Scope: Thermochimica Acta accepts for publication original research contributions in thermal analysis, thermochemistry, and chemical thermodynamics. Specific areas of research include: (a) Static calorimetry of all types; (b) Dynamic calorimetry of all types, including differential scanning calorimetry (DSC), specific heat calorimetry, and others; (c) Low and high temperature thermodynamic studies of all types; and (d) Thermal analysis techniques of all types, such as thermogravimetry (TG), differential thermogravimetry (DTG), differential thermal analysis (DTA), evolved gas detection (or analysis), all types of pyrolysis procedures, high temperature X-ray, nuclear magnetic resonance, infrared and reflectance spectroscopy, electrical conductivity, magnetic and other measurements.
The range of substances studied is necessarily wide and includes metastable species, inorganic and organic compounds, polymers, biologically active materials, metals and alloys, geological materials, and many others. All areas of chemistry are involved as well as biochemistry, geochemistry, metallurgy, mineralogy, physics, soil science, ceramics, and others.

Subscriptions: Subscription price for Volumes 136–153, published in the period December 1988–December 1989: Dfl.3600.00 plus Dfl.486.00 (p.p.h.) = Dfl.4086.00 (US $1874.31). All back volumes are available at Dfl.200.00 plus Dfl.18.00 (p.p.h.) = Dfl.218.00 (US $100.00) per volume. Our p.p.h. (postage, packing and handling) charge includes surface delivery of all issues, except to subscribers in U.S.A., Canada, Australia, New Zealand, P.R. China, India, Israel, South Africa, Malaysia, Thailand, Singapore, South Korea, Taiwan, Pakistan, Hong Kong, Brazil, Argentina and Mexico, who receive all issues by air delivery (S.A.L.—Surface Air Lifted) at no extra cost. For Japan, air delivery requires 50% additional charge; for all other countries airmail and S.A.L. charges are available upon request.

Claims for missing issues will be honoured, free of charge, within three months after the publication date of the issue.

General information: See inside back cover.

Abstracted / Indexed in: Curr. Contents: Phys., Chem. Earth Sci.; Eng., Technol. Appl. Sci., Chem. Abstr., PASCAL/CNRS.

Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. The transfer will ensure the widest possible dissemination of information.
Submission of an article for publication entails the author(s) irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16 b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the U.S.A. – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee is stated in the code-line at the bottom of the first page of each article. The appropriate fee, together with a copy of the first page of the article, should be forwarded to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code-line appears, broad consent to copy has not been given and permission to copy must be obtained directly from the author(s). All articles published prior to 1980 may be copied for a per-copy fee of US $2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.
No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.
Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Report on the workshop: advances in thermoanalytical instrumentation 110(1987) 31
Murphy, K.P. and Gill, S.J.
Calorimetric measurement of the enthalpy of dissolution of diketopiperazine in water as a function of temperature 139(1989)279
Murray, J.P. and Hill, J.O.
DSC determination of the sublimation enthalpy of tris(2,4-pentanedionato)cobalt(III) and bis(2,4-pentanedionato)nickel(II) and -copper(II) 109(1986)383
Murray, J.P. and Hill, J.O.
DSC determination of the sublimation enthalpy of bis(2,4-pentanedionato)oxovanadium(IV) and tetrakis(2,4-pentanedionato)zirconium(IV) 109(1986)391
Murti, P.S., see Krishnaiah, M.V. 140(1989)103
Mushran, V., see Pandey, J.D. 117(1987)245
Musil, V., see Žarjal, B. 134(1989)139

N

Nabavian, M., see Gambino, M. 111(1987)37
Nabiullah, M., Gupta, R.N., Singh, B. and Gandopadhyay, P.K.
A study on thermal behaviour of some commercial explosives 134(1989)419
Nabot, J.P., see Ansara, I. 129(1988)89
Nadeau, D., see Khorami, J. 108(1986)279
Nadeau, D., see Khorami, J. 120(1987)1
Nadiv, S., see Bar-On, P. 133(1989)119
Nadiv, S., see Lin, I.J. 148(1989)301
Nagarajan, K., see Saha, R. 120(1987)29
Nagarajan, K., see Saha, R. 131(1988)183
Nagasawa, J., see Uedaira, H. 123(1988)183
Nagasawa, K. and Ohkochi, N.
X-ray studies on dehydration and rehydration of expansible clay minerals 135(1989)285
Nagata, I.
Liquid–liquid equilibria of (acetonitrile + methyl ethanoate + cyclohexane) and of (acetonitrile + cyclohexane + methyl ethanoate + benzene) 101(1986)205
Nagata, I.
Thermodynamics of alcohol solutions. Phase equilibria and excess molar enthalpies of mixtures containing two alcohols 107(1986) 199
Nagata, I.
Thermodynamics of associated solutions. Excess thermodynamic properties of liquid mixtures of some organic compounds with amines 108(1986)305
Nagata, I.
Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by 1-butanol, acetonitrile and benzene 112(1987) 187
Nagata, I.
Liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems 114(1987)227
Nagata, I.
Liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon

and acetonitrile–1-propanol–saturated hydrocarbon mixtures 119(1987)357
Nagata, I.
Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, isobutanol and benzene 126 (1988)107
Nagata, I.
Liquid–liquid equilibria for the acetonitrile–2-propanol–saturated hydrocarbon and acetonitrile–isobutanol–saturated hydrocarbon systems 127(1988)109
Nagata, I.
Liquid–liquid equilibria for ternary mixtures containing two alcohols and one saturated hydrocarbon 127(1988)337
Nagata, I.
Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, 2-butanol and benzene 140 (1989)355
Nagata, I.
Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions containing propanoic acid or butanoic acid with association in both phases 142(1989)351
Nagata, I.
Isothermal vapour–liquid equilibria for binary mixtures of methylcyclohexane with alcohols 144(1989)95
Nagata, I., Miyamoto, K., Alessi, P. and Kikic, I.
Prediction of thermodynamic equilibrium properties from mutual solubility data 120 (1987)63
Nagata, I., Tamura, K. and Gotoh, K.
Thermodynamics of alcohol solutions. Excess molar enthalpies of ternary mixtures containing two alcohols and one active nonassociating component 104(1986)179
Nagata, I. and Gotoh, K.
Thermodynamics of alcohol solutions. Excess molar enthalpies of binary and ternary mixtures containing two alcohols 102(1986) 207
Nagata, I. and Miyazaki, K.
Correlation of the spectroscopic and thermodynamic properties of solutions of ethanol with non-associating components by means of the UNIQUAC associated-solution model 118(1987)237
Nagata, I. and Nakamura, S.
Prediction of vapour–liquid equilibrium from ternary liquid–liquid equilibrium data by means of local composition equations 115 (1987)359
Nagata, I. and Ohtsubo, K.
Thermodynamics of alcohol solutions: phase equilibria of binary and ternary mixtures containing two alcohols 102(1986)185
Nagata, I. and Satoh, T.
Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions of acetic acid and non-polar components with association in both phases 132(1988)53
Nagata, I. and Satoh, T.
Thermodynamics of associated solutions. Vapour–liquid equilibrium for the systems acetic acid–water and acetic acid–2-butanone with association in both phases 138(1989)207
Nagata, I. and Tamura, K.
Thermodynamics of amine solutions 101 (1986)305
Nagata, I. and Tamura, K.
Thermodynamics of solutions of butanols in hydrocarbons 121(1987)447
Nagata, I. and Tamura, K.
Thermodynamics of solutions containing acetonitrile and 1-butanol 124(1988)53
Nagata, I. and Tamura, K.
Thermodynamics of solutions of acetonitrile with 2-methyl-1-propanol 140(1989)109
Nagata, I. and Usui, Y.
Correlation of ternary liquid–liquid equilibrium data and prediction of quaternary liquid–liquid equilibrium data by means of the uniquac model 140(1989)121
Nagata, I. and Yamamoto, T.
Thermodynamics of associated solutions: vapour–liquid equilibrium for the acetic acid–propanoic acid and propanoic acid–water systems with association in both phases 143(1989)253
Nagumo, T., Matsuo, T. and Suga, H.
Thermodynamic study on camphor crystals 139(1989)121
Nagy, J.B., see Crea, F. 135(1989)353
Nagy, J.B., see Nastro, A. 135(1989)403
Naidu, R.S., Rao, E.N., Ruby, R. and Mallikarjun, K.G.
Kinetic parameters of the non-isothermal decomposition of Cu(II) chelates of *o*-hydroxychalcones 131(1988)299
Naidu, R.S., Ruby, R., Rao, E.N. and Mallikarjun, K.G.
Kinetic parameters of thermal decomposition of bis(2-OH-1-naphthaldoxime) chelates using freeman–carroll equation 140(1989)97
Nair, C.G.R., Mathew, S. and Ninan, K.N.
Thermal decomposition kinetics. Part XVI. Kinetics and mechanism of thermal decomposition of diaquobis(ethylenediamine)copper(II) oxalate 150(1989)63
Nair, C.G.R., see Mathew, S. 144(1989)33
Nair, G.M., see Shukla, J.P. 149(1989)287
Nair, S.M.K., Malayil, K.K. and Daisamma Jacob, P.
Evaluation of kinetic parameters for the thermal decomposition of γ-irradiated sodium bromate by dynamic thermogravimetry 141(1989)61
Nair, S.M.K. and Koshy Kunju Malayil,
The thermal decomposition of γ-irradiated lead nitrate by dynamic thermogravimetry 127(1988)275
Nair, S.M.K. and Malayil, K.K.
The effect of γ-irradiation on the thermal decomposition of lead nitrate 129(1988)237

Naito, K., see Matsui, T. 139(1989)299
Najib, F.M., see Ahmed, I.K. 108(1986)105
Nakamura, K., see Hatakeyama, T. 123(1988)153
Nakamura, K., see Nakamura, S. 136(1988)163
Nakamura, S., see Nagata, I. 115(1987)359
Nakamura, S., Todoki, M., Nakamura, K. and Kanetsuna, H.
Thermal analysis of polymer samples by a round robin method. I. Reproducibility of melting, crystallization and glass transition temperatures 136(1988)163
Nakanishi, M., see Fujieda, S. 111(1987)167
Nakata, Y., see Takizawa, T. 123(1988)247
Namboodiri, P.N., Phadnis, A.B. and Deshpande, V.V.
Thermal behaviour of mixed tungstates $ASc(WO_4)_2$ (A = Li, Na, K, Rb AND Cs) 144(1989)151
Namboodiri, P.N. and Deshpande, V.V.
Thermal stability and phase transition studies of diammonium zinc and cadmium halides 144(1989)183
Nanjyo, A., see Shinozaki, K. 136(1988)297
Nardou, F., see Raynaud, P. 103(1989)27

SUBJECT INDEX

VOLUMES 101–150

A

Absorption

Enthalpies of absorption of carbon dioxide in aqueous methyldiethanolamine solutions 121 (1987)437

X-ray *K*-absorption as a probe for investigating thermal behaviour of complexes: related thermal and X-ray *K*-absorption studies on copper(II) salicylhydroxamate 132(1988)25

Enthalpies of absorption of carbon dioxide in aqueous diethanolamine solutions 146(1989)107

Accelerating rate calorimetry

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part I. Derivation of the activation energy for decomposition 107(1986)1

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part II. Products and mechanism of the reaction 107 (1986)17

Kinetic studies of the thermal decomposition of nitroguanidine using accelerating rate calorimetry 127(1988)89

Accuracy

Influence of thermal noise on the accuracy of mass determination according to the Straubel method 103(1987)33

The influence of the dynamic parameters of the calorimetric system on the accuracy of the determination of the thermokinetics 149(1989) 373

Acetamide

Thermal properties of acetamide in the temperature range from 298 k to 400 k 104 (1986)127

Enthalpies of transfer of alkali metal halides from water to water–acetamide mixtures 111 (1987)175

Enthalpies of solvation of alkali and halide ions in water–acetamide mixtures in the range 298.15–348.15 K 137(1988)233

Cryoscopy, viscosity, and electrical conductivity measurements of the strontium nitrate–acetamide molten system 143(1989)205

Phase changes in acetamide–salt systems: melting points and latent heat of fusion of pure acetamide and acetamide–ammonium chloride 146(1989) 353

Acetates

Synthesis of the hydrates of chlorinated acetates of rare earths and their thermal behaviour 123 (1988)23

Acetazolamide

Thermal studies on sulphonamide derivative complexes. Part 1. Thermal behaviour of acetazolamide–copper complexes 147(1989)321

Acetic acid

Standard thermodynamics of transfer. IV. The silver and silver salt electrodes in acetic acid + water mixtures at 25 °C 115(1987)111

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions of acetic acid and non-polar components with association in both phases 132(1988)53

Acid-base properties of zeolites by acetic acid temperature programmed desorption 137(1988)51

Thermodynamics of associated solutions. Vapour–liquid equilibrium for the systems acetic acid–water and acetic acid–2-butanone with association in both phases 138(1989)207

Thermodynamics of associated solutions: vapour–liquid equilibrium for the acetic acid–propanoic acid and propanoic acid–water systems with association in both phases 143 (1989)253

Acetone

Thermodynamic functions of the transfer of aminobenzoic acids from water to water–acetone mixtures at 25 °C 136(1988)23

Thermochemical investigations of associated solutions. 9. Prediction of excess enthalpies of ternary acetone + cyclohexane + chloroform mixtures from measured binary data 145(1989) 245

Acetonitrile

Liquid–liquid equilibria of (acetonitrile + methyl ethanoate + cyclohexane) and of (acetonitrile + cyclohexane + methyl ethanoate + benzene) 101 (1986)205

Isothermal vapor–liquid equilibria for binary and ternary mixtures formed by 1-butanol, acetonitrile and benzene 112(1987)187

Liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems 114(1987)227

Viscosity and densities of binary mixtures of acetonitrile with substituted anilines. Part 4 117 (1987)115

Binary liquid mixtures of acetonitrile with methyl, ethyl, n-propyl and n-butyl benzoates. Variation of viscosities with temperature and composition 117(1987)219

Liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol–saturated hydrocarbon mixtures 119(1987)357

Thermodynamics of solutions containing acetonitrile and 1-butanol 124(1988)53

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, isobutanol and benzene 126(1988)107

Liquid–liquid equilibria for the acetonitrile– 2-propanol–saturated hydrocarbon and acetonitrile–isobutanol–saturated hydrocarbon systems 127(1988)109

Calorimetric study of hydrogen-bond formation in acetonitrile for some hydrogen-bis-phenolates and hydrogen-trimethyl-N-oxidephenolates at 298.15 K 137(1988)87

Excess Gibbs energy of mixing and refractive index of binary solutions of acetonitrile and of dimethylsulfoxide with several aromatic hydrocarbons 138(1989)19

A calorimetric study of the protonation process of some indole derivatives in acetonitrile. Correlations with electro-oxidation and ionization potentials 138(1989)27

Thermodynamics of solutions of acetonitrile with 2-methyl-1-propanol 140(1989)109

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, 2-butanol and benzene 140(1989)355

Thermodynamics of silver–silver ion electrode in acetonitrile–water mixtures 144(1989)267

Calorimetric study of the solvation of some ions in acetonitrile–dimethylsulfoxide mixtures 145 (1989)219

_N_-Acetyl-leucinamide

Calorimetric determination of chiral interactions in aqueous solutions, Part 2. _N_-acetyl-leucinamide at 298.15 K 122(1987)105

Acetylated sugars

Spectroscopic and thermal characterization of some 5-acetyl-4-β-D-glycopyranosylaminopyrimidine derivatives and their acetylated sugar homologues 105(1986)161

Acetylenedicarboxylic acid compounds

Thermal studies on acetylenedicarboxylic acid compounds of iron(II), cobalt(II), nickel(II), copper(II) and zinc(II) 117(1987)51

_N_-Acetylglycine

Calorimetric determination of the heats of formation of competitive ternary mixed-ligand complex compounds. Copper(II)–_N_-acetylglycine–α-amino acid system 123(1988)201

Acetylpyridines

Thermogravimetric studies on the addition compounds of cobalt and nickel dithiophosphinates with picolines and acetylpyridines 128(1988)301

2-Acetylpyridine semicarbazone

Thermodynamic stabilities of metal complexes of the biologically active complexing agent, 2-acetylpyridine semicarbazone (2-APS) 126(1988)7

2-Acetylpyridinethiosemicarbazone

Thermodynamic stabilities of lanthanide complexes of the biologically active complexing agent, 2-acetylpyridinethiosemicarbazone (2-APT) 117(1987)291

Acid–base concept

Acid–base concept in oxide glasses 110(1987)443

Acid-base properties

Acid-base properties of zeolites by acetic acid temperature programmed desorption 137(1988)51

Acid crystallohydrate

Kinetic aspects of the thermal treatment of acid crystallohydrate, $MgHPO_4 \cdot 3H_2O$. Part 1. Changes in the IR spectra and proton delocalization 116(1987)131

Kinetic aspects of the thermal treatment of acid crystallohydrate, $MgHPO_4 \cdot 3H_2O$. Part 2. Dehydration and accompanying effects 116 (1987)137

Acidity

Acidity of dealuminated Y-type zeolites determined by adsorption microcalorimetry 115 (1987)91

Calorimetric investigation of the effect of dealumination on the acidity of zeolites 122 (1987)63

Characterization of acidity types and strength on H–NaY zeolites by TA 123(1988)113

Surface acidity determination of several gamma-aluminas using a thermometric method. Comparison with other methods 127(1988)355

Study of the surface acidity before and after heat or steam treatment for P or Mg modified ZSM-5 zeolites 135(1988)385

Acidity strength

Differential scanning calorimetry probes acidity strength distribution in catalytic materials 118 (1987)9

Acid proton dissociation

Thermodynamics of acid proton dissociation of some α-amino acids. Effect of the hydroxyl substituent group on aliphatic and aromatic side-chains 111(1987)233

Acid sites

Acid sites strength distribution in heteropoly acids by differential scanning calorimetry 140 (1989)21

Acoustic emission

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reversibility versus irreversibility via acoustic emission 116(1987)195

Acrylic copolymers

Glass-transition in donor and acceptor acrylic copolymers 112(1987)123

Acrylonitrile

Thermal characterization of starch-g-acrylonitrile copolymers 115(1987)189

Actinide chlorides

Thermochemical and structural studies of complex actinide chlorides $Cs_2NaAnCl_6$ (An = U–Cf); ionization potentials and hydration enthalpies of An^{3+} ions 139(1989)49

Actinides

Thermal properties of the hydroxides and oxides of lanthanides and actinides (Review) 148(1989) 249

Actinide tetrafluorides

Thermal decomposition of lanthanide and actinide tetrafluorides 133(1988)241

Activated carbon

Two-stage kinetic model for the non-isothermal decomposition of phenol adsorbed on activated carbon 104(1986)61

The use of TGA to estimate the loading of organics on activated carbon 113(1987)341

Activated carbons from materials of varying morphological structure 129(1988)173

Kinetics of the thermal regeneration of spent activated carbon in a fluidized bed 136(1988)179

Catalytic gasification of activated carbon by CO_2 137(1988)383

Activation

The role of ammonium ions in the activation of nickel molybdate; Precursors 133(1988)163

Solar energy storage by natural zeolites. V. Optimization of the thermal activation process of chabazite tuff 135(1988)379

Activation energy

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part I. Derivation of the activation energy for decomposition 107(1986)1

On the change of the activation energy with conversion degree and heating rate for the non-isothermal dehydration of $CaC_2O_4 \cdot H_2O$ 107 (1986)339

On the activation energy for the hydrolysis of bis-(2-chloroethylethyl) sulfide. II 114(1987)313

Analysis of irreversible complex chemical reactions and some observations on their overall activation energy 128(1988)185

Activation energy studies on complexes of uranyl fluoride with amidic ligands 128(1988)237

Activation energies of thermal decomposition processes of $MgBr_2 \cdot 6H_2O$ 148(1989)197

Activation energy spectrum

Computation of activation energy spectrum — a new approach 101(1986)365

Activation parameters

Solvolysis rates and activation parameters of phenylchloroformate in water–tetrahydrofuran and water–dioxane mixed solvents 141(1989)1

Active carbon

Thermoanalysis of zinc acetate-active carbon catalysts 148(1989)395

Active charcoal

Thermogravimetric study of alcohol adsorption on active charcoal 103(1987)113

Activity coefficient

Determination of equations representing the thermodynamic magnitude of the vaporisation of

true paraffins for any temperature. Application to the calculation of the activity coefficient (in French) 104(1986)121

Adamantane-1-carboxylate

Microcalorimetric titration of β-cyclodextrine with adamantane-1-carboxylate 109(1986)139

Adamantane derivatives

Thermal behaviour of some adamantane derivatives 111(1987)21

Addition compounds

Thermogravimetric studies on the addition compounds of cobalt and nickel dithiophosphinates with picolines and acetylpyridines 128(1988)301

Additives

Thermolysis of potassium tetraperoxochromate(V) IV. Effect of additives on ordinary and self-propagating decomposition 102(1986)293

Influence of additives and water vapour on the transformation of transition aluminas into alpha alumina 122(1987)71

The effect of additives on the reduction of chromite by graphite: an isothermal kinetic study 127(1988)25

Influence of additives on the solid phase thermal decomposition of barium bromate 132(1988)7

Role of additives in the thermal decomposition of ammonium perchlorate and evidence supporting the identification of nitryl perchlorate as the essential reaction intermediate 132(1988) 205

Thermal and colloidal stability behaviour of overbased petroleum sulphonate additives 132 (1988)253

Effect of poly(ethylene glycol) 4000 and poly(ethylene glycol) 4000 distearate additives on the thermal decomposition of tapioca starch 146 (1989)201

Adducts

Thermal and structural studies on the adducts of bis(β-diketonate) oxovanadium(IV) complexes with organic bases 140(1989)179

Adenosine

Kinetic study of the thermal decomposition of adenosine 144(1989)177

Adhesives

Thermal analysis of epoxide film adhesives 134 (1988)187

Adiabatic calorimetry

Correction methods for heat leaks in adiabatic calorimetry 125(1988)307

Adiabatic methods

Adiabatic methods for the investigation of exothermic reactions 119(1987)1

Adipic acid

Studies in solid state reactions between basic copper carbonate with cinnamic, succinic and adipic acids 124(1988)197

Admixtures

The effect of admixtures on the reduction of cassiterite by graphite 124(1988)109

Adsorbents

Thermal analysis of adsorbents in heat transfer systems 121(1987)165

Adsorption

The influence of water content on the adsorption of lubricating oil base stocks onto ferric oxide, studied by flow-microcalorimetry 101(1986)155

Thermodynamic and kinetic study on the adsorption of chlorine on alumina 102(1986)349

Quasi-equilibrium nitrogen adsorption gravimetry: comparison with volumetry for the determination of surface areas and pore size distributions 103(1987)89

Thermogravimetric study of alcohol adsorption on active charcoal 103(1987)113

Preliminary experiments on phase transition of adsorbed gases on porous glass 103(1987)123

Adsorption of nitrogen and water vapour onto goethite surfaces 114(1987)139

Acidity of dealuminated Y-type zeolites determined by adsorption microcalorimetry 115 (1987)91

Detection of adsorbed or condensed water films with the aid of thermal oscillations 119(1987)37

A water calorimetric determination of absorbed dose to water 119(1987)81

Calorimetric investigation of adsorption of an aqueous metachromic dye (crystal-violet) on montmorillonite 121(1987)373

Contribution of microcalorimetry to the study of adsorption mechanisms of ionic and non-ionic molecules at the solid-water interface 122(1987) 197

Investigations of water film properties on barite surface containing preadsorbed tetradecylammonium hydrochloride (TDACl) 122(1987)363

Temperature programmed desorption study of hydrogen adsorption on $LaMO_3$ oxides 126 (1988)205

The heats of adsorption of zinc di *n*-alkyl dithio phosphates onto pure iron, cast iron and ferric oxide surfaces 130(1988)141

Probing the electronic interaction between metal and support on Pd/TiO_2 catalyst with adsorption of hydrogen 133(1988)175

Adsorption calorimetry in surface chemistry (Invited Lecture) 135(1988)19

Thermal analysis study of the adsorption of D_2O by sepiolite and palygorskite 135(1988)291

Thermal analysis of the adsorption of rhodamine 6G by smectite minerals 135(1988)299

CO adsorbed on Ni(001): effects of the interplay of "on-top" and "bridge" adsorption complexes on heat capacity 140(1989)237

Thermal analysis of compounds adsorbed on low-surface-area solids. Part 1. Measurement and characterization by TGA 140(1989)245

Thermal analysis of compounds adsorbed on low-surface-area solids Part 2. Calorimetric investigations of fatty acids on calcite 140(1989) 253

Effect of chemical adsorption of calcium oxalate monohydrate on DTA baseline 141(1989)151

Differential molar heats of adsorption of ammonia on silicious mordenites at high temperature 143(1989)299

Quasi-equilibrium adsorption microcalorimetry (of Kr, Ar and N_2) to characterize real microcrystalline surfaces: Application to ZnO 148(1989)191

Thermal analytic study of the adsorption of crystal violet by montmorillonite 148(1989)457

Affinity

Affinity of plant auxins IAA, IBA, IPA and NAA to metals 115(1987)375

Ageing

Thermoanalytical study of an aged XLPE-pipe 114(1987)115

The use of TGA to study thermal ageing effects of oriented polypropylene 134(1988)255

Ageing due to gamma radiation of three linear low-density polyethylenes. Solubility and calorimetric results 137(1988)137

Aggregation states

Phase transition phenomena induced by the successive appearances of new types of aggregation states of water molecules in the "L-dipalmitoylphosphatidylcholine–water" system 109(1986)81

Air

Effect of the layer of air between the calorimeter and cylindrical samples in DC experiments 130 (1988)355

Akaganeite

Thermal behaviour in air of iron oxyhydroxides obtained from the method of homogeneous precipitation. Part II. Akaganeite sample 129 (1988)325

Alanine

Critical comparison of thermal properties of some divalent metal ion complexes with alanine, leucine and valine 113(1987)243

The thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics 114 (1987)245

Alcohols

Thermodynamics of alcohol solutions: phase equilibria of binary and ternary mixtures containing two alcohols 102(1986)185

Thermodynamics of alcohol solutions. Excess molar enthalpies of binary and ternary mixtures containing two alcohols 102(1986)207

Thermogravimetric study of alcohol adsorption on active charcoal 103(1987)113

Thermodynamics of alcohol solutions. Excess molar enthalpies of ternary mixtures containing two alcohols and one active nonassociating component 104(1986)179

Thermodynamics of alcohol solutions. Phase equilibria and excess molar enthalpies of mixtures containing two alcohols 107(1986)199

Excess enthalpies of binary solvent mixtures of 2-butanone with aliphatic alcohols 114(1987)239

Dissolution enthalpy of NaI in mixtures of ethylene glycol + aliphatic alcohols at 313.15 K 115(1987)119

Description of binary systems containing hydrocarbons and alcohols by a modified NRTL equation 116(1987)267

Standard thermodynamics of transfer. III. Silver and silver salt electrodes in water + mono- and + dihydric alcohol mixtures 121(1987)353

Studies on thermodynamic properties of binary systems containing alcohols. VII. Temperature dependence of excess enthalpies for *n*-propanol + benzene and *n*-butanol + benzene 123(1988) 285

Liquid–liquid equilibria for ternary mixtures containing two alcohols and one saturated hydrocarbon 127(1988)337

Isothermal vapour–liquid equilibria for binary mixtures of methylcyclohexane with alcohols 144(1989)95

Alcohol solutions

Thermodynamics of alcohol solutions: phase equilibria of binary and ternary mixtures containing two alcohols 102(1986)185

Thermodynamics of alcohol solutions. Excess molar enthalpies of binary and ternary mixtures containing two alcohols 102(1986)207

Thermodynamics of alcohol solutions. Excess molar enthalpies of ternary mixtures containing two alcohols and one active nonassociating component 104(1986)179

Thermodynamics of alcohol solutions. Phase equilibria and excess molar enthalpies of mixtures containing two alcohols 107(1986)199

Aliphatic amines

Mass spectral studies on the thermal desorption of aliphatic amines from the surface of Y-type zeolites 128(1988)115

Aliphatic diols

Solute-solute-solvent interactions in dilute ternary aqueous solutions of urea and α,ω-aliphatic diols. Excess enthalpies and Gibbs energies 137(1988)165

Alizarine red S complexes

Alizarine red S complexes of Mn(II), Co(II) and Ni(II) 113(1987)209

Alkali-metal ions

Standard enthalpies of transfer of alkali-metal and halide ions from water to water–urea mixtures 120(1987)97

Alkali carbonates

Catalytic effect of alkali carbonates on the calcination of calcium carbonate 115(1987)57

Alkali chalcogenides

Relations between the heats of formation of the alkali chalcogenides and the electronegativities of the chalcogen ions (O, S, Se and Te) 130 (1988)115

Alkali halides

Relation between heats of formation of alkali and pseudo-alkali halides and electronegativities of halogen ions 108(1986)189

The effect of alkali halides on the thermal hydrolysis of magnesium chloride and magnesium bromide 109(1986)207

Alkali metal chlorides

E.M.F. measurements on solid electrolytes—a tool for investigating systems with alkali metal chlorides 110(1987)297

Alkali metal complexes

Studies on hexacyanoferrate(II) complexes. Formation constants for alkali metal, ammonium and calcium(II) complexes at different temperatures and ionic strengths in aqueous solution 102(1986)1

Alkali metal fluorides

Enthalpies of formation of ZrF_4–MF (M = Li, Na, K, Rb) liquid mixtures (in French) 149 (1989)15

Alkali metal halides

Enthalpies of transfer of alkali metal halides from water to water–acetamide mixtures 111 (1987)175

Physicochemical properties of concentrated solutions of some alkali metal halides in aqueous thiourea solutions 136(1988)119

Alkali metal persulphates

Solid state preparative and descriptive thermoanalysis of SnO_2–$X_2S_2O_8$ and PbO_2–$X_2S_2O_8$ (X = Na, K) binary systems 107 (1986)305

Simultaneous thermoanalytical examinations of Si–$X_2S_2O_8$ (X = Na, K) binary systems 108 (1986)157

Thermoanalytical study of solid state Al_4C_3–$X_2S_2O_8$ and B_4C–$X_2S_2O_8$ (X = Na, K) binary systems 127(1988)181

Alkali metal phosphides

Chemistry and structural chemistry of phosphides and polyphosphides. 45. The thermal decomposition and thermodynamic properties of the alkali metal phosphides LiP_{15}(s), NaP_{15}(s), KP_{15}(s), RbP_{15}(s) and CsP_{15}(s) 117(1987)261

Alkali metals

Thermal behaviour in steam of a bituminous coal doped with alkali and alkaline earth metals 113(1987)277

Thermal behaviour in air of a bituminous coal with high mineral matter content doped with compounds of alkali and alkaline earth metals 116(1987)101

Studies on double selenates. VI. Thermal decomposition of gadolinium, terbium, dysprosium and alkali metal double selenates 136(1988)319

Studies on double selenates. VII. Thermal decomposition of holmium, erbium, thulium and alkali metal double selenates 136(1988)327

Studies on double selenates. VIII. Thermal decomposition of ytterbium, lutetium, yttrium and alkali metal double selenates 136(1988)335

Thermal behaviour of mixed tungstates $ASc(WO_4)_2$ (A = Li, Na, K, Rb AND Cs) 144 (1989)151

Alkali metal succinates

Comparative study of thermal analysis of alkali metal succinates 132(1988)229

Alkali metal sulphate melts

Thermogravimetric investigation of reactions between vanadium(V) compounds and pyrosulphate in alkali metal sulphate melts 121 (1987)121

Alkaline earth compounds

Thermodynamic properties of compounds of alkaline earth elements with other fission products 120(1987)29

Alkaline earth metals

Thermal behaviour in steam of a bituminous coal doped with alkali and alkaline earth metals 113(1987)277

Thermal behaviour in air of a bituminous coal with high mineral matter content doped with compounds of alkali and alkaline earth metals 116(1987)101

Alkaline earth monouranates

Thermodynamic functions of alkaline earth monouranates from calorimetric measurements 131(1988)183

Alkali nitrites

Thermodynamic properties of alkali and thallium nitrites: the ionic plastically crystalline state 132 (1988)133

Alkalis

Thermochemistry of alkali interactions with refractory adsorbents 131(1988)141

Alkanaminium chlorides

Thermal properties of amine hydrochlorides. Part II. Thermolysis and thermochemistry of alkanaminium chlorides 105(1986)257

Alkanaminium hexachloroplumbates

Thermal reactions of lead(IV) chloride complexes in the solid state. Part VI. Thermal properties, thermochemistry and kinetics of the thermal decomposition of alkanaminium hexachloroplumbates 108(1986)239

Alkanaminium hexachlorostannates

Thermal properties of H_2SnCl_6 complexes. Part II. Thermal features of alkanaminium hexachlorostannates 141(1989)93

Alkanes

Measurement of the vapour pressure of the hydrocarbons C_{10} to C_{18} *n*-alkanes and *n*-alkylbenzenes in the range 3–1000 Pascal (in French) 105(1986)79

Excess molar volumes and heat capacities of (1,2,4-trichlorobenzene + an *n*-alkane) and (1-chloronaphthalene + an *n*-alkane) 105(1986)101

Excess thermodynamic properties of binary mixtures of n-alkanes with cycloalkanones 112 (1987)351

Molar excess volumes of binary mixtures of ethylbenzene with *n*-alkanes at 298.15 K; an interpretation in terms of the Prigogine–Flory–Patterson model 114(1987)337

Excess molar volumes of tributyl phosphate(TBP) + *n*-alkanol, *n*-alkanol + *n*-alkane measured with a modified continuous-dilution dilatometer 123(1988)169

Excess volumes of trimethylphosphite and tributylphosphate with branched and linear alkanes 124(1988)129

Volumes of mixing and viscosities of methyl acetate + *n*-alkanes and *n*-butyl acetate + *n*-alkanes at 298.15 K: an interpretation in terms of the Van–Patterson, the absolute rate and free volume theories 129(1988)249

Isobaric expansivities of the binary mixtures $C_3H_7(OH) + C_nH_{2n+2}$ ($n = 11, 12$) between 288.15 and 318.15 K 131(1988)57

Excess molar enthalpies of some n-alkylamine + n-alkane binary mixtures 143(1989)333

Measurements of VLE, h^E and v^E for binary mixtures of n-alkanes with n-alkylbenzenes 180 (1986)9

Alkanols

Topological studies of the molecular species that characterize lower alkanol + methylene bromide mixtures: molar excess volumes and molar excess enthalpies 106(1986)293

Excess isobaric heat capacities for water + alkanol mixtures at 298.15 K 109(1986)145

Excess molar volumes of tributyl phosphate(TBP) + *n*-alkanol, *n*-alkanol + *n*-alkane measured with a modified continuous-dilution dilatometer 123(1988)169

Alkanones

Thermodynamics of binary mixtures of alkanone–chloroalkane. I. Heat of mixing of n-alkanone–1-chlorohexadecane mixtures at 298.15 K 128(1988)209

Alkoxybenzyliden-*p'*-Hexyloxy-anilines

Calorimetry of homologous *p-n*-alkoxybenzyliden-*p'*-hexyloxy-anilines 105 (1986)197

Alkoxyethanol

Excess properties of mixtures of some *n*-alkoxyethanols with organic solvents. III. V^E and C_p^E with butan-1-ol at 298.15 K 131(1988)73

Alkoxyethanols

Excess properties of mixtures of some n-alkoxyethanols with organic solvents. IV. H^E, V^E and C_p^E with 2-methoxyethanol at 298.15 K 137(1988)241—246

Alkoxyphenols

Solution thermodynamics for *o*-alkoxyphenols in water and in water–alcohol systems 116(1987)329

Alkyds

Kinetics of the curing process of alkyd–melamine resin systems 149(1989)341

***p*-Alkyl-*p'*-cyano-cyclohexyl-cyclohexanes**

Scanning dilatometry and calorimetry of *p*-alkyl-*p'*-cyano-cyclohexyl-cyclohexanes 140(1989)31

Alkylamines

Excess molar enthalpies of some n-alkylamine + n-alkane binary mixtures 143(1989)333

Excess molar enthalpies of some *n*-alkylamine + cyclohexane or + benzene binary mixtures 150 (1989)87

Alkylammonium hexachlorostannates

Thermochemical properties of H_2SnCl_6 complexes. Part I. thermal behaviour of primary *n*-alkylammonium hexachlorostannates 101 (1986)271

Alkylammonium tetrafluoroborates

On the thermal properties of some di- and tri-alkylammonium tetrafluoroborates 137(1988)39

***N*-Alkylaniline**

Viscosities and densities of binary liquid mixtures of 2-butoxyethanol with aniline and *N*-alkylaniline 149(1989)275

Alkylbenzenes

Measurement of the vapour pressure of the hydrocarbons C_{10} to C_{18} *n*-alkanes and *n*-alkylbenzenes in the range 3–1000 Pascal (in French) 105(1986)79

Measurements of VLE, h^E and v^E for binary mixtures of n-alkanes with n-alkylbenzenes 180 (1986)9

***N*-Alkylcyclohexyl dithiocarbamates**

Thermal studies on tin(IV) complexes of *N*-alkylcyclohexyl dithiocarbamates 106(1986)233

Alkyl methacrylate

Thermal characterization of methyl methacrylate–alkyl methacrylate copolymers 142(1989)189

Alkylureas

Enthalpies of fusion and solid-to-solid transition, entropies of fusion for urea and twelve alkylureas 122(1987)143

Alkylxanthine derivatives

Thermal studies on purine complexes. XIII. Bromo complexes of some alkylxanthine derivatives 115(1987)45

Allophanes

The structure and thermal reactions of natural iron-containing allophanes studied by 57-Fe Mössbauer spectroscopy 130(1988)259

Allotropes

Study of the equilibrium diagram of the potassium metaphosphate-erbium phosphate system and the allotropic forms of the condensed phosphates $KEr(PO_3)_4$ (in French) 136(1988)139

Alloys

Studies of the crystallization processes of amorphous Zr-Co based alloys by DSC 114 (1987)35

Kinetics of martensitic transformation in CuAlNi-43# alloy 123(1988)9

Contribution to the study of the mercury–indium binary system as a function of pressure. Determination of the isobaric expansion coefficient of Hg + In alloys between 1 and 300 bar (in French) 126(1988)117

Experimental thermochemistry of alloys 129 (1988)11

Vapour composition and activities in Mg–Zn liquid alloy at 923 K 130(1988)193

Calorimetric determination of the enthalpies of formation of liquid Ni–Ti alloys 131(1988)171

DSC analysis of lithium-rich Li-B alloys 133 (1988)305

Calorimetric studies of liquid Li–Zn alloys 142 (1989)117

Thermal analysis and DSC: the hysteresis cycle in shape memory alloys 145(1989)101

Molecular alloys in the series of *para* disubstituted benzene derivatives. Part III. The *para*-bromochlorobenzene–*para*-dibromobenzene system 147(1989)273

Almora magnesite

Isothermal decomposition of Almora magnesite 126(1988)403

Alum

Structural and textural characterization of alum-derived active alumina 102(1986)303

γ-Alumina

Surface basicity modification of γ-alumina: study by thermometric titration 138(1989)303

Aluminium

High temperature synthesis and characteristics of Al-substituted iron alkoxide 107(1986)75

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Optical microscopy and simultaneous thermosonimetry of a microplate 113(1987)171

Thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel 114(1987)329

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reversibility versus irreversibility via acoustic emission 116(1987)195

Thermodynamics of the liquid aluminum–gallium–tin system 122(1987)395

The influence of zirconium on decomposition in high strength aluminium alloys 119(1987)211

Kinetics of martensitic transformation in CuAlNi-43# alloy 123(1988)9

The effect of raw material type on the characteristics of Mg-Al double hydroxides synthesized by hydrothermal method 133(1988) 119

Phase investigations of the system Na_3AlF_6 - NaCl 133(1988)283

Heat capacity of aluminum from 80 to 880 K 139(1989)133

Low temperature specific heat and electrical resistivity of $UCu_{4.5}Al_{7.5}$ 139(1989)219

γ precipitates in β-Cu–Zn–Al: influence on martensitic transformations 145(1989)237

Aluminium acetylacetonate

Thermoanalysis of ca and al acetylacetonates: catalytic study of their binary systems with $Ba(ClO_4)_2 \cdot 3H_2O$ 101(1986)185

Aluminium alloys

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reproducibility of the thermal energy results and cycling effects 106(1986)209

Aluminium carbide

Thermoanalytical study of solid state Al_4C_3–$X_2S_2O_8$ and B_4C–$X_2S_2O_8$ (X = Na, K) binary systems 127(1988)181

Heat capacity of $2Al_4C_3 \cdot SiC$ from 447 to 1447 K and enthalpy of peritectic decomposition of Al_4C_3, $2Al_4C_3 \cdot SiC$, and $Al_4C_3 \cdot SiC$ 115(1987) 11

Aluminium chloride

Kinetics studies of the decomposition of benzylidene aniline–$AlCl_3$ complexes 116(1987) 285

Aluminium chloride hexahydrate

Evaluation of thermodynamic data for aluminum chloride hexahydrate and its dehydration 144 (1989)241

Aluminium fluoride

Hydration effects in reactions between aluminum and potassium fluorides 101(1986)169

The influence of potassium sulphate impurity on thermal reactions between aluminum and potassium fluorides 106(1986)163

Non-isothermal crystallization in ZrF_4–BaF_2–GdF_3–AlF_3 fluoride glasses 123 (1988)263

Aluminium hydroxide polymer

Thermal analysis of AlOH polymer/montmorillonite/humic acid complexes 135(1988)307

Aluminium hydroxyacetate

Thermal and spectroscopic characterization of reaction products of aluminium hydroxyacetate–chromium nitrate interaction at different temperatures 144(1989)141

Aluminium nitrate

Thermal and spectroscopic characterization of reaction products of Al-nitrate–Cr-nitrate interaction at various temperatures 141(1989)277

Aluminium oxide

Structural and textural characterization of alum-derived active alumina 102(1986)303

Thermodynamic and kinetic study on the adsorption of chlorine on alumina 102(1986)349

TG and DSC studies of the surface reaction of γ-Al_2O_3 with Cl_2 107(1986)171

TG study on the reaction of γ-alumina with $SiCl_4$ 107(1986)175

Thermal characterization of commercial alumina with different preparation histories by emanation thermal analysis using Ra-226 parent isotope 109(1986)227

Thermal stability of CuO–Al_2O_3 system doped with sodium 118(1987)57

Influence of additives and water vapour on the transformation of transition aluminas into alpha alumina 122(1987)71

Surface acidity determination of several gamma-aluminas using a thermometric method. Comparison with other methods 127(1988)355

Temperature programmed desorption investigation of some nickel/alumina catalysts for carbon monoxide methanation 133(1988)137

Mutual solid–solid interaction between CuO and sodium oxide-doped alumina 141(1989)195

Thermal solid–solid interaction between CuO and pure Al_2O_3 solids 141(1989)205

The effect of grinding on porosity and mechanochemical transformations in Al_2O_3 powders 148(1989)301

The effect of the surface hydroxyls on the chlorination kinetics of alumina 149(1989)205

The crystallization kinetics of $12CaO \cdot 7Al_2O_3$ glass 149(1989)387

Effects of Li_2O doping on solid–solid interactions in the CuO–Al_2O_3 system 150 (1989)111

Aluminium phosphate

Thermal decomposition of precipitates from aqueous aluminium phosphate solution by reaction with alkali 148(1989)295

Aluminium selenide

The vapour pressure over Al_2Se_3 136(1988)313

Aluminium silicate fibers

Induced conversion of aluminium silicate fibers into mullite and cristobalite by elevated temperatures: a comparative study on two commercial products 120(1987)1

Aluminium sulphate

Thermodynamics of the oxidation of elements by aluminium sulphate 106(1986)355

On isomorphism of the structure of basic aluminium sulphates obtained by means of hydrolysis of aluminium sulphate at higher temperatures 133(1988)323

Alums

Structure and function of the nuclei developed during dehydration of the alums $KAl(SO_4)_2 \cdot 12H_2O$ and $KCr(SO_4)_2 \cdot 12H_2O$ 121(1987)97

Alunites

Thermoanalytical and calorimetric investigations on the formation and decomposition of some alunites 121(1987)109

Americium

The enthalpy of solution of ^{243}Am metal and the standard enthalpy of formation of $Am^{3+}(aq)$ 116(1987)235

Amides

Determination of ammonia, amides, and the degree of hydrolysis of partially hydrolyzed polyacrylamide by thermometric titration and direct injection enthalpimetry 111(1987)57

Determination and analysis of the excess molar volumes of some amide–water systems 120 (1987)299

Amidic ligands

Activation energy studies on complexes of uranyl fluoride with amidic ligands 128(1988)237

Amidoxime

Analytical properties of the amidoxime group. X. Potentiometric and thermometric behaviour of 3,5-dimethyl-4-isoxazolylacetamidoxime 103 (1986)259

Amidoxime group

Analytical properties of the amidoxime group. Potentiometric and thermometric behaviour of ethanediamidoxime 142(1989)135

Amine groups

Thermogravimetric study of the thermal stability of poly(methyl methacrylate) containing sterically hindered amine groups 101(1986)27

Amine hardeners

Heat capacities of amine hardeners and epoxy resins (in French) 109(1987)317

Heat capacities of model compounds of polymers synthesised from amine hardeners and epoxy resins (in French) 118(1987)199

Amine hydrochlorides

Thermal properties of amine hydrochlorides. Part II. Thermolysis and thermochemistry of alkanaminium chlorides 105(1986)257

Thermal properties, thermochemistry and kinetics of the thermal dissociation of hydrochlorides of aromatic mono-amines 121 (1987)413

Amines

Thermodynamics of associated solutions. Excess thermodynamic properties of liquid mixtures of some organic compounds with amines 108(1986) 305

Spectroscopic and thermal studies on platinum(II) iodide complexes with primary amines 115(1987)229

Thermodynamic study of organic compounds in octan-1-ol. Enthalpy changes in the transfer or primary, secondary, and tertiary amines from gas and the dilute aqueous state 122(1987)1

Amine solutions

Thermodynamics of amine solutions 101(1986) 305

α-Amino acids

Calorimetric determination of the heats of formation of competitive ternary mixed-ligand complex compounds. Copper(II)–*N*-acetylglycine–α-amino acid system 123(1988)201

Thermodynamic study of some α-amino acids bearing different groups in their side-chains 144 (1989)275

Thermodynamics of the second proton dissociation processes of nine α-amino-acids and the third ionization processes of glutamic acid, aspartic acid and tyrosine 141(1989)297

Thermodynamics of proton transfer processes for some α-amino-acids with different side-chain groups 144(1989)75

Amino acids

Aqueous solutions containing amino acids and peptides. Part 25. The enthalpy of interaction at 298.15 K of glycine with potassium halides 107 (1986)267

Thermodynamics of acid proton dissociation of some α-amino acids. Effect of the hydroxyl substituent group on aliphatic and aromatic side-chains 111(1987)233

The emission thermophotometry (ETP) of some amino acids 114(1987)381

Chemistry of dithiocarbamate derivatives of amino acids. Part IV. Thermal behaviour of nickel(II) complexes 127(1988)101

DTG and DTA studies on amino acids 134 (1988)73

Thermodynamics of the "standard" α-amino acids in water at 25 °C 149(1989)157

4-Aminoantipyrine

Thermochromism in Ni(II) complexes with Schiff base derivatives of 4-aminoantipyrine 131(1988)1

***p*-Aminobenzoic acid**

Thermodynamic and related studies of the oxidation of *p*-aminobenzoic acid, sulphanilic acid and anthranilic acid by periodate 140(1989) 197

Aminobenzoic acids

Thermodynamic functions of the transfer of aminobenzoic acids from water to water–acetone mixtures at 25 °C 136(1988)23

Aminooxyacid esters

Thermal properties and thermochemistry of hydrochlorides of 2-aminooxyacids and their esters 108(1986)265

Aminooxyacid hydrochlorides

Thermal properties and thermochemistry of hydrochlorides of 2-aminooxyacids and their esters 108(1986)265

Aminophenols

Related thermal analyses and spectrophotometric studies on iodine redox products of aminophenols 111(1987)103

Aminopyrazine

The electrical properties of some 2-aminopyrimidine and 2-aminopyrazine Schiff bases 114(1987)257

Electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives 114 (1987)265

Aminopyrimidine

The electrical properties of some 2-aminopyrimidine and 2-aminopyrazine Schiff bases 114(1987)257

Electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives 114 (1987)265

Ammonia

A simple microbalance for investigating the reactions of solids with ammonia and freons at pressures up to 10 bars 103(1987)15

Determination of ammonia, amides, and the degree of hydrolysis of partially hydrolyzed polyacrylamide by thermometric titration and direct injection enthalpimetry 111(1987)57

Study of some solvated copper(II) adipates. I. Complexes with water, ammonia and pyridine (in French) 125(1988)23

Desulfurization of some turkish lignites during carbonization by ammonia 126(1988)299

A microcalorimetric study of NH_3-sorption onto differently modified and pretreated ZSM-5 surfaces 126(1988)325

Desorption of presorbed ammonia, triethylamine and pyridine from the acid sites of mordenites via differential scanning calorimetry 132(1988) 257

The use of DSC to study the selective catalytic reduction of NO with NH_3 133(1988)169

Differential molar heats of adsorption of ammonia on silicious mordenites at high temperature 143(1989)299

Ammonia-borane

The thermal dissociation of NH_3BH_3 113(1987) 379

The thermal light emission of $NH_3 \cdot BH_3$ 113 (1987)383

Ammonium

Characterisation of the ammonium rare earth mixed tripolyphosphates $NH_4LnHP_3O_{10}$ (Ln = Nd, Ho, Er) (in French) 147(1989)241

Ammonium bromide

Enthalpies of crystallization and dissolution of ammonium bromide in water at 298.15 K 113 (1987)151

Ammonium carbamate

Novel thermodynamic and kinetic investigation of ammonium carbamate decomposition into urea and water 102(1986)357

A new model of gas–solid kinetics: the case of ammonium carbamate formation and decomposition 126(1988)129

Ammonium chloride

Thermoanalytical investigations on the decomposition of double salts. Part II. The decomposition of double salts $MeCl \cdot MgCl_2 \cdot 6H_2O$ (Me = NH_4, Rb, Cs) 121(1987)151

Calcium chloride hexahydrate–ammonium chloride binary solutions: a DSC study 138 (1989)39

Phase changes in acetamide–salt systems: melting points and latent heat of fusion of pure acetamide and acetamide–ammonium chloride 146(1989) 353

Ammonium chlorobromides

Electrical and thermal properties of $NH_4Br_xCl_{1-x}$ single crystal 141(1989)159

Ammonium complexes

Studies on hexacyanoferrate(II) complexes. Formation constants for alkali metal, ammonium and calcium(II) complexes at different temperatures and ionic strengths in aqueous solution 102(1986)1

Thermal decomposition of complexes $[Co(NH_3)_6](M^I)_3[Ln(SO_4)_3]_2 \cdot nH_2O$ (M^I = NH_4, Rb; Ln = La, Ce, Pr) 126(1988)289

Ammonium fluorooxovanadates(IV)

Thermal decomposition of ammonium fluorooxovanadates(IV) 131(1988)133

Ammonium ions

The role of ammonium ions in the activation of nickel molybdate; Precursors 133(1988)163

Ammonium magnesium phosphate hydrates

Phase changes on heating ammonium magnesium phosphate hydrates 129(1988)197

Ammonium nitrate

Detection of unidentifiable changes in zeolite-Y via treatment with NH_4NO_3 using differential scanning calorimetry (DSC) 146(1989)263

Application of thermal analysis for the investigation of reaction of ammonium nitrate melt with solid zinc oxide 148(1989)311

Ammonium paratungstate

Thermal decomposition and the creation of reactive solid surfaces. V. The genesis course of the WO_3 catalyst from its ammonium paratungstate precursor 129(1988)187

Non-isothermal kinetic and thermodynamic parameters of ammonium paratungstate decomposition—a thermoanalytic study 138 (1989)309

Ammonium pentafluorotellurate(V)

Calorimetric study of ammonium and pyridinium pentafluorotellurates(V) at low temperatures (in French) 120(1987)47

Ammonium perchlorate

Role of additives in the thermal decomposition of ammonium perchlorate and evidence supporting the identification of nitryl perchlorate as the essential reaction intermediate 132(1988) 205

Ammonium phosphates

A DSC study of low temperature phase transitions in KH_2PO_4 and $NH_4H_2PO_4$ 148 (1989)289

Ammonium salts

Kinetic parameters and mechanisms of decomposition for some ammonium salts 126 (1988)407

Thermal behavior of some long-chain di-*n*-dodecyl quaternary ammonium salts 134(1988)49

Ammonium sulphate

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from $(NH_4)_2SO_4/CdSO_4$ 1 : 2 M mixtures. I. synthesis and characterization 144 (1989)65

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from $(NH_4)_2SO_4/CdSO_4$ 1 : 2 m mixtures. II. Analysis of the langbeinite decomposition 144(1989)225

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from mixtures of $(NH_4)_2SO_4/CdSO_4$ in molar ratio 1 : 2. III. Evolution of the samples 145(1989)51

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained from saturated solutions of $(NH_4)_2SO_4/CdSO_4$ in molar ratio 1 : 1 145(1989)131

Ammonium thiocyanate

The preparation of bismuth(III) sulfide from ammonium thiocyanate and thiourea 126(1988) 199

Ammonium titanyl oxalate

Thermal decomposition and creation of reactive solid surfaces. VI. Thermal genesis course of titania catalyst from a novel ammonium titanyl oxalate precursor 150(1989)153

Ammonium trifluoromanganate(II)

Thermal decomposition of ammonium trifluoromanganate(II) 129(1988)285

Ammonium triphosphate

Thermal transformations of triphosphates $Na(NH_4)_4P_3O_{10} \cdot 4H_2O$ and $(NH_4)_9H(P_3O_{10})_2 \cdot 2H_2O$ 126(1988)355

Ammonium uranyl carbonate

Study of AUC thermal decomposition kinetics in nitrogen by a non-isothermal method 116(1987) 71

Amorphous materials

DSC of amorphous materials 112(1987)137

Kinetics of phase transformations in amorphous materials by DSC. Part I 131(1988)211

Kinetics of phase transformations in amorphous materials by DSC. Part II 131(1988)225

Amorphous ribbons

Relationships between the quenching conditions and the relaxation enthalpy of Fe–Si–B amorphous ribbons 121(1987)223

Structural relaxation, glass transition and crystallization of Cu–Zr amorphous ribbons studied by dilatometry and differential scanning calorimetry 142(1989)29

Amphiphiles

Thermodynamic properties of ionic and non-ionic solutions of amphiphiles. Direct measurement of the relative apparent molar enthalpies and the relative partial molar enthalpies (in French) 116 (1987)1

Analog computation

Instantaneous heat effect estimated with microcomputer-aided heat exchange calorimetry involving analog computation 111(1987)167

Anatase

Reaction of strontium sulfate with anatase and rutile below and above the phase transition temperature of strontium sulfate 119(1987)347

Anation

δH and activation energy of dehydration–anation processes calculated from dynamic TG and DTA 101(1986)77

Solid state kinetic parameters and mechanism for the deaquation–anation of hexacyanocobaltate(III) of aquopentaamminecobalt(III), rhodium(III) and iridium(III), calculated by isothermal DSC measurements 102(1986)137

Androstanolone

Thermoanalytical study of some steroids. V. Androstanolone (in French) 149(1989)1

Anemometry

Use of balances in anemometry 103(1987)69

Anhydrite

Displacement reactions in gypsum and in anhydrite 114(1987)75

Heat capacities and entropies from 8 to 1000 K of langbeinite ($K_2Mg_2(SO_4)_3$), anhydrite ($CaSO_4$) and of gypsum ($CaSO_4 \cdot 2H_2O$) to 325 K 139(1989)67

Anhydrous carbonates

Applications of variable atmosphere DTA (in CO_2) to improved detection and content evaluation of anhydrous carbonates in mixtures 109(1986)243

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. I. Li_2CO_3–$BaCO_3$ 124(1988)65

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. III. K_2CO_3–$BaCO_3$ 124(1988)89

Aniline

Heat content of solid aniline (in French) 116 (1987)337

Viscosity and densities of binary mixtures of acetonitrile with substituted anilines. Part 4 117 (1987)115

Studies on the thermal decomposition of thermosetting aniline–formaldehyde resins 119 (1987)321

A thermochemical kinetic study of interconversion reactions of aniline–formaldehyde products 127(1988)369

Viscosities and densities of binary liquid mixtures of 2-butoxyethanol with aniline and *N*-alkylaniline 149(1989)275

Animals

Combination of calorimetry and endoscopy for monitoring locomotor activities of small animals 130(1988)87

Anion-exchange resin

Calorimetry study of the exchange equilibrium between ligands or metal–ligands and an anion-exchange resin 136(1988)203

Ankerite

Differential scanning calorimetry of the dolomite–ankerite mineral series in flowing nitrogen 121(1987)39

Differential scanning calorimetry of the dolomite-ankerite mineral series in variable atmospheres 135(1988)225

Annealing

Emanation thermal analysis used to study annealing of radiation disorder 110(1987)237

Role of thermal annealing during processing of metallic glasses 110(1987)427

Anomalous thermal effects

Differential scanning calorimetric analysis of $Ca(OH)_2$: some anomalous thermal effects 112 (1987)259

Anthracene

Precursor states for the graphitization of naphthalene, anthracene, phenanthrene and chrysene 108(1986)211

Anthracene derivatives

Electrical and spectrophotometric properties of charge-transfer complexes of some anthracene derivatives 147(1989)57

Anthranilic acid

Thermodynamic and related studies of the oxidation of *p*-aminobenzoic acid, sulphanilic acid and anthranilic acid by periodate 140(1989) 197

Antibacterial efficiency

Listeria monocytogens – microcalorimetric investigations regarding the antibacterial efficiency of chemotherapeutics 119(1987)113

Antimicrobial activity

Thermal stability of some 1,3,4-thiadiazoles with possible antimicrobial activity 140(1989)1

Antimony

Phase diagram of the ternary system Ge–Sb–Te. II. The subternary Ge–GeTe–Sb_2Te_3–Sb 107 (1986)239

Physical properties and structural studies of $Se_{100-x}Sb_x$ 116(1987)35

On the thermochemistry of the rare earth antimonides. The Dy–Sb system 129(1988)99

The ternary system silver–antimony–tellurium. Study of the subternary Sb_2Te_3–Ag_2Te–Te 131 (1988)37

Formation of new copper antimony oxides by solid state reaction between $CuSb_2O_6$ and CuO under atmospheric and high pressure 133(1988)73

Glass formation and crystallization in the $GeSe_2$-GeTe-Sb_2Te_1 system 133(1988)287

Crystallization kinetics of some Ge-Sb-Se glasses 133(1988)293

Enthalpies of mixing of the ternary system bismuth–antimony–tellurium at 981 K (in French) 149(1989)33

Antimony compounds

Thermoanalytical studies of compounds of general formula $Cs_3[Sb_xBi_{2-x}Cl_9]$ 116(1987)225

A study of thermal decomposition of complex compounds of $Cs_3[Sb_{2-x}Pb_xCl_{9-x}]$ type 130 (1988)299

Antimony(III) complexes

Thermoanalytical studies on antimony(III) complexes with monochlorobenzoylhydrazones of 2-furaldehyde (FpClBHH), 2-pyrroaldehyde (PmClBHH) and 2-thiophenaldehyde (TpClBHH) as ligands 133(1988)329

Antimony(III) diethyldithiocarbamate complexes

The thermochemistry of antimony(III) and bismuth(III) diethyldithiocarbamate complexes 130(1988)95

Antimony(III) oxide

The enantiotropic phase transition of antimony(III) oxide 114(1987)61

Antimony trioxide

The temperature dependence of magnetic susceptibility and thermogravimetry of antimony trioxide and antimony trisulphide specimens in relation to their method of preparation 120 (1987)225

Antimony trisulphide

The temperature dependence of magnetic susceptibility and thermogravimetry of antimony trioxide and antimony trisulphide specimens in relation to their method of preparation 120 (1987)225

Antioxidants

Evaluation of 1-amino and 1-hydroxynaphthalenes as antioxidants for mineral oils by differential scanning calorimetery 108 (1986)91

Anydrous carbonates

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. II. Na_2CO_3–$BaCO_3$ 124(1988)79

Apatites

Temperature-programmed characterization of synthetic calcium-deficient phosphate apatites 143(1989)265

Aqueous vapour

Temperature enhancement of water–oligomer populations in saturated aqueous vapour 116 (1987)161

Aromatic amines

Aromatic amine–epoxy resin reactions: enthalpy and heat capacity (in French) 125(1988)209

Aromatic compounds

The role of heteroatoms on the carbonization and graphitization of polynuclear aromatic compounds 137(1988)225

Aromatic hydrocarbons

Excess Gibbs energy of mixing and refractive index of binary solutions of acetonitrile and of dimethylsulfoxide with several aromatic hydrocarbons 138(1989)19

Excess volumes of mixing and excess enthalpies of mixing of 1,2-dibromoethane with aromatic hydrocarbons at 298.15 K 146(1989)187

Aromatic monoamine hydrochlorides

Thermal properties, thermochemistry and kinetics of the thermal dissociation of hydrochlorides of aromatic mono-amines 121 (1987)413

Arrhenius equation

On the sensitivity of scale values in the Arrhenius equation 124(1988)235

Arsenic(III)

Determination of submicrogram quantities of osmium based on its catalytic effect on the Ce(IV)–As(III) reaction 121(1986)367

Simple kinetic–thermometric determination of submicrogram quantities of ruthenium based on its catalytic effect on the Ce(IV)–As(III) reaction 127(1988)209

Artifacts

The investigation of ancient oriental materials and artifacts by thermal analysis (1988 "Mettler" Plenary Lecture) 148(1989)95

Artificial intelligence

Non-isothermal reaction analysis and artificial intelligence—a promising combination for kinetic studies using thermoanalytical methods 121(1987)253

Arylazobarbituric acid compounds

Temperature and substituent effects on the ionization of some disubstituted arylazo barbituric and thiobarbituric acid compounds 140(1989)365

Arylhydrazoneacetoacetylaminopyridines

The use of thermal and spectrometric analyses for the structure investigation of arylhydrazone-acetoacetylaminopyridines and their copper chelates 146(1989)1

Asbestos

Physicochemical characterization of asbestos and attapulgite mineral fibers before and after treatment with phosphorus oxychloride 108 (1986)279

Ash

Characterization of the low-temperature ash component of the herrin 6 coal seam (Southwestern Illinois) by thermal methods of analysis 121(1987)71

Thermochemical studies on hot ash corrosion of stainless steel 304 and inhibition by magnesium sulphate 126(1988)43

Aspartic acid

Thermodynamics of the second proton dissociation processes of nine α-amino-acids and the third ionization processes of glutamic acid, aspartic acid and tyrosine 141(1989)297

Asphalt

The use of thermogravimetry and NMR spectroscopy in the attempted identification of the source of Babylonian building asphalt 115 (1987)181

Asphaltene

TA-MS investigations of coal westerhold and its related asphaltene and asphaltole 112(1987)101

Asphaltole

TA-MS investigations of coal westerhold and its related asphaltene and asphaltole 112(1987)101

Associated liquids

Comparisons of dielectric and thermodynamic ideality. II. Mixtures of associated liquids 116 (1987)183

Associated solutions

Thermodynamics of associated solutions. Excess thermodynamic properties of liquid mixtures of some organic compounds with amines 108(1986) 305

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions of acetic acid and non-polar components with association in both phases 132(1988)53

Thermodynamics of associated solutions. Vapour–liquid equilibrium for the systems acetic acid–water and acetic acid–2-butanone with association in both phases 138(1989)207

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions containing propanoic acid or butanoic acid with association in both phases 142(1989)351

Thermodynamics of associated solutions: vapour–liquid equilibrium for the acetic acid–propanoic acid and propanoic acid–water systems with association in both phases 143 (1989)253

Thermochemical investigations of associated solutions. 9. Prediction of excess enthalpies of ternary acetone + cyclohexane + chloroform mixtures from measured binary data 145(1989) 245

Atmosphere

Influence of the self-generated and controlled atmosphere on the thermal decomposition of basic nickel carbonate, $NiCO_3 \cdot 2Ni(OH)_2 \cdot 4H_2O$ 104(1986)101

Atmosphere dependence of the thermal decomposition of manganite, γ-MnO.OH 135 (1988)273

Atomic absorption

A comparative study of a kinetic–thermometric method and the atomic absorption cold vapour technique for determination of mercury traces and ultratraces 128(1988)21

Attapulgite

Physicochemical characterization of asbestos and attapulgite mineral fibers before and after treatment with phosphorus oxychloride 108 (1986)279

Attapulgites

Comparison of attapulgites from different sources using TG/DTG and FTIR 138(1989)97

Authentication

The authentication of phase transitions 139 (1989)93

Automated adiabatic calorimeter

An automated adiabatic calorimeter for heat-capacity measurements between 20 and 90 K 123(1988)105

Automated balances

Automated balances of the second generation 103(1987)1

Automated equipment

Derivatograph-C: a microcomputer automated equipment for simultaneous TG, DTG, DTA, EGA and TD 107(1986)375

Automatic batch calorimetry

Automatic batch calorimetry: application to the determination of the thermodynamic parameters of Co(II)-5′ adenosine monophosphate complex formation 141(1989)141

Automatic solution calorimetry

VALTER-II: a program for automatic solution calorimetry including heat-leak corrections 143 (1989)193

Aviation turbine oils

Spontaneous ignition temperatures of aviation turbine oils 112(1987)297

Avrami–Erofeev expressions

Some comments on the use of Avrami–Erofeev expressions and solid state decomposition rate constants 104(1986)93

Azide

Catalytic–thermometric determination of stability constants of complexes using the iodine–azide reaction 103(1986)325

Enthalpimetric determination of sulphide and thiosulphate by the catalysis of the iodine–azide reaction 112(1987)171

Azodiisobutyronitrile

Further investigations on the thermoelectrical and photochemical properties of 2,5-distyrylpyrazine (DSP) and azodiisobutyronitrile (AIBN) single crystals 101(1986)1

Azodyes

Electrical properties of some bis-azodye complexes 124(1988)171

B

Bacterial growth

Microcalorimetric study of bacterial growth 123 (1988)33

Bacterial metabolism

A thermokinetic study of bacterial metabolism 142(1989)211

Balance reaction calorimetry

Balance reaction calorimetry (in German) 119 (1987)219

Balances

Use of balances in anemometry 103(1987)69

Baraćite

The thermochemistry of some iron phosphate minerals: vivianite, metavivianite, baraćite, ludlamite and vivianite/metavivianite admixtures 104(1986)1

Barbituric acids

Thermodynamic parameters of ionization of 5-(2-substituted phenylazo) barbituric acids 122 (1987)209

Structure–activity relationships for solubility and wettability of a number of substituted barbituric acids 138(1989)319

Barite

Investigations of water film properties on barite surface containing preadsorbed tetradecylammonium hydrochloride (TDACl) 122(1987)363

Barium

Preparation of $BaPbO_3$ from coprecipitated barium–lead oxalate 115(1987)207

On phases and characterisation of quenched $YBa_2Cu_3O_x$ 132(1988)35

Thermal analysis in the M-Ba-Cu-O systems (M = Y, La, Pr) in relation to high T_c superconductors 133(1988)17

Use of emanation thermal analysis in characterization of $YBa_2Cu_3O_x$ 133(1988)23

The stability of $YBa_2Cu_3O_x$ in different atmospheres, by TGA 133(1988)33

Comparative study on the heat capacity of $ABa_2Cu_3O_{7-x}$ high T_c superconducting compounds (A = Y, Eu, Ho) 133(1988)49

Substitution effects on the T_c of $RBa_2Cu_3O_2$ (R = Y and Eu) 133(1988)55

Phase diagram of the pseudobinary $BaCuO_2$–$YBa_2Cu_3O_{6.5}$–$YCuO_{2.5}$ system 136 (1988)263

Heat capacity measurements of the high T_c superconductor $YBa_2Cu_3O_{7-x}$ 137(1988)65

Reduction of $Ba_2YCu_3O_7$ and $Y_2Cu_2O_5$ BY H_2 137(1988)373

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. IV. Mechanism of perovskite formation from various starting materials 142 (1989)281

Thermogravimetric study of the transition copper valency in the superconductive system Y–Ba–Cu–O 143(1989)123

Binary and ternary compounds, phase diagrams and contaminations in the $YO_{1.5}$-BaO-CuO system auxiliary to superconducting ceramics (Review) 148(1989)235

Thermal study of superconducting $Ba_2Cu_3RO_{7-x}$ (R = Y, Eu, Gd, Ho) 148(1989) 269

The thermal stability of $RBa_{2-x}K_xCu_3O_z$ (R = Y and Eu) 148(1989)275

Barium 2-ethylhexanoate

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. III. Preparation from mixed 2-ethylhexanoates of yttrium, barium and copper 140(1989)41

Barium bismuth oxides

Thermoanalytical investigation of the phase relation in $BaBiO_{3-x}$ 115(1987)199

Barium bromate

Influence of additives on the solid phase thermal decomposition of barium bromate 132(1988)7

Barium bromide

A galvanic bromine cell for measuring ΔG-values of solid-state reactions in the systems KBr/MBr_2 (M = Ca, Sr, Ba) 121(1987)343

Barium carbonate

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. I. Li_2CO_3–$BaCO_3$ 124(1988)65

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. II. Na_2CO_3–$BaCO_3$ 124(1988)79

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. III. K_2CO_3–$BaCO_3$ 124(1988)89

Calorimetric heat of transition assignments by microcomputer-based differential thermal analysis. Part II. The γ–β (orthorhombic to hexagonal) transition of barium carbonate 137 (1988)365

Kinetic analysis of thermal decomposition reactions. Part IV: kinetics of formation of barium titanate in crystalline mixtures of barium carbonate and titanium dioxide 145(1989)271

Barium chlorate trihydrate

Thermoanalysis of ca and al acetylacetonates: catalytic study of their binary systems with $Ba(ClO_4)_2 \cdot 3H_2O$ 101(1986)185

Barium chloride

Kinetic study of solid–solid reactions by DTA method ($BaCl_2$-KNO_3 system) 133(1988)209

Thermal analysis of calcite equilibrated with aqueous solutions of magnesium, strontium, barium and zinc chlorides 135(1988)237

Barium fluoride

Non-isothermal crystallization in ZrF_4–BaF_2–GdF_3–AlF_3 fluoride glasses 123 (1988)263

Barium(II) complexes

Influence of different donor atoms on the formation of 1 : 1- and 2 : 1-complexes of 12-crown-4 and 18-crown-6 ethers with Ag^+, Tl^{2+}, Ba^{2+} and Pb^{2+} 107(1986)219

Barium nitrite hydrates

Phase relation and dehydration behavior of barium nitrite hydrates 127(1988)201

Barium oxide

Structure and devitrification of $Li_2O \cdot P_2O_5$–B_2O_3 and $BaO \cdot P_2O_5$–B_2O_3 glasses 113 (1987)351

Derivatographic investigations of the systems BaO–GeO_2 and BaO–Nb_2O_5 115(1987)37

Nucleation and crystal growth in a $0.9Li_2O \cdot 0.1BaO \cdot 2SiO_2$ glass: a DTA study 120(1987)217

Barium titanate

Kinetic analysis of thermal decomposition reactions. Part IV: kinetics of formation of barium titanate in crystalline mixtures of barium carbonate and titanium dioxide 145(1989)271

Barium yttrium copper oxide

Kinetics and reaction mechanisms for formation and decomposition of $Ba_2YCu_3O_x$ 145(1989)149

Barium zinc germanate

Characterization of powder-calcined $BaZnGeO_4$ by thermal analysis 109(1986)267

Barium zirconyl oxalate

Thermal decomposition kinetics of barium zirconyl oxalate 144(1989)109

Barrier-layer capacitors

Impregnation thermodynamics of barrier-layer capacitors 131(1988)247

Base line

A numerical method to construct the sample base line in DSC curves 119(1987)233

Effect of chemical adsorption of calcium oxalate monohydrate on DTA baseline 141(1989)151

Base line drawing

Base line drawing for the determination of the enthalpy of transition in classical DTA, power-compensated DSC and heat-flux DSC 104(1986) 275

Basicity

Surface basicity modification of γ-alumina: study by thermometric titration 138(1989)303

BASIC language program

BASIC language program to evaluate non-isothermal kinetic parameters from thermoanalytical data 105(1986)247

Basic language programs

Basic language programs for automatic processing non-isothermal kinetic data 111 (1987)359

Basline

A computing method for drawing the DSC baseline 150(1989)53

Batch calorimetry

Extended batch calorimetry on periodic chemical reactions 119(1987)175

Batch solution calorimetry

A solid sampling device for use in batch solution calorimetry 124(1988)99

Belousov–Zhabotinskii reaction

The application of deconvolution calorimetry to the belousov–zhabotinskii reaction 106(1986)27

Bentonite

Variability in water sorption and in thermogravimetry of bentonite 114(1987)179

Possibility of feldspar formation in bentonite suspensions during storage, drying and/or heating 135(1988)319

Benzene

Liquid–liquid equilibria of (acetonitrile + methyl ethanoate + cyclohexane) and of (acetonitrile + cyclohexane + methyl ethanoate + benzene) 101 (1986)205

Excess enthalpies of binary mixtures for 1,3-cyclohexadiene and 1,4-cyclohexadiene + cyclohexane, + n-hexane and + benzene 102 (1986)245

Isothermal vapor–liquid equilibria for binary and ternary mixtures formed by 1-butanol, acetonitrile and benzene 112(1987)187

Molar excess enthalpies, molar excess volumes and molar isentropic compressions of mixtures of 2-propanone with heptane, benzene and trichloromethane at 298.15 K 113(1987)141

Heats of solution of cyclohexanol in benzene solutions of tri-n-octylammonium bromide and derived thermodynamic functions of transfer from benzene 116(1987)241

Studies on thermodynamic properties of binary systems containing alcohols. VII. Temperature dependence of excess enthalpies for *n*-propanol + benzene and *n*-butanol + benzene 123(1988) 285

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, isobutanol and benzene 126(1988)107

Study of the decoking kinetics of deactivated zeolite catalysts for ethylation of benzene by TA 135(1988)391

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, 2-butanol and benzene 140(1989)355

Solubility and excess volumes of the mixture Di-*n*-octyl ether + benzene 143(1989)171

Thermodynamic properties of positional isomers of disubstituted benzenes in the condensed phase (in French) 147(1989)261

Molecular alloys in the series of *para* disubstituted benzene derivatives. Part III. The *para*-bromochlorobenzene–*para*-dibromobenzene system 147(1989)273

Excess molar enthalpies of some *n*-alkylamine + cyclohexane or + benzene binary mixtures 150 (1989)87

Benzenoid hydrocarbons

Total resonant sextet benzenoid hydrocarbon isomers and their molecular orbital and thermodynamic characteristics 122(1987)313

Benzil-4-methyl-2-quinolylhydrazone

Thermodynamic studies of the complexation reaction involving trivalent metal ions and benzil-4-methyl-2-quinolylhydrazone (BMQH) 144(1989)13

Benzoates

Binary liquid mixtures of acetonitrile with methyl, ethyl, n-propyl and n-butyl benzoates. Variation of viscosities with temperature and composition 117(1987)219

Benzoic acid

Thermochemical investigation of β-cyclodextrin complexes with benzoic acid and sodium benzoate 116(1987)249

Thermodynamics for the ionization of benzoic acid in ethanol + water mixtures at 298.1 K 124 (1988)43

Statistical study of the dissociation and solvation processes for dichloro-substituted benzoic acids: additive and steric effects 127(1988)295

Calorimetric studies of benzoic acid–cyclodextrin inclusion complexes 140(1989)161

Benzoic derivatives

Statistical study of the influence of the nitro groups on the ionization and solvation processes of disubstituted benzoic derivatives 125(1988)363

5,6-Benzoquinoline-*N*-oxide

Thermal studies on complexes of zinc(II) and cadmium(II) with 5,6-benzoquinoline-*N*-oxide 132(1988)297

Benzoxazines

The effect of temperature on the mass fragmentation of some 3,1-benzoxazines 137 (1988)391

Benzoylacetone arylhydrazone

Stability constants, structure and thermogravimetric analysis of La(III) complexes with some arylhydrazones of benzoylacetone and dibenzoylmethane 149(1989)61

Benzyl alcohol

Thermodynamic properties of binary mixtures containing sulfur amide. 3. Excess molar volumes of benzyl alcohol + *N*,*N*-dimethylmethanesulfinamide, + *N*,*N*-dimethyl-benzenesulfinamide and + dimethyl sulfoxide 109(1987)377

Benzyl chloroformate

Standard enthalpies of formation of n-propyl chloroformate and benzyl chloroformate via solution calorimetry 116(1987)65

Benzylidene anilize

Kinetics studies of the decomposition of benzylidene aniline–$AlCl_3$ complexes 116(1987) 285

2-Benzylideniminobenzohydroxamic acid

Solid complexes from 2-benzylideniminobenzohydroxamic, 2-pyrilideniminobenzohydroxamic and 2-salicy-lideniminobenzohydroxamic acids with Fe(III) and Cu(II) 143(1989)85

Benzylpropargylamine

Thermal analysis, conductivity and electrochemical applications of phenylacetylene and benzylpropargylamine polymers. Part 3 146 (1989)161

Beryllium hafnyl oxalates

Thermal studies on beryllium, magnesium and calcium hafnyl oxalates 103(1986)239

Bidentate heterocyclic Schiff bases

Spectral and thermogravimetric studies on thorium(IV) complexes with bidentate heterocyclic Schiff bases 130(1988)319

Bimetallic EDTA complexes

Study of the thermal behaviour of ordered bimetallic edta complexes 104(1986)223

Binary hydroorganic systems

Studies of dielectric properties of some binary hydroorganic systems 104(1986)203

Binary liquid mixtures

Application of L–M modification of the Peng–Robinson equation of state for saturated binary liquid mixtures 106(1986)201

Comment on "ultrasonic velocity and viscosity of binary liquid mixtures" 149(1989)393

Binary phase diagrams

Use of the "shape factors" as an empirical method to determine the actual characteristic temperatures of binary phase diagrams by differential scanning calorimetry 128(1988)45

Binary systems

The simultaneous correlation of excess gibbs energies of binary systems at different temperatures by means of the UNIQUAC equation 117(1987)271

Binders

Thermal analysis and chemistry of inorganic binders 110(1987)467

Biodegradation

Differential scanning calorimetry as a complementary tool in wood biodegradation studies 119(1987)143

Biological products

TG/MS interface: applications to the determination of moisture in polysaccharides and freeze-dried biological products 115(1987)289

Biological studies

Thermal, spectral and biological studies on metal complexes of isoorotic and 2-thioisoorotic acids 133(1988)341

Biological thermodynamic data

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of ribonuclease A in solution 128(1988)267

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of lysozyme in solution 147(1989)71

Biological tissue

Heat flow in biological tissue undergoing laser irradiation 135(1988)167

Biomembranes

Fluctuations, stability and fusion in biomembranes 135(1988)161

Biphenol

Thermodynamic studies of *p*-polyphenyls: heat capacity of *p*,*p*′-biphenol 109(1986)45

2,2′-Bipyridine

Solvent effects on the dissociation of 2,2′-bipyridine and 1,10-phenanthroline in aqueous binary mixtures of 2-methoxyethanol and 1,2-dimethoxyethane 147(1989)41

Bis-(2-chloroethylethyl) sulfide

On the activation energy for the hydrolysis of bis-(2-chloroethylethyl) sulfide. II 114(1987)313

Bis[4-(4′-ethynylphenoxy)phenyl] ketone

DSC studies on the thermal stability of bis[4-(4′-ethynylphenoxy)phenyl] sulfone and bis[4-(4′-ethynylphenoxy)phenyl] ketone 123(1988)163

Bis[4-(4′-ethynylphenoxy)phenyl] sulfone

DSC studies on the thermal stability of bis[4-(4′-ethynylphenoxy)phenyl] sulfone and bis[4-(4′-ethynylphenoxy)phenyl] ketone 123(1988)163

Bis(2,4-pentanedionato)copper(II)

DSC determination of the sublimation enthalpy of tris(2,4-pentanedionato)cobalt(III) and bis(2,4-pentanedionato)nickel(II) and -copper(II) 109(1986)383

Bis(2,4-pentanedionato)nickel(II)

DSC determination of the sublimation enthalpy of tris(2,4-pentanedionato)cobalt(III) and bis(2,4-pentanedionato)nickel(II) and -copper(II) 109(1986)383

Bis(2,4-pentanedionato)oxovanadium(IV)

DSC determination of the sublimation enthalpy of bis(2,4-pentanedionato)oxovanadium(IV) and tetrakis(2,4-pentanedionato)zirconium(IV) 109 (1986)391

Bis-(5-sulphosalicylato)-diaquo metal chelates

Structure, thermal behaviour and solid state kinetics, of bis-(5-sulphosalicylato)-diaquo metal chelates of bivalent metal ions 127(1988)37

1,4-Bis(4-aminocyclohexyl) butadiyne

Thermal, spectral and magnetic studies of some first row transition metal complexes of 1,4-bis(4-aminocyclohexyl) butadiyne 131(1988)29

Bis-azodye complexes

Electrical properties of some bis-azodye complexes 124(1988)171

Bis(β-diketonate) oxovanadium(IV) complexes

Thermal and structural studies on the adducts of bis(β-diketonate) oxovanadium(IV) complexes with organic bases 140(1989)179

Bis(2-OH-1-naphthaldoxime)

Kinetic parameters of thermal decomposition of bis(2-OH-1-naphthaldoxime) chelates using freeman–carroll equation 140(1989)97

2,2-Bis[4-(*p*-aminophenoxy)phenyl]propane

Effect of different epoxy diluents/fortifier on the reactivity in curing and the thermal stability of epoxy resin using 2,2-bis[4-(*p*-aminophenoxy)phenyl]propane as a curing agent 141(1989)77

Bis-phenolates

Calorimetric study of hydrogen-bond formation in acetonitrile for some hydrogen-bis-phenolates and hydrogen-trimethyl-N-oxidephenolates at 298.15 K 137(1988)87

***N,N′*-Bis(dithiocarboxy)piperazine**

Thermal decomposition kinetics of polymeric complexes of nickel(II), zinc(II) and cadmium(II) with *N,N′*-bis(dithiocarboxy)piperazine 140 (1989)325

Bis(fluoro-substituted pentane-2,4-dionato) hydrates

Standard enthalpies of formation of bis(fluoro-substituted pentane-2,4-dionato) hydrates of Mn(II), Co(II) and Ni(II): the mean (M–O) bond dissociation enthalpies 139(1989)33

Bis(hydroxyethyl)terephthalate

The determination of catalytic activity of various metallic compounds in the polycondensation of bis(hydroxyethyl)terephthalate using DSC and TG techniques 106(1986)105

Bismaleimide-diamine adduct

Thermal characterisation of bismaleimide-diamine adduct polymers 134(1988)231

Bismaleimide resins

The thermal behaviour of blends of trisnadimide with bismaleimide resins 144(1989)339

Bismuth

Thermoelectrical conductivity of $Ge_{20}Bi_{15}S_{65}$ as a complementary method to differential thermal analysis 110(1987)281

Differential thermal analysis investigation of the $Gd_2(MoO_4)_3$–$Bi_2(MoO_4)_3$ system (in French) 112(1987)245

Determination of the free enthalpy of formation of the distinct compounds $LaBi_2$ and $CeBi_2$ (in French) 115(1987)167

New contribution in the study of the Bi_2Te_3-Bi_2Se_3 system 122(1987)135

Thermodynamic evaluation of the Au–Bi system 130(1988)15

Thermodynamic evaluation of the Bi–Ge system 132(1988)111

Kinetic study of isothermal and continuous heating crystallization in $Se_{100-x}Bi_x$ ($x \leqslant 8$) glasses 144(1989)123

Enthalpies of mixing of the ternary system bismuth–antimony–tellurium at 981 K (in French) 149(1989)33

Bismuth carbonate

Thermal decomposition of basic bismuth carbonate under high pressures of CO_2 and N_2 up to 50 ATM 114(1987)393

Bismuth citrate

Thermoanalytical studies of zinc citrate, bismuth citrate and calcium citrate 117(1987)201

Bismuth complexes

Studies on the thermal decomposition of complex salts of the $Cs_3[Bi_{2-x}Pb_xCl_{9-x}]$ type 138(1989) 249

Bismuth compounds

Thermoanalytical studies of compounds of general formula $Cs_3[Sb_xBi_{2-x}Cl_9]$ 116(1987)225

Bismuth(III) diethyldithiocarbamate complexes

The thermochemistry of antimony(III) and bismuth(III) DIETHYLDITHIOCARBAMATE COMPLEXES 130(1988)95

Bismuth(III) ions

Determination of stability constants and thermodynamic functions of L-lysine monohydrochloride with Sm(III), Bi(III) and Gd(III) metal ions 147(1989)401

Bismuth(III) oxide

Calorimetric heat of transition assignments by microcomputer-based differential thermal analysis. Part I. The α–δ (monoclinic to cubic) transition of bismuth(III) oxide 137(1988)353

Bismuth(III) sulphite

The preparation of bismuth(III) sulfide from ammonium thiocyanate and thiourea 126(1988) 199

Bismuth trioxide

Study of the system GeO_2–Bi_2O_3 127(1988)377

Bismuth vanadates

The Bi_2O_3-V_2O_5 system and crystal data about some bismuth vanadates 133(1988)61

Bis(*N*-benzoyl-*N′*,*N′*-diphenylthioureate) M(II) (M = Zn, Cd)

Calorimetric study of the reaction of bis(*N*-benzoyl-*N′*,*N′*-diphenylthioureate) M(II) (M = Zn, Cd) with some nitrogen bases 107(1986)299

Bis(*N*-monosubstituted-dithiocarbamato)metal(II) complexes

Thermal decomposition kinetics of square-planar d^8 bis(*N*-monosubstituted-dithiocarbamato)metal(II) complexes 149(1989) 331

Bis(*N*,*N*-diethyldithiocarbamato)tin(II)

The oxidation of bis(*N*,*N*-diethyldithiocarbamato)tin(II) 133(1988)383

2,6-Bis(picryl amino)-3,5-dinitropyridine (PYX)

Determination of the specific heat functions of PYX and KP by DSC 149(1989)123

Bissalicylaldoximates

Studies of thermal decomposition of bissalicylaldoximates of some heavy metals 133 (1988)347

Bituminous coal

Thermal behaviour in steam of a bituminous coal doped with alkali and alkaline earth metals 113(1987)277

Thermal behaviour in air of a bituminous coal with high mineral matter content doped with compounds of alkali and alkaline earth metals 116(1987)101

Catalysis by alkali and alkaline earth metals of the gasification in CO_2 and in steam of chars from a bituminous coal with high inorganic matter content 125(1988)79

Bivalent metal chelates

Spectral and thermal studies of some novel bivalent metal chelates of dichlorobenzoylhydrazines 132(1988)165

Bivalent metal complexes

Thermal studies on the chelation behaviour of bivalent metal complexes of biologically active 2-hydroxy-1-naphthaldehyde monosemicarbazone (HNAS) 126(1988)1

Bivalent metal ions

Determination of thermodynamic parameters and stability constants of complexes of biologically active *o*-vanillinthiosemicarbazone with bivalent metal ions 146(1989)375

Bivalent transition metal ions

Thermochemistry for the formation of methyl and chloro maleanilic acid complexes of bivalent transition metal ions 105(1986)231

Black phosphorus

Thermodynamic stability of orthorhombic black phosphorus 129(1988)57

Black powder

A thermo-analytical study of the pyrotechnic reactions of black powder and its constituents 134(1988)413

Blast furnace slag

Thermal analysis and X-ray diffraction studies on controlled release fertilizers prepared by incorporating nutrients into blast furnace slag 111(1987)135

Boiling points

Prediction of vapor pressures, boiling points and enthalpies of fusion for twenty-nine halogenated dibenzo-*p*-dioxins 112(1987)117

Bond length

Bond length–bond energy concept and its impact on the surface chemistry of oxides 110(1987)333

Boric acid

New estimates for the thermodynamic functions of molecular boric acid 141(1989)125

Boron

Relationships between the quenching conditions and the relaxation enthalpy of Fe–Si–B amorphous ribbons 121(1987)223

Structural relaxation and crystallization of $Fe_{78}B_{13}Si_9$ amorphous ribbons studied by dilatometry and differential scanning calorimetry 130(1988)177

DSC analysis of lithium-rich Li-B alloys 133 (1988)305

Boron carbide

Thermoanalytical study of solid state Al_4C_3–$X_2S_2O_8$ and B_4C–$X_2S_2O_8$ (X = Na, K) binary systems 127(1988)181

Boronic acids

Thermal stability of polymer-supported boronic acids functionalized with molybdenum derivatives 137(1988)71

Boudouard reaction

On the role of the Boudouard reaction in the isothermal reduction of iron ore by char and graphite 111(1987)89

Bromate

Thermometric study of the bromate–iodide reaction catalysed by Mo(VI) 142(1989)107

Bromazepan

Study of the thermal decomposition of bromazepan-thiocyanate complexes of Fe(II), Co(II), Ni(II) and Cu(II) 101(1986)83

Bromination

The sequential bromination of phenols 146 (1989)371

Bromine cell

A galvanic bromine cell for measuring ΔG-values of solid-state reactions in the systems KBr/MBr_2 (M = Ca, Sr, Ba) 121(1987)343

Bromine compounds

Thermogravimetric analysis of poly(ethylene terephthalate) treated with polymeric bromine compounds 113(1987)105

Bromine number

Bromine number determination of petroleum distillates by thermometric titration. Comparison with other methods 104(1986)247

Bromobenzylated poly(2,6-dimethyl-1,4-phenylene oxide)

Thermal stability of bromobenzylated poly(2,6-dimethyl-1,4-phenylene oxide) 120(1987)293

Bromochlorobenzene

Molecular alloys in the series of *para* disubstituted benzene derivatives. Part III. The *para*-bromochlorobenzene–*para*-dibromobenzene system 147(1989)273

Bromoiodobenzene

The system *p*-dibromobenzene + *p*-chloroiodobenzene + *p*-bromoiodobenzene–a methodological study on thermal analysis and thermodynamic phase-diagram analysis 146 (1989)297

Bromophenol

The kinetics and thermochemistry of the redox reaction between iodine and phenol derivatives. I. With *ortho*-bromophenol 101(1986)325

Brown coal

A comparative thermoanalytical study of low-temperature reactivity of brown coal with dioxygen and radiofrequency-activated oxygen 134(1988)333

Building materials

Some applications of the decrepitation technique and thermosonimetry in research on minerals and building materials 110(1987)265

Buprenorphine

Interaction of buprenorphine with phosphatidylcholine 150(1989)1

Burning

Problems in the DSC and DTA study of the burning properties of fuels and other organic materials 106(1986)191

Study on the burning characteristics of the combustible materials based on carbon black and cellolignine by thermal analysis method 134 (1988)339

Burning velocity

Temperature dependence of the burning velocity of gasless pyrotechnics 120(1987)203

Butan-1-ol

Excess properties of mixtures of some *n*-alkoxyethanols with organic solvents. III. V^E and C_p^E with butan-1-ol at 298.15 K 131(1988)73

Butanoic acid

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions containing propanoic acid or butanoic acid with association in both phases 142(1989)351

1-Butanol

Thermodynamics of solutions containing acetonitrile and 1-butanol 124(1988)53

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, 2-butanol and benzene 140(1989)355

Butanol

Isothermal vapor–liquid equilibria for binary and ternary mixtures formed by 1-butanol, acetonitrile and benzene 112(1987)187

Liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems 114(1987)227

Thermodynamics of solutions of butanols in hydrocarbons 121(1987)447

Studies on thermodynamic properties of binary systems containing alcohols. VII. Temperature dependence of excess enthalpies for *n*-propanol + benzene and *n*-butanol + benzene 123(1988) 285

Butanone

Excess enthalpies of binary solvent mixtures of 2-butanone with aliphatic alcohols 114(1987)239

Thermodynamics of associated solutions. Vapour–liquid equilibrium for the systems acetic acid–water and acetic acid–2-butanone with association in both phases 138(1989)207

Butobarbital

Thermoanalytical study of psychotherapeutic substances. VI. Butobarbital 147(1989)17

Butoxyethanol

Excess molar volumes and enthalpies of the 2-butoxyethanol + water system at 25 °C 131 (1988)153

Viscosities and densities of binary liquid mixtures of 2-butoxyethanol with aniline and *N*-alkylaniline 149(1989)275

Butyl acetate

Volumes of mixing and viscosities of methyl acetate + *n*-alkanes and *n*-butyl acetate + *n*-alkanes at 298.15 K: an interpretation in terms of the Van–Patterson, the absolute rate and free volume theories 129(1988)249

Butylmethane

Thermolabile hydrocarbons. XXIX. Combustion and sublimation enthalpies of tri-*tert*-butylmethane (in German) 107(1986)331

C

Cadmium

Thermochemical study of adducts of urea with zinc, cadmium and mercury: some correlations for urea derivatives 125(1988)295

Cadmium carbonate

Influence of CO_2 pressure on the kinetics of thermal decomposition of $CdCO_3$ 113(1987)31

Factors affecting the thermal decomposition of cadmium carbonate by TG 138(1989)147

Cadmium chloride

The phase diagram $PdCl_2$–$CdCl_2$ 113(1987)49

Thermal decomposition of solid complexes of cadmium chloride with substituted pyridines 128(1988)225

Cadmium ferrite

Electrical conduction in γ irradiated and unirradiated Fe_3O_4, $CdFe_2O_4$ and $Co_xZn_{1-x}Fe_2O_4$ ($0 \leqslant x \leqslant 1$) ferrites 144(1989)45

Cadmium(II) chelates

Infrared and thermal investigations of 1,10-phenanthroline *N*,*N*′-dioxide chelates of zinc(II) and cadmium(II) 101(1986)389

Infrared and thermal studies of 1,10-phenanthroline-mono-***n***-oxide chelates of zinc(II) and cadmium(II) 105(1986)377

Cadmium(II) complexes

Thermodynamics of the complexation of Fe(II), Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) with 6,7-dihydro-3(h)-methyl-5-methylthio-7-oxo-vic-triazolo(4,5-*d*)pyrimidine 102(1986)47

Thermal studies on purine complexes. XI. Thermal behaviour of 2-thioxanthine, its chlorohydrate and some thioxanthine complexes of Ag(I), Cd(II), Hg(II) and Hg(I) 102(1986)149

Thermal studies on complexes of zinc(II) and cadmium(II) with 5,6-benzoquinoline-*N*-oxide 132(1988)297

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part II. 138(1989)285

Thermal decomposition kinetics of polymeric complexes of nickel(II), zinc(II) and cadmium(II) with *N*,*N*′-bis(dithiocarboxy)piperazine 140 (1989)325

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part III 142(1989)89

Cadmium(II) diamine complexes

Solid state thermal phase transition of cadmium(II) diamine complexes 105(1986)35

Cadmium(II) *p*-toluenesulphonate

Thermal decomposition of Co(II), Ni(II), Cu(II), Zn(II), Cd(II) and Pb(II) *p*-toluenesulphonates 146(1989)341

Cadmium iodide

The phase diagrams of mixtures of CuI with ZnI_2, CdI_2 and HgI_2 143(1989)115

Cadmium metavanadate

α-cadmium metavanadate preparation at room temperature. Part I 107(1986)115

Cadmium metavanadate formation. Part II. Quantitative X-ray diffraction, scanning electron microscopy and eds studies 108(1986)33

Cadmium oxide

Treatment of CdO at room temperature and 150 °C in a water-vapour-saturated atmosphere. Part I. 142(1989)73

Cadmium picoline halides

Thermoanalytical investigation of cadmium picoline halides 133(1988)353

Cadmium selenide

Vaporization enthalpy of cadmium selenide and telluride obtained by vapour pressure measurements 129(1988)341

Cadmium sulphate

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from $(NH_4)_2SO_4/CdSO_4$ 1 : 2 M mixtures. I. synthesis and characterization 144 (1989)65

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from $(NH_4)_2SO_4/CdSO_4$ 1 : 2 m mixtures. II. Analysis of the langbeinite decomposition 144(1989)225

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from mixtures of $(NH_4)_2SO_4/CdSO_4$ in molar ratio 1 : 2. III. Evolution of the samples 145(1989)51

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained from saturated solutions of $(NH_4)_2SO_4/CdSO_4$ in molar ratio 1 : 1 145(1989)131

Decomposition of hydrazine complexes of cadmium sulfate 150(1989)79

Cadmium telluride

Vaporization enthalpy of cadmium selenide and telluride obtained by vapour pressure measurements 129(1988)341

Caesium

Studies on thermal decomposition of caesium–sodium chlorothiocyanatobismuthates(III) 137(1988)337

Caesium chloride

Thermoanalytical investigations on the decomposition of double salts. Part II. The decomposition of double salts $MeCl \cdot MgCl_2 \cdot 6H_2O$ (Me = NH_4, Rb, Cs) 121(1987)151

Caesium complexes

Studies on the thermal decomposition of complex salts of the $Cs_3[Bi_{2-x}Pb_xCl_{9-x}]$ type 138(1989) 249

Caesium compounds

Thermoanalytical studies of compounds of general formula $Cs_3[Sb_xBi_{2-x}Cl_9]$ 116(1987)225

A study of thermal decomposition of complex compounds of $Cs_3[Sb_{2-x}Pb_xCl_{9-x}]$ type 130 (1988)299

Caesium hexaiodotellurate(IV)

Standard enthalpies of formation of potassium rubidium and caesium hexaiodotellurate(IV) (in French) 138(1989)67

Caesium iodide

Thermodynamic properties of CsI. II. Vapour pressures and thermochemical properties of CsI(g) and Cs_2I_2(g) 108(1986)45

Enthalpies of solution of NaI and CsI in *N,N*-dimethylacetamide–water mixtures at 298.15 K 141(1989)131

Caesium metaborate

The thermodynamic properties of cesium metaborate $CsBO_2$ from 5 to 1000 K 128(1988)31

Caesium molybdate

The thermochemical properties of cesium molybdate, Cs_2MoO_4, from 298.15 to 1500 K 124(1988)157

Caesium oxalate monohydrate

Thermal analyses of rubidium and cesium oxalate monohydrates 127(1988)159

Caesium sulphate

Thermodynamic functions of gaseous lithium, sodium, potassium, rubidium and caesium sulfates 106(1986)51

Caesium telluride

A knudsen cell–mass spectrometer study of the vaporization of cesium telluride and cesium tellurite 144(1989)21

Caesium tellurite

A knudsen cell–mass spectrometer study of the vaporization of cesium telluride and cesium tellurite 144(1989)21

Calcination

Catalytic effect of alkali carbonates on the calcination of calcium carbonate 115(1987)57

Lithium carbonate enhancement of the calcination of calcium carbonate: proposed extended-shell model 118(1987)135

Inhibition of the calcination of calcium carbonate 130(1988)173

Calcite

Interaction of kaolinite with calcite on heating. I. Instrumental and procedural factors for one kaolinite in air and nitrogen 121(1987)51

Interaction of kaolinite with calcite on heating. II. Mixtures with one kaolinite in carbon dioxide 124(1988)119

Thermal analysis of calcite equilibrated with aqueous solutions of magnesium, strontium, barium and zinc chlorides 135(1988)237

Thermal analysis of compounds adsorbed on low-surface-area solids Part 2. Calorimetric investigations of fatty acids on calcite 140(1989) 253

Interaction of kaolinite with calcite on heating. IV - Rehydrated and recarbonated samples 148 (1989)439

Calcitic marl rocks

Mineralogical changes upon heating calcitic and dolomitic marl rocks 135(1988)243

Calcium

Ion association of Cl^- with Na^+, K^+, Mg^{2+} and Ca^{2+} in aqueous solution at $10 \leqslant T \leqslant 45\,^\circ C$ and $0 \leqslant I \leqslant 1$ mol l^{-1}. A literature data analysis 115 (1987)241

Calcium α-alaninate complexes

Thermodynamic parameters for the formation of calcium α-alaninate complexes in aqueous solution 140(1989)59

Calcium-deficient phosphate apatite

Temperature-programmed characterization of synthetic calcium-deficient phosphate apatites 143(1989)265

Calcium acetate

Effect of calcium chloride and calcium acetate on the reactivity of a lignite coal at low heating rate 125(1988)285

Calcium acetylacetonate

Thermoanalysis of ca and al acetylacetonates: catalytic study of their binary systems with $Ba(ClO_4)_2 \cdot 3H_2O$ 101(1986)185

Calcium aluminate

Thermal analysis of the $3CaO \cdot Al_2O_3$–$CaSO_4 \cdot 2H_2O$–$CaCO_3$–H_2O system 106(1986)273

Calorimetry of the hydration of calcium aluminates with various glass contents 113 (1987)331

Calcium bromide

A galvanic bromine cell for measuring ΔG-values of solid-state reactions in the systems KBr/MBr_2 (M = Ca, Sr, Ba) 121(1987)343

Calcium carboaluminates

Direct determination of standard enthalpies and Gibbs energies of formation and absolute entropies of hydrated calcium sulphoaluminates and carboaluminates 132(1988)285

Calcium carbonate

Thermal analysis of the $3CaO \cdot Al_2O_3$–$CaSO_4 \cdot 2H_2O$–$CaCO_3$–H_2O system 106(1986)273

Catalytic effect of alkali carbonates on the calcination of calcium carbonate 115(1987)57

Lithium carbonate enhancement of the calcination of calcium carbonate: proposed extended-shell model 118(1987)135

Investigation of the thermal stability of $CaCO_3$-$SrCO_3$ solid solutions 122(1987)23

Solid-state reactions in the system TALC–$CaCO_3$ doped with Ni(II) at high temperatures 127 (1988)171

Thermal analyses of cement components hydrated in the presence of calcium carbonate 127(1988)385

Inhibition of the calcination of calcium carbonate 130(1988)173

Thermal properties and crystallization kinetics of $PP/CaCO_3$ and $PP/EPDM/CaCO_3$ composites 134(1988)139

Formation of amorphous $CaCO_3$ during the reaction of CO_2 with CaO 142(1989)175

Effects of sample weight, particle size, purge gas and crystalline structure on the observed kinetic parameters of calcium carbonate decomposition 143(1989)339

Kinetics of solid state reaction between $CaCO_3$ and MoO_3 144(1989)363

Calcium chloride

Enthalpy of KNO_3 and $CaCl_2$ solution in water–hydrophilic urea derivatives mixtures 116 (1987)349

Effect of calcium chloride and calcium acetate on the reactivity of a lignite coal at low heating rate 125(1988)285

TC and DSC investigation of $CaCl_2 \cdot 6H_2O$, a phase change material for energy storage 148 (1989)281

Calcium chloride hexahydrate

Calcium chloride hexahydrate–ammonium chloride binary solutions: a DSC study 138 (1989)39

TG and DSC investigation of $CaCl_2 \cdot 6H_2O$ PCM material 144(1989)235

Calcium citrate

Thermoanalytical studies of zinc citrate, bismuth citrate and calcium citrate 117(1987)201

Calcium complexes

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of H^+, Na^+ and Ca^{2+} complexes with 2,4-dichlorophenoxyacetate in aqueous solution at different temperatures and ionic strengths 128(1988)261

Calcium hafnyl oxalates

Thermal studies on beryllium, magnesium and calcium hafnyl oxalates 103(1986)239

Calcium hydrogen orthophosphate

Formation of β-tricalcium di(orthophosphate) from mixtures of hydroxyapatite and calcium hydrogen orthophosphate 113(1987)133

Calcium hydroxide

Estimation of calcium hydroxide in OPC, OPC/PFA and OPC/PFA/polymer modified systems 106(1986)115

Differential scanning calorimetric analysis of $Ca(OH)_2$: some anomalous thermal effects 112 (1987)259

Calcium(II) complexes

Studies on hexacyanoferrate(II) complexes. Formation constants for alkali metal, ammonium and calcium(II) complexes at different temperatures and ionic strengths in aqueous solution 102(1986)1

Calcium ions

Calorimetric study of the interactions of calcium and magnesium ions with calmoduline (in French) 122(1987)37

Microcalorimetric studies of Ca^{2+} binding to triphosphoinositide and phosphatidylserine 123 (1988)247

Calcium nitrate

Molten calcium nitrate tetrahydrate: the reactions of six chromium(VI) compounds 106 (1986)361

Calcium oxalate

The deuterium isotope effect on the kinetics of the thermal dehydration of calcium oxalate monohydrate 102(1986)263

Kinetic analysis of TG data: study of calcium oxalate monohydrate dehydration with a non-separable variables model 104(1986)71

Comparison of isothermal and non-isothermal TG data. Kinetic analysis of calcium oxalate dehydration 107(1986)283

On the change of the activation energy with conversion degree and heating rate for the non-isothermal dehydration of $CaC_2O_4 \cdot H_2O$ 107 (1986)339

Kinetic studies by DSC on the thermal decomposition of calcium oxalate 143(1989)93

Calcium oxalate monohydrate

Effect of chemical adsorption of calcium oxalate monohydrate on DTA baseline 141(1989)151

Calcium oxide

Contribution to the study of the $Ca_3(PO_4)_2$–CaO–$CaSO_4$ system (in French) 120(1987)143

Formation of amorphous $CaCO_3$ during the reaction of CO_2 with CaO 142(1989)175

The crystallization kinetics of $12CaO \cdot 7Al_2O_3$ glass 149(1989)387

Calcium phosphate

Calorimetric investigations of calcium phosphate precipitation in relation to solution composition and temperature 131(1988)47

Calcium phosphoaluminate

Role of phosphogypsum in the hydration of calcium sulphoaluminate 116(1987)145

Calcium selenate

Thermal decomposition of magnesium and calcium selenates 145(1989)367

Calcium sulphate

Thermal analysis of the $3CaO \cdot Al_2O_3$–$CaSO_4 \cdot 2H_2O$–$CaCO_3$–H_2O system 106(1986)273

Effect of carbon and silica on the reduction of calcium sulfate 114(1987)389

Contribution to the study of the $Ca_3(PO_4)_2$–CaO–$CaSO_4$ system (in French) 120(1987)143

The quantitative determination of hydrated calcium sulphates in cement by DSC 121(1987) 181

Calcium sulphite

Studies on alkaline earth metal sulfites. X(1) - Thermal dehydration of calcium sulfite hemihydrate: Dependence of the products on dehydration conditions 133(1988)251

Calcium sulphoaluminate

High-temperature synthesis of calcium sulphoaluminate from phosphogypsum 113 (1987)269

Calcium sulphoaluminates

Direct determination of standard enthalpies and Gibbs energies of formation and absolute entropies of hydrated calcium sulphoaluminates and carboaluminates 132(1988)285

Calcium zirconate

Thermodynamic properties of calcium zirconate ($CaZrO_3$) 106(1986)183

Calcium zirconyl oxalate

A comparative study of the thermal decomposition kinetics of zirconyl oxalates of calcium and strontium 146(1989)225

Calibration

Gravimetric calibration of standard gases 103 (1987)57

Calibration of differential scanning calorimetry units for mineralogical studies 104(1986)77

Biological standard reference materials for the calibration of differential scanning calorimeters: di-alkylphosphatidylcholine in water suspensions 107(1986)37

Calibration and application of a "heat flux DSC" in the study of heterogeneous catalyzed reactions 112(1987)51

Continuous gradient method in flow microcalorimetry. Part I. Relation between electrical and chemical calibration 113(1987)125

Temperature calibration of thermogravimetric equipment 113(1987)205

A calibration study of the DuPont DSC 910 module 120(1987)55

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of ribonuclease A in solution 128(1988)267

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of lysozyme in solution 147(1989)71

Calibration and accuracy of thermal mechanical analyzers 149(1989)215

Caloric measurements

Computer-aided acquisition and processing of data for caloric measurements with isoperibol calorimeters 119(1987)59

Caloric quantities

Determination of caloric quantities of dilute liquid solutions 119(1987)17

Calorimeters

Suggested practice for classification of calorimeters 109(1986)121

Linear theory applied to a calorimeter during quasi-isothermal operation 115(1987)303

Heat capacity evolution in calorimeters with temperature programming simulated by an RC model 118(1987)183

New experimental vessels for the C 80 calorimeter 119(1987)223

Effect of the layer of air between the calorimeter and cylindrical samples in DC experiments 130 (1988)355

A new calorimeter for temperatures above 1400 K 139(1989)291

Modelling of the process in DC experiments by considering the layer of air between the calorimeter and holder 147(1989)291

Calorimetry

Modelling of processes in calorimetry by taking into account heat transfer and reaction 121 (1987)381

Combination of calorimetry and endoscopy for monitoring locomotor activities of small animals 130(1988)87

Interplay of calorimetry and thermal analysis (Invited Lecture) 135(1988)31

Calvent calorimeter

Enthalpy determination for an extraction reaction by direct static measurement with a Calvent calorimeter 123(1988)1

Camphor

Thermodynamic study on camphor crystals 139 (1989)121

Camphor derivative

Application of thermodynamic relationships to the polymorphic modifications of a camphor derivative (in French) 107(1986)189

Canola oil

Polymorphic transitions in hydrogenated canola oil in presence of surfactants 134(1988)97

Capillary tube sample container

Evaluation of a capillary tube sample container for differential scanning calorimetry 136(1988) 231

Carbohydrate

Thermal analysis of protein-carbohydrate mixtures in oxygen 114(1987)109

Carbon

A study of the reduction of molybdenum trioxide on a carbon support using thermogravimetry/ mass spectrometry 127(1988)1

Studies of interfacial properties in polyepoxide/carbon or glass fiber composites by means of microgravimetric techniques 103(1987) 97

Effect of carbon and silica on the reduction of calcium sulfate 114(1987)389

Quantitative thermal characterization of carbon–epoxy composites using differential scanning calorimetry and thermogravimetric analysis 125(1988)191

Kinetics of the thermal regeneration of spent activated carbon in a fluidized bed 136(1988)179

Carbonated fluorapatites

Thermal decomposition of "reversed" type B carbonated fluorapatites 118(1987)267

Carbonate mineralogy

Applications of thermal analysis to carbonate mineralogy 110(1987)501

Carbonates

The moving boat technique and practical studies on the decomposition of carbonates. Part 1. comparative assessment of the decomposition rates of limestone and dolomite samples 101 (1986)119

The moving boat technique and practical studies on the decomposition of carbonates. Part 2. Analysis and prediction of α–t plots generated under a nonlinear temperature programme 101 (1986)131

Applications of variable atmosphere DTA (in CO_2) to improved detection and content evaluation of anhydrous carbonates in mixtures 109(1986)243

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. I. Li_2CO_3–$BaCO_3$ 124(1988)65

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. II. Na_2CO_3–$BaCO_3$ 124(1988)79

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. III. K_2CO_3–$BaCO_3$ 124(1988)89

Mn, Co oxides prepared by the thermal decomposition of carbonates 133(1988)257

A new model of TL in carbonates 135(1988)213

Carbonation

Carbonation of ettringite by atmospheric carbon dioxide 135(1988)347

Carbon black

Study on the burning characteristics of the combustible materials based on carbon black and cellolignine by thermal analysis method 134 (1988)339

Carbon dioxide

Enthalpies of solution of carbon dioxide in aqueous diglycolamine solutions 106(1986)241

Influence of CO_2 pressure on the kinetics of thermal decomposition of $CdCO_3$ 113(1987)31

Influence of CO_2 pressure on the kinetics of thermal decomposition of $PbCO_3$ 113(1987)39

Enthalpies of absorption of carbon dioxide in aqueous methyldiethanolamine solutions 121 (1987)437

Interaction of kaolinite with calcite on heating. II. Mixtures with one kaolinite in carbon dioxide 124(1988)119

Carbonation of ettringite by atmospheric carbon dioxide 135(1988)347

Catalytic gasification of activated carbon by CO_2 137(1988)383

Formation of amorphous $CaCO_3$ during the reaction of CO_2 with CaO 142(1989)175

Enthalpies of absorption of carbon dioxide in aqueous diethanolamine solutions 146(1989)107

Carbon fibres

Isothermal crystallization behaviour of poly(ether-ether-ketone) (PEEK) and its carbon fiber composite 134(1988)223

Compositional analysis of polyphenylene sulfide containing PTFE and carbon fibers 142(1989)151

Carbon$_6$(g) clusters

Isomerism of C_6(g) cluster and its manifestations in the system thermodynamics 127(1988)237

Carbonization

Desulfurization of some turkish lignites during carbonization by ammonia 126(1988)299

The role of heteroatoms on the carbonization and graphitization of polynuclear aromatic compounds 137(1988)225

Carbon monoxide

Temperature interplay of isomeric structures OC · HF(g) and CO · HF(g) 102(1986)287

DSC–GC studies on the oxidation of CO over vanadia catalysts 107(1986)181

Temperature programmed desorption investigation of some nickel/alumina catalysts for carbon monoxide methanation 133(1988)137

Investigation of basic zinc sulfate thermal decomposition under nitrogen and carbon monoxide atmosphere 137(1988)281

Kinetics of $SrSO_4$ reduction with CO 138(1989)55

CO adsorbed on Ni(001): effects of the interplay of "on-top" and "bridge" adsorption complexes on heat capacity 140(1989)237

Carbon oxidation catalyst

Thorium as a carbon oxidation catalyst 108 (1986)389

Carbon tetrachloride

Thermodynamic properties of binary mixtures containing sulfur amide. 1. Excess molar volumes of carbon tetrachloride + *N*,*N*-dimethylmethanesulfinamide and + *N*-methylmethanesulfinamide 104(1986)153

High pressure differential thermal analysis of cyclohexanol-d_{11} ($C_6D_{11}OH$) and carbon tetrachloride (CCl_4) 143(1989)109

Carbonyl complexes

Thermal degradation of transition metal carbonyl complexes. Part IV: Thermogravimetric studies of various stoichiometric mixtures of trimethylamine *N*-oxide dihydrate and hexacarbonyl molybdenum 145(1989)179

Carbonyl groups

Calorimetric study of molecular interactions in mixtures of substances containing carbonyl groups 149(1989)111

Carbothermic reduction

Kinetic model for the carbothermic reduction of manganese dioxide 125(1988)99

The effect of catalysts during the carbothermic reduction of manganese dioxide 125(1988)107

Carboxylates

Surface tensions of some molten divalent metal carboxylates 115(1987)351

Thermal studies of heavy metal carboxylates. III. Metal dodecanoate–carboxylic acid mixtures 118(1987)253

Carboxylato complexes

Thermal decomposition reactions of metal carboxylato complexes in the solid state. II. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 112(1987)275

Thermal decomposition reactions of metal carboxylato complexes in the solid state. III. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 116(1987)53

Carboxylic acid

Structure–stability relationship of copper(II)–indol carboxylic acid derivative complexes from spectrophotometric, thermogravimetric and potentiometric studies 114(1987)359

Thermal studies of heavy metal carboxylates. III. Metal dodecanoate–carboxylic acid mixtures 118(1987)253

Calorimetric study of some carboxylic acids Lewis-bases complexes in view of thermal energy storage 130(1988)149

Carburization

Investigation of the carburization of Fe/Mn-Fischer-Tropsch catalysts with a microbalance 103(1987)187

Cassiterite

The effect of admixtures on the reduction of cassiterite by graphite 124(1988)109

Catalases

Thermodynamics of the interaction between *n*-dodecyltrimethylammonium bromide and catalases 146(1989)215

Catalysis

The determination of catalytic activity of various metallic compounds in the polycondensation of bis(hydroxyethyl)terephthalate using DSC and TG techniques 106(1986)105

DSC–GC studies on the oxidation of CO over vanadia catalysts 107(1986)181

Calibration and application of a "heat flux DSC" in the study of heterogeneous catalyzed reactions 112(1987)51

Enthalpimetric determination of sulphide and thiosulphate by the catalysis of the iodine–azide reaction 112(1987)171

Copper(II) determination by means of a thermometric method based on its catalytic effect on the hydrazine–hydrogen peroxide reaction 112(1987)335

Catalytic effect of alkali carbonates on the calcination of calcium carbonate 115(1987)57

Cu(II) trace determination by means of a catalytic thermometric method based on the hydroxylamine–hydrogen peroxide reaction 117 (1987)283

Determination of submicrogram quantities of osmium based on its catalytic effect on the Ce(IV)–As(III) reaction 121(1986)367

Catalysis by alkali and alkaline earth metals of the gasification in CO_2 and in steam of chars from a bituminous coal with high inorganic matter content 125(1988)79

The effect of catalysts during the carbothermic reduction of manganese dioxide 125(1988)107

Thermal decomposition of $KClO_4$ catalyzed by MnO_2–CuO mixed oxides systems 126(1988)17

Simple kinetic–thermometric determination of submicrogram quantities of ruthenium based on its catalytic effect on the Ce(IV)–As(III) reaction 127(1988)209

Evaluation of thermal stability of some reforming catalysts 127(1988)217

Cobalt(II) determination at ppb levels based on its catalytic effect on the hydrazine–hydrogen peroxide reaction. Study by thermometric method 130(1988)241

Temperature programmed desorption investigation of some nickel/alumina catalysts for carbon monoxide methanation 133(1988)137

Temperature-programmed reaction and desorption studies of unsupported MoS_2-based hydrotreating catalysts 133(1988)143

True differential microcalorimetry study of the structure of bimetallic catalyst particles 133 (1988)149

Evidence of the role of non-stoichiometry in Zn-Cr catalysts by thermal investigations 133 (1988)155

The use of DSC to study the selective catalytic reduction of NO with NH_3 133(1988)169

Probing the electronic interaction between metal and support on Pd/TiO_2 catalyst with adsorption of hydrogen 133(1988)175

Alkaline X and Y zeolites as catalysts for ring transformation: a TPD study 135(1988)371

Study of the decoking kinetics of deactivated zeolite catalysts for ethylation of benzene by TA 135(1988)391

Thermometric study of the bromate–iodide reaction catalysed by Mo(VI) 142(1989)107

The use of a heat-flow differential scanning calorimeter as a plug-flow fixed-bed reactor in heterogeneous catalysis 144(1989)329

Study of copper–chromium oxide catalyst. II. Crystal data and thermal decomposition of basic copper(II) ammonium chromate 145(1989)19

Calorimetry and thermal analysis in surface science and catalysis 148(1989)37

The use of thermal analysis techniques in heterogeneous catalysis (Review) 148(1989)137

Thermoanalysis of zinc acetate-active carbon catalysts 148(1989)395

Catalysts

Thermal analysis of spent steam-reforming catalysts 149(1989)147

Catalyst surfaces

Thermal analysis of catalyst surfaces 142(1989) 329

Catalytic materials

Differential scanning calorimetry probes acidity strength distribution in catalytic materials 118 (1987)9

Catechol

Chemistry of organic eutectics and 1 : 1 addition compound: *p*-phenylenediamine–catechol system 138(1989)219

Cationic-exchange resins

Comparative DSC and TG studies of the desorption of water from cationic-exchange resins 127(1988)309

CDTA complexes

A study of the thermal decomposition of amorphous bimetallic CDTA complexes 149 (1989)141

Cellobiose

Thermal studies on cellobiose and cellobiose halobenzoates 117(1987)139

Cellobiose halobenzoates

Thermal studies on cellobiose and cellobiose halobenzoates 117(1987)139

Cellolignine

Study on the burning characteristics of the combustible materials based on carbon black and cellolignine by thermal analysis method 134 (1988)339

Cellulose

Emission thermophotometry. IV. Cellulose and some cellulose derivatives 101(1986)95

Thermal analysis in the cellulose, paper and textile industry 110(1987)471

Thermal decomposition of cellulose and typha sap — evaluation of the catalytic activity of potassium carbonate 111(1987)27

Thermal and spectroscopic studies on C-2, C-3 and C-6 substituted cellulose with different groups 117(1987)187

Kinetics of thermal decomposition of cellulose. Part I. Influence of experimental conditions 120 (1987)121

Kinetics of thermal decomposition of cellulose. Part II. Temperature differences between gas and solid at high heating rates 120(1987)133

The kinetics of the oxidative degradation of cellulose and cellulose doped with chlorides 121 (1987)273

Differential scanning calorimetry in the saccharification of cellulose 123(1988)255

Thermal degradation of cellulose, cellulose thiophosphate and its complexes with transition-metal cations 145(1989)331

Cellulose acetate

Thermal behaviour of cellulose acetate 150 (1989)33

Cellulose derivatives

Emission thermophotometry. IV. Cellulose and some cellulose derivatives 101(1986)95

Cellulose thiophosphate

Thermal degradation of cellulose, cellulose thiophosphate and its complexes with transition-metal cations 145(1989)331

Cement

Microgravimetric measurements of water vapour sorption on hydrated cement pastes 103(1987)137

The quantitative determination of hydrated calcium sulphates in cement by DSC 121(1987) 181

Thermal analyses of cement components hydrated in the presence of calcium carbonate 127(1988)385

Estimation of the degree of hydration in modified ordinary portland cement pastes by differential scanning calorimetry 145(1989)203

Ceramics

High temperature dilatometer study of special ceramics and their sintering kinetics 106(1986)71

Ceramics in Engines. Past – Present – Future 112(1987)1

High temperature DTA of ceramic superconductor $YBa_2Cu_3O_{7-\gamma}$ 127(1988)395

Determination of quartz in ceramics by dilatometry 135(1988)335

The composition of glass ceramics determined by DTA 144(1989)117

Development of ceramics from organosilicon polymers by heat treatment 144(1989)159

Binary and ternary compounds, phase diagrams and contaminations in the $YO_{1.5}$-BaO-CuO system auxiliary to superconducting ceramics (Review) 148(1989)235

Cerium

Determination of the free enthalpy of formation of the distinct compounds $LaBi_2$ and $CeBi_2$ (in French) 115(1987)167

Cerium complexes

Thermal decomposition of complexes $[Co(NH_3)_6](M^I)_3[Ln(SO_4)_3]_2 \cdot nH_2O$ (M^I = NH_4, Rb; Ln = La, Ce, Pr) 126(1988)289

Cerium compounds

Kinetic and x-ray powder diffraction studies on hydrated tris(indole-3-acetato)M(III) (M = Ce, Pr, Nd) 126(1988)393

Cerium(III) compounds

Equilibrium analysis of Nd(III)–NAA, Pr(III)–NAA and Ce(III)–NAA systems 144 (1989)173

Cerium(III) sulphate

Reaction kinetics at linearly increased temperature. V. DTA and UV study of the oxidation of malonic, tartronic, glyoxylic and monobromomalonic acids by ceric sulphate in dilute sulphuric acid 101(1986)245

Cerium(IV)

Determination of submicrogram quantities of osmium based on its catalytic effect on the Ce(IV)–As(III) reaction 121(1986)367

Simple kinetic–thermometric determination of submicrogram quantities of ruthenium based on its catalytic effect on the Ce(IV)–As(III) reaction 127(1988)209

Cerium(IV) complexes

Thermal behaviour of uranium(VI) and cerium(IV) complexes of 1-(2′-hydroxybenzyl)-2-(2′-hydroxyphenyl)-benzimidazole 111(1987)369

Cerium oxide

Thermally induced changes in the ceria zirconia system 133(1988)113

Cerium plumbate

Determination of the free enthalpy of formation of the distinct compound $CePb_3$ (in French) 112(1987)307

Chabazite tuff

Solar energy storage by natural zeolites. V. Optimization of the thermal activation process of chabazite tuff 135(1988)379

Chalcogenides

Effects of temperature and frequency changes on the dielectric properties of modified chalcogenides 120(1987)231

Effect of the side chain structure on the glass transition temperature. Part 4. Molecular weight dependence of T_g in chalcogenides containing poly(methacrylates) 146(1989)137

Chalcogen ions

Relations between the heats of formation of the alkali chalcogenides and the electronegativities of the chalcogen ions (O, S, Se and Te) 130 (1988)115

Characteristic temperatures

Peak heights and characteristic temperatures of differential thermoanalysis curves of one-step processes (in German) 112(1987)81

Use of the "shape factors" as an empirical method to determine the actual characteristic temperatures of binary phase diagrams by differential scanning calorimetry 128(1988)45

Charged particle

The role of microdosimetry in heavy charged particle induced thermoluminescence dose response 135(1988)127

Charge transfer

Stoichiometry, thermodynamic functions and stability of some charge transfer complexes 105 (1986)303

Electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives 114 (1987)265

Electrical and spectrophotometric properties of charge-transfer complexes of some anthracene derivatives 147(1989)57

Charge transfer complexes

Electrical properties of charge transfer complexes of diaminonaphthalene donors with dinitro- and trinitrobenzene acceptors 140(1989)277

Stoichiometry and stability of some solid state charge transfer complexes formed in imidazole–hydrocarbon systems 142(1989)371

Chars

On the role of the Boudouard reaction in the isothermal reduction of iron ore by char and graphite 111(1987)89

Catalysis by alkali and alkaline earth metals of the gasification in CO_2 and in steam of chars from a bituminous coal with high inorganic matter content 125(1988)79

Cheese

Thermoanalytical techniques applied to the analysis of an italian soft cheese: a critical comparison with the official methods of analysis 144(1989)301

Chelated compounds

Thermal and electrical studies on some two-dimensional chelated compounds 140(1989)229

Chelates

Infrared and thermal investigations of 1,10-phenanthroline *N,N′*-dioxide chelates of zinc(II) and cadmium(II) 101(1986)389

Spectral and thermal studies of some bivalent metal chelates of various hydroxy-quinones 104 (1986)39

Infrared and thermal studies of 1,10-phenanthroline-mono-***n***-oxide chelates of zinc(II) and cadmium(II) 105(1986)377

Thermochemical properties of the chelate complexes of some 3*d*-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione Part II. Complexes of nickel(II), copper(II) and zinc(II) 119(1987)311

Potentiometric, IR and thermal conductimetric studies on chelates of chromotropic acid with some transition metals 125(1988)163

Structure, thermal behaviour and solid state kinetics, of bis-(5-sulphosalicylato)-diaquo metal chelates of bivalent metal ions 127(1988)37

Kinetic parameters of thermal decomposition of bis(2-OH-1-naphthaldoxime) chelates using freeman–carroll equation 140(1989)97

The use of thermal and spectrometric analyses for the structure investigation of arylhydrazone-acetoacetylaminopyridines and their copper chelates 146(1989)1

Chelation

Thermal studies on the chelation behaviour of bivalent metal complexes of biologically active 2-hydroxy-1-naphthaldehyde monosemicarbazone (HNAS) 126(1988)1

Chemical flux reactivities

Structural properties and chemical flux reactivities of aqueous suspensions of mixtures of potassium tetrafluoroborate and potassium fluoride 107(1986)321

Chemical reactions

DTA as a method of studying chemical reactions at high pressures 113(1987)233

Measuring energy–entropy competition and compensation in chemical reactions: a theoretical study of the role of entropy in the formation of van der Waals complexes 118(1987)79

Chemical vapour deposition

Calculation of the Gibbs free energy of formation of titanium carbide TiC_y using the sublattice method. Application to the determination of chemical vapour deposition diagrams (in French) 147(1989)1

Chemisorption

Mathematical analysis of the effects of surface heterogeneity in chemisorption: a new/old model 148(1989)173

Chemotherapeutics

Listeria monocytogens – microcalorimetric investigations regarding the antibacterial efficiency of chemotherapeutics 119(1987)113

Chiral interactions

Calorimetric determination of chiral interactions in aqueous solutions, Part 2. *N*-acetyl-leucinamide at 298.15 K 122(1987)105

Chloride system

Phase diagram studies of chloride system – common and not-so-common methods 114 (1987)67

Chlorinated acetates

Synthesis of the hydrates of chlorinated acetates of rare earths and their thermal behaviour 123 (1988)23

Chlorination

Chlorination reactions of gibbsite and its thermal decomposition products with phosgene 115 (1987)269

Kinetics of the selective chlorination of ilmenite 124(1988)205

The effect of the surface hydroxyls on the chlorination kinetics of alumina 149(1989)205

Chlorine

Thermodynamic and kinetic study on the adsorption of chlorine on alumina 102(1986)349

TG and DSC studies of the surface reaction of γ-Al_2O_3 with Cl_2 107(1986)171

Ion association of Cl^- with Na^+, K^+, Mg^{2+} and Ca^{2+} in aqueous solution at $10 \leqslant T \leqslant 45\,^\circ C$ and $0 \leqslant I \leqslant 1$ mol l^{-1}. a literature data analysis 115 (1987)241

Chloroalkanes

Thermodynamics of binary mixtures of alkanone–chloroalkane. I. Heat of mixing of n-alkanone–1-chlorohexadecane mixtures at 298.15 K 128(1988)209

Chloroform

Thermodynamic investigation of the system perrhenate–tetrazolium salt–water–chloroform 107(1986)123

Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. V. Excess enthalpies of (deuterochloroform + methyl methylthiomethyl sulfoxide), (deuterochloroform + dimethyl sulfoxide) and (deuterochloroform + chloroform) at 298.15 K 123(1987)293

Thermochemical investigations of associated solutions. 9. Prediction of excess enthalpies of ternary acetone + cyclohexane + chloroform mixtures from measured binary data 145(1989) 245

Chlorohexamminecobalt(II) chloride

Derivatographic thermoanalysis of $[Co(NH_3)_5Cl]Cl_2$ 145(1989)189

Chlorohexanedecane

Thermodynamics of binary mixtures of alkanone–chloroalkane. I. Heat of mixing of n-alkanone–1-chlorohexadecane mixtures at 298.15 K 128(1988)209

Chloroiodobenzene

The system *p*-dibromobenzene + *p*-chloroiodobenzene + *p*-bromoiodobenzene–a methodological study on thermal analysis and thermodynamic phase-diagram analysis 146 (1989)297

Chloromaleanilic acid

Thermochemistry for the formation of methyl and chloro maleanilic acid complexes of bivalent transition metal ions 105(1986)231

Chloronaphthalene

Excess molar volumes and heat capacities of (1,2,4-trichlorobenzene + an *n*-alkane) and (1-chloronaphthalene + an *n*-alkane) 105(1986)101

Chlorostannates(IV)

Examination of the thermal decomposition of chlorostannates(IV) 116(1987)217

Chlorothiocyanatobismuthates(III)

Studies on thermal decomposition of caesium–sodium chlorothiocyanatobismuthates(III) 137(1988)337

Cholesteryl cinnamates

Phase transitions of cholesteryl cinnamates 148 (1989)335

Chromates

Characterisation of some new chromates $M_2Fe_3(OH)_5(CrO_4)_3 \cdot 3H_2O$ (M = Li, Na) 137 (1988)197

Chromite

The effect of additives on the reduction of chromite by graphite: an isothermal kinetic study 127(1988)25

Chromium

Thermal behaviour of some phosphorus/chromium polyoxoanions 103 (1986)267

A thermodynamic study of the Cu–Cr–O system by the EMF method 103(1986)361

Reactivity of MoO_3 towards $Cr_2 2V_4O_{13}$ 133 (1988)67

Evidence of the role of non-stoichiometry in Zn-Cr catalysts by thermal investigations 133 (1988)155

Thermal and spectroscopic investigations of some chromium coordination compounds with the application of computer methods 133(1988)365

Chromium carbide

Oxidation of chromium carbide 103(1987)193

Chromium complexes

Thermal degradation of transition metal carbonyl complexes. Part III. Thermogravimetric and differential scanning calorimetric studies of triphenylphosphine pentacarbonyls of chromium, molybdenum and tungsten 128(1988)175

Chromium dioxide

Kinetic parameters for the thermal decomposition reactions of CrO_3 in air 143 (1989)347

Chromium(III)

Reactions of single Cr(III)–P(V)Mo(VI) and double Cr(VI)–P(V)Mo(VI) phase systems in molten KNO_3 132(1988)155

Chromium(III) molybdate

Studies on chromium(III) molybdate and equilibria in the $CrVO_4$–$Cr_2(MoO_4)_3$ system 150(1989)133

Chromium(III) nitrate nonahydrate

Study on the thermal decomposition of chromium(III) nitrate nonahydrate (CNN) 115 (1987)137

Chromium(III) oxide

A thermoanalytical study of the solid state reactions in the Cr_2O_3–Na_2CO_3–O_2 system 120 (1987)9

Chromium nitrate

Thermal and spectroscopic characterization of reaction products of Al-nitrate–Cr-nitrate interaction at various temperatures 141(1989)277

Thermal and spectroscopic characterization of reaction products of aluminium hydroxyacetate–chromium nitrate interaction at different temperatures 144(1989)141

Chromium oxide

Reduction reactivity of CuO–Cr_2O_3 mixed oxides with hydrogen and the effect of gamma pre-irradiation 119(1987)261

Study of copper–chromium oxide catalyst. II. Crystal data and thermal decomposition of basic copper(II) ammonium chromate 145(1989)19

Chromium sulphides

Thermal analysis and kinetics of oxidation of Cr_3S_4 and Cr_2S_3 133(1988)215

Chromium vanadate

The $CrVO_4$–MoO_3 system 150(1989)125

Studies on chromium(III) molybdate and equilibria in the $CrVO_4$–$Cr_2(MoO_4)_3$ system 150(1989)133

Chromium(VI)

Reactions of single Cr(III)–P(V)Mo(VI) and double Cr(VI)–P(V)Mo(VI) phase systems in molten KNO_3 132(1988)155

Chromium(VI) compounds

Molten calcium nitrate tetrahydrate: the reactions of six chromium(VI) compounds 106 (1986)361

Chromotropic acid

Potentiometric, IR and thermal conductimetric studies on chelates of chromotropic acid with some transition metals 125(1988)163

Chrysene

Precursor states for the graphitization of naphthalene, anthracene, phenanthrene and chrysene 108(1986)211

Cimetidine

Thermal study of ternary complexes of Cu(II), cimetidine and phenobarbitone 102(1986)257

Thermal study of cobalt(II), copper(II) and nickel(II) complexes of cimetidine 104(1986)31

Cimetidine metal complexes

Thermal decomposition of metal complexes of cimetidine 130(1988)213

Cinchocaine

Thermal decomposition of silicon derivatives of cinchocaine 116(1987)79

Cinnamic acid

Studies in solid state reactions between basic copper carbonate with cinnamic, succinic and adipic acids 124(1988)197

Cinoxacin

Study of the thermal decomposition of cinoxacin complexes with Co(II), Ni(II) and Cu(II) 106 (1986)333

Classification

Suggested practice for classification of calorimeters 109(1986)121

"Kinetic variations". Attempt of a classification of the dynamic thermal analysis methods to describe the dynamics of solid state reactions based on thoughts of Paul Klee (in German) 112(1987)13

Clay

Thermal investigation of acid-activated clay minerals 119(1987)293

The present state of thermal investigations of clays (Review) 148(1989)413

Clay minerals

X-ray studies on dehydration and rehydration of expansible clay minerals 135(1988)285

Cloud point

Determination of cloud point for petroleum middle distillates by differential scanning calorimetry 114(1987)125

Cluster model

A cluster model of the gas-phase water 114 (1987)273

Clusters

Computational study of relative stabilities of $C_{60}(I_h)$ and $C_{70}(D_{5h})$ gas-phase clusters 125 (1988)155

On relative stability reasoning for clusters of different dimensions: an illustration with the C_{60}–C_{70} system 140(1989)87

Coal

High temperature, high pressure thermogravimetry of coal gasification apparatus, data acquisition and numerical evaluation 103 (1987)163

Physicochemical characterization of coal and coal reactivity: a review 108(1986)357

Coal characterisation by thermal analysis 110 (1987)527

TA-MS investigations of coal westerhold and its related asphaltene and asphaltole 112(1987)101

Interaction of coals with oxygen at temperatures up to 600 °C 113(1987)217

Thermal behaviour in steam of a bituminous coal doped with alkali and alkaline earth metals 113(1987)277

An approach with use of EGA to the mechanism of sulfur release during coal combustion 114 (1987)171

High-pressure, high-temperature thermodynamic properties of a coal-derived liquid 115(1987)83

Thermal behaviour in air of a bituminous coal with high mineral matter content doped with compounds of alkali and alkaline earth metals 116(1987)101

Transport of penetrants in the macromolecular structure of coals. VIII. Transport mechanism as a function of temperature 116(1987)153

Characterization of the low-temperature ash component of the herrin 6 coal seam (southwestern illinois) by thermal methods of analysis 121(1987)71

Simultaneous thermal analysis–mass spectrometric investigations of volatiles released from coal samples 121(1987)87

Catalysis by alkali and alkaline earth metals of the gasification in CO_2 and in steam of chars from a bituminous coal with high inorganic matter content 125(1988)79

Effect of calcium chloride and calcium acetate on the reactivity of a lignite coal at low heating rate 125(1988)285

A comparative thermoanalytical study of low-temperature reactivity of brown coal with dioxygen and radiofrequency-activated oxygen 134(1988)333

The study of coal by thermal analysis, advantages and disadvantages 134(1988)359

The study of coal by thermal analysis. The effect of measuring conditions on thermal analysis results 148(1989)541

Derivation of the specific energy of victorian brown coal from proximate and ultimate analyses 149(1989)269

Coal-derived liquids

Thermal expansion of coal-derived liquids 113 (1987)67

High-pressure, high-temperature thermodynamic properties of a coal-derived liquid 115(1987)83

Coatings

Thermal analysis of epoxy powder coatings 134 (1988)291

Cobalt

Studies of the crystallization processes of amorphous Zr-Co based alloys by DSC 114 (1987)35

Thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel 114(1987)329

Studies on thermal decomposition reactions of cobalt, nickel and zinc thiocyanatobismuthates (III) 148(1989)319

Cobalt-oxygen bond

Standard enthalpy of formation of tris(2,4-pentanedionato)cobalt(III): the mean (Co–O) bond-dissociation enthalpy 129(1988)229

Cobalt amino acid complexes

The behaviour of some cobalt, nickel and copper amino acid complexes at different temperatures 128(1988)75

Cobaltammine complexes

Preparation, characterization and thermal studies of the paramolybdates of some cobaltammine complexes 143(1989)59

Cobalt carbonate

Thermal decomposition of basic carbonates of copper, zinc and cobalt under high pressures 106(1986)263

Cobalt complexes

Thermal decomposition of the complexes $[Co(NH_3)_6][Nd(SO_4)_3] \cdot nH_2O$ 102(1986)373

Thermal decomposition of complexes $[Co(NH_3)_6](M^I)_3[Ln(SO_4)_3]_2 \cdot nH_2O$ (M^I = NH_4, Rb; Ln = La, Ce, Pr) 126(1988)289

Thermal, structural and electrical studies of the chloro complexes of cobalt, nickel, copper and zinc with 2-methylquinoxaline 145(1989)291

γ-irradiation effects on the electrical conductivity of some two-dimensional complexes: $RMnCl_4$, $RCoCl_4$ and $RMn_{0.5}Co_{0.5}Cl_4$ (R = $H_3N-(CH_2)_8-NH_3$) 146(1989)87

Cobalt compounds

The reactions of some compounds of iron, cobalt and nickel with the molten lithium carbonate–sodium carbonate–potassium carbonate eutectic 132(1988)45

Cobalt dicytosine chloride

Enthalpy of formation of $Co(cytosine)_2Cl_2$ 131 (1988)95

Cobalt dithiophosphinate

Thermogravimetric studies on the addition compounds of cobalt and nickel dithiophosphinates with picolines and acetylpyridines 128(1988)301

Cobalt ferricyanide

Thermal decomposition of supported $Co_3[Fe(CN)_6]_2$ in hydrogen 150(1989)185

Cobalt hydrazido-carbonate

Thermal properties of hydrazido-carbonates of cobalt and nickel in an inert atmosphere 144 (1989)257

Cobalt hydroxide nitrates

On the thermal decomposition of some cobalt hydroxide nitrates 106(1986)283

Cobalt(II)

A thermometric titration study of the interaction of Co^{2+} with metallochromic indicators 122 (1987)163

Thermal, spectral, magnetic and electrical studies of cobalt(II) and nickel(II) with 3-(3-pyridyl)acrylic acid 137(1988)205

Kinetic thermometric determination of Co(II) and Cu(II) based on their catalytic effect on permanganate decomposition in basic media 137(1988)263

Complex formation of cobalt(II) and copper(II) with macrocyclic polyethers in propylene carbonate 137(1988)331

Cobalt(II)-5′-adenosine monophosphate complex

Automatic batch calorimetry: application to the determination of the thermodynamic parameters of Co(II)-5′ adenosine monophosphate complex formation 141(1989)141

Cobalt(II) acetoacetanilidehydrazone complexes

Thermodynamic and spectrophotometric studies of acetoacetanilidehydrazone complexes of Cu(II), Ni(II) and Co(II) metal ions 128(1988)81

Cobalt(II) chloride

Solid state kinetic parameters of the dehydration of $CoCl_2 \cdot 6H_2O$ by isothermal thermogravimetric measurements 102(1986)125

Determination by "entropy titration" of the variations of enthalpy, free enthalpy and entropy accompanying the reaction of cobalt(II) chloride with (furyl-2)-3-propen-2-aldoxime in ethanolic medium (in French) 149(1989)87

Cobalt(II) complexes

Study of the thermal decomposition of bromazepan-thiocyanate complexes of Fe(II), Co(II), Ni(II) and Cu(II) 101(1986)83

Thermal decomposition kinetics of salicylidene-aminofluorene complexes of cobalt(II) and nickel(II) 101(1986)145

Thermodynamics of the complexation of Fe(II), Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) with 6,7-dihydro-3(h)-methyl-5-methylthio-7-oxo-vic-triazolo(4,5-*d*)pyrimidine 102(1986)47

Dissociation of 5-nitroso-2,4,6-triamino-pyrimidine and stability of its complexes with Co(II), Ni(II) and Cu(II) 102(1986)163

Thermal study of cobalt(II), copper(II) and nickel(II) complexes of cimetidine 104(1986)31

Thermal study of mepirizol complexes with Co(II), Ni(II), Cu(II) and Zn(II) 106(1986)155

Study of the thermal decomposition of cinoxacin complexes with Co(II), Ni(II) and Cu(II) 106 (1986)333

Phase transition and decomposition of A_2MX_4 [$A = (C_2H_5)_4N$; M = Co(II), Ni(II) and Cu(II); X = Cl and Br] in the solid state 108(1986)97

The stability and thermodynamic functions of 4-amino-1,6-dihydro-1-methyl-2-methylthio-5-nitroso-6-oxo-pyrimidine complexes with Mn(II), Fe(II), Co(II), Ni(II) and Cu(II) 108(1986)181

Spectral, magnetic and thermal investigations on Cu(II), Ni(II) and Co(II) complexes with 3-(*p*-dimethyl amino-anilino)-methyl salicylic acid hydrazide 111(1987)385

Alizarine red S complexes of Mn(II), Co(II) and Ni(II) 113(1987)209

Thermal behavior of cobalt(II) and manganese(II) complexes of 1-(2′-hydroxybenzyl)-2-(2′-hydroxyphenyl)-benzimidazole 117(1987)385

On the formation of mononuclear and binuclear complexes of pentadentate N_4O_2 Schiff base ligands with Co(II), Ni(II) and Cu(II) ions: TGA, spectral and conductance studies 126(1988)235

Thermal and spectral studies of some mixed ligand complexes of Co(II), Ni(II) and Cu(II) involving aliphatic and heterocyclic β-diketone 129(1988)161

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Cobalt(II) compounds

Thermal studies on pyridine-2,3-dicarboxylic acid compounds of manganese(II), iron(II), cobalt(II) and nickel(II) 116(1987)275

Thermal studies on acetylenedicarboxylic acid compounds of iron(II), cobalt(II), nickel(II), copper(II) and zinc(II) 117(1987)51

Thermal and electrical studies on pyrazine-2,3-dicarboxylic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 124 (1988)345

Standard enthalpies of formation of bis(fluoro-substituted pentane-2,4-dionato) hydrates of Mn(II), Co(II) and Ni(II): the mean (M–O) bond dissociation enthalpies 139(1989)33

Thermal studies on maleic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 143(1989)283

Cobalt(II) coordination compounds

Thermal stability and nonisothermal decomposition kinetic study of some coordination compounds of $Ni^{(II)}$ and $Co^{(II)}$ 149(1989)189

Thermal stability and non-isothermal kinetic study of two coordination compounds of cobalt(II) with ligands derived from thioamides and ethylendiamine 149(1989)251

Cobalt(II) crotonates

Thermal studies on fumaric acid and crotonic acid compounds of cobalt(II) and nickel(II) 141 (1989)227

Cobalt(II) determination

A sensitive kinetic–thermometric method for Co(II) determination based on the tiron–hydrogen peroxide reaction 117(1987)89

Cobalt(II) determination at ppb levels based on its catalytic effect on the hydrazine–hydrogen peroxide reaction. Study by thermometric method 130(1988)241

Cobalt(II) fumarates

Thermal studies on fumaric acid and crotonic acid compounds of cobalt(II) and nickel(II) 141 (1989)227

Cobalt(II) halide complexes

Thermogravimetric analysis of cobalt(II) halide complexes with a series of substituted pyridine ligands 113(1987)161

Evaluation of kinetic parameters for the thermal decomposition of piperonaldehyde thiosemicarbazone complexes of cobalt(II) and zinc(II) halides 146(1989)149

Cobalt(II) halo compounds

The thermal, spectral and magnetic studies of chloro and bromo compounds of cobalt(II), nickel(II) and copper(II) with melamine 115 (1987)21

Cobalt(III) diphenylcarbazonate complexes

Thermal and spectroscopic characterization of Co(III) and Ni(II) diphenylcarbazonate complexes 132(1988)265

Cobalt(II)–isoniazid complex

Thermochromism of the cobalt(II)–isoniazid complex in the solid state 147(1989)65

Cobalt(II) methanesulphonates

Thermal decomposition of Co(II), Cu(II) and Zn(II) methanesulfonates 124(1988)9

Cobalt(II) *p*-toluenesulphonate

Thermal decomposition of Co(II), Ni(II), Cu(II), Zn(II), Cd(II) and Pb(II) *p*-toluenesulphonates 146(1989)341

Cobalt(II) perchlorate

Heats of transfer of cobalt(II) perchlorate from pure to mixed solvents 143(1989)161

Cobalt(II) porphyrin compounds

Thermal and electrical studies on porphyrin compounds of cobalt(II), copper(II) and zinc(II) 143(1989)67

Cobaltocene

Vapour pressures and enthalpies of sublimation of ferrocene, cobaltocene and nickelocene 124 (1988)179

Cobalt oxides

Mn, Co oxides prepared by the thermal decomposition of carbonates 133(1988)257

Cobalt zinc ferrite

Electrical conduction in γ irradiated and unirradiated Fe_3O_4, $CdFe_2O_4$ and $Co_xZn_{1-x}Fe_2O_4$ ($0 \leqslant x \leqslant 1$) ferrites 144(1989)45

Coefficient values

Discussing coefficient values of the compensation for thermal dissociation reactions of the type a(solid) $\rightleftharpoons$ b(solid) + c(gas) 124(1988)385

Coir fibres

Thermal behaviour of coir fibres 108(1986)188

Colemanite

Thermal decomposition of colemanite 126(1988) 307

Colloids

Thermal and colloidal stability behaviour of overbased petroleum sulphonate additives 132 (1988)253

Combusion

Vacuum microbalance studies on the combustion of Saraji coal 103(1987)157

Investigations of the combustion products of flame-protected impact resistant polystyrene 112(1987)75

An approach with use of EGA to the mechanism of sulfur release during coal combustion 114 (1987)171

Combustible materials

Study on the burning characteristics of the combustible materials based on carbon black and cellolignine by thermal analysis method 134 (1988)339

Combustion

Combustion experiments of polystyrene by use of a modified bayer–ici–shell apparatus 103 (1986)231

TGA/DSC techniques as research tools for the study of the in-situ combustion process 106 (1986)63

Thermolabile hydrocarbons. XXIX. Combustion and sublimation enthalpies of tri-*tert*-butylmethane (in German) 107(1986)331

The energy of combustion of liquid 1,2-dichlorotetrafluoroethane 109(1986)175

Determination of enthalpy of formation of a solid solution in the Ti–S system by combustion calorimetry 109(1986)181

TG study of sorbent materials for desulfurization of combustion gases at high temperature 114 (1987)103

Heats of combustion and formation of norbornane 121(1987)473

Enthalpy of combustion of triphenylarsine oxide 131(1988)107

An equilibrium analysis of combustion of industrial waste materials 134(1988)347

Combustion gases

Kinetic investigation of sorbents for desulfurization of combustion gases measured with a tubular reactor/TG combination 135 (1988)139

Compartment models

Thermokinetic compartment models of thermal decomposition reactions 112(1987)179

Compatibility

Compatibility of blends of poly(butylene terephthalate) and liquid crystal polymers: A DSC study 137(1988)105

Compensation calorimetry

Principle and experimental verification of compensation calorimetry 123(1988)93

Compensation effect

Significance of kinetic compensation effect in the thermal decomposition of a solid 135(1988)79

Compensation parameter

Use of a compensation parameter in the thermal decomposition of copolymers 107(1986)379

Competition reactions

Complex formation of crown ethers and cryptands with mono- and bivalent cations studied by calorimetric competition reactions 102(1986)179

Complexation

Thermodynamics of the complexation of Fe(II), Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) with 6,7-dihydro-3(h)-methyl-5-methylthio-7-oxo-vic-triazolo(4,5-*d*)pyrimidine 102(1986)47

Thermodynamic studies of the complexation reaction involving trivalent metal ions and benzil-4-methyl-2-quinolylhydrazone (BMQH) 144(1989)13

Complexation equilibria

Investigations of the complexation equilibria and thermodynamic parameters of biologically active *o*-vanillinsemicarbazone with lanthanon(III) ions 140(1989)271

Complex chemical reactions

Analysis of irreversible complex chemical reactions and some observations on their overall activation energy 128(1988)185

Complexes

X-ray *K*-absorption as a probe for investigating thermal behaviour of complexes: related thermal and X-ray *K*-absorption studies on copper(II) salicylhydroxamate 132(1988)25

Complex formation

Thermodynamics of complex formation reactions in non-aqueous solvents. part 3. the reaction of $VO(acac)_2$ with pyridine 145(1989)353

Complexing

Complexing behaviour of 2-hydroxy-3-(-3-methyl-2-butenyl)-1,4-naphthalenedionesemicarbazone 104(1986)383

Composites

Quantitative thermal characterization of carbon–epoxy composites using differential scanning calorimetry and thermogravimetric analysis 125(1988)191

Composition

Compositional analysis of waterborne paint systems by thermogravimetry 106(1986)79

Thermal decomposition of lignocellulosic materials: influence of the chemical composition 143(1989)149

Computation

Computation of activation energy spectrum — a new approach 101(1986)365

Computers

Computer-determined kinetic parameters from TG curves. Part XVI 105(1986)375

Computer-determined kinetic parameters from TG curves. Part XVII 106(1986)379

Acquisition and numerical analysis of thermoanalytical data by microcomputer, applied to an existing flow microcalorimeter 107(1986) 101

Derivatograph-C: a microcomputer automated equipment for simultaneous TG, DTG, DTA, EGA and TD 107(1986)375

Report on the workshop: the use of computers and data storage in everyday thermoanalytical practice 110(1987)67

Remarks on computerized statistical analysis 110(1987)76

Data acquisition from a differential thermal microanalyzer with a low-cost microcomputer 111(1987)75

Instantaneous heat effect estimated with microcomputer-aided heat exchange calorimetry involving analog computation 111(1987)167

Computer-determined kinetic parameters from TG curves. Part XVIII 111(1987)379

Computer-aided simultaneous TA-MS investigations of beat-resistant polystyrene 112 (1987)107

Computer controlled forced stepwise isothermal analysis 114(1987)131

Computer-determined kinetic parameters from TG curves. Part XIX 116(1987)367

Computer program of calculation method for a constant-environment calorimeter 117(1987)167

Computer-aided acquisition and processing of data for caloric measurements with isoperibol calorimeters 119(1987)59

Computer-determined kinetic parameters from TG curves. Part XX 119(1987)383

Computer-determined kinetic parameters from TG curves. Part XXI 124(1988)139

Calculation computer program for a quasi-adiabatic calorimeter 124(1988)185

VALTER, a computing program for automatic thermometric titrations 128(1988)9

Computer evaluation of non-isothermal kinetic parameters from TG data 130(1988)369

On the experimental evaluation of a Reich and Stivala computer algorithm by House et al. 130 (1988)381

Thermal and spectroscopic investigations of some chromium coordination compounds with the application of computer methods 133(1988)365

Use of a BBC microcomputer for the collection and processing of thermal analysis data 136 (1988)307

Calorimetric heat of transition assignments by microcomputer-based differential thermal analysis. Part I. The α–δ (monoclinic to cubic) transition of bismuth(III) oxide 137(1988)353

Calorimetric heat of transition assignments by microcomputer-based differential thermal analysis. Part II. The γ–β (orthorhombic to hexagonal) transition of barium carbonate 137 (1988)365

Computer analysis of equilibrium data in solution. ES5CM FORTRAN and BASIC programs for computing formation enthalpies from calorimetric measurements 138(1989)141

A computer program for kinetic analysis of non-isothermal thermoanalytical data 138(1989)337

A computing method for drawing the DSC baseline 150(1989)53

Concrete admixtures

Hydration of dicalcium silicate in the presence of concrete admixtures 118(1987)143

Condensation

Detection of adsorbed or condensed water films with the aid of thermal oscillations 119(1987)37

Conductance

Spectral and thermal conductance studies of some symmetric 1,5-diphenyl-3-cyanoformazans. SCF PPP CI calculation 138(1989)129

Conduction

Thermal effect on formation and conduction mechanism of $MnFe_2O_4$ 105(1986)1

Conduction calorimeter

Method for correcting the time lag of a conduction calorimeter and its application 123 (1988)177

Conduction calorimetry

Conduction calorimetry and reagent lack: measurement of the excess partial molar enthalpies extrapolated to infinite dilution (in French) 114(1987)373

Conduction calorimetry and reagent flow rate: measurement of partial molar excess enthalpies at high dilution, determination of the integral size (in French) 129(1988)217

Conductivity

Thermoelectrical conductivity of $Ge_{20}Bi_{15}S_{65}$ as a complementary method to differential thermal analysis 110(1987)281

Vapour pressure, heat of evaporation and thermal conductivity determination by means of the C 80 calorimeter 114(1987)91

The measurement of thermal conductivity by differential scanning calorimetry 115(1987)345

A method for the determination of thermal conductivity of sheet materials by differential scanning calorimetry (DSC) 126(1988)93

Thermal diffusivity and thermal conductivity studies on europium, gadolinium and lanthanum pyrohafnates 140(1989)103

Wide range determination of thermal conductivity by differential scanning calorimetry 140(1989)139

Thermal analysis and conducting properties of polymers of diethynylbenzene and diethynylpyridine 141(1989)27

Thermal analysis, conducting properties and electrochemical applications of some conductor-doped polymers. Part 2. 141(1989)41

Correlation of the thermal conductivity of saturated vapours 141(1989)113

Electrical conduction in γ irradiated and unirradiated Fe_3O_4, $CdFe_2O_4$ and $Co_xZn_{1-x}Fe_2O_4$ ($0 \leqslant x \leqslant 1$) ferrites 144(1989)45

Thermal analysis, conductivity and electrochemical applications of phenylacetylene and benzylpropargylamine polymers. Part 3 146 (1989)161

Thermal conductivity and diffusivity measurements hy the transient two linear and parallel probe method 148(1989)513

Conductor-doped polymers

Thermal analysis, conducting properties and electrochemical applications of some conductor-doped polymers. Part 2. 141(1989)41

Conformation

Conformational analysis of dibromo-1,2-cyclohexane by microcalorimetry (in French) 130(1988)121

Conformational disorder

The detection of conformational disorder by thermal analysis (Ankor Plenary Lecture) [abstract] 135(1988)8

Consistency test

A rigorous rule for temperature extrema of isomer enthalpy and entropy terms: consistency test of data 142(1989)343

Constant-environment calorimeter

Computer program of calculation method for a constant-environment calorimeter 117(1987)167

Constant rate thermal analysis

Development of a new equipment for using the constant rate thermal analysis (CRTA) under flow of inert or reactive gases 134(1988)365

Contamination

Binary and ternary compounds, phase diagrams and contaminations in the $YO_{1.5}$-BaO-CuO system auxiliary to superconducting ceramics (Review) 148(1989)235

Continuous gradient method

Continuous gradient method in flow microcalorimetry. Part I. Relation between electrical and chemical calibration 113(1987)125

Continuous gradient method in flow microcalorimetry. Part II: Application to solution equilibria 122(1987)153

Controlled transformation rate thermal analysis

Controlled transformation rate thermal analysis: the hidden face of thermal analysis 144(1989)209

Convection

The influence of convection on weighing 103 (1987)45

Conversion

Nonisothermal kinetic equations with parameters depending on the degree of conversion 135 (1988)193

Cooling

Effect of cure enthalpy on cure progress during the cooling period in motionless air 102(1986)83

Mathematical laws for the steady state and cooling in a metallic bar 143(1989)211

Cooling rates

A new DSC for high heating and cooling rates measurements 134(1988)389

Cooperativity functions

Cooperativity functions and site binding constants in polyprotic acids 140(1989)203

Coordination compounds

On the thermal stability of some coordination compounds generating mixed oxides with perovskitic structure. III 111(1987)353

Thermal and spectroscopic investigations of some chromium coordination compounds with the application of computer methods 133(1988)365

Synthesis of rare earth coordination compounds of salicylaldehyde-β-alanine Schiff base and their thermal behaviours 133(1988)377

Thermal stability and nonisothermal decomposition kinetic study of some coordination compounds of $Ni^{(II)}$ and $Co^{(II)}$ 149(1989)189

Copolymer ABS

On the thermal decomposition of the copolymer ABS and of nylon polyamide 149(1989)181

Copolymers

Use of a compensation parameter in the thermal decomposition of copolymers 107(1986)379

Thermal characterization of starch-g-acrylonitrile copolymers 115(1987)189

Copper

A thermodynamic study of the Cu–Cr–O system by the EMF method 103(1986)361

Copper(II) determination by means of a thermometric method based on its catalytic effect on the hydrazine–hydrogen peroxide reaction 112(1987)335

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Optical microscopy and simultaneous thermosonimetry of a microplate 113(1987)171

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reversibility versus irreversibility via acoustic emission 116(1987)195

Kinetics of martensitic transformation in CuAlNi-43# alloy 123(1988)9

On phases and characterisation of quenched $YBa_2Cu_3O_x$ 132(1988)35

Thermal analysis in the M-Ba-Cu-O systems (M = Y, La, Pr) in relation to high T_c superconductors 133(1988)17

Use of emanation thermal analysis in characterization of $YBa_2Cu_3O_x$ 133(1988)23

The stability of $YBa_2Cu_3O_x$ in different atmospheres, by TGA 133(1988)33

Comparative study on the heat capacity of $ABa_2Cu_3O_{7-x}$ high T_c superconducting compounds (A = Y, Eu, Ho) 133(1988)49

Substitution effects on the T_c of $RBa_2Cu_3O_2$ (R = Y and Eu) 133(1988)55

Phase diagram of the pseudobinary $BaCuO_2$–$YBa_2Cu_3O_{6.5}$–$YCuO_{2.5}$ system 136 (1988)263

Heat capacity measurements of the high T_c superconductor $YBa_2Cu_3O_{7-x}$ 137(1988)65

Reduction of $Ba_2YCu_3O_7$ and $Y_2Cu_2O_5$ BY H_2 137(1988)373

Low temperature specific heat and electrical resistivity of $UCu_{4.5}Al_{7.5}$ 139(1989)219

Structural relaxation, glass transition and crystallization of Cu–Zr amorphous ribbons studied by dilatometry and differential scanning calorimetry 142(1989)29

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. IV. Mechanism of perovskite formation from various starting materials 142 (1989)281

Thermogravimetric study of the transition copper valency in the superconductive system Y–Ba–Cu–O 143(1989)123

Study of copper–chromium oxide catalyst. II. Crystal data and thermal decomposition of basic copper(II) ammonium chromate 145(1989)19

γ precipitates in β-Cu–Zn–Al: influence on martensitic transformations 145(1989)237

Thermal studies on sulphonamide derivative complexes. Part 1. Thermal behaviour of acetazolamide–copper complexes 147(1989)321

Binary and ternary compounds, phase diagrams and contaminations in the $YO_{1.5}$-BaO-CuO system auxiliary to superconducting ceramics (Review) 148(1989)235

Thermal study of superconducting $Ba_2Cu_3RO_{7-x}$ (R = Y, Eu, Gd, Ho) 148(1989) 269

The thermal stability of $RBa_{2-x}K_xCu_3O_z$ (R = Y and Eu) 148(1989)275

Copper 2-ethylhexanoate

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. III. Preparation from mixed 2-ethylhexanoates of yttrium, barium and copper 140(1989)41

Copper alloys

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reproducibility of the thermal energy results and cycling effects 106(1986)209

Copper amino acid complexes

The behaviour of some cobalt, nickel and copper amino acid complexes at different temperatures 128(1988)75

Copper antimony oxide

Formation of new copper antimony oxides by solid state reaction between $CuSb_2O_6$ and CuO under atmospheric and high pressure 133(1988)73

Copper carbonate

Thermal decomposition of basic carbonates of copper, zinc and cobalt under high pressures 106(1986)263

Studies in solid state reactions between basic copper carbonate with cinnamic, succinic and adipic acids 124(1988)197

Copper complexes

Thermal, structural and electrical studies of the chloro complexes of cobalt, nickel, copper and zinc with 2-methylquinoxaline 145(1989)291

Copper compounds

Magnetic susceptibility of $(IPA)_2FeCl_4$, $(IBuA)_2FeCl_4$ and $(IPA)_2CuCl_4$ 150(1989)27

Copper hydroxyselenates

Comparison between the hydroxysulphates and hydroxyselenates of copper: study of the selenate monohydrate $CuSeO_4 \cdot 3Cu(OH)_2 \cdot H_2O$ and the anhydrous compound; of the sulphate pentahydrate $2CuSO_4 \cdot 3Cu(OH)_2 \cdot 5H_2O$ (in French) 111(1987)195

Copper hydroxysulphates

Comparison between the hydroxysulphates and hydroxyselenates of copper: study of the selenate monohydrate $CuSeO_4 \cdot 3Cu(OH)_2 \cdot H_2O$ and the anhydrous compound; of the sulphate pentahydrate $2CuSO_4 \cdot 3Cu(OH)_2 \cdot 5H_2O$ (in French) 111(1987)195

Copper(I) complexes

Thermal analysis of some methylhydrazine and methylhydrazinium complexes of copper(II), copper(I) and mixed valence species 130(1988)43

Copper(II)

Structure–stability relationship of copper(II)–indol carboxylic acid derivative complexes from spectrophotometric, thermogravimetric and potentiometric studies 114(1987)359

Design and testing of a microcalorimeter with semiconductor thermopiles as temperature sensor and study of the inclusion of Cu(II) with β-cyclodextrin 123(1988)85

Calorimetric determination of the heats of formation of competitive ternary mixed-ligand complex compounds. Copper(II)–*N*-acetylglycine–α-amino acid system 123(1988)201

Kinetic thermometric determination of Co(II) and Cu(II) based on their catalytic effect on permanganate decomposition in basic media 137(1988)263

Complex formation of cobalt(II) and copper(II) with macrocyclic polyethers in propylene carbonate 137(1988)331

Copper(II)-*N*-protected aminoacidates

Calorimetric and structural investigation of monomeric and dimeric copper(II)-*N*-protected aminoacidates 130(1988)67

Copper(II) 2-phenoxybutyrate

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of copper(II) complexes of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 149(1989)199

Copper(II) 2-phenoxypropionate

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of copper(II) complexes of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 149(1989)199

Copper(II) acetate

Solid and solution complexes of copper(II) acetate with pyridine: stoichiometry, spectral and thermodynamic characteristics 117(1987)59

Copper(II) adipates

Study of some solvated copper(II) adipates. I. Complexes with water, ammonia and pyridine (in French) 125(1988)23

Study of some solvated copper(II) adipates. II. Complexes with imidazole and its methyl derivatives (in French) 125(1988)35

Copper(II) ammonium chromate

Study of copper–chromium oxide catalyst. II. Crystal data and thermal decomposition of basic copper(II) ammonium chromate 145(1989)19

Copper(II) benzoates

Study of some solvated copper(II) benzoates (in French) 146(1989)39

Copper(II) bromide

A mechanistic investigation of the reaction between copper(II) malonate and copper(II) bromide 102(1986)323

Copper(II) chelates

Thermal studies on copper(II) chelates of some O-/N-donor ligands 124(1988)371

Kinetic parameters of the non-isothermal decomposition of Cu(II) chelates of *o*-hydroxychalcones 131(1988)299

Copper(II) complexes

Study of the thermal decomposition of bromazepan-thiocyanate complexes of Fe(II), Co(II), Ni(II) and Cu(II) 101(1986)83

Thermodynamics of the complexation of Fe(II), Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) with 6,7-dihydro-3(h)-methyl-5-methylthio-7-oxo-vic-triazolo(4,5-*d*)pyrimidine 102(1986)47

Dissociation of 5-nitroso-2,4,6-triamino-pyrimidine and stability of its complexes with Co(II), Ni(II) and Cu(II) 102(1986)163

Thermal study of ternary complexes of Cu(II), cimetidine and phenobarbitone 102(1986)257

Thermal study of cobalt(II), copper(II) and nickel(II) complexes of cimetidine 104(1986)31

Thermal study of mepirizol complexes with Co(II), Ni(II), Cu(II) and Zn(II) 106(1986)155

Study of the thermal decomposition of cinoxacin complexes with Co(II), Ni(II) and Cu(II) 106 (1986)333

Phase transition and decomposition of A_2MX_4 [$A = (C_2H_5)_4N$; M = Co(II), Ni(II) and Cu(II); X = Cl and Br] in the solid state 108(1986)97

The stability and thermodynamic functions of 4-amino-1,6-dihydro-1-methyl-2-methylthio-5-nitroso-6-oxo-pyrimidine complexes with Mn(II), Fe(II), Co(II), Ni(II) and Cu(II) 108(1986)181

Spectral, magnetic and thermal investigations on Cu(II), Ni(II) and Co(II) complexes with 3-(*p*-dimethyl amino-anilino)-methyl salicylic acid hydrazide 111(1987)385

Thermochemical properties of the chelate complexes of some 3*d*-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione Part II. Complexes of nickel(II), copper(II) and zinc(II) 119(1987)311

Thermal behaviour of copper(ii), iron(ii) and iron(iii) complexes of 1-(2′-hydroxybenzyl)-(2′-hydroxyphenyl)-benzimidazole 119(1987)377

On the formation of mononuclear and binuclear complexes of pentadentate N_4O_2 Schiff base ligands with Co(II), Ni(II) and Cu(II) ions: TGA, spectral and conductance studies 126(1988)235

Thermal and spectral studies of some mixed ligand complexes of Co(II), Ni(II) and Cu(II) involving aliphatic and heterocyclic β-diketone 129(1988)161

Thermal analysis of some methylhydrazine and methylhydrazinium complexes of copper(II), copper(I) and mixed valence species 130(1988)43

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Solid complexes from 2-benzylideniminobenzohydroxamic, 2-pyrilideniminobenzohydroxamic and 2-salicylideniminobenzohydroxamic acids with Fe(III) and Cu(II) 143(1989)85

Thermal stability of some novel mixed-ligand complexes of copper(II) 144(1989)369

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of copper(II) complexes of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 149(1989)199

Copper(II) compounds

Thermal studies on acetylenedicarboxylic acid compounds of iron(II), cobalt(II), nickel(II), copper(II) and zinc(II) 117(1987)51

Thermal and electrical studies on pyrazine-2,3-dicarboxylic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 124 (1988)345

Thermal studies on maleic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 143(1989)283

Copper(II) determination

Cu(II) trace determination by means of a catalytic thermometric method based on the hydroxylamine–hydrogen peroxide reaction 117 (1987)283

Copper(II) halo compounds

The thermal, spectral and magnetic studies of chloro and bromo compounds of cobalt(II), nickel(II) and copper(II) with melamine 115 (1987)21

Copper(III) acetoacetanilidehydrazone complexes

Thermodynamic and spectrophotometric studies of acetoacetanilidehydrazone complexes of Cu(II), Ni(II) and Co(II) metal ions 128(1988)81

Copper(II) isonicotinate

The thermal decomposition of copper(II) nicotinate and isonicotinate 138(1989)233

Copper(II) malonate

A mechanistic investigation of the reaction between copper(II) malonate and copper(II) bromide 102(1986)323

Copper(II) methanesulphonates

Thermal decomposition of Co(II), Cu(II) and Zn(II) methanesulfonates 124(1988)9

Copper(II) nicotinate

The thermal decomposition of copper(II) nicotinate and isonicotinate 138(1989)233

Copper(II) oxide

Thermal stability of $CuO-Al_2O_3$ system doped with sodium 118(1987)57

Mutual solid–solid interaction between CuO and sodium oxide-doped alumina 141(1989)195

Thermal solid–solid interaction between CuO and pure Al_2O_3 solids 141(1989)205

Effects of Li_2O doping on solid–solid interactions in the $CuO-Al_2O_3$ system 150 (1989)111

Copper(II) *p*-toluenesulphonate

Thermal decomposition of Co(II), Ni(II), Cu(II), Zn(II), Cd(II) and Pb(II) *p*-toluenesulphonates 146(1989)341

Copper(II) phenobarbiturates

Cu(II) phenobarbiturates and *N*-methyl phenobarbiturates. Thermal decomposition processes 117(1987)135

Copper(II) phenoxyacetate

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of copper(II) complexes of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 149(1989)199

Copper(II) porphyrin compounds

Thermal and electrical studies on porphyrin compounds of cobalt(II), copper(II) and zinc(II) 143(1989)67

Copper(II) propionates

Study of some solvated copper(ii) propionates (in French) 145(1989)139

Copper(II) salicylhydroxamate

X-ray *K*-absorption as a probe for investigating thermal behaviour of complexes: related thermal and X-ray *K*-absorption studies on copper(II) salicylhydroxamate 132(1988)25

Copper(II) succinate

Study of copper(II) succinate complexed with imidazole or methyl-substituted imidazoles 122 (1987)221

Copper(II) sulphate

Thermochemical study on the solid state interaction of graphite with cupric and ferric sulphates 126(1988)101

Copper(II) sulphate pentahydrate

Dehydration of $CuSO_4 \cdot 5H_2O$ studied by conventional and advanced thermal analysis techniques 138(1989)107

Copper(II) sulphates

Preparation and thermal decomposition of basic copper(II) sulphates 133(1988)221

Copper iodide

The phase diagrams of mixtures of CuI with ZnI_2, CdI_2 and HgI_2 143(1989)115

Copper ions

Thermochemical study of ion-exchange processes. V. Sorption of copper ions in complex-forming resins 139(1989)327

Copper montmorillonite

Kinetic analysis of the thermal decomposition of the pirimicarb–Cu-montmorillonite complex 141(1989)317

Copper nitrate

Deaquation and denitration studies on copper nitrate trihydrate 103(1986)333

Copper oxide

Reduction reactivity of $CuO-Cr_2O_3$ mixed oxides with hydrogen and the effect of gamma pre-irradiation 119(1987)261

Synthesis and thermal properties of superconducting mixed copper oxides (Plenary Lecture) [abstract] 135(1988)5

Thermal characterization of the near-surface of polycrystalline metal oxides, NiO, CuO and MgO, by emanation thermal analysis using ^{226}Ra as parent isotope 137(1988)293

Copper phthalocyanine

Phase behaviour of copper and zinc phthalocyanines 104(1986)377

Phase behaviour of cobalt, nickel and zinc phthalocyanines 109(1987)397

Copper sulphates

Study of the decomposition kinetics of Cu_2SO_2 under non-isothermal conditions 117(1987)1

Copper valency

Thermogravimetric study of the transition copper valency in the superconductive system Y–Ba–Cu–O 143(1989)123

Coprecipitation

Thermoanalytical study of the system $Pb^{2+}-Zn^{2+}$ coprecipitated as binary carbonates 137(1988)177

Correction methods

Correction methods for heat leaks in adiabatic calorimetry 125(1988)307

Correlation

Simultaneous correlation of vapor–liquid equilibrium and excess enthalpies for binary mixtures of *n*-hexane and *n*-octane with hexane isomers 106(1986)219

The simultaneous correlation of excess gibbs energies of binary systems at different temperatures by means of the UNIQUAC equation 117(1987)271

Correlation of the spectroscopic and thermodynamic properties of solutions of ethanol with non-associating components by means of the UNIQUAC associated-solution model 118 (1987)237

Thermodynamics of electron transfer processes in liquid and gas phases. Part II. Correlations of electro-oxidation and ionization potentials with substituent constants for some *N*,*N*-dimethylaniline derivatives 119(1987)273

Comparative study of the redox reactions between iodine and phenol derivatives, through correlation between thermal analysis and thermodynamic calculations from kinetic data 128(1988)105

Correlation of the thermal conductivity of saturated vapours 141(1989)113

Correlation and prediction of vapour–liquid equilibria in ternary systems formed by hydrocarbons 142(1989)59

Correlation between polystyrene molecular weights and a characteristic temperature derived from the thermogravimetric weight loss curves 142(1989)83

Corrosion

Equipment for studying hot corrosion processes in dynamic gas mixtures containing water vapour 103(1987)27

Thermochemical studies on hot ash corrosion of stainless steel 304 and inhibition by magnesium sulphate 126(1988)43

Cotton

A kinetic study of the thermal degradation of polyester/cotton blends by thermogravimetry 102(1986)335

Thermal decomposition of nitrocelluloses derived from wood and cotton: a non-isothermal thermogravimetric analysis 104(1986)321

Coulometric titration

Performance of ZrO_2 electrolyte cells for coulometric titration at high voltage 129(1988)127

Coupling

Electrochemistry and calorimetry coupling. IV. Determination of electrochemical Peltier heat 126(1988)221

Covalent bonding

The relative strengths of ionic, covalent and multiple-bonding in diatomic molecules 109 (1986)165

Cracking

Kinetics and mechanism of the thermal cracking of *n*-heptane 127(1988)247

Cristobalite

Induced conversion of aluminium silicate fibers into mullite and cristobalite by elevated temperatures: a comparative study on two commercial products 120(1987)1

Cross-square rule

A derivation of the cross-square rule in terms of a composite description of mixed salt solutions 125(1988)353

Crown compounds

Thermodynamic acid dissociation constants for proton-ionizable crown compounds in aqueous dioxane 130(1988)103

Crown ether carboxylic acids

Thermodynamic ionization constants for crown ether carboxylic acids in aqueous dioxane 111 (1987)257

Crown ethers

Complex formation of crown ethers and cryptands with mono- and bivalent cations studied by calorimetric competition reactions 102(1986)179

Influence of different donor atoms on the formation of 1 : 1- and 2 : 1-complexes of 12-crown-4 and 18-crown-6 ethers with Ag^+, Tl^{2+}, Ba^{2+} and Pb^{2+} 107(1986)219

Cryoscopy

Cryoscopy, viscosity, and electrical conductivity measurements of the strontium nitrate–acetamide molten system 143(1989)205

Cryptands

Complex formation of crown ethers and cryptands with mono- and bivalent cations studied by calorimetric competition reactions 102(1986)179

Crystal-violet

Calorimetric investigation of adsorption of an aqueous metachromic dye (crystal-violet) on montmorillonite 121(1987)373

Crystal data

The Bi_2O_3-V_2O_5 system and crystal data about some bismuth vanadates 133(1988)61

Crystal growth

Nucleation and crystal growth in a $0.9Li_2O \cdot 0.1BaO \cdot 2SiO_2$ glass: a DTA study 120(1987)217

Application of thermal analysis to study the crystal growth, defect structure and thermal expansion of $LiNbO_3$ (Invited Lecture) 133 (1988)1

Crystallinity

A comparative study of the crystallinity degree of PET by DTA, X-ray diffraction and iodine sorption techniques 101(1986)341

Thermal behavior in air of iron oxyhydroxides obtained from the method of homogeneous precipitation. Part I. Goethite samples of varying crystallinity 124(1988)359

Effect of crystallinity on the thermal evolution of γ-Fe_2O_3 133(1988)107

Crystallization

Enthalpies of crystallization of halogenides. Part 2. Investigations of binary systems 104(1986)139

Enthalpies of crystallization of halogenides. Part 3. Investigations of ternary systems 104(1986)147

Comparison of crystallization kinetics determined by isothermal and non-isothermal methods 110(1987)113

Enthalpies of crystallization and dissolution of ammonium bromide in water at 298.15 K 113 (1987)151

Studies of the crystallization processes of amorphous Zr-Co based alloys by DSC 114 (1987)35

Non-isothermal crystallization in ZrF_4–BaF_2–GdF_3–AlF_3 fluoride glasses 123 (1988)263

Formation of amorphous lanthanide sulfates and their crystallization 124(1988)217

Method to reduce experimentation during crystallization studies done by thermoanalytical techniques 126(1988)25

Designed experiment for polyethylene crystallization by DSC 128(1988)215

The crystallization of $Ge_{40}S_{60}$ glass 129(1988)293

Structural relaxation and crystallization of $Fe_{78}B_{13}Si_9$ amorphous ribbons studied by dilatometry and differential scanning calorimetry 130(1988)177

Glass formation and crystallization in the $GeSe_2$-GeTe-Sb_2Te_1 system 133(1988)287

Crystallization kinetics of some Ge-Sb-Se glasses 133(1988)293

Kinetics of non-isothermal crystallization of oligoethylenetetraphthalate-oligooxyethylene block copolymers 134(1988)121

Crystallization kinetics of dyed nylon 6 134 (1988)133

Thermal properties and crystallization kinetics of PP/$CaCO_3$ and PP/EPDM/$CaCO_3$ composites 134(1988)139

Isothermal crystallization behaviour of poly(ether-ether-ketone) (PEEK) and its carbon fiber composite 134(1988)223

Kinetics and mechanism of β-eucryptite crystallization in non-isothermal conditions 135 (1988)365

Thermal analysis of polymer samples by a round robin method. I. Reproducibility of melting, crystallization and glass transition temperatures 136(1988)163

Crystallization kinetics of binary polymer blends 137(1988)115

Crystallization kinetics of amorphous $Ge_{20}Se_5Te_{75}$ 140(1989)155

Structural relaxation, glass transition and crystallization of Cu–Zr amorphous ribbons studied by dilatometry and differential scanning calorimetry 142(1989)29

Kinetic study of isothermal and continuous heating crystallization in $Se_{100-x}Bi_x$ ($x \leqslant 8$) glasses 144(1989)123

Studies of the thermal and crystallization behaviour of polyphenylene sulphide/polycarbonate blends 144(1989)165

The crystallization kinetics of $12CaO \cdot 7Al_2O_3$ glass 149(1989)387

Crystallochemical characteristics

Enthalpy of dissolution of different kaolinites and metakaolinites in hydrofluoric acid. Influence of crystallochemical characteristics (in French) 122(1987)79

Crystal transitions

Crystalline solid to plastic crystal transitions in pentaglycerine–neopentylglycol mixtures 118 (1987)287

Calorimetric determination of enthalpy changes in octylcyanobiphenyl (8CB) liquid crystal transitions 119(1987)301

Crystal violet

Thermal analytic study of the adsorption of crystal violet by montmorillonite 148(1989)457

Cubic equation of state

Use of *F*-function in van der Waals-type two-constant cubic equation of state 140(1989)77

Cure

Comparative study of a reaction of low enthalpy (rubber cure) by DC and DSC 116(1987)111

Cure enthalpy

Effect of cure enthalpy on cure progress during the cooling period in motionless air 102(1986)83

Fundamental study of heating process in DSC. Effect of the cure enthalpy and heating rate 116(1987)301

Curie temperature

Curie temperature standards for thermogravimetry: the effect of magnetic field strength and comparison with melting point standards using Ni and Pb 109(1986)193

Curing

Effect of cure enthalpy on cure progress during the cooling period in motionless air 102(1986)83

Determination of the state of cure of epoxy resin used in composite with sand 102(1986)93

Effect of sample size and heating rate on cure reaction of rubber in DSC 108(1986)345

Calorimetric investigation of curing of some new polyhydroxy epoxy resins 111(1987)115

Isothermal calorimetric measurement of polymer cure kinetics: the mangelsdorf method of analysis 112(1987)289

Effect of the enthalpy, sample size and heating rate on the cure reaction of rubber in DSC 112(1987)313

Dynamic, isothermal and residual heats of curing of an unsaturated polyester resin 126(1988)339

Curing kinetics of epoxy resin using epoxidized cardanol as diluent with/without fortifier 129 (1988)277

Calorimetric analysis of the curing behavior of an unsaturated polyester resin using different catalytic systems 134(1988)261

Thermoanalytical investigations on curing and decomposition of methyl silicone resin 134 (1988)269

The differential scanning calorimetric study on potential mid-temperature curing reagent system for epoxy resins 134(1988)313

Effect of different epoxy diluents/fortifier on the reactivity in curing and the thermal stability of epoxy resin using 2,2-bis[4-(*p*-aminophenoxy)phenyl]propane as a curing agent 141(1989)77

Values of kinetic parameters of cure reaction of epoxy in calorimetry by DC and DSC 146(1989) 329

Optimization of the photocuring of a ternary mixture of methacrylic monomers using DSC 148(1989)387

Prediction of the 'state of cure' of an unsaturated polyester by differential scanning calorimetry, and investigation of its variation with temperature and kinetic parameters 149(1989)93

Kinetics of the curing process of alkyd–melamine resin systems 149(1989)341

Cutting fluids

Thermoanalytical investigation of the interaction of phosphate-based cutting fluids with an iron surface 114(1987)287

Cyano compounds

Thermal analysis of some cyano compounds. Part II. Thermal behaviour of mixed $KLnFe(CN)_6 \cdot 4H_2O$ (Ln = La(III), Ce(III), Nd(III)) 128(1988)127

Cyanomercurates

Phase transitions of cyanomercurates 112(1987) 71

Cyclic ethers

Thermodynamic properties of binary mixtures containing cyclic ethers 122(1987)9

Cyclic polyethers

The complexation of cyclic polyethers and a series of equations for determination of equilibrium constants 131(1988)125

Cyclized polymers

Evaluation of the thermal stability of cyclized polymers. I 113(1987)1

Cycloalkanes

On the phase transitions of cycloalkanes 112 (1987)57

Cycloalkanones

Excess thermodynamic properties of binary mixtures of n-alkanes with cycloalkanones 112 (1987)351

β-Cyclodextrin

Design and testing of a microcalorimeter with semiconductor thermopiles as temperature sensor and study of the inclusion of Cu(II) with β-cyclodextrin 123(1988)85

Cyclodextrin

Microcalorimetric titration of β-cyclodextrine with adamantane-1-carboxylate 109(1986)139

Calorimetric studies of benzoic acid–cyclodextrin inclusion complexes 140(1989)161

β-Cyclodextrin complexes

Thermochemical investigation of β-cyclodextrin complexes with benzoic acid and sodium benzoate 116(1987)249

Cyclohexadiene

Excess enthalpies of binary mixtures for 1,3-cyclohexadiene and 1,4-cyclohexadiene + cyclohexane, + n-hexane and + benzene 102 (1986)245

Cyclohexane

Liquid–liquid equilibria of (acetonitrile + methyl ethanoate + cyclohexane) and of (acetonitrile + cyclohexane + methyl ethanoate + benzene) 101 (1986)205

Excess enthalpies of binary mixtures for 1,3-cyclohexadiene and 1,4-cyclohexadiene + cyclohexane, + n-hexane and + benzene 102 (1986)245

Thermochemical investigations of associated solutions. 9. Prediction of excess enthalpies of ternary acetone + cyclohexane + chloroform mixtures from measured binary data 145(1989) 245

Cyclohexanes

Excess molar enthalpies of some *n*-alkylamine + cyclohexane or + benzene binary mixtures 150 (1989)87

Cyclohexanol

Heats of solution of cyclohexanol in benzene solutions of tri-n-octylammonium bromide and derived thermodynamic functions of transfer from benzene 116(1987)241

Cyclohexanol-d_{11}

High pressure differential thermal analysis of cyclohexanol-d_{11} ($C_6D_{11}OH$) and carbon tetrachloride (CCl_4) 143(1989)109

Cyclohexanone

Excess molar volumes of trichloroethylene with cyclohexanone, methylisobutylketone, and 1,4-dioxane at 308.15 and 318.15 K 107(1986)383

Excess enthalpy and excess volume of cyclohexanone + tetrachloroethene 139(1989)11

Cyclotetramethylenetetranitramine (HMX)

Investigation of thermal decomposition of HMX and RDX by pyrolysis–gas chromatography 138 (1989)167

Cyclotrimethylenetrinitramine (RDX)

Investigation of thermal decomposition of HMX and RDX by pyrolysis–gas chromatography 138 (1989)167

Cylindrical samples

Effect of the layer of air between the calorimeter and cylindrical samples in DC experiments 130 (1988)355

Cytidine

Kinetic study on the thermal decomposition of cytidine and uridine 115(1987)281

D

Data acquisition

High temperature, high pressure thermogravimetry of coal gasification apparatus, data acquisition and numerical evaluation 103 (1987)163

Data acquisition from a differential thermal microanalyzer with a low-cost microcomputer 111(1987)75

Data storage

Report on the workshop: the use of computers and data storage in everyday thermoanalytical practice 110(1987)67

Date stones

The thermogravimetry and pyrolysis of date stones 147(1989)283

DC experiments

Modelling of the process in DC experiments by considering the layer of air between the calorimeter and holder 147(1989)291

Dealumination

Calorimetric investigation of the effect of dealumination on the acidity of zeolites 122 (1987)63

Deamination

Catalyzed deamination of tris(ethylenediamine)chromium(III) phosphate 117(1987)371

Deamination of tris(ethylenediamine)nickel(II) chloride and tris(ethylenediamine)platinum(IV) chloride 118(1987)191

Deaquation

Solid state kinetic parameters and mechanism for the deaquation–anation of hexacyanocobaltate(III) of aquopentaamminecobalt(III), rhodium(III) and iridium(III), calculated by isothermal DSC measurements 102(1986)137

Deaquation and denitration studies on copper nitrate trihydrate 103(1986)333

Decane

Vapour–liquid equilibrium and solid–solid equilibrium in the system formed by octan-1-ol and *n*-decane: measurement and calculation 150 (1989)101

Decarbonylation

Application of a new method to the kinetic study of the thermal decarbonylation of sodium oxalate 141(1989)261

Decarboxylation

Novel thermal decarboxylation of tris(mandelato)–thallium(III) complex 116 (1987)171

Decoking

Study of the decoking kinetics of deactivated zeolite catalysts for ethylation of benzene by TA 135(1988)391

Decomposition

Mössbauer study of the thermal decomposition of potassium tris(malonato)ferrate(III) trihydrate 101(1986)35

Study of the thermal decomposition of bromazepan-thiocyanate complexes of Fe(II), Co(II), Ni(II) and Cu(II) 101(1986)83

The moving boat technique and practical studies on the decomposition of carbonates. Part 1. comparative assessment of the decomposition rates of limestone and dolomite samples 101 (1986)119

Thermal decomposition kinetics of salicylidene-aminofluorene complexes of cobalt(II) and nickel(II) 101(1986)145

A thermoanalytical study of the decomposition of a double-base propellant 101(1986)373

Thermokinetic mathematical model of the reaction zone of an oscillating thermal decomposition reaction 102(1986)29

Thermal decomposition kinetics of siderite 102 (1986)101

Thermolysis of potassium tetraperoxochromate(V) IV. Effect of additives on ordinary and self-propagating decomposition 102(1986)293

Novel thermodynamic and kinetic investigation of ammonium carbamate decomposition into urea and water 102(1986)357

Thermal decomposition of the complexes $[Co(NH_3)_6][Nd(SO_4)_3] \cdot nH_2O$ 102(1986)373

A note on the thermal decomposition of lead thiosulphate 102(1986)391

Thermochemical and morphological aspects of the thermal decomposition of lead dioxide 103 (1987)201

Two-stage kinetic model for the non-isothermal decomposition of phenol adsorbed on activated carbon 104(1986)61

Some comments on the use of avrami–erofeev expressions and solid state decomposition rate constants 104(1986)93

Influence of the self-generated and controlled atmosphere on the thermal decomposition of basic nickel carbonate, $NiCO_3 \cdot 2Ni(OH)_2 \cdot 4H_2O$ 104(1986)101

Thermal decomposition and dehydration of magnesium perchlorate hexahydrate 104(1986) 159

The thermal decomposition of neodymium nitrate 104(1986)293

Solid state kinetic parameters of the first decomposition of potassium dichlorotetracyanoplatinate(IV), dibromotetracyanoplatinate(IV) and diiodotetracyanoplatinate(IV) 104(1986)299

Thermal decomposition of nitrocelluloses derived from wood and cotton: a non-isothermal thermogravimetric analysis 104(1986)321

Thermal decomposition to dehalogenation of α-haloketones by GLC 104(1986)373

DTG and kinetics of non-isothermal decomposition of tris(*p*-nitrobenzaldehydethiosemicarbazonato) M(III) (M = Fe, Al, Cr) 104(1986)387

Thermal decomposition of some double oxalates, precursors of the oxides Na_2MO_3; M = Sn, Ge, V and Ti (in French) 106(1986)1

The thermal decomposition of oxalates. Part 21. The preparation and thermal decomposition of an oxymolybdenum(VI) oxalate 106(1986)125

Thermal decomposition of basic carbonates of copper, zinc and cobalt under high pressures 106(1986)263

On the thermal decomposition of some cobalt hydroxide nitrates 106(1986)283

Study of the thermal decomposition of cinoxacin complexes with Co(II), Ni(II) and Cu(II) 106 (1986)333

Thermal decomposition of trifluoroacetates 106 (1986)377

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part I. Derivation of the activation energy for decomposition 107(1986)1

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part II. Products and mechanism of the reaction 107 (1986)17

Use of a compensation parameter in the thermal decomposition of copolymers 107(1986)379

The thermal decomposition of $K_6[Mo_2I_2O_{16}] \cdot 8H_2O$ 107(1986)393

Thermal decomposition of toothpastes and toothpowders 108(1986)57

Phase transition and decomposition of A_2MX_4 [$A = (C_2H_5)_4N$; M = Co(II), Ni(II) and Cu(II); X = Cl and Br] in the solid state 108(1986)97

Thermal reactions of lead(IV) chloride complexes in the solid state. Part VI. Thermal properties, thermochemistry and kinetics of the thermal decomposition of alkanaminium hexachloroplumbates 108(1986)239

Thermal decomposition reactions of metal carboxylato complexes in the solid state. I. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 109(1987)331

Thermal decomposition of $Eu_2(SO_4)_3 \cdot 8H_2O$ studied by low temperature high-resolution luminescence spectroscopy 109(1986)343

How (un)reliable are kinetic data of reversible solid-state decomposition processes? 110(1987) 145

Quantitative thermoanalytical studies of the kinetics and mechanisms of the thermal decomposition of inorganic solids 110(1987)153

Decomposition of inorganic compounds 110 (1987)373

Thermal decomposition of cellulose and typha sap — evaluation of the catalytic activity of potassium carbonate 111(1987)27

Kinetic analysis of thermal decomposition reactions. I. Thermal decomposition of potassium bromate 111(1987)49

Thermal decomposition of tetrakisoxalatouranates(IV) of mixed metals: characterisation of a new potassium uranate phase 111(1987)67

Investigation of the thermal decomposition kinetics of polyacrylamide using a dynamic TG technique 111(1987)121

The thermal decomposition of oxalates. Part 22. The preparation and thermal decomposition of some oxytungsten(VI) oxalates 111(1987)275

Gas chromatographic studies of the thermal decomposition of 12-molybdophosphoric acid and its salts in the solid state 111(1987)325

The thermal decomposition of vanadyl(IV) hexacyanoferrate(II), $(VO)_2\ [Fe(CN)_6] \cdot 10H_2O$ 111(1987)375

On the thermal decomposition of $K_3[HV_2O_2(O_2)_3F_4] \cdot 2H_2O(K_3[V_2O_2(O_2)_3F_3] \cdot 2H_2O \cdot HF)$ 111(1987)383

Preparation of transition metal complexes of strongly basic ligands by thermal decomposition 112(1987)63

Thermokinetic compartment models of thermal decomposition reactions 112(1987)179

Synthesis of γ-Fe_2O_3 by thermal decomposition of $FeC_4H_4O_4 \cdot 4H_2O$ 112(1987)231

Thermal decomposition reactions of metal carboxylato complexes in the solid state. II. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 112(1987)275

Influence of CO_2 pressure on the kinetics of thermal decomposition of $CdCO_3$ 113(1987)31

Influence of CO_2 pressure on the kinetics of thermal decomposition of $PbCO_3$ 113(1987)39

Changes in textural properties derived from the thermal decomposition of synthetic pyroaurite 113(1987)79

Thermal decomposition of shampoos 113(1987) 199

Correlation between isothermal and rising temperature experiments. Thermal decomposition of diammonium hydrophosphate 113(1987)305

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some transition metal salicylato complexes 114 (1987)145

Thermal decomposition of energetic materials. 20. A comparison of the structural properties and thermal reactivity of an acyclic and cyclic tetramethylenetetranitramine pair 114(1987)209

The solid state chemistry of uranium. Part IV. The thermal decomposition and kinetics of tetrachlorobis(*N, N, N′, N′*-tetramethylurea) uranium(IV) 114(1987)303

Thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel 114(1987)329

Solid-state decomposition studies on fluoroperoxo species of transition metals. Part XIII. Kinetics of isothermal decomposition of $K_2[V_2O_3(O_2)_2F_2]$ and $K_3[Ta(O_2)_2F_4]$ 114 (1987)347

Thermal decomposition of basic bismuth carbonate under high pressures of CO_2 and N_2 up to 50 ATM 114(1987)393

Heat capacity of $2Al_4C_3 \cdot SiC$ from 447 to 1447 K and enthalpy of peritectic decomposition of Al_4C_3, $2Al_4C_3 \cdot SiC$, and $Al_4C_3 \cdot SiC$ 115(1987) 11

Study on the thermal decomposition of chromium(III) nitrate nonahydrate (CNN) 115 (1987)137

A method for the kinetic analysis of nonisothermal decomposition reactions of solids 115(1987)175

Synthesis of γ-Fe_2O_3 by thermal decomposition of $FeC_4H_2O_4 \cdot \frac{1}{2}H_2O$. Part II 115(1987)215

Thermal decomposition of tetramethylammonium di-μ-fluorobis[aquadifluoro-oxovanadate(IV)] 115 (1987)249

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some 5-substituted metal salicylato complexes 115(1987)255

Chlorination reactions of gibbsite and its thermal decomposition products with phosgene 115 (1987)269

Kinetic study on the thermal decomposition of cytidine and uridine 115(1987)281

Pyrolysis and kinetics of non-isothermal decomposition of La(III)– and Th(IV)–phenoxymethyl penicillin complexes 115(1987)381

The thermal decomposition of octakis(di-*p*-methylphenyl sulphoxide) lanthanide(III) perchlorates. Formation of lanthanide oxysulphates 116(1987)45

Thermal decomposition reactions of metal carboxylato complexes in the solid state. III. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 116(1987)53

Study of AUC thermal decomposition kinetics in nitrogen by a non-isothermal method 116(1987) 71

Thermal decomposition of silicon derivatives of cinchocaine 116(1987)79

Thermal decomposition of energetic materials. 23. Thermochemical differentiation of cyclic and acyclic nitramines by their phase transitions 116 (1987)125

Examination of the thermal decomposition of chlorostannates(IV) 116(1987)217

Solid state decomposition studies on metal salicylates. Thermal decomposition of dysprosium salicylato complexes 116(1987)257

Kinetics studies of the decomposition of benzylidene aniline–$AlCl_3$ complexes 116(1987) 285

Study of the decomposition kinetics of Cu_2SO_2 under non-isothermal conditions 117(1987)1

Solid state decomposition study on tetraperoxo species of transition metals. Part II. Kinetics of isothermal decomposition of $K_4[Ti(O_2)_4] \cdot 2H_2O$ 117(1987)73

Solid state decomposition studies on metal salicylates. Thermal decomposition of the 5-substituted dysprosium and erbium salicylato complexes 117(1987)79

Cu(II) phenobarbiturates and *N*-methyl phenobarbiturates. Thermal decomposition processes 117(1987)135

Effect of operating parameters on time to decomposition of high density polyethylene and chlorinated polyethylenes 117(1987)157

Thermal decomposition study of hydrazinium(2 +) heptafluorotantalate monohydrate and identification of intermediate compounds 117 (1987)227

Chemistry and structural chemistry of phosphides and polyphosphides. 45. The thermal decomposition and thermodynamic properties of the alkali metal phosphides LiP_{15}(s), NaP_{15}(s), KP_{15}(s), RbP_{15}(s) and CsP_{15}(s) 117(1987)261

The thermal decomposition of iron(III) formate 117(1987)325

The thermal decomposition of oxalates. A review 117(1987)331

Some observations on the decomposition of tris (ethylenediamine)cadmium(II) chloride 117 (1987)375

FTIR and high-resolution photoluminescence studies of the thermal decomposition of crystalline europium hydroxide 118(1987)25

Phases and thermal decomposition characteristics of hydro-sodalites $Na_{6+x}[AlSiO_4]_6(OH)_x \cdot nH_2O$ 118(1987)35

Thermogravimetric analysis of polythiocarbonates: thermal decomposition temperatures and kinetic parameters 118(1987) 111

Kinetics of solid state decomposition of $K_2[V_2O_3(O_2)_2F_2]$: A TG study 118(1987)229

Non-isothermal decomposition kinetics of a mononuclear coordination compound of Fe(II) 118(1987)309

The influence of zirconium on decomposition in high strength aluminium alloys 119(1987)211

Study of the thermal decomposition of the alkaline pentafluorotellurates(IV) $MTeF_5$ (M = Li, Na, Rb, Cs) (in French) 119(1987)243

Solid state decomposition studies on metal salicylates. Thermal decomposition of some lanthanide salicylato complexes 119(1987)285

Studies on the thermal decomposition of thermosetting aniline–formaldehyde resins 119 (1987)321

Kinetics of thermal decomposition of cellulose. Part I. Influence of experimental conditions 120 (1987)121

Kinetics of thermal decomposition of cellulose. Part II. Temperature differences between gas and solid at high heating rates 120(1987)133

Studies on thermal decomposition of rice straw 120(1987)241

Thermal decomposition of rare earth trifluoromethanesulfonate complexes with dimethylformamide (DMF) 120(1987)351

Thermoanalytical and calorimetric investigations on the formation and decomposition of some alunites 121(1987)109

Investigation of the phase diagram for the system $Ni(NO_3)_2$–H_2O and examination of the decomposition of $Ni(NO_3)_2 \cdot 6H_2O$ 121(1987) 137

Thermoanalytical investigations on the decomposition of double salts. Part II. The decomposition of double salts $MeCl \cdot MgCl_2 \cdot 6H_2O$ (Me = NH_4, Rb, Cs) 121(1987)151

Note on the thermal decomposition of dolomite 121(1987)479

Spontaneous isothermal decomposition of the uranyl carbonate complex $(NH_4)_4[UO_2(CO_3)_3]$ at room temperature. Part I. Chemical analysis 122(1987)245

Spontaneous isothermal decomposition of the uranyl carbonate complex $(NH_4)_4[UO_2(CO_3)_3]$ at room temperature. Part II. Infrared spectroscopy and X-ray analysis 122(1987)261

Spontaneous isothermal decomposition of the uranyl carbonate complex $(NH_4)_4[UO_2(CO_3)_3]$ at room temperature. Part III. Mechanism of the decomposition. Stability of the uranyl molecular orbitals 122(1987)277

DSC studies on the kinetics of decomposition of manganese dioxide 123(1988)61

The determination of the most probable mechanism function and three kinetic parameters of exothermic decomposition reaction of energetic materials by a single non-isothermal DSC curve 123(1988)135

Thermal decomposition of Co(II), Cu(II) and Zn(II) methanesulfonates 124(1988)9

Thermal decomposition of 3-(4,5-dimethyl-2-thiazolylazo)-2,6-diaminopyridine 124(1988)35

The thermal decomposition of lanthanum(III), praseodymium(III) and europium(III) nitrates 124(1988)277

Thermally induced isomerization and decomposition of *N*-methyl-1,3-propanediamine complexes of nickel(II) in the solid state 124 (1988)297

Enthalpies of decomposition of dialkylammoniumdialkyldithiocarbamates (alkyl = ethyl, *n*-propyl, i-propyl, i-butyl) 124(1988)319

Thermal decomposition behaviour of thorium(IV) complexes with furfurylidene arylamine Schiff base ligands 125(1988)17

Kinetics of solid-state decomposition of $K_2[VO(O_2)_2F]$ by a TG study 125(1988)51

Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malonate dihydrate 125(1988)173

A thermogravimetric study of the decomposition rate of chlorinated polyethylenes under ignition conditions 125(1988)247

Kinetic–thermometric study of hydrogen peroxide decomposition in basic media catalyzed by Mn(II). Influence of several organic ligands 125(1988)319

Thermal decomposition of $KClO_4$ catalyzed by MnO_2–CuO mixed oxides systems 126(1988)17

A new model of gas–solid kinetics: the case of ammonium carbamate formation and decomposition 126(1988)129

Kinetic study of the thermal decomposition; of polyvinylbenzyltriphenylphosphonium chloride (in French) 126(1988)213

Thermal decomposition of complexes $[Co(NH_3)_6](M^I)_3[Ln(SO_4)_3]_2 \cdot nH_2O$ (M^I = NH_4, Rb; Ln = La, Ce, Pr) 126(1988)289

Thermal decomposition of colemanite 126(1988) 307

Kinetic study of the thermal decomposition of pesticides 126(1988)319

Isothermal decomposition of Almora magnesite 126(1988)403

Kinetic parameters and mechanisms of decomposition for some ammonium salts 126 (1988)407

Kinetic studies of the thermal decomposition of nitroguanidine using accelerating rate calorimetry 127(1988)89

A thermoanalytical study of the thermal decomposition of silver squarate 127(1988)139

The thermal decomposition of γ-irradiated lead nitrate by dynamic thermogravimetry 127(1988) 275

Preparation and thermal decomposition of halogenometalates. Part I. Tris(2,2′-dipyridyl)ruthenium(II) halogenocadmates 127 (1988)347

Kinetics of thermal decomposition of the tetracyano complexes of some transition metals containing the $[R_3S]^+$ cation 128(1988)1

Thermal decomposition of the malato-aquo complex of thallium(III): the mechanism of thermal dehydration of thallium(III) malate trihydrate 128(1988)55

Thermal decomposition of solid complexes of cadmium chloride with substituted pyridines 128(1988)225

The thermal decomposition of nagyagite 128 (1988)311

Thermal decomposition and the creation of reactive solid surfaces. V. The genesis course of the WO_3 catalyst from its ammonium paratungstate precursor 129(1988)187

The effect of γ-irradiation on the thermal decomposition of lead nitrate 129(1988)237

Kinetic studies on the decomposition of *trans*-dichlorotetramminecobalt(III) bisulfate 129(1988) 263

Thermal decomposition of ammonium trifluoromanganate(II) 129(1988)285

Some observations on the thermal decomposition kinetics of gadolinium(III), holmium(III) and erbium(III) nitrate 129(1988)335

Thermal decomposition of $K_3Co(CN)_5L$ in hydrogen atmosphere and the influence of reduced iron powder 130(1988)77

Thermal decomposition of metal complexes of cimetidine 130(1988)213

A study of thermal decomposition of complex compounds of $Cs_3[Sb_{2-x}Pb_xCl_{9-x}]$ type 130 (1988)299

Thermal decomposition of ammonium fluorooxovanadates(IV) 131(1988)133

Kinetic parameters of the non-isothermal decomposition of Cu(II) chelates of *o*-hydroxychalcones 131(1988)299

Influence of additives on the solid phase thermal decomposition of barium bromate 132(1988)7

Role of additives in the thermal decomposition of ammonium perchlorate and evidence supporting the identification of nitryl perchlorate as the essential reaction intermediate 132(1988) 205

Preparation and thermal decomposition of basic copper(II) sulphates 133(1988)221

Polarizing microscopy for examining mechanisms of the decomposition of single crystal materials 133(1988)227

The influence of gudron additive on the structure of the solid phase from the thermal decomposition of phosphogypsum 133(1988)233

Thermal decomposition of lanthanide and actinide tetrafluorides 133(1988)241

Thermal decomposition of tetraethylammonium fluorooxo-vanadates(IV) 133(1988)247

Mn, Co oxides prepared by the thermal decomposition of carbonates 133(1988)257

Studies of thermal decomposition of bissalicylaldoximates of some heavy metals 133 (1988)347

The influence of trioctyl methyl ammonium salts on the decomposition of initiators studied by DSC 134(1988)237

Thermoanalytical investigations on curing and decomposition of methyl silicone resin 134 (1988)269

Modification in thermal decomposition products of polymers by catalytic pyrolysis 134(1988)301

The kinetics of heterogeneous solid state decomposition reactions: a new way forward? (1988 Royal Society of Chemistry, Thermal Methods Group, Award Lecture) 135(1988)37

Kinetics of decomposition of the solid state: Is there really a dichotomy? (Invited Lecture) 135 (1988)71

Significance of kinetic compensation effect in the thermal decomposition of a solid 135(1988)79

Influence of grinding on both the stability and thermal decomposition mechanism of siderite 135(1988)219

Atmosphere dependence of the thermal decomposition of manganite, γ-MnO.OH 135 (1988)273

Kinetics of solid state decomposition of $K_3[Nb(O_2)_4]$ and $K_3[Ta(O_2)_4]$: a thermogravimetric study 136(1988)73

Thermal phase transition and decomposition of *N*-methyl-1,2-ethanediamine complexes of nickel(II) in the solid state 136(1988)191

Studies on double selenates. VI. Thermal decomposition of gadolinium, terbium, dysprosium and alkali metal double selenates 136(1988)319

Studies on double selenates. VII. Thermal decomposition of holmium, erbium, thulium and alkali metal double selenates 136(1988)327

Studies on double selenates. VIII. Thermal decomposition of ytterbium, lutetium, yttrium and alkali metal double selenates 136(1988)335

Thermochromism and thermal decomposition of V(III) and VO(IV) complexes with Schiff base derivatives 137(1988)189

Preparation of V_2O_5 with an enhanced dispersity by thermal decomposition of oxalates and peroxides 137(1988)217

Kinetic thermometric determination of Co(II) and Cu(II) based on their catalytic effect on permanganate decomposition in basic media 137(1988)263

Investigation of basic zinc sulfate thermal decomposition under nitrogen and carbon monoxide atmosphere 137(1988)281

Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium 137 (1988)319

Studies on thermal decomposition of caesium–sodium chlorothiocyanatobismuthates(III) 137(1988)337

Thermoanalytical investigations on heterocyclic organic compounds. Part V: Thermal decomposition of some substituted *N*-phenylphthalamic acids 138(1989)13

The thermal decomposition of magnesium chloride dihydrate 138(1989)115

Factors affecting the thermal decomposition of cadmium carbonate by TG 138(1989)147

Investigation of thermal decomposition of HMX and RDX by pyrolysis–gas chromatography 138 (1989)167

Kinetic parameters of the decomposition of hydrated tris(indole-3-butyrato)Ho(III) 138 (1989)173

Kinetics of solid state decomposition of $K_3[Nb(O_2)_2F_4]$: TG study 138(1989)199

The thermal decomposition of copper(II) nicotinate and isonicotinate 138(1989)233

Studies on the thermal decomposition of complex salts of the $Cs_3[Bi_{2-x}Pb_xCl_{9-x}]$ type 138(1989) 249

Thermal decomposition of silver carbonate 1. Differential thermal gas analysis 138(1989)257

Non-isothermal kinetic and thermodynamic parameters of ammonium paratungstate decomposition—a thermoanalytic study 138 (1989)309

The thermal decomposition of $VO[(DMSO)_3SO_4]$ 138(1989)367

Non-isothermal, in situ XRD analysis of dolomite decomposition 140(1989)67

Kinetic parameters of thermal decomposition of bis(2-OH-1-naphthaldoxime) chelates using freeman–carroll equation 140(1989)97

Thermal decomposition kinetics of zinc(II) bis (oxalato)zincate(II) tetrahydrate 140(1989)145

Thermal decomposition kinetics of polymeric complexes of nickel(II), zinc(II) and cadmium(II) with *N*,*N*′-bis(dithiocarboxy)piperazine 140 (1989)325

Evaluation of kinetic parameters for the thermal decomposition of γ-irradiated sodium bromate by dynamic thermogravimetry 141(1989)61

Preparation of potassium trimolybdate by the thermal decomposition of a new oxomolybdenum(VI) oxalato complex 141(1989) 87

Thermal decomposition of nitroguanidine 141 (1989)305

Kinetic analysis of the thermal decomposition of the pirimicarb–Cu-montmorillonite complex 141(1989)317

Kinetic studies by DSC on the thermal decomposition of calcium oxalate 143(1989)93

Kinetics of weight loss by thermal decomposition of xylan and lignin. Influence of experimental conditions 143(1989)137

Thermal decomposition of lignocellulosic materials: influence of the chemical composition 143(1989)149

Thermal decomposition of silver carbonate. Part II. Cyclic differential thermal analysis 143(1989) 319

Effects of sample weight, particle size, purge gas and crystalline structure on the observed kinetic parameters of calcium carbonate decomposition 143(1989)339

Kinetic parameters for the thermal decomposition reactions of CrO_3 in air 143 (1989)347

Thermal decomposition kinetics—Part XV. Kinetics and mechanism of thermal decomposition of tetrammine copper(II) sulphate monohydrate 144(1989)33

Thermal decomposition kinetics of barium zirconyl oxalate 144(1989)109

Kinetic study of the thermal decomposition of adenosine 144(1989)177

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from $(NH_4)_2SO_4/CdSO_4$ 1 : 2 m mixtures. II. Analysis of the langbeinite decomposition 144(1989)225

Study of copper–chromium oxide catalyst. II. Crystal data and thermal decomposition of basic copper(II) ammonium chromate 145(1989)19

Thermal decomposition of manganese(II) bis (oxalato)manganate(II) tetrahydrate 145(1989)77

Thermal decomposition of tetrazole. Part I. Programmed heating 145(1989)195

Kinetic analysis of thermal decomposition reactions. Part IV: kinetics of formation of barium titanate in crystalline mixtures of barium carbonate and titanium dioxide 145(1989)271

Thermal decomposition of magnesium and calcium selenates 145(1989)367

The study of the influence of particle sizes on the thermal decomposition of minerals present in solid fuel 146(1989)63

Thermal decomposition of molybdenum(V) thioglycolate 2-hydrate 146(1989)95

Preparation of sodium tetramolybdate by the thermal decomposition of a new sodium oxomolybdenum(VI)-formato complex 146 (1989)101

Evaluation of kinetic parameters for the thermal decomposition of piperonaldehyde thiosemicarbazone complexes of cobalt(II) and zinc(II) halides 146(1989)149

Thermal decomposition of silver carbonate. Part III. High temperature X-ray diffraction analysis 146(1989)177

Effect of poly(ethylene glycol) 4000 and poly(ethylene glycol) 4000 distearate additives on the thermal decomposition of tapioca starch 146 (1989)201

A comparative study of the thermal decomposition kinetics of zirconyl oxalates of calcium and strontium 146(1989)225

Thermal decomposition of Co(II), Ni(II), Cu(II), Zn(II), Cd(II) and Pb(II) *p*-toluenesulphonates 146(1989)341

The thermal decomposition of nickel oxalates doped with traces of other metal ions 147(1989) 251

Decompositions

Thermal decomposition studies of solid propellant binder HTPB 138(1989)189

Decontaminating agents

Thermoanalytical investigations on decontaminating agents for use in nuclear plants 108(1986)175

Deconvolution

Deconvolution of periodic heat signals by fast Fourier transform 119(1987)189

A model-based study of deconvolution in time-varying or injection calorimeters 126(1988)171

Microcalorimetry: identification and automatic deconvolution with the aid of physical models (in French) 150(1989)11

Deconvolution calorimetry

The application of deconvolution calorimetry to the belousov–zhabotinskii reaction 106(1986)27

Decrepitation

Some applications of the decrepitation technique and thermosonimetry in research on minerals and building materials 110(1987)265

Defect sites

Determination of the principal defect site responsible for Saran degradation using thermogravimetric analysis 134(1988)207

Theory of emanation thermal analysis VII: thermostimulated inert gas release as influenced by the energy spectrum of the defect sites in solids 142(1989)241

Defect structure

Application of thermal analysis to study the crystal growth, defect structure and thermal expansion of $LiNbO_3$ (Invited Lecture) 133 (1988)1

Degradation

Degradation studies on nickel nitrate hexahydrate. Part 3. Raman and infrared analysis 101(1986)291

A kinetic study of the thermal degradation of polyester/cotton blends by thermogravimetry 102(1986)335

A comparison of various isothermal thermogravimetric methods applied to the degradation of PVC 106(1986)169

Study of the degradation in open atmosphere of the hydrated dioxynitrate of lead 108(1986)29

Thermal degradation of the three isomers *ortho-*, *meta-* and *para*-polymethoxymethylstyrene (in French) 112(1987)325

The kinetics of the oxidative degradation of cellulose and cellulose doped with chlorides 121 (1987)273

Thermal degradation characteristics of poly(acrylamide-co-acrylic acid) and poly(acrylamide-co-sodium acrylate) copolymers 121(1987)295

Thermal degradation of sugar cane bagasse 125 (1988)89

Chemistry and mechanism of thermal degradation reactions of zirconium(IV) alkyl xanthate complexes 127(1988)193

Kinetic study of thermal degradation of guar gum esters 128(1988)141

Kinetics of thermal degradation of cured epoxy resins based on triglycidyl-*p*-aminophenol 128 (1988)149

Thermal degradation of transition metal carbonyl complexes. Part III. Thermogravimetric and differential scanning calorimetric studies of triphenylphosphine pentacarbonyls of chromium, molybdenum and tungsten 128(1988)175

Determination of the principal defect site responsible for Saran degradation using thermogravimetric analysis 134(1988)207

Structural characterization and thermal degradation of hexolic-anhydride-based polyesters 140(1989)169

Thermal degradation of transition metal carbonyl complexes. Part IV: Thermogravimetric studies of various stoichiometric mixtures of trimethylamine *N*-oxide dihydrate and hexacarbonyl molybdenum 145(1989)179

Thermal degradation of cellulose, cellulose thiophosphate and its complexes with transition-metal cations 145(1989)331

Effects of temperature and oxygen on the degradation of doped and undoped polyphenylacetylene 146(1989)251

The application of thermogravimetry for the study of polymer degradation 148(1989)375

Degration

A kinetic study of the thermal degradation of poly(dihexyl itaconate) 134(1988)127

Degree of conversion

On the use of the degree of conversion in the rate equations. II 111(1987)349

Dehalogenation

Thermal decomposition to dehalogenation of α-haloketones by GLC 104(1986)373

Dehydration

δH and activation energy of dehydration–anation processes calculated from dynamic TG and DTA 101(1986)77

Solid state kinetic parameters of the dehydration of $CoCl_2 \cdot 6H_2O$ by isothermal thermogravimetric measurements 102(1986)125

The deuterium isotope effect on the kinetics of the thermal dehydration of calcium oxalate monohydrate 102(1986)263

Solid state mechanism of the thermal dehydration of $[Rh(NH_3)_5(H_2O)]X_3$ ($X = Cl^-, Br^-, I^-$) 103(1986)353

Kinetic analysis of TG data: study of calcium oxalate monohydrate dehydration with a non-separable variables model 104(1986)71

Thermal decomposition and dehydration of magnesium perchlorate hexahydrate 104(1986) 159

Comparison of isothermal and non-isothermal TG data. Kinetic analysis of calcium oxalate dehydration 107(1986)283

On the change of the activation energy with conversion degree and heating rate for the non-isothermal dehydration of $CaC_2O_4 \cdot H_2O$ 107 (1986)339

Dehydration kinetics of some smectites: a thermogravimetric study 111(1987)9

Dehydration of crystalline $MnSO_4 \cdot 4H_2O$ 113 (1987)95

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some transition metal salicylato complexes 114 (1987)145

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some 5-substituted metal salicylato complexes 115(1987)255

Kinetic aspects of the thermal treatment of acid crystallohydrate, $MgHPO_4 \cdot 3H_2O$. Part 2. Dehydration and accompanying effects 116 (1987)137

Kinetic parameters of dehydrating iron oxide hydrate: DTA and DTG study 117(1987)127

Structure and function of the nuclei developed during dehydration of the alums $KAl(SO_4)_2 \cdot 12H_2O$ and $KCr(SO_4)_2 \cdot 12H_2O$ 121(1987)97

Phase relation and dehydration behavior of barium nitrite hydrates 127(1988)201

Thermal decomposition of the malato-aquo complex of thallium(III): the mechanism of thermal dehydration of thallium(III) malate trihydrate 128(1988)55

Dehydration of some inorganic compounds by CW CO_2 laser irradiation and thermal heating. A comparative study 129(1988)269

Investigation of the dehydration kinetics of 2-ethylpyridinium metatungstate monohydrate using a rising temperature technique 130(1988) 345

Studies on alkaline earth metal sulfites. X(1) - Thermal dehydration of calcium sulfite hemihydrate: Dependence of the products on dehydration conditions 133(1988)251

The study of thermal dehydration and hydrolysis of $MgBr_2$.6HOH by DTA and TG 133(1988)263

Kinetics of the thermal dehydration of some layered hydroxycarbonates 135(1988)231

Dehydration energy of halloysite by means of DSC methods with the relationships of its mineralogy and modes of occurence 135(1988)279

X-ray studies on dehydration and rehydration of expansible clay minerals 135(1988)285

Thermodynamic study of the dehydration process of α-goethite in vacuo 138(1989)47

Dehydration of $CuSO_4 \cdot 5H_2O$ studied by conventional and advanced thermal analysis techniques 138(1989)107

Thermal dehydration of crystalline $NiSO_4 \cdot 6H_2O$ 144(1989)83

Evaluation of thermodynamic data for aluminum chloride hexahydrate and its dehydration 144 (1989)241

Kinetics of dehydration reactions—a comparison between isothermal and non-isothermal studies 147(1989)331

Dehydration kinetics of $K_2AlF_5 \cdot H_2O$ 149 (1989)53

Dehydroxylation

Dehydroxylation kinetics of some pure smectites 112(1987)265

Deltatherm V

The deltatherm V differential thermal analysis and thermogravimetry system 117(1987)45

Denitration

Deaquation and denitration studies on copper nitrate trihydrate 103(1986)333

Density

Viscosity and densities of binary mixtures of acetonitrile with substituted anilines. Part 4 117 (1987)115

Weighing in free suspension and its application in thermogravimetry and in the determination of surface areas and the density of porous solids 134(1988)395

Viscosities and densities of binary liquid mixtures of 2-butoxyethanol with aniline and *N*-alkylaniline 149(1989)275

Derivative thermoanalytical curves

A simple kinetic relation of derivative thermoanalytical curves 124(1988)389

Desorption

Kinetic analysis of NH_3 temperature programmed desorption (TPD) on a HZSM-5 zeolite 106(1986)133

Temperature programmed desorption study of hydrogen adsorption on $LaMO_3$ oxides 126 (1988)205

Comparative DSC and TG studies of the desorption of water from cationic-exchange resins 127(1988)309

Mass spectral studies on the thermal desorption of aliphatic amines from the surface of Y-type zeolites 128(1988)115

Desorption of presorbed ammonia, triethylamine and pyridine from the acid sites of mordenites via differential scanning calorimetry 132(1988) 257

Temperature programmed desorption investigation of some nickel/alumina catalysts for carbon monoxide methanation 133(1988)137

Temperature-programmed reaction and desorption studies of unsupported MoS_2-based hydrotreating catalysts 133(1988)143

Evaluation of outgassing processes of plastics and rubbers using on-line thermal desorption GC-FTIR-MS 134(1988)307

Acid-base properties of zeolites by acetic acid temperature programmed desorption 137(1988)51

Desulfurization

TG study of sorbent materials for desulfurization of combustion gases at high temperature 114 (1987)103

Desulfurization of some turkish lignites during carbonization by ammonia 126(1988)299

Desulfurization of some Turkish lignites during oxidation by air 132(1988)289

Kinetic investigation of sorbents for desulfurization of combustion gases measured with a tubular reactor/TG combination 135 (1988)139

Detection

Applications of variable atmosphere DTA (in CO_2) to improved detection and content evaluation of anhydrous carbonates in mixtures 109(1986)243

Detonation

Thermodynamics and distribution of equilibrium compositions in LPG–O_2 detonation behind an initial shock wave 126(1988)279

Deuterium oxide

Thermal analysis study of the adsorption of D_2O by sepiolite and palygorskite 135(1988)291

Deuterochloroform

Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. V. Excess enthalpies of (deuterochloroform + methyl methylthiomethyl sulfoxide), (deuterochloroform + dimethyl sulfoxide) and (deuterochloroform + chloroform) at 298.15 K 123(1987)293

Devitrification

Structure and devitrification of $Li_2O \cdot P_2O_5$–B_2O_3 and $BaO \cdot P_2O_5$–B_2O_3 glasses 113 (1987)351

The non-isothermal devitrification of lithium metasilicate glass 140(1989)191

Devitrification behaviour of a glass obtained from porphyric sands with addition of TiO_2 (4%) and MgO (8%) 150(1989)39

Di-alkylphosphatidylcholine

Biological standard reference materials for the calibration of differential scanning calorimeters: di-alkylphosphatidylcholine in water suspensions 107(1986)37

Di-butyl thiourea

A thermometric study on the stability of di-butyl thiourea in acid solutions 105(1986)91

Di-caesium telluride

The vapour pressure of di-caesium telluride (Cs_2Te) 102(1986)387

Di-*n*-dodecyl

Thermal behavior of some long-chain di-*n*-dodecyl quaternary ammonium salts 134(1988)49

Di-*n*-octyl ether

Mutual solubilities of components of binary blends of *n*-octadecane, di-*n*-octyl ether, and *N*,*N*-dioctylamine 107(1986)227

Solubility and excess volumes of the mixture Di-*n*-octyl ether + benzene 143(1989)171

Diagnostics

Diagnostics of inorganic materials by diffusion structural analysis ("Israel Chemicals Ltd." Invited Lecture) 148(1989)117

Dialkylammoniumdialkyldithiocarbamates

Enthalpies of decomposition of dialkylammoniumdialkyldithiocarbamates (alkyl = ethyl, *n*-propyl, i-propyl, i-butyl) 124(1988)319

Diamine complexes

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part II. 138(1989)285

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part III 142(1989)89

Diaminonaphthalene

Electrical properties of charge transfer complexes of diaminonaphthalene donors with dinitro- and trinitrobenzene acceptors 140(1989)277

Diammonium cadmium halides

Thermal stability and phase transition studies of diammonium zinc and cadmium halides 144 (1989)183

Diammonium hydrophosphate

Correlation between isothermal and rising temperature experiments. Thermal decomposition of diammonium hydrophosphate 113(1987)305

Diammonium zinc halides

Thermal stability and phase transition studies of diammonium zinc and cadmium halides 144 (1989)183

Diaquobis(ethylenediamine)copper(II) oxalate

Thermal decomposition kinetics. Part XVI. Kinetics and mechanism of thermal decomposition of diaquobis(ethylenediamine) copper(II) oxalate 150(1989)63

1,5-Diaryl-3-acetylformazan

Thermogravimetric studies on lanthanide complexes of new derivatives of 1,5-diaryl-3-acetylformazan 144(1989)249

Diatomic molecules

The relative strengths of ionic, covalent and multiple-bonding in diatomic molecules 109 (1986)165

Dibenzo-*p*-dioxins

Prediction of vapor pressures, boiling points and enthalpies of fusion for twenty-nine halogenated dibenzo-*p*-dioxins 112(1987)117

Dibenzoylmethane arylhydrazone

Stability constants, structure and thermogravimetric analysis of La(III) complexes with some arylhydrazones of benzoylacetone and dibenzoylmethane 149(1989)61

Dibromo-1,2-cyclohexane

Conformational analysis of dibromo-1,2-cyclohexane by microcalorimetry (in French) 130(1988)121

Dibromobenzene

The system *p*-dibromobenzene + *p*-chloroiodobenzene + *p*-bromoiodobenzene–a methodological study on thermal analysis and thermodynamic phase-diagram analysis 146 (1989)297

Molecular alloys in the series of *para* disubstituted benzene derivatives. Part III. The *para*-bromochlorobenzene–*para*-dibromobenzene system 147(1989)273

1,2-Dibromoethane

Excess volumes of mixing and excess enthalpies of mixing of 1,2-dibromoethane with aromatic hydrocarbons at 298.15 K 146(1989)187

Dicalcium silicate

Hydration of dicalcium silicate in the presence of concrete admixtures 118(1987)143

Dicarboxylic acids

Thermodynamics of electrolytic dissociation. First and second dissociation constants of some dicarboxylic acids in 10% (v/v) acetone 115 (1987)1

Thermodynamics of dissociation of dicarboxylic acids in water + dioxane mixtures 115(1987)97

Thorium(IV) complexes of some dicarboxylic acids in aqueous solution: a potentiometric and calorimetric study 124(1988)311

Dichloro-substituted benzoic acids

Statistical study of the dissociation and solvation processes for dichloro-substituted benzoic acids: additive and steric effects 127(1988)295

Dichlorobenzene

Dynamical analysis of the specific heat in *p*-dichlorobenzene 134(1988)35

Dichlorobenzoylhydrazines

Spectral and thermal studies of some novel bivalent metal chelates of dichlorobenzoylhydrazines 132(1988)165

2,4-Dichlorophenoxyacetate

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of H^+, Na^+ and Ca^{2+} complexes with 2,4-dichlorophenoxyacetate in aqueous solution at different temperatures and ionic strengths 128(1988)261

Dichlorotetrafluoroethane

The energy of combustion of liquid 1,2-dichlorotetrafluoroethane 109(1986)175

***trans*-Dichlorotetramminecobalt(III) bisulphate**

Kinetic studies on the decomposition of *trans*-dichlorotetramminecobalt(III) bisulfate 129(1988) 263

Dideuteriocyclobutadienes

Thermodynamics of equilibrium isomeric mixtures: the dideuteriocyclobutadienes 112 (1987)379

Dielectric constant

Thermal studies on the dielectric constant of some $(C_nH_{2n})(NH_3)_2FeCl_4$ compounds ($n = 2$, 7 and 10) 105(1986)295

Dielectric ideality

Comparisons of dielectric and thermodynamic ideality. I. Mixtures of onsager liquids 113 (1987)369

Comparisons of dielectric and thermodynamic ideality. II. Mixtures of associated liquids 116 (1987)183

Dielectric properties

Studies of dielectric properties of some binary hydroorganic systems 104(1986)203

Effects of temperature and frequency changes on the dielectric properties of modified chalcogenides 120(1987)231

Diesel engine oils

Characterization of fresh and used diesel engine oils by differential scanning calorimetry 126 (1988)181

Diethanolamine solutions

Enthalpies of absorption of carbon dioxide in aqueous diethanolamine solutions 146(1989)107

Diether

Excess enthalpies of ketones + diether at 298.15 K 130(1988)375

Thermodynamics of ketones and diether mixtures: analysis in terms of group contribution (DISQUAC) 144(1989)1

Diethyl phthalate

Thermal analysis of ethyl cellulose: influence of atmosphere and addition of diethyl phthalate as plasticizer 145(1989)173

Diethynylbenzene polymers

Thermal analysis and conducting properties of polymers of diethynylbenzene and diethynylpyridine 141(1989)27

Diethynylpyridine polymers

Thermal analysis and conducting properties of polymers of diethynylbenzene and diethynylpyridine 141(1989)27

Differential-heat-conduction-scanning calorimeter

Thermal power measurements in a differential-heat-conduction-scanning calorimeter at low temperature-scanning rates 121(1987)333

Differential thermal microanalyzer

Data acquisition from a differential thermal microanalyzer with a low-cost microcomputer 111(1987)75

Diffusion

Investigation of diffusional phenomenon in the oil shale of Timahdit (Morocco). Role of sedimented plans 103(1987)147

Diffusional study of the effect of sodium chloride on limestone sulfation in fluidized-bed combustion. Part 2 106(1986)43

Theory of emanation thermal analysis. V. Functional scales for evaluating the parameters of inert gas diffusion in solids 111(1987)215

Use of thermal analysis in the optimization of polymeric diffusion barriers in controlled release delivery systems 134(1988)275

Diffusion and readsorption effects during TPD from porous materials 135(1988)147

Diagnostics of inorganic materials by diffusion structural analysis ("Israel Chemicals Ltd." Invited Lecture) 148(1989)117

Diffusional barriers

Influence of diffusional barriers on the thermal analysis of the zeolite TON 135(1988)359

Diffusivity

Thermal diffusivity measurements for thin films by the photoacoustic effect 120(1987)191

Theory of emanation thermal analysis. VI. Mathematical model of inert gas release from a two-phase solid–fluid system under its interface and diffusivity changes due to a chemical reaction 121(1987)241

Thermal diffusivity and thermal conductivity studies on europium, gadolinium and lanthanum pyrohafnates 140(1989)103

Thermophysical properties of protein crystals: thermal diffusivity measurements of methemoglobin single crystals using a dielectric heating technique 141(1989)235

Thermal conductivity and diffusivity measurements hy the transient two linear and parallel probe method 148(1989)513

Diglycolamine

Enthalpies of solution of carbon dioxide in aqueous diglycolamine solutions 106(1986)241

***cis*-Dihalogeno-(2,2′,2″-triaminotriethylamine)nickel(II) complexes**

Thermal syntheses and the electronic spectra of *cis*-dihalogeno-(2,2′,2″-triaminotriethylamine)nickel(II) complexes 136 (1988)279

Dihydrazinium hexafluorosilicate

Synthesis and characterization of $(N_2H_5)_2SiF_6$ and thermal analysis of $(N_2H_5)_2SiF_6$ and $N_2H_6SiF_6$ 108(1986)149

3,4-Dihydroxybenzoic acid

Statistical study of the influence of the hydroxyl groups in positions 3 and 4 on the ionization process of 3,4-dihydroxybenzoic acid 120(1987) 279

β-Diketone

Thermal and spectral studies of some mixed ligand complexes of Co(II), Ni(II) and Cu(II) involving aliphatic and heterocyclic β-diketone 129(1988)161

Thermodynamics of proton–ligand dissociation of some fluorinated β-diketones in dioxane–water mixtures 149(1989)287

Diketopiperazine

Calorimetric measurement of the enthalpy of dissolution of diketopiperazine in water as a function of temperature 139(1989)279

Dilatometer

Development of a new laser interferometric dilatometer and its application to low expansion materials 134(1988)383

Dilatometry

High temperature dilatometer study of special ceramics and their sintering kinetics 106(1986)71

Standardization of TMA (dilatometry) for application of the study of synthetic zeolites 132(1988)127

Determination of quartz in ceramics by dilatometry 135(1988)335

Scanning dilatometry and calorimetry of *p*-alkyl-*p'*-cyano-cyclohexyl-cyclohexanes 140(1989)31

Structural relaxation, glass transition and crystallization of Cu–Zr amorphous ribbons studied by dilatometry and differential scanning calorimetry 142(1989)29

Dilution

Heats of dilution of water-soluble polymer solutions 123(1988)271

Dimensionless parameter method

Dimensionless parameter method in thermokinetics 123(1988)213

3-(4,5-Dimethyl-2-thiazolylazo)-2,6-diaminopyridine

Thermal decomposition of 3-(4,5-dimethyl-2-thiazolylazo)-2,6-diaminopyridine 124(1988)35

3-(Dimethyl-aminomethyl)indole

Structural and thermal studies on mixed ligand co-ordination compounds of Pd(II), Rh(III) and Pt(II) with 3-(dimethyl-aminomethyl)indole and salicylaldoxime 140(1989)265

***N,N*-Dimethylacetamide**

Enthalpies of solution of NaI and CsI in *N,N*-dimethylacetamide–water mixtures at 298.15 K 141(1989)131

3-(*p*-Dimethyl amino-anilino)-methyl salicyclic acid hydrazide

Spectral, magnetic and thermal investigations on Cu(II), Ni(II) and Co(II) complexes with 3-(*p*-dimethyl amino-anilino)-methyl salicylic acid hydrazide 111(1987)385

***N,N*-Dimethylaniline**

Thermodynamics of electron transfer processes in liquid and gas phases. Part II. Correlations of electro-oxidation and ionization potentials with substituent constants for some *N,N*-dimethylaniline derivatives 119(1987)273

***N,N*-Dimethylbenzenesulphinamide**

Thermodynamic properties of binary mixtures containing sulfur amide. 3. Excess molar volumes of benzyl alcohol + *N,N*-dimethylmethanesulfinamide, + *N,N*-dimethyl-benzenesulfinamide and + dimethyl sulfoxide 109(1987)377

Dimethylformamide

Standard potentials of silver–silver bromide electrode in water–dimethylformamide mixtures at different temperatures and the related thermodynamic quantities 112(1987)341

Thermal decomposition of rare earth trifluoro-methanesulfonate complexes with dimethyl-formamide (DMF) 120(1987)351

***N,N*-Dimethylformamide**

Excess thermodynamic properties for mixtures of water and *N,N*-dimethylformamide at 303.15 K 117(1987)379

Transfer free energies of ions from water to *n,n*-dimethylformamide and its aqueous mixtures, based on Ph_4AsBPh_4 and Ph_4SbBPh_4 assumptions 142(1989)19

***N,N*-Dimethylmethanesulphinamide**

Thermodynamic properties of binary mixtures containing sulfur amide. 3. Excess molar volumes of benzyl alcohol + *N,N*-dimethylmethanesulfinamide, + *N,N*-dimethyl-benzenesulfinamide and + dimethyl sulfoxide 109(1987)377

Dimethyl sulfoxide

Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. V. Excess enthalpies of (deuterochloroform + methyl methylthiomethyl sulfoxide), (deuterochloroform + dimethyl sulfoxide) and (deuterochloroform + chloroform) at 298.15 K 123(1987)293

Heats of solution of some pyrimidines, purines and related compounds in dimethylsulfoxide 126(1988)155

Dimethyl sulphoxide

Absolute electrode potentials in dimethyl sulphoxide–water mixtures and transfer free energies of individual ions 108(1986)115

Thermodynamic properties of binary mixtures containing sulfur amide. 3. Excess molar volumes of benzyl alcohol + *N*,*N*-dimethylmethanesulfinamide, + *N*,*N*-dimethylbenzenesulfinamide and + dimethyl sulfoxide 109(1987)377

Excess molar isobaric heat capacities and excess molar enthalpies for water–dimethylsulfoxide mixtures at 25 °C 136(1988)209

Excess Gibbs energy of mixing and refractive index of binary solutions of acetonitrile and of dimethylsulfoxide with several aromatic hydrocarbons 138(1989)19

Calorimetric study of the solvation of some ions in acetonitrile–dimethylsulfoxide mixtures 145 (1989)219

***N*,*N*′-Dimethylthiourea**

Thermal behaviour of uranium(VI) complexes. Uranyl acetate dihydrate–*N*,*N*′-dimethylthiourea system: synthesis and decomposition 136(1988)153

1,3-Dimethyluracil

Thermoanalytical characterization of 1,3-dimethyluracil and malonamide crystals 142 (1989)365

Dinitrobenzene

Electrical properties of charge transfer complexes of diaminonaphthalene donors with dinitro- and trinitrobenzene acceptors 140(1989)277

***N*,*N*-Dioctylamine**

Mutual solubilities of components of binary blends of *n*-octadecane, di-*n*-octyl ether, and *N*,*N*-dioctylamine 107(1986)227

Dioxane

Excess molar volumes of trichloroethylene with cyclohexanone, methylisobutylketone, and 1,4-dioxane at 308.15 and 318.15 K 107(1986)383

Thermodynamic ionization constants for crown ether carboxylic acids in aqueous dioxane 111 (1987)257

Thermodynamics of dissociation of dicarboxylic acids in water + dioxane mixtures 115(1987)97

Enthalpies of solution of polyvinylalcohol in water and polyvinylacetate in dioxane 119(1987) 47

Absolute electrode potentials in dioxane–water solvent mixtures and transfer free energies of individual ions 120(1987)261

Dipalmitoylphosphatidylcholine

Phase transition phenomena induced by the successive appearances of new types of aggregation states of water molecules in the "L-dipalmitoylphosphatidylcholine–water" system 109(1986)81

Thermotropic behaviour of dipalmitoylphosphatidylcholine lipsomes containing retinoids 122(1987)117

1,5-Diphenyl-3-cyanoformazans

Spectral and thermal conductance studies of some symmetric 1,5-diphenyl-3-cyanoformazans. SCF PPP CI calculation 138(1989)129

Diphenyl-1,3 urea

Enthalpies of sublimation and fusion of monophenylurea and diphenyl-1,3 urea 122 (1987)189

Diphenylglyoxal

Entropies of diphenylglyoxal solutions in non-polar solvents 108(1986)221

Diphenylglyoxal solutions

Comment on "entropies of diphenylglyoxal solutions in non-polar solvents" 130(1988)367

Dipropylammonium

Standard enthalpy of formation of zeolite samples of the MFI type. Stabilisation of this structure by tetra-, tri- and dipropylammonium cations (in French) 146(1989)21

Dirhodium tetra-acetate adducts

Spectroscopic and thermal studies on dirhodium tetra-acetate adducts with thiocarbonyl donors 132(1988)217

Disorder

Symmetry departure: disorder and glass transition 109(1986)91

Dispersions

Thermal determination of solid dispersions of oxodipine 132(1988)181

Dispersity

Preparation of V_2O_5 with an enhanced dispersity by thermal decomposition of oxalates and peroxides 137(1988)217

Displacement

Displacement reactions in gypsum. I. 103(1986) 247

Displacement reactions in gypsum and in anhydrite 114(1987)75

Displacement reactions

Formation of scheelite ($CaWO_4$) and powellite ($CaMO_4$) by displacement reactions 133(1988) 125

DISQUAC group contribution

Application of the DISQUAC group contribution model to binary liquid organic mixtures 122 (1987)45

Excess enthalpies of ketone–triether mixtures. Measurement and application of the DISQUAC group contribution method 141(1989)269

Thermodynamics of ketones and diether mixtures: analysis in terms of group contribution (DISQUAC) 144(1989)1

Dissociation

Some macrokinetic structural aspects of heterogeneous thermal dissociation reactions 110(1987)159

Significance of structural factors in the thermal dissociation of solids 110(1987)359

The thermal dissociation of NH_3BH_3 113(1987) 379

Thermodynamics of dissociation of dicarboxylic acids in water + dioxane mixtures 115(1987)97

Thermal properties, thermochemistry and kinetics of the thermal dissociation of hydrochlorides of aromatic mono-amines 121 (1987)413

Discussing coefficient values of the compensation for thermal dissociation reactions of the type a(solid) ⇌ b(solid) + c(gas) 124(1988)385

Thermodynamic properties of the dissociation of 2-mercaptopyridine, 2-mercaptopyrimidine and 2-thiobarbituric acid 127(1988)81

Statistical study of the dissociation and solvation processes for dichloro-substituted benzoic acids: additive and steric effects 127(1988)295

Standard enthalpy of formation of tris(2,4-pentanedionato)cobalt(III): the mean (Co–O) bond-dissociation enthalpy 129(1988)229

Thermodynamic acid dissociation constants for proton-ionizable crown compounds in aqueous dioxane 130(1988)103

Temperature and substituent effects on the dissociation constants of some 5-(*p*-substituted phenylazo) barbituric acid compounds 136 (1988)1

Thermodynamics of the dissociation of $ZnCl_2(NH_3)_2$ by modified entrainment 138 (1989)371

Standard enthalpies of formation of bis(fluoro-substituted pentane-2,4-dionato) hydrates of Mn(II), Co(II) and Ni(II): the mean (M–O) bond dissociation enthalpies 139(1989)33

Thermodynamics of the second proton dissociation processes of nine α-amino-acids and the third ionization processes of glutamic acid, aspartic acid and tyrosine 141(1989)297

Studies on the dissociation constants of 1,10-phenanthroline in ethanediol + water mixtures at 25 °C 142(1989)1

Calorimetric study of the first and second proton dissociation processes of fluoro and hydroxyl derivatives of phenylalanine 142(1989)203

Thermodynamic proton–ligand dissociation constants of substituted 3-hydroxy-4-pyrones in dioxane–water mixtures 143(1989)1

Solvent effects on the dissociation of 2,2′-bipyridine and 1,10-phenanthroline in aqueous binary mixtures of 2-methoxyethanol and 1,2-dimethoxyethane 147(1989)41

Influence of some factors on thermal dissociation of solids 148(1989)165

Thermodynamics of proton–ligand dissociation of some fluorinated β-diketones in dioxane–water mixtures 149(1989)287

Dissociation constants

Thermodynamics of electrolytic dissociation. First and second dissociation constants of some dicarboxylic acids in 10% (v/v) acetone 115 (1987)1

Dissolution

Enthalpies of crystallization and dissolution of ammonium bromide in water at 298.15 K 113 (1987)151

Dissolution enthalpy of NaI in mixtures of ethylene glycol + aliphatic alcohols at 313.15 K 115(1987)119

Enthalpy of dissolution of LiCl and $LiCl \cdot H_2O$ in water at 25 °C at low concentrations 116 (1987)291

Calorimetric measurement of the enthalpy of dissolution of diketopiperazine in water as a function of temperature 139(1989)279

Distortion

Note on the distortion of TA curves by transport phenomena 110(1987)78

Disturbances

Disturbances in weighing. Part II 103(1987)39

Distyrylpyrazine

Further investigations on the thermoelectrical and photochemical properties of 2,5-distyrylpyrazine (DSP) and azodiisobutyronitrile (AIBN) single crystals 101(1986)1

Disubstituted benzenes

Thermodynamic properties of positional isomers of disubstituted benzenes in the condensed phase (in French) 147(1989)261

Molecular alloys in the series of *para* disubstituted benzene derivatives. Part III. The *para*-bromochlorobenzene–*para*-dibromobenzene system 147(1989)273

***trans*-1,4-Dithiane-1,4-dioxide**

Thermal analysis of hydrated rare-earth trifluoromethanesulfonate complexes with *trans*-1,4-dithiane-1,4-dioxide (TDTD) 107(1986)387

Thermogravimetric and differential scanning calorimetry studies of hydrated lanthanide perrhenate complexes with *trans*-1,4-dithiane-1,4-dioxide 118(1987)305

Dithiazolin iodonium salts

On the thermal stability of some 3,5-disubstituted 1,2,4-thiadiazols and 3,5-disubstituted-1,2,4-dithiazolin iodonium salts 105(1986)239

Dithiocarbamate

Thermal behaviour of metal-dithiocarbamates 104(1986)339

Chemistry of dithiocarbamate derivatives of amino acids. Part IV. Thermal behaviour of nickel(II) complexes 127(1988)101

Dithiocarbazates

Determination of dithiocarbazates, stoichiometric composition and heat of formation of its methalic complexes by thermometric titration 113(1987)257

Dithiooxamides

Complexes of group IIB metals with dithiooxamides. I. Thermal properties of $Zn(CH_3NHCSCSNHCH_3)X_2$ (X = Cl, Br, I) complexes 124(1988)17

Ditungsten carbide

Heat capacity and thermodynamic properties of ditungsten carbide, W_2C_{1-x}, from 10 to 1000 K 129(1988)115

Divalent cations

Thiophenehydroxamic acid (tha) and its solid complexes with several metallic divalent cations: a spectroscopic and thermal study 141(1989)253

Divalent metal ions

Stability and thermodynamics of binary complexes of divalent metal ions with *p*-nitrobenzaldehydesemicarbazone 116(1987)373

Thermal analysis of some complexes of divalent metal ions with picrolonic acid 144(1989)293

Divided materials

The role of thermal analysis and calorimetry in the study of porous or divided materials (Review) 148(1989)183

Dodecanates

Thermal studies of heavy metal carboxylates. II. Thermal behaviour of dodecanoates 106(1986) 341

Dodecane

Heat capacities of binary mixtures of n-dodecane with hexane isomers 102(1986)75

Dodecylammonium tetrachloromanganate(II)

Thermodynamic properties and phase transitions of dodecylammonium tetrachloromanganate(II) and tetrachlorozincate(II) from 280 to 500 K 123(1988)15

Dodecylammonium tetrachlorozincate(II)

Thermodynamic properties and phase transitions of dodecylammonium tetrachloromanganate(II) and tetrachlorozincate(II) from 280 to 500 K 123(1988)15

Dodecyltrimethylammonium bromide

Thermodynamics of transfer of some nitroalkanes from aqueous to dodecyltrimethylammonium bromide micellar phases 137(1988)151

***n*-Dodecyltrimethylammonium bromide**

Thermodynamics of the interaction between *n*-dodecyltrimethylammonium bromide and catalases 146(1989)215

Dolomite

The moving boat technique and practical studies on the decomposition of carbonates. Part 1. comparative assessment of the decomposition rates of limestone and dolomite samples 101 (1986)119

Differential scanning calorimetry of the dolomite–ankerite mineral series in flowing nitrogen 121(1987)39

Note on the thermal decomposition of dolomite 121(1987)479

Differential scanning calorimetry of the dolomite-ankerite mineral series in variable atmospheres 135(1988)225

Non-isothermal, in situ XRD analysis of dolomite decomposition 140(1989)67

Studies of the silicon dioxide-dolomite system by thermal analysis 148(1989)473

Dolomitic marl rocks

Mineralogical changes upon heating calcitic and dolomitic marl rocks 135(1988)243

Domains

Properties of domains in heterogeneous systems from thermodynamic functions of solution 135 (1988)155

Donor atoms

Influence of different donor atoms on the formation of 1 : 1- and 2 : 1-complexes of 12-crown-4 and 18-crown-6 ethers with Ag^{+}, Tl^{2+}, Ba^{2+} and Pb^{2+} 107(1986)219

Donor complexes

Thermal analysis of heterocyclic thione donor complexes. Part VI. Palladium(II) and platinum(II) complexes of thiazole-thiones 140 (1989)343

Doping

Effects of Li_2O doping on thermal solid–solid interaction between ferric oxide and nickel carbonate 132(1988)117

Effects of temperature and oxygen on the degradation of doped and undoped polyphenylacetylene 146(1989)251

The thermal decomposition of nickel oxalates doped with traces of other metal ions 147(1989) 251

Effects of Li_2O doping on solid–solid interactions in the $CuO–Al_2O_3$ system 150 (1989)111

Dosimeters

Evaluation of kinetic parameters of $CaF_2 : Tm$ (TLD-300) TL dosimeters 135(1988)111

Glow curve kinetics of self-made $CaSO_4 : Dy$ + PTFE thermoluminescent dosimeters 135(1988) 121

Double-base propellant

A thermoanalytical study of the decomposition of a double-base propellant 101(1986)373

Double chlorides

Properties of double chlorides in the systems $ACl/SmCl_3$ (A = Na-Cs) 133(1988)275

Double hydroxides

The effect of raw material type on the characteristics of Mg-Al double hydroxides synthesized by hydrothermal method 133(1988) 119

Double oxalates

Thermal decomposition of some double oxalates, precursors of the oxides Na_2MO_3; M = Sn, Ge, V and Ti (in French) 106(1986)1

Double salts

Thermoanalytical investigations on the decomposition of double salts. Part II. The decomposition of double salts $MeCl \cdot MgCl_2 \cdot 6H_2O$ (Me = NH_4, Rb, Cs) 121(1987)151

Double selenates

Studies on double selenates. VI. Thermal decomposition of gadolinium, terbium, dysprosium and alkali metal double selenates 136(1988)319

Studies on double selenates. VII. Thermal decomposition of holmium, erbium, thulium and alkali metal double selenates 136(1988)327

Studies on double selenates. VIII. Thermal decomposition of ytterbium, lutetium, yttrium and alkali metal double selenates 136(1988)335

Drop calorimeter

Thermodynamic study of the liquid Fe–S system by use of a drop calorimeter 109(1986)275

Drugs

Thermal analysis methods in the study of some retard macromolecular drugs 134(1988)167

DS-11 lube oils

Thermogravimetric assessment of service performance of DS-11 lube oils 101(1986)9

DuPont DSC 910 module

A calibration study of the DuPont DSC 910 module 120(1987)55

Dynamic calorimetry

Dynamic calorimetry in high-pressure, high-temperature thermodynamics of liquids 121 (1987)463

Dynamic gas mixtures

Equipment for studying hot corrosion processes in dynamic gas mixtures containing water vapour 103(1987)27

Dynamic parameters

The influence of the dynamic parameters of the calorimetric system on the accuracy of the determination of the thermokinetics 149(1989) 373

Dynamic thermogravimetry

Mathematical models of the kinetics of dynamic thermogravimetry 145(1989)165

Dysprosium

On the thermochemistry of the rare earth antimonides. The Dy–Sb system 129(1988)99

Studies on double selenates. VI. Thermal decomposition of gadolinium, terbium, dysprosium and alkali metal double selenates 136(1988)319

Dysprosium complexes

Solid state decomposition studies on metal salicylates. Thermal decomposition of the 5-substituted dysprosium and erbium salicylato complexes 117(1987)79

Dysprosium salicylato complexes

Solid state decomposition studies on metal salicylates. Thermal decomposition of dysprosium salicylato complexes 116(1987)257

E

Earth sciences

Thermal analysis in earth sciences 110(1987)495

Earth sciences applications of evolved gas analysis: a review (Invited lecture) 135(1988)207

Education

Report on the workshop: education, publication and standardization in thermal analysis 110 (1987)23

Thermal analysis education 148(1989)13

Effusing molecules

Effects of effusing molecules on a suspended target 131(1988)257

Elastomers

Epoxy polymers: Effect of the elastomer in the kinetics of polymerization 122(1987)29

Electrical conductivity

Metal chelates of heterocyclic nitrogen-containing ketones. XVII. Effect of temperature and gamma irradiation on the electrical conductivity of 2-quinaldyl phenyl ketone and its metal complexes 103(1986)213

Effect of temperature on the electrical conductivity of some 4-(substituted)-3-hydroxy-2-quinoline ligands and their complexes 125 (1988)9

Electrical conduction in γ-irradiated and unirradiated zinc–iron ferrites 125(1988)379

Electrical conductivity behaviour in $(C_nH_{2n})(NH_3)_2FeCl_4$ complexes ($n = 2, 3, 7$ and 10) 137(1988)255

Cryoscopy, viscosity, and electrical conductivity measurements of the strontium nitrate–acetamide molten system 143(1989)205

γ-irradiation effects on the electrical conductivity of some two-dimensional complexes: $RMnCl_4$, $RCoCl_4$ and $RMn_{0.5}Co_{0.5}Cl_4$ ($R = H_3N-(CH_2)_8-NH_3$) 146(1989)87

Electrical properties

The electrical properties of some 2-aminopyrimidine and 2-aminopyrazine Schiff bases 114(1987)257

Electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives 114 (1987)265

Electrical properties of charge transfer complexes of diaminonaphthalene donors with dinitro- and trinitrobenzene acceptors 140(1989)277

Electrical and thermal properties of $NH_4Br_xCl_{1-x}$ single crystal 141(1989)159

Electrical resistivity

Low temperature specific heat and electrical resistivity of $UCu_{4.5}Al_{7.5}$ 139(1989)219

Electrical studies

Thermal and electrical studies on some two-dimensional chelated compounds 140(1989)229

Electro-oxidation

Thermodynamics of electron transfer processes in liquid and gas phases. Part II. Correlations of electro-oxidation and ionization potentials with substituent constants for some *N,N*-dimethylaniline derivatives 119(1987)273

A calorimetric study of the protonation process of some indole derivatives in acetonitrile. Correlations with electro-oxidation and ionization potentials 138(1989)27

Electrochemical behaviour

Influence of heat treatment on the electrochemical behaviour of nickel 136(1988)19

Electrochemical Peltier heat

Electrochemistry and calorimetry coupling. IV. Determination of electrochemical Peltier heat 126(1988)221

Electrochemistry

"Electrochemistry–calorimetry" coupling. III. Obtaining interesting thermal effects in an adiabatic double-compartment electrolysis cell (in French) 114(1987)187

Electrochemistry and calorimetry coupling. IV. Determination of electrochemical Peltier heat 126(1988)221

Electrode potential

Solvent effects on single electrode potential and related thermodynamic quantities 103(1986)371

Absolute electrode potentials in dimethyl sulphoxide–water mixtures and transfer free energies of individual ions 108(1986)115

Standard potentials of silver–silver bromide electrode in water–dimethylformamide mixtures at different temperatures and the related thermodynamic quantities 112(1987)341

Absolute electrode potentials in dioxane–water solvent mixtures and transfer free energies of individual ions 120(1987)261

Electrodes

Standard thermodynamics of transfer V. The silver and silver salt electrodes in *t*-butyl alcohol–water mixtures at various temperatures 119(1987)337

Standard thermodynamics of transfer. III. Silver and silver salt electrodes in water + mono- and + dihydric alcohol mixtures 121(1987)353

Thermodynamics of silver–silver ion electrode in acetonitrile–water mixtures 144(1989)267

Electrolysis

"Electrochemistry–calorimetry" coupling. III. Obtaining interesting thermal effects in an adiabatic double-compartment electrolysis cell (in French) 114(1987)187

Electrolyte cells

Performance of ZrO_2 electrolyte cells for coulometric titration at high voltage 129(1988)127

Electrolytes

Enthalpy of solution of some electrolytes in water–acetamide mixtures at 313.15 K 105 (1986)41

E.M.F. measurements on solid electrolytes—a tool for investigating systems with alkali metal chlorides 110(1987)297

Electrolytic dissociation

Thermodynamics of electrolytic dissociation. First and second dissociation constants of some dicarboxylic acids in 10% (v/v) acetone 115 (1987)1

Electromotive force

A thermodynamic study of the Cu–Cr–O system by the EMF method 103(1986)361

E.M.F. measurements on solid electrolytes—a tool for investigating systems with alkali metal chlorides 110(1987)297

Gibbs free energy of formation of magnesium stannate from EMF measurement 122(1987)389

Study of the thermodynamic properties of liquid selenium-tellurium alloys. Part I. Determination of thermodynamic properties by EMF cell method (in French) 136(1988)87

Thermodynamics of individual ions in various solvent systems from electromotive force measurements 140(1989)305

Electron donor–acceptor–solvent systems

Solute–solvent interactions in electron donor–acceptor–solvent systems: pyridine or quinoline derivatives, with molecular iodine 146(1989)125

Electronegativity

Relation between heats of formation of alkali and pseudo-alkali halides and electronegativities of halogen ions 108(1986)189

Relations between heats of formation of MX_2 halides and electronegativities of halogen ions 111(1987)185

Relations between the heats of formation of MX_3 halides and the electronegativities of the halogen ions 120(1987)115

Relations between the heats of formation of the alkali chalcogenides and the electronegativities of the chalcogen ions (O, S, Se and Te) 130 (1988)115

Relations between the heats of formation of lanthanide trihalides and the electronegativities of the halogen ions 132(1988)187

Electronic interaction

Probing the electronic interaction between metal and support on Pd/TiO_2 catalyst with adsorption of hydrogen 133(1988)175

Electronic materials

Thermal analysis applied to electronic materials and processes 110(1987)407

Electronic spectra

Thermal syntheses and the electronic spectra of *cis*-dihalogeno-(2,2′,2″-triaminotriethylamine)nickel(II) complexes 136 (1988)279

Electron transfer

Thermodynamics of electron transfer processes in liquid and gas phases. 1. Correlations of electrooxidation and ionization potentials with substituent constants for some indole and indolizine derivatives: quantitative solvation free energies 108(1986)163

Thermodynamics of electron transfer processes in liquid and gas phases. Part II. Correlations of electro-oxidation and ionization potentials with substituent constants for some *N*,*N*-dimethylaniline derivatives 119(1987)273

Electrooxidation

Thermodynamics of electron transfer processes in liquid and gas phases. 1. Correlations of electrooxidation and ionization potentials with substituent constants for some indole and indolizine derivatives: quantitative solvation free energies 108(1986)163

Emanation power

Correlation between surface area and emanation power of solids 110(1987)241

Emanation thermal analysis

Theory of emanation thermal analysis. IV. Influence of inertia of the apparatus on the form of the eta curve and reconstruction of the true form of the eta curve during thermally stimulated inert gas release 104(1986)255

Thermal characterization of commercial alumina with different preparation histories by emanation thermal analysis using Ra-226 parent isotope 109(1986)227

Emanation thermal analysis used to study annealing of radiation disorder 110(1987)237

Recent developments in the theory of emanation thermal analysis 110(1987)245

Possibilities of emanation thermal analysis for the characterization of semiconducting glasses 110(1987)437

Thermal characterization and reactivity of metal oxide powders by emanation thermal analysis using Ra-226 parent isotope 110(1987)453

Theory of emanation thermal analysis. V. Functional scales for evaluating the parameters of inert gas diffusion in solids 111(1987)215

Theory of emanation thermal analysis. VI. Mathematical model of inert gas release from a two-phase solid–fluid system under its interface and diffusivity changes due to a chemical reaction 121(1987)241

Use of emanation thermal analysis in characterization of $YBa_2Cu_3O_x$ 133(1988)23

Thermal characterization of the near-surface of polycrystalline metal oxides, NiO, CuO and MgO, by emanation thermal analysis using ^{226}Ra as parent isotope 137(1988)293

Theory of emanation thermal analysis VII: thermostimulated inert gas release as influenced by the energy spectrum of the defect sites in solids 142(1989)241

Theory of emanation thermal analysis. Part VIII. Influence of sample-labelling conditions on the thermostimulated inert gas release 143(1989)27

Use of emanation thermal analysis, DTA and TG/DTG for zirconia reactivity testing during zircon preparation 143(1989)101

Emission thermophotometry

Emission thermophotometry. III. SOME NYLON POLYMERS 101(1986)89

Emission thermophotometry. IV. Cellulose and some cellulose derivatives 101(1986)95

The light emission of thermally stimulated processes: emission thermophotometry (Landseas Plenary Lecture) [abstract] 135(1988)9

Emission thermophotometry. V. Premelting light emission of some nylon polymers 143(1989)181

Emulsifier

Study on the effect of emulsifier on thermal behaviour of concentrated O/W emulsions 134 (1988)91

Enantiotropy

The enantiotropic phase transition of antimony(III) oxide 114(1987)61

Endochronic approach

Thermoviscoelastic finite element stress analysis by using endochronic approach 135(1988)199

Endoscopy

Combination of calorimetry and endoscopy for monitoring locomotor activities of small animals 130(1988)87

Energetic materials

Thermal decomposition of energetic materials. 20. A comparison of the structural properties and thermal reactivity of an acyclic and cyclic tetramethylenetetranitramine pair 114(1987)209

Thermal decomposition of energetic materials. 23. Thermochemical differentiation of cyclic and acyclic nitramines by their phase transitions 116 (1987)125

The determination of the most probable mechanism function and three kinetic parameters of exothermic decomposition reaction of energetic materials by a single non-isothermal DSC curve 123(1988)135

Thermal analysis of energetic materials (Review) 148(1989)521

Energy conversion

Report on the workshop: thermal characterization of non-stoichiometric oxides and similar compounds and their application in energy storage and conversion 110(1987)395

Energy spectrum

Theory of emanation thermal analysis VII: thermostimulated inert gas release as influenced by the energy spectrum of the defect sites in solids 142(1989)241

Energy storage

Report on the workshop: thermal characterization of non-stoichiometric oxides and similar compounds and their application in energy storage and conversion 110(1987)395

Engineering

Differential thermal analysis under high-pressure gas atmospheres: applications to materials science and engineering. A review 121(1987)21

Engines

Ceramics in engines. Past – present – future 112(1987)1

Enthalpimetry

Determination of residual unsaturation in polyene preparations by direct injection enthalpimetry 117(1987)37

Enthalpy

A heat flux DSC for enthalpy and specific heat determinations to 1700 K 148(1989)499

Enthalpy of formation

Determination of the free enthalpy of formation of the compound $LaPb_3$ (in French) 101(1986)177

Entrainment

Thermodynamics of the dissociation of $ZnCl_2(NH_3)_2$ by modified entrainment 138 (1989)371

Entropy

Entropies of diphenylglyoxal solutions in non-polar solvents 108(1986)221

Measuring energy–entropy competition and compensation in chemical reactions: a theoretical study of the role of entropy in the formation of van der Waals complexes 118(1987)79

Enthalpy–entropy interplay in gas–solid equilibria: conditions for heterogeneous entropy-controlled processes 120(1987)207

Thermochemical properties of uranyl arsenates. II. Derivations of standard entropies 126(1988) 385

Comment on "entropies of diphenylglyoxal solutions in non-polar solvents" 130(1988)367

Thermochemistry of inorganic compounds. Part 1. Estimation of entropies of A_xB_y types of solids 136(1988)133

Heat capacities and entropies from 8 to 1000 K of langbeinite ($K_2Mg_2(SO_4)_3$), anhydrite ($CaSO_4$) and of gypsum ($CaSO_4 \cdot 2H_2O$) to 325 K 139(1989)67

A rigorous rule for temperature extrema of isomer enthalpy and entropy terms: consistency test of data 142(1989)343

Entropy titration

Determination by "entropy titration" of the variations of enthalpy, free enthalpy and entropy accompanying the reaction of cobalt(II) chloride with (furyl-2)-3-propen-2-aldoxime in ethanolic medium (in French) 149(1989)87

Enzymatic reactions

Application of microcalorimetry for analysing initial rates of enzymatic reactions 103(1986)297

Enzymes

Thermochemistry of hydrolytic enzymatic reactions 112(1987)151

Epoxide

Thermal analysis of epoxide film adhesives 134 (1988)187

Epoxidized cardanol

Curing kinetics of epoxy resin using epoxidized cardanol as diluent with/without fortifier 129 (1988)277

Epoxy

Epoxy polymers: Effect of the elastomer in the kinetics of polymerization 122(1987)29

Quantitative thermal characterization of carbon–epoxy composites using differential scanning calorimetry and thermogravimetric analysis 125(1988)191

Values of kinetic parameters of cure reaction of epoxy in calorimetry by DC and DSC 146(1989) 329

Epoxy diluents / fortifier

Effect of different epoxy diluents/fortifier on the reactivity in curing and the thermal stability of epoxy resin using 2,2-bis[4-(*p*-aminophenoxy)phenyl]propane as a curing agent 141(1989)77

Epoxy polymers

Epoxy polymers: temperature–time–transformation diagram by means of DSC investigations 120(1987)315

Epoxy powder

Thermal analysis of epoxy powder coatings 134 (1988)291

Epoxy resin

Determination of the state of cure of epoxy resin used in composite with sand 102(1986)93

Thermosetting characteristics of some new polymethylol epoxy resins 109(1987)297

Heat capacities of amine hardeners and epoxy resins (in French) 109(1987)317

Calorimetric investigation of curing of some new polyhydroxy epoxy resins 111(1987)115

Heat capacities of model compounds of polymers synthesised from amine hardeners and epoxy resins (in French) 118(1987)199

Aromatic amine–epoxy resin reactions: enthalpy and heat capacity (in French) 125(1988)209

Kinetics of thermal degradation of cured epoxy resins based on triglycidyl-*p*-aminophenol 128 (1988)149

Curing kinetics of epoxy resin using epoxidized cardanol as diluent with/without fortifier 129 (1988)277

The differential scanning calorimetric study on potential mid-temperature curing reagent system for epoxy resins 134(1988)313

Effect of different epoxy diluents/fortifier on the reactivity in curing and the thermal stability of epoxy resin using 2,2-bis[4-(*p*-aminophenoxy)phenyl]propane as a curing agent 141(1989)77

Equations of state

Correlation of thermodynamic properties of fluids by means of equations of state 137(1988)21

Equilibrium

Gibbs energy and equilibrium: dimensions in the lewis equation 111(1987)321

Prediction of thermodynamic equilibrium properties from mutual solubility data 120 (1987)63

Optimum temperature programs to achieve thermogravimetry with equilibrium vapor pressure as a probe 132(1988)67

Equilibrium analysis

Equilibrium analysis of Nd(III)–NAA, Pr(III)–NAA and Ce(III)–NAA systems 144 (1989)173

Equilibrium composition

Thermodynamics and distribution of equilibrium compositions in LPG–O_2 detonation behind an initial shock wave 126(1988)279

Equilibrium constants

The complexation of cyclic polyethers and a series of equations for determination of equilibrium constants 131(1988)125

Equilibrium data

Computer analysis of equilibrium data in solution. ES5CM FORTRAN and BASIC programs for computing formation enthalpies from calorimetric measurements 138(1989)141

Equipment

Present state of commercially available thermoanalytical equipment 110(1987)31

Development of a new equipment for using the constant rate thermal analysis (CRTA) under flow of inert or reactive gases 134(1988)365

Erbium

Studies on double selenates. VII. Thermal decomposition of holmium, erbium, thulium and alkali metal double selenates 136(1988)327

Erbium(III) nitrate

Some observations on the thermal decomposition kinetics of gadolinium(III), holmium(III) and erbium(III) nitrate 129(1988)335

Erbium phosphate

Study of the equilibrium diagram of the potassium metaphosphate-erbium phosphate system and the allotropic forms of the condensed phosphates ker$(po_3)_4$ (in French) 136(1988)139

Erbium salicylato complexes

Solid state decomposition studies on metal salicylates. Thermal decomposition of the 5-substituted dysprosium and erbium salicylato complexes 117(1987)79

Ethanediamidoxime

Analytical properties of the amidoxime group. Potentiometric and thermometric behaviour of ethanediamidoxime 142(1989)135

Ethanediamidoxime complexes

Thermometric study of ethanediamidoxime complexes with metallic ions 143(1989)187

Ethanediol

Studies on the dissociation constants of 1,10-phenanthroline in ethanediol + water mixtures at 25 °C 142(1989)1

Ethanol

Solubility studies of polyethylene glycols in ethanol and water 114(1987)97

Correlation of the spectroscopic and thermodynamic properties of solutions of ethanol with non-associating components by means of the UNIQUAC associated-solution model 118 (1987)237

Liquid–liquid equilibria for ternary aceto-nitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol–saturated hydrocarbon mixtures 119(1987)357

Thermodynamics for the ionization of benzoic acid in ethanol + water mixtures at 298.1 K 124 (1988)43

Determination of the free energy of solvation of ferrous ion in water and free energies of transfer of ferrous ion from water to ethanol–water mixtures 127(1988)119

Ionic solvation in water + co-solvent mixtures. Part 16. Free energies of transfer of large single ions with the "neutral" component removed from water into water + ethanol mixtures 130(1988) 127

Ionic solvation in water + CO-solvent mixtures. Part 17. The "neutral" component of free energies of transfer of single ions from water into water + ethanol mixtures 132(1988)141

Ethers

Thermodynamic properties of binary mixtures containing cyclic ethers 122(1987)9

Thermodynamics of ketones + ether mixtures using a generalized quasichemical theory in terms of group surface interactions 136(1988)33

2-Ethoxyethanol

Thermochemical properties of NaI solutions in water–2-methoxyethanol and water–2-ethoxyethanol mixtures. The temperature dependence of enthalpic pair interaction coefficients in water solution 122(1987)377

8-Ethyl-1,3-dimethylxanthine

Thermal studies on purine complexes. Part XIV. Thermal behaviour of 8-ethyl-1-methylxanthine, 8-ethyl-1,3-dimethylxanthine and some of their metal complexes 130(1988)229

Ethyl-α-ketocyclopentylcarboxylate

Synthesis and characterization of two derivatives of ethyl-α-ketocyclopentylcarboxylate with mercury(II) 146(1989)279

8-Ethyl-1-methylxanthine

Thermal studies on purine complexes. Part XIV. Thermal behaviour of 8-ethyl-1-methylxanthine, 8-ethyl-1,3-dimethylxanthine and some of their metal complexes 130(1988)229

Thermal studies on purine complexes. XV. Thermal behaviour of some new complexes of 8-ethylxanthine and 8-ethyl-3-methylxanthine 140(1989)13

Ethyl acetate

Integral kinetic analysis from temperature programmed reaction data: alkaline hydrolysis of ethyl acetate as test reaction 141(1989)169

Ethylation

Study of the decoking kinetics of deactivated zeolite catalysts for ethylation of benzene by TA 135(1988)391

Ethylbenzene

Molar excess volumes of binary mixtures of ethylbenzene with *n*-alkanes at 298.15 K; an interpretation in terms of the prigogine–flory–patterson model 114(1987)337

Ethyl cellulose

Thermal analysis of ethyl cellulose: influence of atmosphere and addition of diethyl phthalate as plasticizer 145(1989)173

Ethylene-propylene-diene

Thermal properties and crystallization kinetics of $PP/CaCO_3$ and $PP/EPDM/CaCO_3$ composites 134(1988)139

Ethylenediamine

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Thermal stability and non-isothermal kinetic study of two coordination compounds of cobalt(II) with ligands derived from thioamides and ethylendiamine 149(1989)251

Ethylenediamine ligands

Tetracyanonickelates containing ethylenediamine ligands isolated at different pH values and their thermal stabilities 146(1989)287

Ethylene glycol

Thermodynamics of individual ions in ethylene glycol–water solvents 103(1986)387

Standard absolute potentials of $M;M^+$ and $Ag,AgX;X^-$ electrodes in ethylene glycol + water solvents and related transfer free energies 106 (1986)309

Dissolution enthalpy of NaI in mixtures of ethylene glycol + aliphatic alcohols at 313.15 K 115(1987)119

Ethyl methacrylate

Polymerization of methyl methacrylate and ethyl methacrylate in different solvents studied by DSC 134(1988)217

Ethylmorphine

Ethylmorphine–lipid interaction study by calorimetry and monolayer techniques 130 (1988)221

2-Ethylpyridinium metatungstate monohydrate

Investigation of the dehydration kinetics of 2-ethylpyridinium metatungstate monohydrate using a rising temperature technique 130(1988) 345

8-Ethylxanthine

Thermal studies on purine complexes. XV. Thermal behaviour of some new complexes of 8-ethylxanthine and 8-ethyl-3-methylxanthine 140(1989)13

Ettringite

Carbonation of ettringite by atmospheric carbon dioxide 135(1988)347

Eucryptite

Kinetics and mechanism of β-eucryptite crystallization in non-isothermal conditions 135 (1988)365

Europium

Comparative study on the heat capacity of $ABa_2Cu_3O_{7-x}$ high T_c superconducting compounds (A = Y, Eu, Ho) 133(1988)49

Substitution effects on the T_c of $RBa_2Cu_3O_2$ (R = Y and Eu) 133(1988)55

Thermal study of superconducting $Ba_2Cu_3RO_{7-x}$ (R = Y, Eu, Gd, Ho) 148(1989) 269

The thermal stability of $RBa_{2-x}K_xCu_3O_z$ (R = Y and Eu) 148(1989)275

Europium hydroxide

FTIR and high-resolution photoluminescence studies of the thermal decomposition of crystalline europium hydroxide 118(1987)25

Europium(III) nitrate

The thermal decomposition of lanthanum(III), praseodymium(III) and europium(III) nitrates 124(1988)277

Europium pyrohafnate

Thermal diffusivity and thermal conductivity studies on europium, gadolinium and lanthanum pyrohafnates 140(1989)103

Europium sulphate

Thermal decomposition of $Eu_2(SO_4)_3 \cdot 8H_2O$ studied by low temperature high-resolution luminescence spectroscopy 109(1986)343

Eutectics

Enthalpy of fusion of urea and of some eutectic mixtures of urea base (in French) 111(1987)37

Molten $LiNO_2$–$NaNO_2$, $LiNO_2$–KNO_2, $LiNO_2$–$CsNO_2$, and $NaNO_2$–KNO_2 eutectics: the reaction of $PdCl_2$, K_2PdCl_4, $K_2Pd(NO_2)_4$, $PtCl_2$, K_2PtCl_4, $K_2Pt(NO_2)_4$, $PtCl_4$, and K_2PtCl_6 111(1987)283

Chemistry of organic eutectics and 1 : 1 addition compound: *p*-phenylenediamine–catechol system 138(1989)219

Evaporation

Vapour pressure, heat of evaporation and thermal conductivity determination by means of the C 80 calorimeter 114(1987)91

Kinetics of evaporation and decomposition of isopropyl nitrate by rapid scan IR spectroscopy 149(1989)349

Evolved gas analysis

Application of evolved gas analysis to the study of poly(vinyl butyral) thermal stability 116 (1987)317

Earth sciences applications of evolved gas analysis: a review (Invited lecture) 135(1988)207

Evolved gases

A new technique for analysis of evolved gases from a thermogravimetric analyser 101(1986)231

Excess enthalpies

Unifac interaction parameters for excess enthalpies of mixing 111(1987)267

Molar excess enthalpies, molar excess volumes and molar isentropic compressions of mixtures of 2-propanone with heptane, benzene and trichloromethane at 298.15 K 113(1987)141

Excess enthalpy

Thermodynamics of alcohol solutions. Excess molar enthalpies of binary and ternary mixtures containing two alcohols 102(1986)207

Excess enthalpies of binary mixtures for 1,3-cyclohexadiene and 1,4-cyclohexadiene + cyclohexane, + n-hexane and + benzene 102 (1986)245

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. I. Description and discussion of experimental procedures 103(1986)275

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. II. Experimental results and their analytical presentation 103(1986)281

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. III. The influence of pressure on the excess enthalpy 103(1986)291

Thermodynamics of alcohol solutions. Excess molar enthalpies of ternary mixtures containing two alcohols and one active nonassociating component 104(1986)179

The binary system (Li, Na)Br: measurement of the excess enthalpy of solid mixtures; measurement and analysis of the solid–liquid phase diagram 105(1986)117

Topological studies of the molecular species that characterize lower alkanol + methylene bromide mixtures: molar excess volumes and molar excess enthalpies 106(1986)293

Thermodynamics of alcohol solutions. Phase equilibria and excess molar enthalpies of mixtures containing two alcohols 107(1986)199

Excess enthalpies of binary solvent mixtures of 2-butanone with aliphatic alcohols 114(1987)239

Conduction calorimetry and reagent lack: measurement of the excess partial molar enthalpies extrapolated to infinite dilution (in French) 114(1987)373

Studies on thermodynamic properties of binary systems containing alcohols. VII. Temperature dependence of excess enthalpies for *n*-propanol + benzene and *n*-butanol + benzene 123(1988) 285

Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. V. Excess enthalpies of (deuterochloroform + methyl methylthiomethyl sulfoxide), (deuterochloroform + dimethyl sulfoxide) and (deuterochloroform + chloroform) at 298.15 K 123(1987)293

Conduction calorimetry and reagent flow rate: measurement of partial molar excess enthalpies at high dilution, determination of the integral size (in French) 129(1988)217

Excess enthalpies of ketones + diether at 298.15 K 130(1988)375

Excess molar volumes and enthalpies of the 2-butoxyethanol + water system at 25 °C 131 (1988)153

Excess molar isobaric heat capacities and excess molar enthalpies for water–dimethylsulfoxide mixtures at 25 °C 136(1988)209

Excess enthalpy and excess volume of cyclohexanone + tetrachloroethene 139(1989)11

Excess enthalpies of ketone–triether mixtures. Measurement and application of the DISQUAC group contribution method 141(1989)269

Excess molar enthalpies of some n-alkylamine + n-alkane binary mixtures 143(1989)333

Thermochemical investigations of associated solutions. 9. Prediction of excess enthalpies of ternary acetone + cyclohexane + chloroform mixtures from measured binary data 145(1989) 245

Excess volumes of mixing and excess enthalpies of mixing of 1,2-dibromoethane with aromatic hydrocarbons at 298.15 K 146(1989)187

Excess molar enthalpies of some *n*-alkylamine + cyclohexane or + benzene binary mixtures 150 (1989)87

Excess Gibbs energies

The simultaneous correlation of excess gibbs energies of binary systems at different temperatures by means of the UNIQUAC equation 117(1987)271

Excess heat capacity

Excess molar isobaric heat capacities and excess molar enthalpies for water–dimethylsulfoxide mixtures at 25 °C 136(1988)209

Excess properties

Excess properties of mixtures of some n-alkoxyethanols with organic solvents. IV. H^E, V^E and C_p^E with 2-methoxyethanol at 298.15 K 137(1988)241—246

Excess thermodynamic properties

Thermodynamics of associated solutions. Excess thermodynamic properties of liquid mixtures of some organic compounds with amines 108(1986) 305

Excess thermodynamic properties of binary mixtures of n-alkanes with cycloalkanones 112 (1987)351

Excess thermodynamic properties of the *n*-pentane + methyl acetate system at 298.15 K 130(1988)249

Excess properties of mixtures of some *n*-alkoxyethanols with organic solvents. III. V^E and C_p^E with butan-1-ol at 298.15 K 131(1988)73

Excess volume

Thermodynamic properties of binary mixtures containing sulfur amide. 1. Excess molar volumes of carbon tetrachloride + *N*,*N*-dimethylmethanesulfinamide and + *N*-methylmethanesulfinamide 104(1986)153

Excess molar volumes and heat capacities of (1,2,4-trichlorobenzene + an *n*-alkane) and (1-chloronaphthalene + an *n*-alkane) 105(1986)101

Topological studies of the molecular species that characterize lower alkanol + methylene bromide mixtures: molar excess volumes and molar excess enthalpies 106(1986)293

Excess molar volumes of trichloroethylene with cyclohexanone, methylisobutylketone, and 1,4-dioxane at 308.15 and 318.15 K 107(1986)383

Molar excess enthalpies, molar excess volumes and molar isentropic compressions of mixtures of 2-propanone with heptane, benzene and trichloromethane at 298.15 K 113(1987)141

Molar excess volumes of binary mixtures of ethylbenzene with *n*-alkanes at 298.15 K; an interpretation in terms of the prigogine–flory–patterson model 114(1987)337

Determination and analysis of the excess molar volumes of some amide–water systems 120 (1987)299

Excess molar volumes of tributyl phosphate(TBP) + *n*-alkanol, *n*-alkanol + *n*-alkane measured with a modified continuous-dilution dilatometer 123(1988)169

Excess volumes of trimethylphosphite and tributylphosphate with branched and linear alkanes 124(1988)129

Excess isobaric heat capacities and excess volumes of some hexanol + *n*-heptane mixtures 127(1988)15

Excess molar volumes and enthalpies of the 2-butoxyethanol + water system at 25 °C 131 (1988)153

Thermodynamic properties of binary mixtures containing sulfur amide. Part 4. Excess molar volumes of *N*-methylbenzenesulfonamide + various solvents 132(1988)235

Excess enthalpy and excess volume of cyclohexanone + tetrachloroethene 139(1989)11

Solubility and excess volumes of the mixture Di-*n*-octyl ether + benzene 143(1989)171

Excess volumes of mixing and excess enthalpies of mixing of 1,2-dibromoethane with aromatic hydrocarbons at 298.15 K 146(1989)187

Thermodynamic properties of ternary non-electrolyte solutions: prediction of excess volumes from measured binary data 149(1989)363

Exchange equilibrium

Calorimetry study of the exchange equilibrium between ligands or metal–ligands and an anion-exchange resin 136(1988)203

Exoelectron emission

Exoelectron emission accompanying the phase transformations in some silver salts 130(1988)329

Exothermic reactions

Adiabatic methods for the investigation of exothermic reactions 119(1987)1

Expansion

Thermal expansion of coal-derived liquids 113 (1987)67

Application of thermal analysis to study the crystal growth, defect structure and thermal expansion of $LiNbO_3$ (Invited Lecture) 133 (1988)1

Development of a new laser interferometric dilatometer and its application to low expansion materials 134(1988)383

Explosives

On DTA investigations of confined explosives (in German) 107(1986)61

A study on thermal behaviour of some commercial explosives 134(1988)419

Application of rigorous nonlinear regression to the decomposition kinetics of explosives 149 (1989)301

Extended-shell model

Lithium carbonate enhancement of the calcination of calcium carbonate: proposed extended-shell model 118(1987)135

Extraction

Enthalpy determination for an extraction reaction by direct static measurement with a calvent calorimeter 123(1988)1

F

Faraday method

Susceptibility of superconducting vanadium measured following the Faraday method 103 (1987)83

Fast breeder nuclear reactors

On the chemistry of the reactions between liquid sodium and urania–plutonia fuel for fast breeder nuclear reactors 129(1988)143

Fast temperature change device

Fast temperature change device 103(1987)13

Fatty acids

DSC-studies of phospholipids containing iso-branched and ω-cyclohexane fatty acids 119 (1987)53

Thermal analysis of compounds adsorbed on low-surface-area solids Part 2. Calorimetric investigations of fatty acids on calcite 140(1989) 253

Feldspar

Possibility of feldspar formation in bentonite suspensions during storage, drying and/or heating 135(1988)319

Ferric molybdate

Phase equilibria in the system $Fe_2(MoO_4)_3$–V_2O_5 117(1987)9

Ferric oxide

$V_9Mo_6O_{40}$ and phase equilibria in the system $V_9Mo_6O_{40}$–Fe_2O_3 118(1987)1

Solid–solid interactions between ferric oxide and lithium carbonate and the thermal stability of the lithium ferrites produced 118(1987)151

Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malonate dihydrate 125(1988)173

Solid–solid interaction between ferric oxide and sodium nitrate and thermal stability of the sodium ferrites produced 131(1988)115

Effects of Li_2O doping on thermal solid–solid interaction between ferric oxide and nickel carbonate 132(1988)117

Electrical conduction in γ irradiated and unirradiated Fe_3O_4, $CdFe_2O_4$ and $Co_xZn_{1-x}Fe_2O_4$ ($0 \leqslant x \leqslant 1$) ferrites 144(1989)45

Ferrocene

Calorimetric studies on phase transitions arising from orientational order–disorder of the molecular axes of ferrocene and its derivatives 109(1986)29

Vapour pressures and enthalpies of sublimation of ferrocene, cobaltocene and nickelocene 124 (1988)179

Ferroelectric rare-earth molybdates

Differential scanning calorimetric studies of ferroelectric rare-earth molybdates 145(1989)11

Ferromanganese

Characteristics of marine ferromanganese concretions at elevated temperature 145(1989)33

Ferrous ion

Determination of the free energy of solvation of ferrous ion in water and free energies of transfer of ferrous ion from water to ethanol–water mixtures 127(1988)119

Ferrous malonate dihydrate

Studies on the formation of γ-Fe_2O_3 by thermal decomposition of ferrous malonate dihydrate 125(1988)173

Fertilizers

Thermal analysis and X-ray diffraction studies on controlled release fertilizers prepared by incorporating nutrients into blast furnace slag 111(1987)135

Film properties

Investigations of water film properties on barite surface containing preadsorbed tetradecylammonium hydrochloride (TDACl) 122(1987)363

Films

Thermoanalytical study on some film-forming quick-drying and waterproof products 134 (1988)243

Fischer-Tropsch catalysts

Investigation of the carburization of Fe/Mn-Fischer-Tropsch catalysts with a microbalance 103(1987)187

Fission products

Thermodynamic properties of compounds of alkaline earth elements with other fission products 120(1987)29

Fixed-bed reactor

The use of a heat-flow differential scanning calorimeter as a plug-flow fixed-bed reactor in heterogeneous catalysis 144(1989)329

Flash setting

Thermal monitoring of flash setting in Portland cement clinkers 119(1987)235

Flash vacuum pyrolysis

The method of flash vacuum pyrolysis, preparative applications and analytical studies 112(1987)31

Flax

Thermogravimetric analysis of flax shives degraded by *Pleurotus ostreatus* and *Ceraceomyces sublaevis* 138(1989)347

Flax fibres

Thermogravimetric analysis of flax fibres 132 (1988)101

Flours

Determination of moisture in food flours. A comparative thermogravimetric and NMR study, part 2 120(1987)81

Flow microcalorimeter

Acquisition and numerical analysis of thermoanalytical data by microcomputer, applied to an existing flow microcalorimeter 107(1986) 101

Flow microcalorimetry

Continuous gradient method in flow microcalorimetry. Part I. Relation between electrical and chemical calibration 113(1987)125

Continuous gradient method in flow microcalorimetry. Part II: Application to solution equilibria 122(1987)153

Fluctuations

Fluctuations, stability and fusion in biomembranes 135(1988)161

Flue gas

Thermogravimetric study of promoted hydrated lime sorbents for flue gas clean up 127(1988)57

Fluid constituents

Thermogravimetric determination of the fluid constituents in reservoir rocks 106(1986)373

Fluidized beds

Kinetics of the thermal regeneration of spent activated carbon in a fluidized bed 136(1988)179

Fluorapatites

Thermal decomposition of "reversed" type B carbonated fluorapatites 118(1987)267

Fluoride glasses

Non-isothermal crystallization in ZrF_4–BaF_2–GdF_3–AlF_3 fluoride glasses 123 (1988)263

Fluorinated β-diketones

Thermodynamics of proton–ligand dissociation of some fluorinated β-diketones in dioxane–water mixtures 149(1989)287

Fluoroperoxo species

Solid-state decomposition studies on fluoroperoxo species of transition metals. Part XIII. Kinetics of isothermal decomposition of $K_2[V_2O_3(O_2)_2F_2]$ and $K_3[Ta(O_2)_2F_4]$ 114 (1987)347

Fluorophenylalanine

Calorimetric study of the first and second proton dissociation processes of fluoro and hydroxyl derivatives of phenylalanine 142(1989)203

Fly ashes

DTA study of the influence of lime content of low-calcium fly ashes on the Pozzolanic reaction 145(1989)87

Food products

Thermogravimetric analysis of some spices and commercial food products. Comparison with other analytical methods for moisture content determination (Part 3) 143(1989)15

Formaldehyde

Studies on the thermal decomposition of thermosetting aniline–formaldehyde resins 119 (1987)321

A thermochemical kinetic study of interconversion reactions of aniline–formaldehyde products 127(1988)369

Thermophysical properties of the urea–formaldehyde system measured under near-industrial-process conditions 146(1989)271

Formation

Thermal effect on formation and conduction mechanism of $MnFe_2O_4$ 105(1986)1

Formation constants

Studies on hexacyanoferrate(II) complexes. Formation constants for alkali metal, ammonium and calcium(II) complexes at different temperatures and ionic strengths in aqueous solution 102(1986)1

Thermodynamics, formation constants, spectrophotometry and infrared spectroscopy of complexes between some divalent metal ions and 3-hydrazino-6-phenylpyridazine and related ligands 119(1987)249

Fragmentation

The effect of temperature on the mass fragmentation of some 3,1-benzoxazines 137 (1988)391

Freeman–Carroll equation

Kinetic parameters of thermal decomposition of bis(2-OH-1-naphthaldoxime) chelates using Freeman–Carroll equation 140(1989)97

Freezing

Influence of freezing-unfreezing cycles on the thermal behaviour of a marine clay 135(1988)313

Fremy's salt

Potassium nitrosodisulphonate (Fremy's salt) as a new redox thermometric titrant 118(1987)215

Freons

A simple microbalance for investigating the reactions of solids with ammonia and freons at pressures up to 10 bars 103(1987)15

Frequential analysis

A frequential analysis of the numerical algorithms used for inverse filtering in calorimetry 102 (1986)173

Fuels

Problems in the DSC and DTA study of the burning properties of fuels and other organic materials 106(1986)191

On the chemistry of the reactions between liquid sodium and urania–plutonia fuel for fast breeder nuclear reactors 129(1988)143

***F*-Function**

Use of *F*-function in van der Waals-type two-constant cubic equation of state 140(1989)77

g(α) Function

Method of the selection of the g(α) function based on the reduced-time plot 122(1987)339

Furaldehyde

Thermoanalytical studies on antimony(III) complexes with monochlorobenzoylhydrazones of 2-furaldehyde (FpClBHH), 2-pyrroaldehyde (PmClBHH) and 2-thiophenaldehyde (TpClBHH) as ligands 133(1988)329

Furfurylidene arylamine

Thermal decomposition behaviour of thorium(IV) complexes with furfurylidene arylamine Schiff base ligands 125(1988)17

(furyl-2)-3-propen-2-aldoxime

Determination by "entropy titration" of the variations of enthalpy, free enthalpy and entropy accompanying the reaction of cobalt(II) chloride with (furyl-2)-3-propen-2-aldoxime in ethanolic medium (in French) 149(1989)87

Fusion

Prediction of vapor pressures, boiling points and enthalpies of fusion for twenty-nine halogenated dibenzo-*p*-dioxins 112(1987)117

Enthalpies of fusion and solid-to-solid transition, entropies of fusion for urea and twelve alkylureas 122(1987)143

Enthalpies of sublimation and fusion of monophenylurea and diphenyl-1,3 urea 122 (1987)189

Thermal investigation of organic crystalline complexes. I. Enthalpies and entropies of fusion 126(1988)61

Fluctuations, stability and fusion in biomembranes 135(1988)161

Phase changes in acetamide–salt systems: melting points and latent heat of fusion of pure acetamide and acetamide–ammonium chloride 146(1989) 353

G

Gadolinium

Differential thermal analysis investigation of the $Gd_2(MoO_4)_3$–$Bi_2(MoO_4)_3$ system (in French) 112(1987)245

Studies on double selenates. VI. Thermal decomposition of gadolinium, terbium, dysprosium and alkali metal double selenates 136(1988)319

Thermal study of superconducting $Ba_2Cu_3RO_{7-x}$ (R = Y, Eu, Gd, Ho) 148(1989) 269

Gadolinium fluoride

Non-isothermal crystallization in ZrF_4–BaF_2–GdF_3–AlF_3 fluoride glasses 123 (1988)263

Gadolinium(III) ions

Determination of stability constants and thermodynamic functions of L-lysine monohydrochloride with Sm(III), Bi(III) and Gd(III) metal ions 147(1989)401

Gadolinium(III) nitrate

Some observations on the thermal decomposition kinetics of gadolinium(III), holmium(III) and erbium(III) nitrate 129(1988)335

Gadolinium oxides

Heat capacity and enthalpy of UO_2 and gadolinia-doped UO_2 139(1989)107

Gadolinium pyrohafnate

Thermal diffusivity and thermal conductivity studies on europium, gadolinium and lanthanum pyrohafnates 140(1989)103

Gallium

Phase studies in the systems Ag_2Te-Ga_2Te_3, ZnSe-In_2Se_3, and ZnS-Ga_2S_3 112(1987)89

Thermodynamics of the liquid aluminum–gallium–tin system 122(1987)395

Gallium sulphide

Thermodynamics and vaporization chemistry in the PbS–Ga_2S_3 system 107(1986)83

The isomolecular exchange reaction $Ga_2S(g) + In_2S(g) = 2\ InGaS(g)$ 112(1987)141

Galvanic bromine cell

A galvanic bromine cell for measuring ΔG-values of solid-state reactions in the systems KBr/MBr_2 (M = Ca, Sr, Ba) 121(1987)343

Gangue

The effect of gangue components on the reduction of manganosite by graphite: an isothermal kinetic study 112(1987)365

Garlic

Calorimetric measurements on inhibitory effects of garlic on some meats 116(1987)363

Gas-phase clusters

Computational study of relative stabilities of $C_{60}(I_h)$ and $C_{70}(D_{5h})$ gas-phase clusters 125 (1988)155

Gas chromatography

Studies on solid state redox reaction of iron(III) oxalate by gas chromatography 126(1988)51

Investigation of thermal decomposition of HMX and RDX by pyrolysis–gas chromatography 138 (1989)167

Gases

A microcalorimetric method for the measurement of enthalpies of solution of gases in liquids 115 (1987)67

Gas evolution analysis

Combined thermogravimetry and fourier transform infrared spectroscopy techniques for gas evolution analysis 103(1986)221

Gasification

High temperature, high pressure thermogravimetry of coal gasification apparatus, data acquisition and numerical evaluation 103 (1987)163

Catalysis by alkali and alkaline earth metals of the gasification in CO_2 and in steam of chars from a bituminous coal with high inorganic matter content 125(1988)79

Catalytic gasification of activated carbon by CO_2 137(1988)383

Gasless pyrotechnics

Temperature dependence of the burning velocity of gasless pyrotechnics 120(1987)203

Gas phase

Contents of molecular complexes in gas phase at higher pressures: a case study of $(H_2O)_2(g)$ 106 (1986)323

Gas release

Theory of emanation thermal analysis. VI. Mathematical model of inert gas release from a two-phase solid–fluid system under its interface and diffusivity changes due to a chemical reaction 121(1987)241

Gas–solid equilibria

Enthalpy–entropy interplay in gas–solid equilibria: conditions for heterogeneous entropy-controlled processes 120(1987)207

Gas–solid kinetics

A new model of gas–solid kinetics: the case of ammonium carbamate formation and decomposition 126(1988)129

Gas–solid reaction calorimetry

Construction and testing of a gas–solid reaction calorimetry system using a Tian–Calvet microcalorimeter 132(1988)75

Gels

Tetraalkylammonium silicates gels as precursors to zeolites of different structures 135(1988)353

General temperature integrals

Equations for the rapid evaluation of general temperature integrals in non-isothermal kinetic analysis 125(1988)111

Geopolymers

Geopolymers and synthetic polymers: A comparative study of the isothermal pyrolysis kinetic behavior 148(1989)405

Germanium

Phase diagram of the ternary system Ge–Sb–Te. II. The subternary Ge–GeTe–Sb_2Te_3–Sb 107 (1986)239

Thermoelectrical conductivity of $Ge_{20}Bi_{15}S_{65}$ as a complementary method to differential thermal analysis 110(1987)281

Critical assessment of thermodynamic data for the Ag–Ge system 130(1988)25

Thermodynamic evaluation of the Bi–Ge system 132(1988)111

Glass formation and crystallization in the $GeSe_2$-GeTe-Sb_2Te_1 system 133(1988)287

Crystallization kinetics of some Ge-Sb-Se glasses 133(1988)293

Crystallization kinetics of amorphous $Ge_{20}Se_5Te_{75}$ 140(1989)155

A thermodynamic evaluation of the Au–Ge and Au–Si systems 141(1989)217

Germanium dioxide

Study of the system GeO_2–Bi_2O_3 127(1988)377

Germanium iodide

Vapour pressure and sublimation enthalpy of GeI_4 119(1987)373

Germanium oxide

Derivatographic investigations of the systems BaO–GeO_2 and BaO–Nb_2O_5 115(1987)37

Germanium sulphide glass

The crystallization of $Ge_{40}S_{60}$ glass 129(1988)293

Gibbs Energy

Gibbs energy and equilibrium: dimensions in the lewis equation 111(1987)321

Gibbs free energy

Gibbs free energy of formation of magnesium stannate from EMF measurement 122(1987)389

Gibbsite

Chlorination reactions of gibbsite and its thermal decomposition products with phosgene 115 (1987)269

Structure and devitrification of $Li_2O \cdot P_2O_5$–B_2O_3 and $BaO \cdot P_2O_5$–B_2O_3 glasses 113 (1987)351

Measurement of the specific heat of a glass-filled polymer composite to high temperatures 131 (1988)7

Kinetics of sintering of irregular particles of glass. Part I. Isothermal sintering 140(1989)219

Kinetics of sintering of irregular particles of glass. Part II. Non-isothermal sintering 140 (1989)225

Glass ceramics

The composition of glass ceramics determined by DTA 144(1989)117

Glasses

Thermal analysis of glass 110(1987)419

Role of thermal annealing during processing of metallic glasses 110(1987)427

Possibilities of emanation thermal analysis for the characterization of semiconducting glasses 110(1987)437

Acid–base concept in oxide glasses 110(1987)443

Calorimetry of the hydration of calcium aluminates with various glass contents 113 (1987)331

A new parameter to evaluate nucleation in glasses from DTA curves 128(1988)39

Glass formation and crystallization in the $GeSe_2$-GeTe-Sb_2Te_1 system 133(1988)287

The non-isothermal devitrification of lithium metasilicate glass 140(1989)191

Kinetic study of isothermal and continuous heating crystallization in $Se_{100-x}Bi_x$ ($x \leqslant 8$) glasses 144(1989)123

The crystallization kinetics of $12CaO \cdot 7Al_2O_3$ glass 149(1989)387

Devitrification behaviour of a glass obtained from porphyric sands with addition of TiO_2 (4%) and MgO (8%) 150(1989)39

Glass fibres

Studies of interfacial properties in polyepoxide/carbon or glass fiber composites by means of microgravimetric techniques 103(1987) 97

Glass transition

Effect of the side chain structure on the glass transition temperatures of some poly(thiocarbonate)s 105(1986)149

Symmetry departure: disorder and glass transition 109(1986)91

Glass-transition in donor and acceptor acrylic copolymers 112(1987)123

Glass-transition temperatures of PVME-PS blends. Influence of the molecular weight of PS 114(1987)165

Effect of the side chain structure on the glass transition temperature. 2. Poly(*o*-alkylphenyl methacrylate)s 114(1987)319

A comparative study of the kinetic and thermodynamic approaches to the glass transition phenomenon in high polymers 118(1987)159

Quasi-static study of the glass transition of glycerol by DSC 128(1988)251

Effect of the side chain structure on the glass transition temperature. Part 3. Molecular weight dependence of T_g in some poly(thiocarbonates) 130(1988)289

Glass transition temperatures of substituted polyoxetanes 134(1988)155

Thermal analysis and molecular weight dependence on glass transition of poly-(ditrimethylene terephthalate) 134(1988)195

Thermal analysis of polymer samples by a round robin method. I. Reproducibility of melting, crystallization and glass transition temperatures 136(1988)163

Structural relaxation, glass transition and crystallization of Cu–Zr amorphous ribbons studied by dilatometry and differential scanning calorimetry 142(1989)29

Effect of the side chain structure on the glass transition temperature. Part 4. Molecular weight dependence of T_g in chalcogenides containing poly(methacrylates) 146(1989)137

Calorimetric measurements of the glass transition (Review) 148(1989)261

DSC studies of thermal events at the glass transition temperature region of partially oriented polyester fibers 148(1989)381

Glauconite

Thermal and mössbauer studies of iron-containing hydrous silicates. VII. Glauconite 136(1988)247

Glow curve kinetics

Glow curve kinetics of self-made $CaSO_4$: Dy + PTFE thermoluminescent dosimeters 135(1988) 121

Glucosyl ceramide

The metastability of glucosyl ceramide in aqueous phase: effect of hydration and phosphatidylcholines of various chain length 148(1989)355

Glutamic acid

Thermodynamics of the second proton dissociation processes of nine α-amino-acids and the third ionization processes of glutamic acid, aspartic acid and tyrosine 141(1989)297

Glycerol

Quasi-static study of the glass transition of glycerol by DSC 128(1988)251

Interactions in electrolyte solutions in glycerol–water and glycerol–methanol mixtures from the heat of solution enthalpy 150(1989)177

Glycine

Aqueous solutions containing amino acids and peptides. Part 25. The enthalpy of interaction at 298.15 K of glycine with potassium halides 107 (1986)267

Glycopyranosylaminopyrimidine derivatives

Spectroscopic and thermal characterization of some 5-acetyl-4-β-D-glycopyranosylaminopyrimidine derivatives and their acetylated sugar homologues 105(1986)161

Glyoxylic acid

Reaction kinetics at linearly increased temperature. V. DTA and UV study of the oxidation of malonic, tartronic, glyoxylic and monobromomalonic acids by ceric sulphate in dilute sulphuric acid 101(1986)245

α-Goethite

Thermodynamic study of the dehydration process of α-goethite in vacuo 138(1989)47

Goethite

Adsorption of nitrogen and water vapour onto goethite surfaces 114(1987)139

Thermal behavior in air of iron oxyhydroxides obtained from the method of homogeneous precipitation. Part I. Goethite samples of varying crystallinity 124(1988)359

Gold

Heat capacity of gold from 80 to 1000 K 109 (1986)105

A thermodynamic assessment of the Au–In system 129(1988)89

A thermodynamic evaluation of the Au–Sn system 130(1988)1

Thermodynamic evaluation of the Au–Bi system 130(1988)15

A thermodynamic evaluation of the Au–Ge and Au–Si systems 141(1989)217

Goyazite

The thermal analysis of some phosphate minerals: strengite, lipscombite and goyazite 135(1988)259

Gram-negative bacteria

Investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A 119(1987)127

Graphite

Some results of investigations into relationship between a few elements of nodular graphite cast iron and nodular graphite 103(1987)169

On the role of the boudouard reaction in the isothermal reduction of iron ore by char and graphite 111(1987)89

The effect of gangue components on the reduction of manganosite by graphite: an isothermal kinetic study 112(1987)365

The effect of admixtures on the reduction of cassiterite by graphite 124(1988)109

Thermochemical study on the solid state interaction of graphite with cupric and ferric sulphates 126(1988)101

The effect of additives on the reduction of chromite by graphite: an isothermal kinetic study 127(1988)25

Thermodynamic and experimental study of the stoichiometry of titanium carbide deposited by the reaction between a graphite substrate and a gaseous mixture of titanium tetrachloride and hydrogen (in French) 138(1989)81

Graphitization

The role of heteroatoms on the carbonization and graphitization of polynuclear aromatic compounds 137(1988)225

Gravimetric hydrometer

Microbalance application in the primary gravimetric hydrometer of the UK National Humidity Standard 103(1987)75

Green coffees

Comparison of various green coffees by thermogravimetric analysis/atmospheric pressure chemical ionization mass spectrometry (TGA/APCIMS). Part 2 104(1986)85

Grinding

Influence of grinding on both the stability and thermal decomposition mechanism of siderite 135(1988)219

The effect of grinding on the thermal behaviour of tetrapropylammonium occluded in silicalite 1 135(1988)403

The effect of grinding on porosity and mechanochemical transformations in Al_2O_3 powders 148(1989)301

Group IA chlorides

Properties of double chlorides in the systems $ACl/SmCl_3$ (A = Na-Cs) 133(1988)275

Group IIA metal ions

Thermodynamics of group IIA metal ions complexes of phenetsal 129(1988)345

Group IIB metal complexes

Complexes of group IIB metals with dithiooxamides. I. Thermal properties of $Zn(CH_3NHCSCSNHCH_3)X_2$ (X = Cl, Br, I) complexes 124(1988)17

Group IV selenites

Thermal and thermodynamic properties of the selenites of the elements from group IV in the periodic table 146(1989)15

Group surface interactions

Thermodynamics of ketones + ether mixtures using a generalized quasichemical theory in terms of group surface interactions 136(1988)33

Growth process

A new approach to kinetic study of nucleation and growth process by thermal analysis 135 (1988)85

Guar gum esters

Kinetic study of thermal degradation of guar gum esters 128(1988)141

Gudron

The influence of gudron additive on the structure of the solid phase from the thermal decomposition of phosphogypsum 133(1988)233

Gypsum

Displacement reactions in gypsum. I. 103(1986) 247

Displacement reactions in gypsum and in anhydrite 114(1987)75

Heat capacities and entropies from 8 to 1000 K of langbeinite ($K_2Mg_2(SO_4)_3$), anhydrite ($CaSO_4$) and of gypsum ($CaSO_4 \cdot 2H_2O$) to 325 K 139(1989)67

H

Haemoglobin

The influence of sugars on the properties of freeze-dried lysozyme and haemoglobin 144 (1989)195

Halide ions

Standard enthalpies of transfer of alkali-metal and halide ions from water to water–urea mixtures 120(1987)97

Halides

Relations between heats of formation of MX_2 halides and electronegativities of halogen ions 111(1987)185

Relations between the heats of formation of MX_3 halides and the electronegativities of the halogen ions 120(1987)115

Halloysite

Dehydration energy of halloysite by means of DSC methods with the relationships of its mineralogy and modes of occurence 135(1988)279

Halogenides

Enthalpies of crystallization of halogenides. Part 2. Investigations of binary systems 104(1986)139

Enthalpies of crystallization of halogenides. Part 3. Investigations of ternary systems 104(1986)147

Halogen ions

Relations between heats of formation of MX_2 halides and electronegativities of halogen ions 111(1987)185

Relations between the heats of formation of MX_3 halides and the electronegativities of the halogen ions 120(1987)115

Relations between the heats of formation of lanthanide trihalides and the electronegativities of the halogen ions 132(1988)187

Halogenometalates

Preparation and thermal decomposition of halogenometalates. Part I. Tris(2,2′-dipyridyl)ruthenium(II) halogenocadmates 127 (1988)347

Haloketones

Thermal decomposition to dehalogenation of α-haloketones by GLC 104(1986)373

Harmonic analysis

Application of harmonic analysis and standard inverse filtering to a DTA system 108(1986)337

Hausmannite

Thermal synthesis of hausmannite via manganese alkoxide 133(1988)93

Haxamethylenetetramine

Thermal analysis of complex salts of lanthanide chlorides with hexamethylenetetramine 149 (1989)133

Heat-conduction calorimetry

Thermokinetics by heat-conduction calorimetry 110(1987)171

Heat-leak corrections

VALTER-II: a program for automatic solution calorimetry including heat-leak corrections 143 (1989)193

Heat capacity

Heat capacity of heterogeneous systems and thermal analysis 101(1986)65

Physico-chemical properties of water adsorbed in zeolites 13X and 4A. Heat capacities of the adsorbed water, the zeolite–water system and anhydrous zeolite (in French) 101(1986)217

Heat capacities of binary mixtures of n-dodecane with hexane isomers 102(1986)75

Excess molar volumes and heat capacities of (1,2,4-trichlorobenzene + an *n*-alkane) and (1-chloronaphthalene + an *n*-alkane) 105(1986)101

Progress in modeling heat capacity versus temperature morphology 109(1986)11

Thermodynamic studies of *p*-polyphenyls: heat capacity of *p*,*p'*-biphenol 109(1986)45

The heat capacity of the heusler alloy $Pd_2Dy_{0.2}Y_{0.8}Sn$ between 0.25 and 4.2 K 109 (1986)75

Heat capacity of gold from 80 to 1000 K 109 (1986)105

Excess isobaric heat capacities for water + alkanol mixtures at 298.15 K 109(1986)145

Heat capacities of amine hardeners and epoxy resins (in French) 109(1987)317

Heat capacity of $2Al_4C_3 \cdot SiC$ from 447 to 1447 K and enthalpy of peritectic decomposition of Al_4C_3, $2Al_4C_3 \cdot SiC$, and $Al_4C_3 \cdot SiC$ 115(1987) 11

Heat capacity evolution in calorimeters with temperature programming simulated by an RC model 118(1987)183

Heat capacities of model compounds of polymers synthesised from amine hardeners and epoxy resins (in French) 118(1987)199

Measurement of the specific heat capacity of steels using the pulse method (in German) 119 (1987)203

The computation of heat capacities of solid high polymers for vibrational spectra 119(1987)225

Heat capacity measurements under high pressure 123(1988)73

An automated adiabatic calorimeter for heat-capacity measurements between 20 and 90 K 123(1988)105

Aromatic amine–epoxy resin reactions: enthalpy and heat capacity (in French) 125(1988)209

Apparent molar heat capacities and volumes of aqueous $HClO_4$, HNO_3, $(CH_3)_4NOH$ and K_2SO_4 at 298.15 K 126(1988)245

Excess isobaric heat capacities and excess volumes of some hexanol + *n*-heptane mixtures 127(1988)15

Heat capacity of urea and some eutectic mixtures of urea base between 30 and 140 °C (in French) 127(1988)223

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of ribonuclease A in solution 128(1988)267

Heat capacity and thermodynamic properties of ditungsten carbide, W_2C_{1-x}, from 10 to 1000 K 129(1988)115

Comparative study on the heat capacity of $ABa_2Cu_3O_{7-x}$ high T_c superconducting compounds (A = Y, Eu, Ho) 133(1988)49

Excess molar isobaric heat capacities and excess molar enthalpies for water–dimethylsulfoxide mixtures at 25 °C 136(1988)209

Heat capacity measurements of the high T_c superconductor $YBa_2Cu_3O_{7-x}$ 137(1988)65

Heat capacities and entropies from 8 to 1000 K of langbeinite ($K_2Mg_2(SO_4)_3$), anhydrite ($CaSO_4$) and of gypsum ($CaSO_4 \cdot 2H_2O$) to 325 K 139(1989)67

Heat capacity and enthalpy of UO_2 and gadolinia-doped UO_2 139(1989)107

Heat capacity of aluminum from 80 to 880 K 139(1989)133

DSC thermophysics on some medium chain thallium(I) *n*-alkanoates: phase transitions, thermal functions and heat capacity 139(1989)139

Heat capacity studies of phase transitions in langbeinites. I. $K_2Mn_2(SO_4)_3$ 139(1989)157

The heat capacity of the metal hydride $TaD_{0.5}$ between 10 and 550 K 139(1989)181

Heat capacity of α quartz from 298.15 to 847.3 K, and of β quartz from 847.3 to 1000 K—transition behaviour and revaluation of the thermodynamic properties 139(1989)225

Heat capacity measurements under continuous heating and cooling using vacuum adiabatic calorimetry 139(1989)245

CO adsorbed on Ni(001): effects of the interplay of "on-top" and "bridge" adsorption complexes on heat capacity 140(1989)237

Mixed interaction terms in the use of Pitzer equations: application to the heat capacities of the reciprocal system $Na^+/K^+/Cl^-/SO_4^{2-}/H_2O$ at high temperatures 145(1989)61

Thermochemistry of inorganic compounds. Part 2. Estimation of heat capacities of A_xB_y-type solids 145(1989)363

Thermal analysis of polymer samples by the round robin method. Part III. Heat capacity measurement by DSC 146(1989)311

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of lysozyme in solution 147(1989)71

Heat conduction calorimeter

Linear system theory of a heat conduction calorimeter. Part 1. Some properties of a linear system with zero initial conditions 141(1989)181

Heat defect

A measurement of the heat defect of water caused by high energy electrons 119(1987)95

Heat exchange

Instantaneous heat effect estimated with microcomputer-aided heat exchange calorimetry involving analog computation 111(1987)167

Evaluation of heat exchange calorimetry of the batch type by estimating known heats of solution 126(1988)165

Heat flow

Heat flow in biological tissue undergoing laser irradiation 135(1988)167

The use of a heat-flow differential scanning calorimeter as a plug-flow fixed-bed reactor in heterogeneous catalysis 144(1989)329

Heat flux

Theoretical analysis of peak height in classical DTA, power-compensated DSC and heat-flux DSC 107(1986)277

A heat flux DSC for enthalpy and specific heat determinations to 1700 K 148(1989)499

Heat flux calorimetry

Oxidation of lipids studied by isothermal heat flux calorimetry 114(1987)159

Heat flux DSC

Calibration and application of a "heat flux DSC" in the study of heterogeneous catalyzed reactions 112(1987)51

Heating

Thermal investigation of organic crystalline complexes. II. Thermal behaviour of the complexes during heating 126(1988)67

Heating rate

Effect of heating rate and sample size on heat transfer through the sample in DSC 103(1986)341

The heating rate as a variable in non-isothermal kinetics. II. A method to evaluate the non-isothermal kinetic parameters using this principle and integration over low ranges of variables 107 (1986)353

Effect of the enthalpy, sample size and heating rate on the cure reaction of rubber in DSC 112(1987)313

Fundamental study of heating process in DSC. Effect of the cure enthalpy and heating rate 116(1987)301

Effect of calcium chloride and calcium acetate on the reactivity of a lignite coal at low heating rate 125(1988)285

Effect of sample size and heating rate on the DSC process for reactions of high enthalpy 126 (1988)81

Effect of the value of heating rate in DSC on the kinetic parameters, when there is high enthalpy of reaction 131(1988)15

The heating rate as a variable in non-isothermal kinetics: III. Some theoretical aspects concerning this problem and the inverse problem of classical non-isothermal kinetics 147(1989)33

Heating rates

Kinetics of thermal decomposition of cellulose. Part II. Temperature differences between gas and solid at high heating rates 120(1987)133

A new DSC for high heating and cooling rates measurements 134(1988)389

Heat leaks

Correction methods for heat leaks in adiabatic calorimetry 125(1988)307

Heats of formation

Mass spectrometric determination of the heats of formation of $POFBr_2$ and POF_2Br 103(1986)401

Heat transfer

Kinetic studies by thermogravimetry: the role of heat transfer of sample mass and of sample holder design on metal hydride kinetic results 103(1987)51

Effect of heating rate and sample size on heat transfer through the sample in DSC 103(1986)341

Modelling of processes in calorimetry by taking into account heat transfer and reaction 121 (1987)381

Heat transfer systems

Thermal analysis of adsorbents in heat transfer systems 121(1987)165

Heat transport

The effect of heat transport within the sample on the shape of thermoanalytical curves 105(1986) 313

Heat treatment

The correlation of the strength of magnesium hydroxide compacts with heat treatment 133 (1988)131

Investigation of the effects of heat treatment on the β-$Ni(OH)_2$–β-NiOOH system using IR spectroscopy 142(1989)143

Development of ceramics from organosilicon polymers by heat treatment 144(1989)159

Heavy metal carboxylates

Thermal studies of heavy metal carboxylates. II. Thermal behaviour of dodecanoates 106(1986) 341

Thermal studies of heavy metal carboxylates. III. Metal dodecanoate–carboxylic acid mixtures 118(1987)253

Heavy metals

Studies of thermal decomposition of bissalicylaldoximates of some heavy metals 133 (1988)347

Helix formation

Energetics of left-handed helix formation of nucleic acids 119(1987)103

Heptane

Isothermal liquid–vapour equilibrium of the systems pyridine–*n*-hexane and pyridine–*n*-heptane (in French) 102(1986)271

Molar excess enthalpies, molar excess volumes and molar isentropic compressions of mixtures of 2-propanone with heptane, benzene and trichloromethane at 298.15 K 113(1987)141

Excess isobaric heat capacities and excess volumes of some hexanol + *n*-heptane mixtures 127(1988)15

Kinetics and mechanism of the thermal cracking of *n*-heptane 127(1988)247

Mechanistic modeling of the pyrolysis of *n*-heptane 127(1988)259

Herrin 6 coal seam

Characterization of the low-temperature ash component of the herrin 6 coal seam (southwestern illinois) by thermal methods of analysis 121(1987)71

Heteroatoms

The role of heteroatoms on the carbonization and graphitization of polynuclear aromatic compounds 137(1988)225

Heterocycles

Metal chelates of heterocyclic nitrogen-containing ketones. XVII. Effect of temperature and gamma irradiation on the electrical conductivity of 2-quinaldyl phenyl ketone and its metal complexes 103(1986)213

Heterocyclic organic compounds

Thermoanalytical investigations on heterocyclic organic compounds. Part V: Thermal decomposition of some substituted *N*-phenylphthalamic acids 138(1989)13

Heterogeneous catalysis

The use of a heat-flow differential scanning calorimeter as a plug-flow fixed-bed reactor in heterogeneous catalysis 144(1989)329

Heterogeneous reactions

Some aspects of heterogeneous reactions of inorganic solids 110(1987)367

Heterogeneous systems

Heat capacity of heterogeneous systems and thermal analysis 101(1986)65

Heteropoly acids

Acid sites strength distribution in heteropoly acids by differential scanning calorimetry 140 (1989)21

Heusler alloy

The heat capacity of the heusler alloy $Pd_2Dy_{0.2}Y_{0.8}Sn$ between 0.25 and 4.2 K 109 (1986)75

Hexacarbonyl molybdenum

Thermal degradation of transition metal carbonyl complexes. Part IV: Thermogravimetric studies of various stoichiometric mixtures of trimethylamine *N*-oxide dihydrate and hexacarbonyl molybdenum 145(1989)179

Hexachloropropene

Thermal studies of uranium(V) chloride–trichloroacrylyl chloride and uranium(VI) chloride–hexachloropropene 115 (1987)63

Hexachlorostannic acid

Thermal properties of H_2SnCl_6 complexes. Part II. Thermal features of alkanaminium hexachlorostannates 141(1989)93

Hexachlorostannic acid complexes

Thermochemical properties of H_2SnCl_6 complexes. Part I. thermal behaviour of primary *n*-alkylammonium hexachlorostannates 101 (1986)271

Hexacyanoferrate(II) complexes

Studies on hexacyanoferrate(II) complexes. Formation constants for alkali metal, ammonium and calcium(II) complexes at different temperatures and ionic strengths in aqueous solution 102(1986)1

Hexadentate macrocyclic ligands

Thermoanalytical studies of rubber oxidation: stabilization of natural rubber by two hexadentate macrocyclic ligands 126(1988)149

***trans*-Hexakis(pyrazole)manganese(II) bispherchlorate**

Magnetic, spectral, thermal and structural properties of *trans*-tetrakis(pyrazole)bischloromanganese(II), *trans*-hexakis(pyrazole)manganese(II) bisperchlorate and *trans*-tetrakis(pyrazole)bisaquamanganese(II) bispyrazolebisnitrate 126(1988)187

Hexamethyldisilane

Vapour pressure and thermodynamic properties of hexamethyldisilane at 305–387 K 109(1986)55

Hexamethylenedithiocarbamate

Thermal studies on some lanthanide(III) complexes of hexamethylenedithiocarbamate 141(1989)69

Hexamethylphosphoramide

Thermogravimetric studies of hexamethylphosphoramide (HMPA) lanthanoid perrhenate complexes 146(1989)381

Hexane

Heat capacities of binary mixtures of n-dodecane with hexane isomers 102(1986)75

Excess enthalpies of binary mixtures for 1,3-cyclohexadiene and 1,4-cyclohexadiene + cyclohexane, + n-hexane and + benzene 102 (1986)245

Isothermal liquid–vapour equilibrium of the systems pyridine–*n*-hexane and pyridine–*n*-heptane (in French) 102(1986)271

Simultaneous correlation of vapor–liquid equilibrium and excess enthalpies for binary mixtures of *n*-hexane and *n*-octane with hexane isomers 106(1986)219

Hexanol

Excess isobaric heat capacities and excess volumes of some hexanol + *n*-heptane mixtures 127(1988)15

Hexolic anhydride

Structural characterization and thermal degradation of hexolic-anhydride-based polyesters 140(1989)169

High-pressure gas atmospheres

Differential thermal analysis under high-pressure gas atmospheres: applications to materials science and engineering. A review 121(1987)21

High-temperature calorimeter

A new calorimeter for temperatures above 1400 K 139(1989)291

High energy electrons

A measurement of the heat defect of water caused by high energy electrons 119(1987)95

High pressures

DTA as a method of studying chemical reactions at high pressures 113(1987)233

Holmium

Comparative study on the heat capacity of $ABa_2Cu_3O_{7-x}$ high T_c superconducting compounds (A = Y, Eu, Ho) 133(1988)49

Studies on double selenates. VII. Thermal decomposition of holmium, erbium, thulium and alkali metal double selenates 136(1988)327

Thermal study of superconducting $Ba_2Cu_3RO_{7-x}$ (R = Y, Eu, Gd, Ho) 148(1989) 269

Holmium hydrated gluconates

On the thermal stability of Fe^{III} and Ho^{III} hydrated gluconates 131(1988)285

Holmium(III) nitrate

Some observations on the thermal decomposition kinetics of gadolinium(III), holmium(III) and erbium(III) nitrate 129(1988)335

Holm oak pyrolysis

A kinetic study of holm oak wood pyrolysis from dynamic and isothermal TG experiments 149 (1989)225

Humic acid

Thermal analysis of AlOH polymer/montmorillonite/humic acid complexes 135(1988)307

Humidity

Microbalance application in the primary gravimetric hydrometer of the UK National Humidity Standard 103(1987)75

Influence of temperature and humidity on ionic conduction of mixed metal hydroxides 133 (1988)87

Hydrated lime

Thermogravimetric study of promoted hydrated lime sorbents for flue gas clean up 127(1988)57

Hydrates

Determination of kinetics and thermal conductivity of hydrates simultaneously by using thermogravimetry and transient hot strip method 105(1986)369

Hydration

Hydration effects in reactions between aluminum and potassium fluorides 101(1986)169

On enthalpies of hydration, ionization potentials, and the softness of ions 104(1986)389

Hydration versus strength in a portland cement developed from domestic mineral wastes — a comparative study 106(1986)93

Calorimetry of the hydration of calcium aluminates with various glass contents 113 (1987)331

Role of phosphogypsum in the hydration of calcium sulphoaluminate 116(1987)145

Hydration of dicalcium silicate in the presence of concrete admixtures 118(1987)143

Thermochemical and structural studies of complex actinide chlorides $Cs_2NaAnCl_6$ (An = U–Cf); ionization potentials and hydration enthalpies of An^{3+} ions 139(1989)49

Estimation of the degree of hydration in modified ordinary portland cement pastes by differential scanning calorimetry 145(1989)203

The metastability of glucosyl ceramide in aqueous phase: effect of hydration and phosphatidylcholines of various chain length 148(1989)355

Hydrazido-carbonates

Thermal properties of hydrazido-carbonates of cobalt and nickel in an inert atmosphere 144 (1989)257

Hydrazine

Copper(II) determination by means of a thermometric method based on its catalytic effect on the hydrazine–hydrogen peroxide reaction 112(1987)335

Cobalt(II) determination at ppb levels based on its catalytic effect on the hydrazine–hydrogen peroxide reaction. Study by thermometric method 130(1988)241

3-Hydrazino-6-phenylpyridazine

Thermodynamics and formation constants of trivalent lanthanide metal ions with 3-hydrazino-6-phenylpyridazine and other related derivative ligands 113(1987)21

Hydrazine complexes

Decomposition of hydrazine complexes of cadmium sulfate 150(1989)79

Hydrazinium(2 +) heptafluorotantalate monohydrate

Thermal decomposition study of hydrazinium(2 +) heptafluorotantalate monohydrate and identification of intermediate compounds 117 (1987)227

Hydrazinium hexafluoroarsenate

Synthesis and characterization of new hydrazinium(2 +) and hydrazinium(1 +) hexafluorophosphates and hydrazinium(1 +) hexafluoroarsenate 142(1989)49

Hydrazinium hexafluorophosphates

Synthesis and characterization of new hydrazinium(2 +) and hydrazinium(1 +) hexafluorophosphates and hydrazinium(1 +) hexafluoroarsenate 142(1989)49

Hydrazinium hydrogen oxalate

Phase transition in hydrazinium hydrogen oxalate. A calorimetric study of the short hydrogen bond system 109(1986)63

Hydrazinium sulphate

Simultaneous TG, DTG, DTA and EGA thermoanalysis of hydrazinium sulfate 125 (1988)237

3-Hydrazino-6-phenylpyridazine

Thermodynamics, formation constants, spectrophotometry and infrared spectroscopy of complexes between some divalent metal ions and 3-hydrazino-6-phenylpyridazine and related ligands 119(1987)249

Hydride phase

Thermal studies on Mg_2NiH_4: existence of additional hydride phase in the Mg_2Ni–hydrogen system 125(1988)1

Hydro-sodalites

Phases and thermal decomposition characteristics of hydro-sodalites $Na_{6+x}[AlSiO_4]_6(OH)_x \cdot nH_2O$ 118(1987)35

Hydroacridines

Hydroacridines. XII. Thermochemical characterization of 4aα,8aβ,9aβ,10aα- and 4aα,8aβ,9aα,10aα-tetradecahydroacridine 126 (1988)13

Hydrocarbons

On calculation of thermodynamic properties of polycyclic aromatic hydrocarbons 102(1986)59

Thermolabile hydrocarbons. XXIX. Combustion and sublimation enthalpies of tri-*tert*-butylmethane (in German) 107(1986)331

Thermodynamics of mixtures of *N*-methylpyrrolidone with hydrocarbons and their hydroxyl derivatives 108(1986)229

Liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems 114(1987)227

Description of binary systems containing hydrocarbons and alcohols by a modified NRTL equation 116(1987)267

Thermodynamics of solutions of butanols in hydrocarbons 121(1987)447

Liquid–liquid equilibria for ternary mixtures containing two alcohols and one saturated hydrocarbon 127(1988)337

Correlation and prediction of vapour–liquid equilibria in ternary systems formed by hydrocarbons 142(1989)59

Stoichiometry and stability of some solid state charge transfer complexes formed in imidazole–hydrocarbon systems 142(1989)371

Vapour pressure of polyaromatic hydrocarbons in the range 10^{-3}–10 Torr (in French) 146 (1989)53

Prediction of hydrocarbon thermolysis by thermodynamic analysis 148(1989)347

Hydrochlorides

Thermal properties, thermochemistry and kinetics of the thermal dissociation of hydrochlorides of aromatic mono-amines 121 (1987)413

Hydrofluoric acid

Enthalpy of dissolution of different kaolinites and metakaolinites in hydrofluoric acid. Influence of crystallochemical characteristics (in French) 122(1987)79

Hydrogels

Changes in the internal structure of hydrogels 112(1987)111

Hydrogen

Temperature programmed desorption study of hydrogen adsorption on $LaMO_3$ oxides 126 (1988)205

Thermodynamic and experimental study of the stoichiometry of titanium carbide deposited by the reaction between a graphite substrate and a gaseous mixture of titanium tetrachloride and hydrogen (in French) 138(1989)81

Hydrogen bonding

Phase transition in hydrazinium hydrogen oxalate. A calorimetric study of the short hydrogen bond system 109(1986)63

Calorimetric study of hydrogen-bond formation in acetonitrile for some hydrogen-bis-phenolates and hydrogen-trimethyl-N-oxidephenolates at 298.15 K 137(1988)87

Effect of hydrogen bonding on the thermal behaviour of substituted phenols 149(1989)381

Hydrogen complexes

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of H^+, Na^+ and Ca^{2+} complexes with 2,4-dichlorophenoxyacetate in aqueous solution at different temperatures and ionic strengths 128(1988)261

Hydrogen fluoride

Temperature interplay of isomeric structures OC · HF(g) and CO · HF(g) 102(1986)287

Hydrogen peroxide

Copper(II) determination by means of a thermometric method based on its catalytic effect on the hydrazine–hydrogen peroxide reaction 112(1987)335

Differential scanning calorimetric studies of the reaction between lignocellulosic materials and hydrogen peroxide using model compounds 113 (1987)321

A sensitive kinetic–thermometric method for Co(II) determination based on the tiron–hydrogen peroxide reaction 117(1987)89

Cu(II) trace determination by means of a catalytic thermometric method based on the hydroxylamine–hydrogen peroxide reaction 117 (1987)283

Kinetic–thermometric study of hydrogen peroxide decomposition in basic media catalyzed by Mn(II). Influence of several organic ligands 125(1988)319

Cobalt(II) determination at ppb levels based on its catalytic effect on the hydrazine–hydrogen peroxide reaction. Study by thermometric method 130(1988)241

Hydrolysis

The effect of alkali halides on the thermal hydrolysis of magnesium chloride and magnesium bromide 109(1986)207

Determination of ammonia, amides, and the degree of hydrolysis of partially hydrolyzed polyacrylamide by thermometric titration and direct injection enthalpimetry 111(1987)57

Thermochemistry of hydrolytic enzymatic reactions 112(1987)151

On the activation energy for the hydrolysis of bis-(2-chloroethylethyl) sulfide. II 114(1987)313

Solid-state hydrolysis of iron(II) sulphate heptahydrate 128(1988)305

The study of thermal dehydration and hydrolysis of $MgBr_2.6HOH$ by DTA and TG 133(1988)263

On isomorphism of the structure of basic aluminium sulphates obtained by means of hydrolysis of aluminium sulphate at higher temperatures 133(1988)323

Integral kinetic analysis from temperature programmed reaction data: alkaline hydrolysis of ethyl acetate as test reaction 141(1989)169

2-Hydroxy-1-naphthaldehyde monosemicarbazone

Thermal studies on the chelation behaviour of bivalent metal complexes of biologically active 2-hydroxy-1-naphthaldehyde monosemicarbazone (HNAS) 126(1988)1

3-Hydroxy-4-pyrones

Thermodynamic proton–ligand dissociation constants of substituted 3-hydroxy-4-pyrones in dioxane–water mixtures 143(1989)1

3-Hydroxy-2-quinoline

Effect of temperature on the electrical conductivity of some 4-(substituted)-3-hydroxy-2-quinoline ligands and their complexes 125 (1988)9

Hydroxy-quinones

Spectral and thermal studies of some bivalent metal chelates of various hydroxy-quinones 104 (1986)39

2-Hydroxyacetamide

Solubility data of some sodium salts in 2-hydroxyacetamide 142(1989)13

2-Hydroxyadamantane

Thermal behaviour of 2-hydroxyadamantane 136(1988)81

Thermal behaviour of 2-hydroxyadamantane 142(1989)245

Hydroxyadamantanes

Solid state ^{13}C NMR and phase transitions in hydroxyadamantanes 146(1989)361

Hydroxyapatite

Formation of β-tricalcium di(orthophosphate) from mixtures of hydroxyapatite and calcium hydrogen orthophosphate 113(1987)133

1-(2′-Hydroxybenzyl)-2-(2′-hydroxyphenyl)-benzimidazole

Thermal behaviour of uranium(VI) and cerium(IV) complexes of 1-(2′-hydroxybenzyl)-2-(2′-hydroxyphenyl)-benzimidazole 111(1987)369

Thermal behavior of cobalt(II) and manganese(II) complexes of 1-(2′-hydroxybenzyl)-2-(2′-hydroxyphenyl)-benzimidazole 117(1987)385

Hydroxycarbonates

Kinetics of the thermal dehydration of some layered hydroxycarbonates 135(1988)231

***o*-Hydroxychalcones**

Kinetic parameters of the non-isothermal decomposition of Cu(II) chelates of *o*-hydroxychalcones 131(1988)299

Hydroxydimethoxyacetophenones

Thermodynamic stability constants of bivalent metal complexes of 2-hydroxy-3,4-dimethoxyacetophenone 107(1986)371

Hydroxylamine

Cu(II) trace determination by means of a catalytic thermometric method based on the hydroxylamine–hydrogen peroxide reaction 117 (1987)283

Hydroxyl groups

Statistical study of the influence of the hydroxyl groups in positions 3 and 4 on the ionization process of 3,4-dihydroxybenzoic acid 120(1987) 279

Hydroxynaphthoic acid azo dyes

Thermogravimetric, potentiometric, conductimetric and spectrometric studies on lanthanide complexes with some hydroxynaphthoic acid azo dyes 122(1987)231

Hydroxyphenylalanine

Calorimetric study of the first and second proton dissociation processes of fluoro and hydroxyl derivatives of phenylalanine 142(1989)203

3-[α-(*o*-Hydroxyphenyl)ethylidenehydrazino]-6-phenylpyridazine

Thermodynamics, stability constants and spectrophotometric studies of complexes of trivalent lanthanides and some divalent metals with 3-[α-(*o*-hydroxyphenyl)ethylidenehydrazino]-6-phenylpyridazine ligand 149(1989)317

8-Hydroxyquinoline

Thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel 114(1987)329

Hyperbolic schedule

Analysis of the shape index of DTG or DTA curves under a hyperbolic or logarithmic schedule 103(1986)317

Hypoxanthine

Thermal studies on purine complexes. XII. Thermal behaviour of some metal complexes of hypoxanthine 103(1986)305

Hysteresis

Thermal analysis and DSC: the hysteresis cycle in shape memory alloys 145(1989)101

I

Ice melting

On the study by DSC of the unexpected ice melting at 0 °C of emulsified aqueous saline solutions 122(1987)123

Ceraceomyces sublaevis

Thermogravimetric analysis of flax shives degraded by *Pleurotus ostreatus* and *Ceraceomyces sublaevis* 138(1989)347

Ignition

The relationship between ignition temperature and thermal stability for selected primary explosives 105(1986)287

Times-to-ignition of pyrotechnics 106(1986)253

A simple model for predicting polymer ignition in a thermogravimetric analyzer 112(1987)161

Spontaneous ignition temperatures of aviation turbine oils 112(1987)297

A thermogravimetric study of the decomposition rate of chlorinated polyethylenes under ignition conditions 125(1988)247

A thermoanalytical study of the ignition behaviour of uranium dicarbide 144(1989)357

On the determination of the ignition temperature of sponge iron 149(1989)27

Ilmenite

Kinetics of the selective chlorination of ilmenite 124(1988)205

Imidazole

Thermogravimetric and infrared studies of tetrameric zirconium(IV) compounds derived from oxozirconium(IV) chloride and imidazole, morpholine and their derivatives 109(1987)303

Study of copper(II) succinate complexed with imidazole or methyl-substituted imidazoles 122 (1987)221

Study of some solvated copper(II) adipates. II. Complexes with imidazole and its methyl derivatives (in French) 125(1988)35

Stoichiometry and stability of some solid state charge transfer complexes formed in imidazole–hydrocarbon systems 142(1989)371

Immobilized urease

Enthalpimetric flow analysis of urea using immobilized urease 111(1987)1

Imperfections

Thermal effects induced by imperfections in powdered solids 110(1987)319

Impregnation

Impregnation thermodynamics of barrier-layer capacitors 131(1988)247

Impurities

Differential scanning calorimetry as a tool for evaluating preparation techniques, and detecting impurities, metastable states, etc. in silver mercury iodide (Ag_2HgI_4) 131(1988)191

In-situ combustion

TGA/DSC techniques as research tools for the study of the in-situ combustion process 106 (1986)63

Inclusion complexes

Calorimetric studies of benzoic acid–cyclodextrin inclusion complexes 140(1989)161

Indium

Contribution to the study of the mercury–indium binary system as a function of pressure. Determination of the isobaric expansion coefficient of Hg + In alloys between 1 and 300 bar (in French) 126(1988)117

A thermodynamic assessment of the Au–In system 129(1988)89

Interpretation of DSC curves of the indium melting process and determination of the thermal resistance R, thermal time constant RC_s and least separation temperature L 137(1988)307

Indium selenium

Phase studies in the systems Ag_2Te-Ga_2Te_3, ZnSe-In_2Se_3, and ZnS-Ga_2S_3 112(1987)89

Indium sulphide

The isomolecular exchange reaction $Ga_2S(g) + In_2S(g) = 2\ InGaS(g)$ 112(1987)141

Individual ions

Thermodynamics of individual ions in ethylene glycol–water solvents 103(1986)387

Thermodynamics of individual ions in various solvent systems from electromotive force measurements 140(1989)305

Indol

Structure–stability relationship of copper(II)–indol carboxylic acid derivative complexes from spectrophotometric, thermogravimetric and potentiometric studies 114(1987)359

Indole derivatives

Thermodynamics of electron transfer processes in liquid and gas phases. 1. Correlations of electrooxidation and ionization potentials with substituent constants for some indole and indolizine derivatives: quantitative solvation free energies 108(1986)163

A calorimetric study of the protonation process of some indole derivatives in acetonitrile. Correlations with electro-oxidation and ionization potentials 138(1989)27

Indolizine derivatives

Thermodynamics of electron transfer processes in liquid and gas phases. 1. Correlations of electrooxidation and ionization potentials with substituent constants for some indole and indolizine derivatives: quantitative solvation free energies 108(1986)163

Industrial reactions

Mathematical modelling of industrial reactions using thermoanalytical methods 134(1988)441

Inert gas release

Theory of emanation thermal analysis VII: thermostimulated inert gas release as influenced by the energy spectrum of the defect sites in solids 142(1989)241

Theory of emanation thermal analysis. Part VIII. Influence of sample-labelling conditions on the thermostimulated inert gas release 143(1989)27

Inertia

Theory of emanation thermal analysis. IV. Influence of inertia of the apparatus on the form of the eta curve and reconstruction of the true form of the eta curve during thermally stimulated inert gas release 104(1986)255

Infinite dilution

Conduction calorimetry and reagent lack: measurement of the excess partial molar enthalpies extrapolated to infinite dilution (in French) 114(1987)373

Information flood

Information flood: fiction and reality 110(1987) 11

Infrared spectroscopy

Degradation studies on nickel nitrate hexahydrate. Part 3. Raman and infrared analysis 101(1986)291

Thermodynamics, formation constants, spectrophotometry and infrared spectroscopy of complexes between some divalent metal ions and 3-hydrazino-6-phenylpyridazine and related ligands 119(1987)249

Inhibition

Determination of the urease activity and the relative inhibition in the presence of some metal ions: A microcalorimetric study 122(1987)95

Thermochemical studies on hot ash corrosion of stainless steel 304 and inhibition by magnesium sulphate 126(1988)43

Initiators

The influence of trioctyl methyl ammonium salts on the decomposition of initiators studied by DSC 134(1988)237

Injection calorimeters

A model-based study of deconvolution in time-varying or injection calorimeters 126(1988)171

Inorganic binders

Thermal analysis and chemistry of inorganic binders 110(1987)467

Inorganic complexes

Inorganic complexes 110(1987)389

Inorganic compounds

Decomposition of inorganic compounds 110 (1987)373

Thermochemistry of inorganic compounds. Part 1. Estimation of entropies of A_xB_y types of solids 136(1988)133

Thermochemistry of inorganic compounds. Part 2. Estimation of heat capacities of A_xB_y-type solids 145(1989)363

Inorganic materials

Synthesis and real structure of inorganic materials (Landseas Plenary Lecture) [abstract] 135(1988)3

Diagnostics of inorganic materials by diffusion structural analysis ("Israel Chemicals Ltd." Invited Lecture) 148(1989)117

Thermal synthesis of inorganic materials (Review) 148(1989)205

Inorganic solids

Quantitative thermoanalytical studies of the kinetics and mechanisms of the thermal decomposition of inorganic solids 110(1987)153

Mechanochemistry of inorganic solids 110(1987) 303

Some aspects of heterogeneous reactions of inorganic solids 110(1987)367

Insertion

TG and DSC studies of lithium insertion in $LiFe_5O_8$ 133(1988)203

Instrumentation

Report on the workshop: advances in thermoanalytical instrumentation 110(1987)31

Trends in thermal analysis instrumentation 110 (1987)51

Instrumentation in thermal analysis: progress report 110(1987)57

Outline of some new calorimetric techniques and instrumentation 110(1987)165

Applications of new methods and instrumentation in thermal analysis 114(1987)1

Software for a combined STA-QMS instrument 148(1989)493

Integral discrimination methods

Kinetic analysis of thermogravimetric data. Comparison of integral discrimination methods 146(1989)75

Integral equations

Application of integral equations with superstrong singularity to steady state heat conduction 135(1988)133

Integral kinetic analysis

Integral kinetic analysis from temperature programmed reaction data: alkaline hydrolysis of ethyl acetate as test reaction 141(1989)169

Integrated system

A new integrated system for simultaneous TG-DTA-mass spectrometry 114(1987)47

Intensity

Determination of the intensity of an early iron age conflagration at Tel-Hadar, Israel 148(1989) 485

Interaction

Some features of the interaction of silica gel with organic bases 104(1986)111

Aqueous solutions containing amino acids and peptides. Part 25. The enthalpy of interaction at 298.15 K of glycine with potassium halides 107 (1986)267

Water–solid interactions in thermal analysis 110 (1987)513

Thermoanalytical investigation of the interaction of phosphate-based cutting fluids with an iron surface 114(1987)287

Calorimetric study of the interactions of calcium and magnesium ions with calmoduline (in French) 122(1987)37

A thermometric titration study of the interaction of Co^{2+} with metallochromic indicators 122 (1987)163

Thermochemical study on the solid state interaction of graphite with cupric and ferric sulphates 126(1988)101

Thermochemistry of alkali interactions with refractory adsorbents 131(1988)141

The interaction of malonaldehyde with myosin and its subfragments: a microcalorimetric study 136(1988)287

Evaluation of the interaction parameter for poly(styrene)-poly(α-methylstyrene) mixtures from heat of solution measurements 137(1988)123

Thermal and spectroscopic characterization of reaction products of Al-nitrate–Cr-nitrate interaction at various temperatures 141(1989)277

Thermal and spectroscopic characterization of reaction products of aluminium hydroxyacetate–chromium nitrate interaction at different temperatures 144(1989)141

Mixed interaction terms in the use of Pitzer equations: application to the heat capacities of the reciprocal system $Na^+/K^+/Cl^-/SO_4^{2-}/H_2O$ at high temperatures 145(1989)61

Interactions in aqueous solutions of urea derivatives and NaI at 298.15 K 145(1989)357

Thermodynamics of the interaction between *n*-dodecyltrimethylammonium bromide and catalases 146(1989)215

Interactions of high-temperature superconductors with the atmosphere (Review) 148(1989)229

Interaction of kaolinite with organic and inorganic alkali salts at 25-1300 ° C 148(1989)431

Interaction of kaolinite with calcite on heating. IV - Rehydrated and recarbonated samples 148 (1989)439

Calorimetric study of molecular interactions in mixtures of substances containing carbonyl groups 149(1989)111

Interaction of buprenorphine with phosphatidylcholine 150(1989)1

Interactions in electrolyte solutions in glycerol–water and glycerol–methanol mixtures from the heat of solution enthalpy 150(1989)177

Interaction coefficients

Thermochemical properties of NaI solutions in water–2-methoxyethanol and water–2-ethoxyethanol mixtures. The temperature dependence of enthalpic pair interaction coefficients in water solution 122(1987)377

Intercalation

Thermal behaviour of intercalated kaolinite 118 (1987)295

Interconversion

A thermochemical kinetic study of interconversion reactions of aniline–formaldehyde products 127(1988)369

Interfaces

Theory of emanation thermal analysis. VI. Mathematical model of inert gas release from a two-phase solid–fluid system under its interface and diffusivity changes due to a chemical reaction 121(1987)241

Interfacial properties of zwitterionic surfactants: *N*-dodecylbetaine 122(1987)171

Contribution of microcalorimetry to the study of adsorption mechanisms of ionic and non-ionic molecules at the solid-water interface 122(1987) 197

Interfacial properties

Studies of interfacial properties in polyepoxide/carbon or glass fiber composites by means of microgravimetric techniques 103(1987) 97

Intermetallic compounds

On the thermochemistry of intermetallic compounds 129(1988)29

Interpotential

The effect of intra and inter potential for isotropic to nematic phase transition: a pressure–volume–temperature measurement study 105(1986)251

Interpretation

Interpretation of TG curves with help of high resolution mass spectrometry 114(1987)29

Intrapotential

The effect of intra and inter potential for isotropic to nematic phase transition: a pressure–volume–temperature measurement study 105(1986)251

Inverse filtering

A frequential analysis of the numerical algorithms used for inverse filtering in calorimetry 102 (1986)173

Inverse kinetic problems

Illustration of the ambiguity in solving inverse kinetic problems 130(1988)269

Inversion

The high-low inversion of quartz 148(1989)467

Invertase

Thermal stability of invertase immobilized on superfine filaments of a poly(vinyl alcohol) derivative 123(1988)183

Iodide

Thermometric study of the bromate–iodide reaction catalysed by Mo(VI) 142(1989)107

Iodine

Catalytic–thermometric determination of stability constants of complexes using the iodine–azide reaction 103(1986)325

Related thermal analyses and spectrophotometric studies on iodine redox products of aminophenols 111(1987)103

Enthalpimetric determination of sulphide and thiosulphate by the catalysis of the iodine–azide reaction 112(1987)171

Comparative study of the redox reactions between iodine and phenol derivatives, through correlation between thermal analysis and thermodynamic calculations from kinetic data 128(1988)105

Iodine derivatives

The kinetics and thermochemistry of the redox reaction between iodine and phenol derivatives. I. With *ortho*-bromophenol 101(1986)325

Iodine sorption

A comparative study of the crystallinity degree of PET by DTA, X-ray diffraction and iodine sorption techniques 101(1986)341

Ion-exchange

Thermodynamic treatment of H^+/K^+ ion-exchange on γ-titanium phosphate 101(1986)101

Ion association

Thermodynamics of ion association: transition metal complexes of *N*-isobutyroyl-L-lysine 111 (1987)239

Ion association of Cl^- with Na^+, K^+, Mg^{2+} and Ca^{2+} in aqueous solution at $10 \leqslant T \leqslant 45\,^\circ C$ and $0 \leqslant I \leqslant 1$ mol l^{-1}. a literature data analysis 115 (1987)241

Ion exchange

A study of heat-treated ammonium-ion-exchanged zeolites by differential scanning calorimetry 129(1988)301

Thermochemical study of ion-exchange processes. V. Sorption of copper ions in complex-forming resins 139(1989)327

Ionic bonding

The relative strengths of ionic, covalent and multiple-bonding in diatomic molecules 109 (1986)165

Ionic conduction

Influence of temperature and humidity on ionic conduction of mixed metal hydroxides 133 (1988)87

Ionic solvation

Ionic solvation in water + co-solvent mixtures. Part 16. Free energies of transfer of large single ions with the "neutral" component removed from water into water + ethanol mixtures 130(1988) 127

Ionic solvation in water + CO-solvent mixtures. Part 17. The "neutral" component of free energies of transfer of single ions from water into water + ethanol mixtures 132(1988)141

Ionic strengths

Formation and stability of magnesium–oxydiacetate complexes at different temperatures and ionic strengths in aqueous solution 117(1987)317

Ionic surfactants

A calorimetric study of three long-chain ionic surfactants 109(1986)155

Ionization

Thermodynamic analysis of the ionization of *ortho* and *para* toluic acids : influence of the medium on the hyperconjugative and steric effects 109(1986)353

The thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics 114 (1987)245

Statistical study of the influence of the hydroxyl groups in positions 3 and 4 on the ionization process of 3,4-dihydroxybenzoic acid 120(1987) 279

Thermodynamic parameters of ionization of 5-(2-substituted phenylazo) barbituric acids 122 (1987)209

Thermodynamics for the ionization of benzoic acid in ethanol + water mixtures at 298.1 K 124 (1988)43

Statistical study of the influence of the nitro groups on the ionization and solvation processes of disubstituted benzoic derivatives 125(1988)363

Temperature and substituent effects on the ionization of some disubstituted arylazo barbituric and thiobarbituric acid compounds 140(1989)365

Thermodynamics of the second proton dissociation processes of nine α-amino-acids and the third ionization processes of glutamic acid, aspartic acid and tyrosine 141(1989)297

Ionization constants

Thermodynamic ionization constants for crown ether carboxylic acids in aqueous dioxane 111 (1987)257

Ionization potentials

On enthalpies of hydration, ionization potentials, and the softness of ions 104(1986)389

Thermodynamics of electron transfer processes in liquid and gas phases. 1. Correlations of electrooxidation and ionization potentials with substituent constants for some indole and indolizine derivatives: quantitative solvation free energies 108(1986)163

Thermodynamics of electron transfer processes in liquid and gas phases. Part II. Correlations of electro-oxidation and ionization potentials with substituent constants for some *N,N*-dimethylaniline derivatives 119(1987)273

A calorimetric study of the protonation process of some indole derivatives in acetonitrile. Correlations with electro-oxidation and ionization potentials 138(1989)27

Thermochemical and structural studies of complex actinide chlorides $Cs_2NaAnCl_6$ (An = U–Cf); ionization potentials and hydration enthalpies of An^{3+} ions 139(1989)49

Ions

Absolute electrode potentials in dioxane–water solvent mixtures and transfer free energies of individual ions 120(1987)261

Ion solvation

Calorimetric study of the solvation of some ions in acetonitrile–dimethylsulfoxide mixtures 145 (1989)219

Ion transfer

Enthalpy of transfer of ions from water to water–tetrahydrofuran mixtures 115(1987)129

Iridium(II) complexes

Solid state kinetic parameters and mechanism for the deaquation–anation of hexacyanocobaltate(III) of aquopentaamminecobalt(III), rhodium(III) and iridium(III), calculated by isothermal DSC measurements 102(1986)137

Iron

Some results of investigations into relationship between a few elements of nodular graphite cast iron and nodular graphite 103(1987)169

Investigation of the carburization of Fe/Mn-Fischer-Tropsch catalysts with a microbalance 103(1987)187

Thermodynamic study of the liquid Fe–S system by use of a drop calorimeter 109(1986)275

Studies on the reduction of iron/tungsten mixed oxides 112(1987)221

Thermoanalytical investigation of the interaction of phosphate-based cutting fluids with an iron surface 114(1987)287

Relationships between the quenching conditions and the relaxation enthalpy of Fe–Si–B amorphous ribbons 121(1987)223

A thermodynamic evaluation of the Iron–Zinc System 129(1988)77

The heats of adsorption of zinc di *n*-alkyl dithio phosphates onto pure iron, cast iron and ferric oxide surfaces 130(1988)141

Structural relaxation and crystallization of $Fe_{78}B_{13}Si_9$ amorphous ribbons studied by dilatometry and differential scanning calorimetry 130(1988)177

The structure and thermal reactions of natural iron-containing allophanes studied by 57-Fe mössbauer spectroscopy 130(1988)259

Thermal and mössbauer studies of iron-containing hydrous silicates. VII. Glauconite 136(1988)247

A third law of thermodynamics analysis of the enthalpy change of the order–disorder transformation in Ni_3Fe 139(1989)149

Iron–neodymium (Fe–Nd) phase diagram (in French) 147(1989)205

On the determination of the ignition temperature of sponge iron 149(1989)27

Iron age conflagration

Determination of the intensity of an early iron age conflagration at Tel-Hadar, Israel 148(1989) 485

Iron alkoxide

High temperature synthesis and characteristics of Al-substituted iron alkoxide 107(1986)75

Iron complexes

Electrical conductivity behaviour in $(C_nH_{2n})(NH_3)_2FeCl_4$ complexes (n = 2, 3, 7 and 10) 137(1988)255

Iron compounds

Thermal effect on formation and conduction mechanism of $MnFe_2O_4$ 105(1986)1

Thermal studies on the dielectric constant of some $(C_nH_{2n})(NH_3)_2FeCl_4$ compounds (n = 2, 7 and 10) 105(1986)295

The reactions of some compounds of iron, cobalt and nickel with the molten lithium carbonate–sodium carbonate–potassium carbonate eutectic 132(1988)45

Magnetic susceptibility of $(IPA)_2FeCl_4$, $(IBuA)_2FeCl_4$ and $(IPA)_2CuCl_4$ 150(1989)27

Iron diphenylcarbazonate complexes

Thermal and spectroscopic characterization of Mn(II), Fe(II) and Fe(III) diphenylcarbazonate complexes 145(1989)281

Iron hydroxides

DTA study on α-Fe_2O_3 formation from Fe(III)-hydroxides containing foreign metallic ions 133 (1988)101

Thermal behavior of oxides and hydroxides of iron and nickel 145(1989)1

Iron(II)-tris-bipyridine

Studies on the solubility and the stability constants of ferrous-tris-bipyridine and phenanthroline complexes and the determination of free energy of transfer of ferrous ion from water to 2-propanol–water mixtures 104(1986) 267

Iron(II) complexes

Study of the thermal decomposition of bromazepan-thiocyanate complexes of Fe(II), Co(II), Ni(II) and Cu(II) 101(1986)83

Thermodynamics of the complexation of Fe(II), Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) with 6,7-dihydro-3(h)-methyl-5-methylthio-7-oxo-vic-triazolo(4,5-*d*)pyrimidine 102(1986)47

The stability and thermodynamic functions of 4-amino-1,6-dihydro-1-methyl-2-methylthio-5-nitroso-6-oxo-pyrimidine complexes with Mn(II), Fe(II), Co(II), Ni(II) and Cu(II) 108(1986)181

Thermal behaviour of copper(ii), iron(ii) and iron(iii) complexes of 1-(2′-hydroxybenzyl)-(2′-hydroxyphenyl)-benzimidazole 119(1987)377

Iron(II) compounds

Thermal studies on pyridine-2,3-dicarboxylic acid compounds of manganese(II), iron(II), cobalt(II) and nickel(II) 116(1987)275

Thermal studies on acetylenedicarboxylic acid compounds of iron(II), cobalt(II), nickel(II), copper(II) and zinc(II) 117(1987)51

Iron(II) coordination compounds

Non-isothermal decomposition kinetics of a mononuclear coordination compound of Fe(II) 118(1987)309

Iron(III)

Kinetic–thermometric method for the determination of Fe(III) in petroleum products 127(1988)73

Iron(III) complexes

Thermal behaviour of copper(ii), iron(ii) and iron(iii) complexes of 1-(2′-hydroxybenzyl)-(2′-hydroxyphenyl)-benzimidazole 119(1987)377

Solid complexes from 2-benzylideniminobenzohydroxamic, 2-pyrilideniminobenzohydroxamic and 2-salicylideniminobenzohydroxamic acids with Fe(III) and Cu(II) 143(1989)85

Iron(III) formate

The thermal decomposition of iron(III) formate 117(1987)325

Iron(III) hydrated gluconates

On the thermal stability of Fe^{III} and Ho^{III} hydrated gluconates 131(1988)285

Iron(III) oxalate

Studies on solid state redox reaction of iron(III) oxalate by gas chromatography 126(1988)51

Iron(III) oxide

The influence of water content on the adsorption of lubricating oil base stocks onto ferric oxide, studied by flow-microcalorimetry 101(1986)155

Iron(III) sulphate

Thermochemical study on the solid state interaction of graphite with cupric and ferric sulphates 126(1988)101

Iron(II) sulphate heptahydrate

Solid-state hydrolysis of iron(II) sulphate heptahydrate 128(1988)305

Iron ore

The hydrogen reduction of iron ore sinters 103 (1987)181

On the role of the boudouard reaction in the isothermal reduction of iron ore by char and graphite 111(1987)89

Reduction of iron ore under rising temperature and fluctuating temperature conditions 111 (1987)143

Iron oxide

Thermal analysis studies on the initial stages of iron oxide reduction 101(1986)107

Synthesis of γ-Fe_2O_3 by thermal decomposition of $FeC_4H_4O_4 \cdot 4H_2O$ 112(1987)231

Synthesis of γ-Fe_2O_3 by thermal decomposition of $FeC_4H_2O_4 \cdot \frac{1}{2}H_2O$. Part II 115(1987)215

The heats of adsorption of zinc di *n*-alkyl dithio phosphates onto pure iron, cast iron and ferric oxide surfaces 130(1988)141

Iron oxide hydrate

Kinetic parameters of dehydrating iron oxide hydrate: DTA and DTG study 117(1987)127

Iron oxides

DTA study on α-Fe_2O_3 formation from Fe(III)-hydroxides containing foreign metallic ions 133 (1988)101

Effect of crystallinity on the thermal evolution of γ-Fe_2O_3 133(1988)107

Thermal behavior of oxides and hydroxides of iron and nickel 145(1989)1

Iron oxyhydroxides

Thermal behavior in air of iron oxyhydroxides obtained from the method of homogeneous precipitation. Part I. Goethite samples of varying crystallinity 124(1988)359

Thermal behaviour in air of iron oxyhydroxides obtained from the method of homogeneous precipitation. Part II. Akaganeite sample 129 (1988)325

Iron phosphate

The thermochemistry of some iron phosphate minerals: vivianite, metavivianite, baraćite, ludlamite and vivianite/metavivianite admixtures 104(1986)1

Iron phosphorus trichalcogenides

Magnetic phase transitions in iron and nickel phosphorus trichalcogenides 139(1989)197

Iron powder

Thermal decomposition of $K_3Co(CN)_5L$ in hydrogen atmosphere and the influence of reduced iron powder 130(1988)77

Iron vanadate

Studies on the $Fe_2V_4O_{13}$–MoO_3 system 127 (1988)363

Irradiated polymers

The melting behaviour of irradiated polymers 117(1987)365

Irradiation

Metal chelates of heterocyclic nitrogen-containing ketones. XVII. Effect of temperature and gamma irradiation on the electrical conductivity of 2-quinaldyl phenyl ketone and its metal complexes 103(1986)213

Effects of γ-irradiation on thermal and textural properties of Na–Y zeolites 111(1987)249

Reduction reactivity of CuO–Cr_2O_3 mixed oxides with hydrogen and the effect of gamma pre-irradiation 119(1987)261

Electrical conduction in γ-irradiated and unirradiated zinc–iron ferrites 125(1988)379

The thermal decomposition of γ-irradiated lead nitrate by dynamic thermogravimetry 127(1988) 275

The effect of γ-irradiation on the thermal decomposition of lead nitrate 129(1988)237

Dehydration of some inorganic compounds by CW CO_2 laser irradiation and thermal heating. A comparative study 129(1988)269

Heat flow in biological tissue undergoing laser irradiation 135(1988)167

Lysophosphatidylcholine-water system: calorimetric study of the lamellar-micellar transition before and after gamma-radiation 137 (1988)79

Ageing due to gamma radiation of three linear low-density polyethylenes. Solubility and calorimetric results 137(1988)137

Evaluation of kinetic parameters for the thermal decomposition of γ-irradiated sodium bromate by dynamic thermogravimetry 141(1989)61

Electrical conduction in γ irradiated and unirradiated Fe_3O_4, $CdFe_2O_4$ and $Co_xZn_{1-x}Fe_2O_4$ ($0 \leqslant x \leqslant 1$) ferrites 144(1989)45

γ-irradiation effects on the electrical conductivity of some two-dimensional complexes: $RMnCl_4$, $RCoCl_4$ and $RMn_{0.5}Co_{0.5}Cl_4$ (R = H_3N–$(CH_2)_8$–NH_3) 146(1989)87

Irreversible processes

Application of thermal analysis to irreversible processes in the field of metallurgy 133(1988)311

Irreversible reactions

Analysis of irreversible complex chemical reactions and some observations on their overall activation energy 128(1988)185

Isentropic compressions

Molar excess enthalpies, molar excess volumes and molar isentropic compressions of mixtures of 2-propanone with heptane, benzene and trichloromethane at 298.15 K 113(1987)141

Isobaric expansion coefficient

Contribution to the study of the mercury–indium binary system as a function of pressure. Determination of the isobaric expansion coefficient of Hg + In alloys between 1 and 300 bar (in French) 126(1988)117

Isobaric expansivities

Isobaric expansivities of the binary mixtures $C_3H_7(OH) + C_nH_{2n+2}$ ($n = 11, 12$) between 288.15 and 318.15 K 131(1988)57

Isobutanol

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, isobutanol and benzene 126(1988)107

Liquid–liquid equilibria for the acetonitrile– 2-propanol–saturated hydrocarbon and acetonitrile–isobutanol–saturated hydrocarbon systems 127(1988)109

***N*-Isobutyroyl-L-lysine**

Thermodynamics of ion association: transition metal complexes of *N*-isobutyroyl-L-lysine 111 (1987)239

Isoconversional calculation

Estimation of the pre-exponential factor in the isoconversional calculation of effective kinetic parameters 128(1988)297

Isomeric interplay

Thermodynamic and kinetic consequences of isomeric interplay 128(1988)157

Isomeric mixtures

Thermodynamics of equilibrium isomeric mixtures: the dideuteriocyclobutadienes 112 (1987)379

Isomeric structures

Temperature interplay of isomeric structures OC · HF(g) and CO · HF(g) 102(1986)287

Isomerism

Isomerism of C_6(g) cluster and its manifestations in the system thermodynamics 127(1988)237

Isomerization

Thermally induced isomerization and decomposition of *N*-methyl-1,3-propanediamine complexes of nickel(II) in the solid state 124 (1988)297

Isomers

Total resonant sextet benzenoid hydrocarbon isomers and their molecular orbital and thermodynamic characteristics 122(1987)313

A rigorous rule for temperature extrema of isomer enthalpy and entropy terms: consistency test of data 142(1989)343

Isomolecular exchange

The isomolecular exchange reaction $Ga_2S(g) + In_2S(g) = 2\ InGaS(g)$ 112(1987)141

Isomorphism

On isomorphism of the structure of basic aluminium sulphates obtained by means of hydrolysis of aluminium sulphate at higher temperatures 133(1988)323

Isoniazid

Thermal studies on organomercury(II) complexes of isoniazid 116(1987)357

Isonicotinic hydrazide

Thermochemical study of some transition metal complexes of isonicotinic hydrazide derivatives 144(1989)53

Isoorotic acid

Thermal, spectral and biological studies on metal complexes of isoorotic and 2-thioisoorotic acids 133(1988)341

Isoperibol calorimeters

Computer-aided acquisition and processing of data for caloric measurements with isoperibol calorimeters 119(1987)59

Isopropyl alcohol

A thermometric study on the oxidation of isopropyl alcohol in some mineral acids 109 (1986)367

Magnetic susceptibility of $(IPA)_2FeCl_4$, $(IBuA)_2FeCl_4$ and $(IPA)_2CuCl_4$ 150(1989)27

Isopropyl nitrate

Kinetics of evaporation and decomposition of isopropyl nitrate by rapid scan IR spectroscopy 149(1989)349

Isothermal analysis

Computer controlled forced stepwise isothermal analysis 114(1987)131

Isothermal conditions

Modelling in calorimetry working under isothermal conditions or in scanning mode 114 (1987)15

Isothermal sintering

Kinetics of sintering of irregular particles of glass. Part I. Isothermal sintering 140(1989)219

Isothermal thermogravimetric curves

A compact method for the kinetic analysis of isothermal thermogravimetric curves 106(1986) 179

Isothiocyanate hydrates

Determination of standard molar enthalpies of formation for rare earth isothiocyanate hydrates 123(1988)43

Isotopes

Thermal characterization of the near-surface of polycrystalline metal oxides, NiO, CuO and MgO, by emanation thermal analysis using ^{226}Ra as parent isotope 137(1988)293

Isotopic effects

The deuterium isotope effect on the kinetics of the thermal dehydration of calcium oxalate monohydrate 102(1986)263

Order–disorder phase transitions in β-$MnSO_3 \cdot 3H_2O$-type hydrates: isotopic effects—vibrational, X-ray, thermoanalytical and permittivity measurements 150(1989)141

Isoxazolylacetamidoximes

Analytical properties of the amidoxime group. X. Potentiometric and thermometric behaviour of 3,5-dimethyl-4-isoxazolylacetamidoxime 103 (1986)259

Itaconic acid

Thermal studies on itaconic acid compounds of some transition metal ions 122(1987)295

Italian soft cheese

Thermoanalytical techniques applied to the analysis of an Italian soft cheese: a critical comparison with the official methods of analysis 144(1989)301

Iterative integral method

Iterative integral method to evaluate the classical non-isothermal kinetic parameters from a single curve obtained at constant heating rate using integration over small intervals of variables and the least-squares method 141(1989)9

J

Japanese quail

Direct and indirect calorimetry of the resting metabolism of Japanese quail (*Coturnix coturnix japonica*) 119(1987)157

JMAYK equation

Some critical considerations concerning the JMAYK equation in isothermal and non-isothermal conditions 147(1989)231

Jones–Dole equation

Apparent molal volume, apparent molal compressibility, verification of Jones–Dole equation and thermodynamic studies of aqueous urea and its derivatives at 25, 30, 35 and 40 °C 117(1987)245

K

Kaolinite

Thermal behaviour of intercalated kaolinite 118 (1987)295

Interaction of kaolinite with calcite on heating. I. Instrumental and procedural factors for one kaolinite in air and nitrogen 121(1987)51

Interaction of kaolinite with calcite on heating. II. Mixtures with one kaolinite in carbon dioxide 124(1988)119

Interaction of kaolinite with organic and inorganic alkali salts at 25-1300 °C 148(1989)431

Interaction of kaolinite with calcite on heating. IV - Rehydrated and recarbonated samples 148 (1989)439

Kaolinites

Enthalpy of dissolution of different kaolinites and metakaolinites in hydrofluoric acid. Influence of crystallochemical characteristics (in French) 122(1987)79

Kerogen

Oil shale pyrolysis – a new approach to the kinetic investigation of different kerogen type samples 134(1988)353

Simultaneous TG-DTG-EGA analysis for studies of kerogen 148(1989)533

2-Ketobutyramide

Supercooling phenomena in electrolytic mixtures of 2-ketobutyramide 118(1987)223

Ketones

Metal chelates of heterocyclic nitrogen-containing ketones. XVII. Effect of temperature and gamma irradiation on the electrical conductivity of 2-quinaldyl phenyl ketone and its metal complexes 103(1986)213

Excess enthalpies of ketones + diether at 298.15 K 130(1988)375

Thermodynamics of ketones + ether mixtures using a generalized quasichemical theory in terms of group surface interactions 136(1988)33

Excess enthalpies of ketone–triether mixtures. Measurement and application of the DISQUAC group contribution method 141(1989)269

Thermodynamics of ketones and diether mixtures: analysis in terms of group contribution (DISQUAC) 144(1989)1

Khelline

On polymorphism of khelline 147(1989)217

Khellin I

Study of the khellin I–nicotinic acid and khellin I–nicotinamide binary systems (in French) 121 (1987)283

Kinetic analysis

A compact method for the kinetic analysis of isothermal thermogravimetric curves 106(1986) 179

Comparison of isothermal and non-isothermal TG data. Kinetic analysis of calcium oxalate dehydration 107(1986)283

Equations for the rapid evaluation of general temperature integrals in non-isothermal kinetic analysis 125(1988)111

On the kinetic analysis of DTA curves 135 (1988)97

Kinetic analysis of monochromatic TL curves 135(1988)103

A computer program for kinetic analysis of non-isothermal thermoanalytical data 138(1989)337

Kinetic analysis of thermogravimetric data. Comparison of integral discrimination methods 146(1989)75

Applicability of the master plots in kinetic analysis of non-isothermal data 147(1989)377

Nonisothermal kinetic analysis - some current problems (Review) 148(1989)127

Kinetic equations

Nonisothermal kinetic equations with parameters depending on the degree of conversion 135 (1988)193

Kinetic laws

Systematic exploration of the rehydration kinetics of a reversible salt. II. Test of the generalization of the kinetic laws (in French) 108(1986)289

Kinetic models

Kinetic models for solid–solid reactions 131 (1988)65

The distinguishability of kinetic models using a single, non-isothermal thermal analysis experiment 136(1988)219

Kinetic parameters

Solid state kinetic parameters of the dehydration of $CoCl_2 \cdot 6H_2O$ by isothermal thermogravimetric measurements 102(1986)125

Solid state kinetic parameters and mechanism for the deaquation–anation of hexacyanocobaltate(III) of aquopentaamminecobalt(III), rhodium(III) and iridium(III), calculated by isothermal DSC measurements 102(1986)137

Solid state kinetic parameters of the first decomposition of potassium dichlorotetracyanoplatinate(IV), dibromotetracyanoplatinate(IV) and diiodotetracyanoplatinate(IV) 104(1986)299

Simple $g(\alpha)$ non dependent method to solve the kinetic parameters by isothermal thermogravimetry 104(1986)309

BASIC language program to evaluate non-isothermal kinetic parameters from thermoanalytical data 105(1986)247

Computer-determined kinetic parameters from TG curves. Part XVI 105(1986)375

Computer-determined kinetic parameters from TG curves. Part XVII 106(1986)379

The heating rate as a variable in non-isothermal kinetics. II. A method to evaluate the non-isothermal kinetic parameters using this principle and integration over low ranges of variables 107 (1986)353

On a new "classical" method to evaluate non-isothermal kinetic parameters 107(1986)359

The evaluation of kinetic parameters from non-isothermal experiments 110(1987)131

Computer-determined kinetic parameters from TG curves. Part XVIII 111(1987)379

The application of kinetic parameters to the investigation of thermal stability determined from rising temperature experiments 113(1987)287

On the kinetic parameters from non-isothermal data: mathematical considerations 114(1987)201

Computer-determined kinetic parameters from TG curves. Part XIX 116(1987)367

Kinetic parameters of dehydrating iron oxide hydrate: DTA and DTG study 117(1987)127

Thermogravimetric analysis of polythiocarbonates: thermal decomposition temperatures and kinetic parameters 118(1987) 111

Comparison between a classical method and two new methods to evaluate non-isothermal kinetic parameters 119(1987)369

Computer-determined kinetic parameters from TG curves. Part XX 119(1987)383

On the dependence of kinetic parameters and functions in non-isothermal kinetics 122(1987) 413

The determination of the most probable mechanism function and three kinetic parameters of exothermic decomposition reaction of energetic materials by a single non-isothermal DSC curve 123(1988)135

Computer-determined kinetic parameters from TG curves. Part XXI 124(1988)139

Interpretation of the dependence of the effective values of kinetic parameters on the degree of transformation 128(1988)69

Estimation of the pre-exponential factor in the isoconversional calculation of effective kinetic parameters 128(1988)297

Computer evaluation of non-isothermal kinetic parameters from TG data 130(1988)369

Effect of the value of heating rate in DSC on the kinetic parameters, when there is high enthalpy of reaction 131(1988)15

Kinetic parameters of the non-isothermal decomposition of Cu(II) chelates of *o*-hydroxychalcones 131(1988)299

Evaluation of kinetic parameters of CaF_2 : Tm (TLD-300) TL dosimeters 135(1988)111

Two new methods for calculation of kinetic parameters from thermogravimetric data 135 (1988)187

Kinetic parameters of the decomposition of hydrated tris(indole-3-butyrato)Ho(III) 138 (1989)173

Kinetic parameters of thermal decomposition of bis(2-OH-1-naphthaldoxime) chelates using freeman–carroll equation 140(1989)97

Evaluation of kinetic parameters for the thermal decomposition of γ-irradiated sodium bromate by dynamic thermogravimetry 141(1989)61

The use of a method for evaluating the non-isothermal activation energy by modelling a non-isothermal change with kinetic parameters dependent on the degree of conversion 143 (1989)177

Effects of sample weight, particle size, purge gas and crystalline structure on the observed kinetic parameters of calcium carbonate decomposition 143(1989)339

Kinetic parameters for the thermal decomposition reactions of CrO_3 in air 143 (1989)347

Evaluation of kinetic parameters for the thermal decomposition of piperonaldehyde thiosemicarbazone complexes of cobalt(II) and zinc(II) halides 146(1989)149

Values of kinetic parameters of cure reaction of epoxy in calorimetry by DC and DSC 146(1989) 329

Kinetics

Experimental data on the thermal kinetics of organic peroxides 101(1986)45

Kinetic studies by thermogravimetry: the role of heat transfer of sample mass and of sample holder design on metal hydride kinetic results 103(1987)51

Determination of kinetics and thermal conductivity of hydrates simultaneously by using thermogravimetry and transient hot strip method 105(1986)369

On the temperature integral in non-isothermal kinetics with linear heating rate. Part II 107 (1986)365

"Kinetic variations". Attempt of a classification of the dynamic thermal analysis methods to describe the dynamics of solid state reactions based on thoughts of Paul Klee (in German) 112(1987)13

Kinetic–thermometric determination of submicrogram quantities of Pd(II) 113(1987)73

On some thermodynamic and kinetic aspects of the dehydration of zeolite 13X in microwaves (in French) 115(1987)317

Kinetics of the selective chlorination of ilmenite 124(1988)205

Influence of the macrodiol chain length on the kinetics of linear non-segmented and segmented polyurethanes 142(1989)127

Thermal decomposition kinetics—Part XV. Kinetics and mechanism of thermal decomposition of tetrammine copper(II) sulphate monohydrate 144(1989)33

Kinetics and reaction mechanisms for formation and decomposition of $Ba_2YCu_3O_x$ 145(1989)149

Mathematical models of the kinetics of dynamic thermogravimetry 145(1989)165

Kinetics 148(1989)45

Knudsen cell–mass spectrometer

A knudsen cell–mass spectrometer study of the vaporization of cesium telluride and cesium tellurite 144(1989)21

Kojik acid

Thermal studies on organomercury(II) complexes of kojik acid and maltol 133(1988)371

Krafft point solubility

Studies on Krafft point solubility in surfactant solutions 137(1988)143

L

Labyrinth flow calorimeter

An isothermal labyrinth flow calorimeter with thermistors 115(1987)31

Lamellar-micellar transition

Lysophosphatidylcholine-water system: calorimetric study of the lamellar-micellar transition before and after gamma-radiation 137 (1988)79

Langbeinite

Heat capacities and entropies from 8 to 1000 K of langbeinite ($K_2Mg_2(SO_4)_3$), anhydrite ($CaSO_4$) and of gypsum ($CaSO_4 \cdot 2H_2O$) to 325 K 139(1989)67

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from $(NH_4)_2SO_4/CdSO_4$ 1 : 2 M mixtures. I. synthesis and characterization 144 (1989)65

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from $(NH_4)_2SO_4/CdSO_4$ 1 : 2 m mixtures. II. Analysis of the langbeinite decomposition 144(1989)225

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained via solution from mixtures of $(NH_4)_2SO_4/CdSO_4$ in molar ratio 1 : 2. III. Evolution of the samples 145(1989)51

The Langbeinite $(NH_4)_2Cd_2(SO_4)_3$ obtained from saturated solutions of $(NH_4)_2SO_4/CdSO_4$ in molar ratio 1 : 1 145(1989)131

Langbeinites

Heat capacity studies of phase transitions in langbeinites. I. $K_2Mn_2(SO_4)_3$ 139(1989)157

Langmuir-Wilhelmy method

Preventing leakages in the Langmuir-Wilhelmy method 103(1987)129

Lanthanide carbonates

Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium 137 (1988)319

Lanthanide chlorides

Thermal analysis of complex salts of lanthanide chlorides with hexamethylenetetramine 149 (1989)133

Lanthanide complexes

Thermodynamic stabilities of lanthanide complexes of the biologically active complexing agent, 2-acetylpyridinethiosemicarbazone (2-APT) 117(1987)291

Thermogravimetric, potentiometric, conductimetric and spectrometric studies on lanthanide complexes with some hydroxynaphthoic acid azo dyes 122(1987)231

Thermogravimetric studies on lanthanide complexes of new derivatives of 1,5-diaryl-3-acetylformazan 144(1989)249

Lanthanide(III) complexes

Thermal studies on some lanthanide(III) complexes of hexamethylenedithiocarbamate 141(1989)69

Lanthanide(III) ion complexes

Thermodynamics for the formation of complexes of lanthanide(III) ions with phthalanilic acids 143(1989)247

Lanthanide metal ions

Thermodynamics and formation constants of trivalent lanthanide metal ions with 3-hydrazino-6-phenylpyridazine and other related derivative ligands 113(1987)21

Lanthanide nitrates

A differential scanning calorimetric study of the decomposition of some lanthanide nitrates 147 (1989)303

Lanthanide oxysulphates

The thermal decomposition of octakis(di-*p*-methylphenyl sulphoxide) lanthanide(III) perchlorates. Formation of lanthanide oxysulphates 116(1987)45

Lanthanide perrhenate complexes

Thermogravimetric and differential scanning calorimetry studies of hydrated lanthanide perrhenate complexes with *trans*-1,4-dithiane-1,4-dioxide 118(1987)305

Lanthanides

Peptide–lanthanide cation equilibria in aqueous solution. IV. Isomorphous substitution, conformations and thermodynamics of complex formation 130(1988)205

Thermal properties of the hydroxides and oxides of lanthanides and actinides (Review) 148(1989) 249

Thermodynamics, stability constants and spectrophotometric studies of complexes of trivalent lanthanides and some divalent metals with 3-[α-(*o*-hydroxyphenyl)ethylidenehydrazino]-6-phenylpyridazine ligand 149(1989)317

Lanthanide salicylato complexes

Solid state decomposition studies on metal salicylates. Thermal decomposition of some lanthanide salicylato complexes 119(1987)285

Lanthanide sulphates

Formation of amorphous lanthanide sulfates and their crystallization 124(1988)217

Lanthanide tetrafluorides

Thermal decomposition of lanthanide and actinide tetrafluorides 133(1988)241

Lanthanide trifluorides

Vaporization studies of mixed lanthanide trifluorides 130(1988)55

Lanthanide trihalides

Relations between the heats of formation of lanthanide trihalides and the electronegativities of the halogen ions 132(1988)187

Lanthanoid complexes

Thermogravimetric investigation of 4-picoline-*N*-oxide (4-picNO) lanthanoid trifluoromethanesulfonate complexes 115(1987) 389

Lanthanoid perrhenate complexes

Thermogravimetric studies of hexamethylphosphoramide (HMPA) lanthanoid perrhenate complexes 146(1989)381

Lanthanoid sulfites

Studies on lanthanoid sulfites. Part VI. Thermogravimetric study of scandium sulfite pentahydrate 114(1987)153

Lanthanoid tellurites

Lanthanoid tellurites 102(1986)311

Lanthanon(III) complexes

Evaluation of thermodynamic parameters and stability constants for the formation of lanthanon(III) complexes with biologically active 2-(2′-lepidylazo)-*N*-methylisatin (LAMI) 113 (1987)15

Lanthanon(III) ions

Investigations of the complexation equilibria and thermodynamic parameters of biologically active *o*-vanillinsemicarbazone with lanthanon(III) ions 140(1989)271

Lanthanum

Determination of the free enthalpy of formation of the compound $LaPb_3$ (in French) 101(1986)177

Determination of the free enthalpy of formation of the distinct compounds $LaBi_2$ and $CeBi_2$ (in French) 115(1987)167

Thermal analysis in the M-Ba-Cu-O systems (M = Y, La, Pr) in relation to high T_c superconductors 133(1988)17

Lanthanum complexes

Thermal decomposition of complexes $[Co(NH_3)_6](M^I)_3[Ln(SO_4)_3]_2 \cdot nH_2O$ (M^I = NH_4, Rb; Ln = La, Ce, Pr) 126(1988)289

Potentiometric, spectrometric, thermogravimetric, conductimetric and magnetic studies of lanthanum complexes with some nitroso naphthols 143(1989)37

Lanthanum ferrites

Further investigation on the thermophysical properties of substituted lanthanum ferrites 107 (1986)163

Lanthanum phosphate

Thermodynamic study of the solid–liquid equilibria in the MPO_3–LaP_3O_9 systems (M = Li, Na, K, Rb, Cs, Ag, Tl) 116(1987)85

Lanthanum(III) complexes

Pyrolysis and kinetics of non-isothermal decomposition of La(III)– and Th(IV)–phenoxymethyl penicillin complexes 115(1987)381

Stability constants, structure and thermogravimetric analysis of La(III) complexes with some arylhydrazones of benzoylacetone and dibenzoylmethane 149(1989)61

Lanthanum(III) nitrate

The thermal decomposition of lanthanum(III), praseodymium(III) and europium(III) nitrates 124(1988)277

Lanthanum(III) systems

Equilibrium analysis of La(III)– and Pr(III)–3-methyl-5-hydroxy-1,4-naphthalenedione systems 115(1987)385

Lanthanum nickerlate

XPS and TPD probe techniques for the study of $LaNiO_3$ perovskite oxide 147(1989)361

Lanthanum oxides

Temperature programmed desorption study of hydrogen adsorption on $LaMO_3$ oxides 126 (1988)205

Lanthanum pyrohafnate

Thermal diffusivity and thermal conductivity studies on europium, gadolinium and lanthanum pyrohafnates 140(1989)103

Lasers

Dehydration of some inorganic compounds by CW CO_2 laser irradiation and thermal heating. A comparative study 129(1988)269

Development of a new laser interferometric dilatometer and its application to low expansion materials 134(1988)383

Heat flow in biological tissue undergoing laser irradiation 135(1988)167

Latent heat

Investigation of latent heat-thermal energy storage materials. IV. Thermoanalytical evaluation of binary eutectic mixtures of NaOH with LiOH or KOH 121(1987)193

Investigation of latent heat thermal energy storage materials V. Thermoanalytical evaluation of binary eutectic mixtures and compounds of NaOH with $NaNO_3$ or $NaNO_2$ 123(1988)233

Lattice variations

Lattice variations in natural magnesium calcites 101(1986)385

Layer thickness

In situ measurements of layer thickness during oxidation of titanium 133(1988)299

Lead

Determination of the free enthalpy of formation of the compound $LaPb_3$ (in French) 101(1986)177

Curie temperature standards for thermogravimetry: the effect of magnetic field strength and comparison with melting point standards using Ni and Pb 109(1986)193

Preparation of $BaPbO_3$ from coprecipitated barium–lead oxalate 115(1987)207

Investigation of the binary Pb-Sn system by DTA 133(1988)319

Lead carbonate

Influence of CO_2 pressure on the kinetics of thermal decomposition of $PbCO_3$ 113(1987)39

Thermoanalytical study of the system Pb^{2+}–Zn^{2+} coprecipitated as binary carbonates 137(1988)177

Lead complexes

Studies on the thermal decomposition of complex salts of the $Cs_3[Bi_{2-x}Pb_xCl_{9-x}]$ type 138(1989) 249

Lead compounds

Molten lithium nitrate–potassium nitrate eutectic: the reactions of some lead compounds 101(1986)19

A study of thermal decomposition of complex compounds of $Cs_3[Sb_{2-x}Pb_xCl_{9-x}]$ type 130 (1988)299

Lead dioxide

Thermochemical and morphological aspects of the thermal decomposition of lead dioxide 103 (1987)201

Lead dioxynitrate

Study of the degradation in open atmosphere of the hydrated dioxynitrate of lead 108(1986)29

Lead dioxynitrates

Obtention, thermal behaviour and structural study of the dioxynitrates of lead 105(1986)111

Lead(II) 9,10-dihydroxyoctadecanoates

Thermotropic mesomorphic changes in racemic and meso lead(II) 9,10-dihydroxyoctadecanoates 122(1987)355

Lead(II) complexes

Influence of different donor atoms on the formation of 1 : 1- and 2 : 1-complexes of 12-crown-4 and 18-crown-6 ethers with Ag^+, Tl^{2+}, Ba^{2+} and Pb^{2+} 107(1986)219

Lead(II) decanoate

Thermal behaviour of the system: lead(II) decanoate/lead(II) octadecanoate 130(1988)281

Lead(II) octadecanoate

Thermal behaviour of the system: lead(II) decanoate/lead(II) octadecanoate 130(1988)281

Lead(II) *p*-toluenesulphonate

Thermal decomposition of Co(II), Ni(II), Cu(II), Zn(II), Cd(II) and Pb(II) *p*-toluenesulphonates 146(1989)341

Lead iodide

The phase diagram $AgI-PbI_2$ 141(1989)293

Lead(IV) chloride complexes

Thermal reactions of lead(IV) chloride complexes in the solid state. Part VI. Thermal properties, thermochemistry and kinetics of the thermal decomposition of alkanaminium hexachloroplumbates 108(1986)239

Lead nitrate

The thermal decomposition of γ-irradiated lead nitrate by dynamic thermogravimetry 127(1988) 275

The effect of γ-irradiation on the thermal decomposition of lead nitrate 129(1988)237

Lead oxide

Solid state preparative and descriptive thermoanalysis of $SnO_2-X_2S_2O_8$ and $PbO_2-X_2S_2O_8$ (X = Na, K) binary systems 107 (1986)305

Lead oxides

The $PbO_2-PbO-B_2O_3$ system in air 149(1989)71

Lead peroxide

Kinetics of the isothermal transformation of β-PbO_2 into α-PbO_2 138(1989)277

Lead sulphate

Analysis of the chemical reaction between $PbSO_4$ and PbS 119(1987)329

Lead sulphide

Thermodynamics and vaporization chemistry in the $PbS-Ga_2S_3$ system 107(1986)83

Analysis of the chemical reaction between $PbSO_4$ and PbS 119(1987)329

Vapour pressure and thermodynamics of PbS(s) 137(1988)269

Lead thiosulphate

A note on the thermal decomposition of lead thiosulphate 102(1986)391

Leakages

Preventing leakages in the Langmuir-Wilhelmy method 103(1987)129

2-(2′-Lepidylazo)-*N*-methylisatin

Evaluation of thermodynamic parameters and stability constants for the formation of lanthanon(III) complexes with biologically active 2-(2′-lepidylazo)-*N*-methylisatin (LAMI) 113 (1987)15

Leucine

Critical comparison of thermal properties of some divalent metal ion complexes with alanine, leucine and valine 113(1987)243

Lewis bases

Calorimetric study of some carboxylic acids Lewis-bases complexes in view of thermal energy storage 130(1988)149

Lewis equation

Gibbs energy and equilibrium: dimensions in the lewis equation 111(1987)321

Lifetime

Lifetime prediction for polymers from thermal analytical experiments - problems and how to deal with some of them 134(1988)115

Ligands

Calorimetry study of the exchange equilibrium between ligands or metal–ligands and an anion-exchange resin 136(1988)203

Light emission

The thermal light emission of $NH_3 \cdot BH_3$ 113 (1987)383

Flow-microcalorimetric investigations on the relationship between that production and light emission of photobacterium phosphoreum 119 (1987)121

The light emission of thermally stimulated processes: emission thermophotometry (Landseas Plenary Lecture) [abstract] 135(1988)9

Emission thermophotometry. V. Premelting light emission of some nylon polymers 143(1989)181

The thermal light emission of [tris(tetraammine-bis-μ-hydroxocobalt(III))cobalt(III)]$(NO_3)_5(OH) \cdot 4H_2O$ 150(1989)193

Light intensity

Simultaneous differential scanning calorimetry and reflected light intensity measurements in polymer studies 134(1988)201

Lignin

Kinetics of weight loss by thermal decomposition of xylan and lignin. Influence of experimental conditions 143(1989)137

Lignite coal

Effect of calcium chloride and calcium acetate on the reactivity of a lignite coal at low heating rate 125(1988)285

Lignites

Calorific value of lignites from proximate analysis 107(1986)291

Desulfurization of some turkish lignites during carbonization by ammonia 126(1988)299

Desulfurization of some Turkish lignites during oxidation by air 132(1988)289

Lignocellulosic materials

Thermal analysis of mixtures of nitrates and lignocellulosic materials 107(1986)131

Differential scanning calorimetric studies of the reaction between lignocellulosic materials and hydrogen peroxide using model compounds 113 (1987)321

Thermal decomposition of lignocellulosic materials: influence of the chemical composition 143(1989)149

Lime

DTA study of the influence of lime content of low-calcium fly ashes on the Pozzolanic reaction 145(1989)87

Limestone

The moving boat technique and practical studies on the decomposition of carbonates. Part 1. comparative assessment of the decomposition rates of limestone and dolomite samples 101 (1986)119

The effect of sodium chloride on the surface area of calcined limestone. Part 1 106(1986)35

Diffusional study of the effect of sodium chloride on limestone sulfation in fluidized-bed combustion. Part 2 106(1986)43

Solid-gas reactions - sulphation of limestone 135 (1988)253

Linear heating rate

On the temperature integral in non-isothermal kinetics with linear heating rate. Part II 107 (1986)365

Linear system theory

Linear system theory of a heat conduction calorimeter. Part 1. Some properties of a linear system with zero initial conditions 141(1989)181

Linear theory

Linear theory applied to a calorimeter during quasi-isothermal operation 115(1987)303

Linoleic acid

The interaction of linoleic acid with myosin and its subfragments: a microcalorimetric study 130 (1988)165

Lipid A

Investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A 119(1987)127

Lipids

Oxidation of lipids studied by isothermal heat flux calorimetry 114(1987)159

Ethylmorphine–lipid interaction study by calorimetry and monolayer techniques 130 (1988)221

Lipopolysaccharides

Investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A 119(1987)127

Lipscombite

The thermal analysis of some phosphate minerals: strengite, lipscombite and goyazite 135(1988)259

Liquid crystal polymers

Compatibility of blends of poly(butylene terephthalate) and liquid crystal polymers: A DSC study 137(1988)105

Liquid crystals

Calorimetric determination of enthalpy changes in octylcyanobiphenyl (8CB) liquid crystal transitions 119(1987)301

Thermal study of blended systems of nylon 6 and a liquid crystalline polyester 122(1987)181

Liquid–liquid coexistence curves

Some interesting properties of vapor–liquid or liquid–liquid coexistence curves for ionic and non-ionic fluids 139(1989)25

Liquid–liquid equilibria

Liquid–liquid equilibria of (acetonitrile + methyl ethanoate + cyclohexane) and of (acetonitrile + cyclohexane + methyl ethanoate + benzene) 101 (1986)205

Liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems 114(1987)227

Prediction of vapor–liquid equilibrium from ternary liquid–liquid equilibrium data by means of local composition equations 115(1987)359

Liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol–saturated hydrocarbon mixtures 119(1987)357

Liquid–liquid equilibria for the acetonitrile– 2-propanol–saturated hydrocarbon and acetonitrile–isobutanol–saturated hydrocarbon systems 127(1988)109

Liquid–liquid equilibria for ternary mixtures containing two alcohols and one saturated hydrocarbon 127(1988)337

Correlation of ternary liquid–liquid equilibrium data and prediction of quaternary liquid–liquid equilibrium data by means of the UNIQUAC model 140(1989)121

Liquid mixtures

Signal processing in time-varying calorimeters for the study of continuous liquid mixtures 107 (1986)149

Ultrasonic velocity and viscosity of binary liquid mixtures 115(1987)335

Application of the DISQUAC group contribution model to binary liquid organic mixtures 122 (1987)45

Liquid propane gas

Thermodynamics and distribution of equilibrium compositions in LPG–O_2 detonation behind an initial shock wave 126(1988)279

Liquids

A microcalorimetric method for the measurement of enthalpies of solution of gases in liquids 115 (1987)67

Dynamic calorimetry in high-pressure, high-temperature thermodynamics of liquids 121 (1987)463

Three generations of scanning microcalorimeters for liquids 139(1989)257

Liquid sodium

On the chemistry of the reactions between liquid sodium and urania–plutonia fuel for fast breeder nuclear reactors 129(1988)143

Liquid solutions

Determination of caloric quantities of dilute liquid solutions 119(1987)17

Liquid state

Application of modified Redlich–Kwong equation for unsaturated vapour and liquid states 116(1987)209

Use of modified Martin equation for unsaturated vapour and liquid states 118(1987)17

Liquid–vapour coexistence curves

Some interesting properties of vapor–liquid or liquid–liquid coexistence curves for ionic and non-ionic fluids 139(1989)25

Liquid–vapour equilibria

Isothermal liquid–vapour equilibrium of the systems pyridine–*n*-hexane and pyridine–*n*-heptane (in French) 102(1986)271

Modification of Peng–Robinson equation of state for saturated vapour–liquid equilibrium 105 (1986)383

Simultaneous correlation of vapor–liquid equilibrium and excess enthalpies for binary mixtures of *n*-hexane and *n*-octane with hexane isomers 106(1986)219

Measurements of VLE, h^E and v^E for binary mixtures of n-alkanes with n-alkylbenzenes 180 (1986)9

Listeria monocytogens

Listeria monocytogens – microcalorimetric investigations regarding the antibacterial efficiency of chemotherapeutics 119(1987)113

Lithiation

Thermal evolution of the lithiation product of Mn_3O_4 146(1989)365

Lithium

TG and DSC studies of lithium insertion in $LiFe_5O_8$ 133(1988)203

DSC analysis of lithium-rich Li-B alloys 133 (1988)305

Characterization of the hydrogenated species in $Li_2Ti_4O_9.nH_2O$ by isothermal weight-change determination 137(1988)59

Characterisation of some new chromates $M_2Fe_3(OH)_5(CrO_4)_3 \cdot 3H_2O$ (M = Li, Na) 137 (1988)197

Calorimetric studies of liquid Li–Zn alloys 142 (1989)117

Lithium aluminium hydroxy salts

Thermal stability of lithium aluminium hydroxy salts 102(1986)67

Lithium bromide

The binary system (Li, Na)Br: measurement of the excess enthalpy of solid mixtures; measurement and analysis of the solid–liquid phase diagram 105(1986)117

Lithium carbonate

Lithium carbonate enhancement of the calcination of calcium carbonate: proposed extended-shell model 118(1987)135

Solid–solid interactions between ferric oxide and lithium carbonate and the thermal stability of the lithium ferrites produced 118(1987)151

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. I. Li_2CO_3–$BaCO_3$ 124(1988)65

The reactions of some compounds of iron, cobalt and nickel with the molten lithium carbonate–sodium carbonate–potassium carbonate eutectic 132(1988)45

Lithium chloride

Enthalpy of dissolution of LiCl and $LiCl \cdot H_2O$ in water at 25 °C at low concentrations 116 (1987)291

Lithium ferrites

Solid–solid interactions between ferric oxide and lithium carbonate and the thermal stability of the lithium ferrites produced 118(1987)151

Lithium hydroxide

Kinetic investigation of the sorption of water by lithium hydroxide 113(1987)87

Investigation of latent heat-thermal energy storage materials. IV. Thermoanalytical evaluation of binary eutectic mixtures of NaOH with LiOH or KOH 121(1987)193

Lithium ions

Effect of the different structural distortions of MoO_3 and the homologous $Mo_{18}O_{52}$ upon the thermodynamics of Li^+ insertion 121(1987)203

Lithium metasilicate glass

The non-isothermal devitrification of lithium metasilicate glass 140(1989)191

Lithium niobium oxide

Application of thermal analysis to study the crystal growth, defect structure and thermal expansion of $LiNbO_3$ (Invited Lecture) 133 (1988)1

Lithium nitrate

Molten lithium nitrate–potassium nitrate eutectic: the reactions of some lead compounds 101(1986)19

Molten lithium nitrate–potassium nitrate eutectic: the reaction of tin(II) chloride 136 (1988)149

Molten lithium nitrate–potassium nitrate eutectic: the reaction of magnesium compounds 145(1989)227

Lithium nitrite

Molten $LiNO_2$–$NaNO_2$, $LiNO_2$–KNO_2, $LiNO_2$–$CsNO_2$, and $NaNO_2$–KNO_2 eutectics: the reaction of $PdCl_2$, K_2PdCl_4, $K_2Pd(NO_2)_4$, $PtCl_2$, K_2PtCl_4, $K_2Pt(NO_2)_4$, $PtCl_4$, and K_2PtCl_6 111(1987)283

Lithium oxide

Structure and devitrification of $Li_2O \cdot P_2O_5$–B_2O_3 and $BaO \cdot P_2O_5$–B_2O_3 glasses 113 (1987)351

Nucleation and crystal growth in a $0.9Li_2O \cdot 0.1BaO \cdot 2SiO_2$ glass: a DTA study 120(1987)217

Effects of Li_2O doping on thermal solid–solid interaction between ferric oxide and nickel carbonate 132(1988)117

Effects of Li_2O doping on solid–solid interactions in the CuO–Al_2O_3 system 150 (1989)111

Lithium sulphate

Thermodynamic functions of gaseous lithium, sodium, potassium, rubidium and caesium sulfates 106(1986)51

Local composition equations

Prediction of vapor–liquid equilibrium from ternary liquid–liquid equilibrium data by means of local composition equations 115(1987)359

Locomotor activities

Combination of calorimetry and endoscopy for monitoring locomotor activities of small animals 130(1988)87

Logarithmic schedule

Analysis of the shape index of DTG or DTA curves under a hyperbolic or logarithmic schedule 103(1986)317

Lovastatin

The thermal behavior of Lovastatin 134(1988)41

Low-calcium fly ashes

DTA study of the influence of lime content of low-calcium fly ashes on the Pozzolanic reaction 145(1989)87

Low-temperature calorimetry

Low-temperature calorimetry: a particular branch of thermal analysis 110(1987)183

Low thermal inertia apparatus

Thermal runaway reactions in a low thermal inertia apparatus 104(1986)13

Lubricating oil base stocks

The influence of water content on the adsorption of lubricating oil base stocks onto ferric oxide, studied by flow-microcalorimetry 101(1986)155

Ludlamite

The thermochemistry of some iron phosphate minerals: vivianite, metavivianite, baraćite, ludlamite and vivianite/metavivianite admixtures 104(1986)1

Luminescence

Thermal decomposition of $Eu_2(SO_4)_3 \cdot 8H_2O$ studied by low temperature high-resolution luminescence spectroscopy 109(1986)343

Lutetium

Studies on double selenates. VIII. Thermal decomposition of ytterbium, lutetium, yttrium and alkali metal double selenates 136(1988)335

Lysine

Stepwise stability constants of uranyl(II) and thorium(IV) complexes of L-lysine monohydrochloride 101(1986)381

L-Lysine monohydrochloride

Determination of stability constants and thermodynamic functions of L-lysine monohydrochloride with Sm(III), Bi(III) and Gd(III) metal ions 147(1989)401

Lysophosphatidylcholine

Lysophosphatidylcholine-water system: calorimetric study of the lamellar-micellar transition before and after gamma-radiation 137 (1988)79

Lysozyme

The influence of sugars on the properties of freeze-dried lysozyme and haemoglobin 144 (1989)195

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of lysozyme in solution 147(1989)71

M

Macrodiol chain length

Influence of the macrodiol chain length on the kinetics of linear non-segmented and segmented polyurethanes 142(1989)127

Macromolecular compounds

On the thermal stability of some macromolecular compounds 131(1988)279

Magnesite

Isothermal decomposition of Almora magnesite 126(1988)403

Magnesium

Ion association of Cl^- with Na^+, K^+, Mg^{2+} and Ca^{2+} in aqueous solution at $10 \leqslant T \leqslant 45\,^\circ C$ and $0 \leqslant I \leqslant 1$ mol l^{-1}. a literature data analysis 115 (1987)241

Vapour composition and activities in Mg–Zn liquid alloy at 923 K 130(1988)193

The effect of raw material type on the characteristics of Mg-Al double hydroxides synthesized by hydrothermal method 133(1988) 119

Study of the surface acidity before and after heat or steam treatment for P or Mg modified ZSM-5 zeolites 135(1988)385

Magnesium bromide

The effect of alkali halides on the thermal hydrolysis of magnesium chloride and magnesium bromide 109(1986)207

Activation energies of thermal decomposition processes of $MgBr_2 \cdot 6H_2O$ 148(1989)197

Magnesium calcites

Lattice variations in natural magnesium calcites 101(1986)385

Magnesium chloride

The effect of alkali halides on the thermal hydrolysis of magnesium chloride and magnesium bromide 109(1986)207

Thermoanalytical investigations on the decomposition of double salts. Part II. The decomposition of double salts $MeCl \cdot MgCl_2 \cdot 6H_2O$ (Me = NH_4, Rb, Cs) 121(1987)151

Thermal analysis of calcite equilibrated with aqueous solutions of magnesium, strontium, barium and zinc chlorides 135(1988)237

Magnesium chloride dihydrate

The thermal decomposition of magnesium chloride dihydrate 138(1989)115

Magnesium compounds

Molten lithium nitrate–potassium nitrate eutectic: the reaction of magnesium compounds 145(1989)227

Magnesium hafnyl oxalates

Thermal studies on beryllium, magnesium and calcium hafnyl oxalates 103(1986)239

Magnesium hydroxide

The correlation of the strength of magnesium hydroxide compacts with heat treatment 133 (1988)131

Magnesium(II)-manganese(II) tetrametaphosphates

Study of thermal preparation and stability of binary Mn^{II}–Mg^{II} tetrametaphosphates by means of DTA 143(1989)131

Magnesium ions

Calorimetric study of the interactions of calcium and magnesium ions with calmoduline (in French) 122(1987)37

Magnesium metavanadates

Preparation and thermal reactivity of magnesium metavanadates 143(1989)325

Magnesium nickel hydride

Thermal studies on Mg_2NiH_4: existence of additional hydride phase in the Mg_2Ni–hydrogen system 125(1988)1

Magnesium orthophosphate

Kinetic aspects of the thermal treatment of acid crystallohydrate, $MgHPO_4 \cdot 3H_2O$. Part 1. Changes in the IR spectra and proton delocalization 116(1987)131

Kinetic aspects of the thermal treatment of acid crystallohydrate, $MgHPO_4 \cdot 3H_2O$. Part 2. Dehydration and accompanying effects 116 (1987)137

Magnesium oxide

Thermal characterization of the near-surface of polycrystalline metal oxides, NiO, CuO and MgO, by emanation thermal analysis using ^{226}Ra as parent isotope 137(1988)293

Devitrification behaviour of a glass obtained from porphyric sands with addition of TiO_2 (4%) and MgO (8%) 150(1989)39

Magnesium–oxydiacetate complexes

Formation and stability of magnesium–oxydiacetate complexes at different temperatures and ionic strengths in aqueous solution 117(1987)317

Magnesium perchlorate

Thermal decomposition and dehydration of magnesium perchlorate hexahydrate 104(1986) 159

Magnesium selenate

Thermal decomposition of magnesium and calcium selenates 145(1989)367

Magnesium stannate

Gibbs free energy of formation of magnesium stannate from EMF measurement 122(1987)389

Magnesium sulphate

Solid–liquid equilibria of the quaternary system $Na^+, K^+, Mg^{2+} \| SO_4^{2-}$–$H_2O$ a 25 °C (in French) 111(1987)295

Thermochemical studies on hot ash corrosion of stainless steel 304 and inhibition by magnesium sulphate 126(1988)43

Magnetic field

Curie temperature standards for thermogravimetry: the effect of magnetic field strength and comparison with melting point standards using Ni and Pb 109(1986)193

Magnetic susceptibility

The temperature dependence of magnetic susceptibility and thermogravimetry of antimony trioxide and antimony trisulphide specimens in relation to their method of preparation 120 (1987)225

Magnetic susceptibility of $(IPA)_2FeCl_4$, $(IBuA)_2FeCl_4$ and $(IPA)_2CuCl_4$ 150(1989)27

Magnetic suspension

New development in microweight determination by free magnetic suspension 103(1987)5

Maleic acid

Thermal studies on maleic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 143(1989)283

Maleic anhydride

Enthalpy of maleic anhydride polymerization in the presence of pyridine 132(1988)161

Enthalpy of free radical polymerization of maleic anhydride 147(1989)93

Enthalpy of maleic anhydride polymerization in the presence of poly-4-vinylpyridine 147(1989) 347

Malonaldehyde

The interaction of malonaldehyde with myosin and its subfragments: a microcalorimetric study 136(1988)287

Malonamide

Thermoanalytical characterization of 1,3-dimethyluracil and malonamide crystals 142 (1989)365

Malonic acid

Reaction kinetics at linearly increased temperature. V. DTA and UV study of the oxidation of malonic, tartronic, glyoxylic and monobromomalonic acids by ceric sulphate in dilute sulphuric acid 101(1986)245

Malonic acid compounds

The thermal, spectral and magnetic studies of malonic acid compounds of some transition metal ions 147(1989)353

Maltol

Thermal studies on organomercury(II) complexes of kojik acid and maltol 133(1988)371

Mammalian cell systems

Progress and problems in microcalorimetric work on mammalian cell systems 137(1988)1

Mandelohydroxamic acid

Solid complexes from mandelohydroxamic acid and several divalent metallic cations: a thermal and spectroscopic study 127(1988)285

Manganese

Investigation of the carburization of Fe/Mn-Fischer-Tropsch catalysts with a microbalance 103(1987)187

Thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel 114(1987)329

Manganese alkoxide

Thermal synthesis of hausmannite via manganese alkoxide 133(1988)93

Manganese bromide

The study of thermal dehydration and hydrolysis of $MgBr_2.6HOH$ by DTA and TG 133(1988)263

Manganese complexes

γ-irradiation effects on the electrical conductivity of some two-dimensional complexes: $RMnCl_4$, $RCoCl_4$ and $RMn_{0.5}Co_{0.5}Cl_4$ ($R = H_3N-(CH_2)_8-NH_3$) 146(1989)87

Manganese compounds

Thermal effect on formation and conduction mechanism of $MnFe_2O_4$ 105(1986)1

Manganese dioxide

DSC studies on the kinetics of decomposition of manganese dioxide 123(1988)61

Kinetic model for the carbothermic reduction of manganese dioxide 125(1988)99

The effect of catalysts during the carbothermic reduction of manganese dioxide 125(1988)107

Manganese(II)

Kinetic–thermometric study of hydrogen peroxide decomposition in basic media catalyzed by Mn(II). Influence of several organic ligands 125(1988)319

Manganese(II)-magnesium(II) tetrametaphosphates

Study of thermal preparation and stability of binary $Mn^{II}-Mg^{II}$ tetrametaphosphates by means of DTA 143(1989)131

Manganese(II) bis(oxalato)manganate(II) tetrahydrate

Thermal decomposition of manganese(II) bis (oxalato)manganate(II) tetrahydrate 145(1989)77

Manganese(II) complexes

The stability and thermodynamic functions of 4-amino-1,6-dihydro-1-methyl-2-methylthio-5-nitroso-6-oxo-pyrimidine complexes with Mn(II), Fe(II), Co(II), Ni(II) and Cu(II) 108(1986)181

Alizarine red S complexes of Mn(II), Co(II) and Ni(II) 113(1987)209

Thermal behavior of cobalt(II) and manganese(II) complexes of 1-(2′-hydroxybenzyl)-2-(2′-hydroxyphenyl)-benzimidazole 117(1987)385

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Manganese(II) compounds

Thermal studies on pyridine-2,3-dicarboxylic acid compounds of manganese(II), iron(II), cobalt(II) and nickel(II) 116(1987)275

Thermal and electrical studies on pyrazine-2,3-dicarboxylic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 124 (1988)345

Standard enthalpies of formation of bis(fluoro-substituted pentane-2,4-dionato) hydrates of Mn(II), Co(II) and Ni(II): the mean (M–O) bond dissociation enthalpies 139(1989)33

Thermal studies on maleic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 143(1989)283

Manganese(II) diphenylcarbazonate complexes

Thermal and spectroscopic characterization of Mn(II), Fe(II) and Fe(III) diphenylcarbazonate complexes 145(1989)281

Manganese(II) sulphate tetrahydrate

Dehydration of crystalline $MnSO_4 \cdot 4H_2O$ 113 (1987)95

Manganese oxides

Thermal solid–solid interaction between sodium and manganese oxides 101(1986)195

Thermal solid–solid interaction between potassium and manganese oxides 102(1986)21

Mn, Co oxides prepared by the thermal decomposition of carbonates 133(1988)257

Manganese reduction

The reduction of manganese nodules by hydrogen 144(1989)313

Manganese sulphite trihydrate

Order–disorder phase transitions in β-$MnSO_3 \cdot 3H_2O$-type hydrates: isotopic effects—vibrational, X-ray, thermoanalytical and permittivity measurements 150(1989)141

Manganic oxide

Thermal evolution of the lithiation product of Mn_3O_4 146(1989)365

Manganite

Atmosphere dependence of the thermal decomposition of manganite, γ-MnO.OH 135 (1988)273

Manganosite

The effect of gangue components on the reduction of manganosite by graphite: an isothermal kinetic study 112(1987)365

Mangelsdorf method of analysis

Isothermal calorimetric measurement of polymer cure kinetics: the mangelsdorf method of analysis 112(1987)289

Marine clay

Influence of freezing-unfreezing cycles on the thermal behaviour of a marine clay 135(1988)313

Marine ferromanganese concretions

Characteristics of marine ferromanganese concretions at elevated temperature 145(1989)33

Marl rocks

Mineralogical changes upon heating calcitic and dolomitic marl rocks 135(1988)243

Martensitic transformation

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reproducibility of the thermal energy results and cycling effects 106(1986)209

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Optical microscopy and simultaneous thermosonimetry of a microplate 113(1987)171

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reversibility versus irreversibility via acoustic emission 116(1987)195

Thermally induced martensitic transformations: theoretical analysis of a complete calorimetric run 121(1987)397

Kinetics of martensitic transformation in CuAlNi-43# alloy 123(1988)9

γ precipitates in β-Cu–Zn–Al: influence on martensitic transformations 145(1989)237

Martin equation

Saturated vapour–liquid equilibria calculation with modified martin equation of state 111 (1987)311

Use of modified Martin equation for unsaturated vapour and liquid states 118(1987)17

Mass changes

The longitudinally oscillating ribbon as a sensor for mass changes in controlled atmospheres 112 (1987)67

Mass determination

Influence of thermal noise on the accuracy of mass determination according to the Straubel method 103(1987)33

Mass spectrometer

Software for a mass spectrometer–thermobalance system 102(1986)115

Mass spectrometry

Mass spectrometric determination of the heats of formation of $POFBr_2$ and POF_2Br 103(1986)401

Comparison of various green coffees by thermogravimetric analysis/atmospheric pressure chemical ionization mass spectrometry (TGA/APCIMS). Part 2 104(1986)85

Mass spectra of vapors over Tl_3AsS_4 111(1987) 127

Interpretation of TG curves with help of high resolution mass spectrometry 114(1987)29

Materials science

Differential thermal analysis under high-pressure gas atmospheres: applications to materials science and engineering. A review 121(1987)21

Mathematical analysis

Mathematical analysis of the effects of surface heterogeneity in chemisorption: a new/old model 148(1989)173

Mathematical considerations

On the kinetic parameters from non-isothermal data: mathematical considerations 114(1987)201

Mathematical laws

Mathematical laws for the steady state and cooling in a metallic bar 143(1989)211

Mathematical modelling

Thermokinetic mathematical model of the reaction zone of an oscillating thermal decomposition reaction 102(1986)29

Theory of emanation thermal analysis. VI. Mathematical model of inert gas release from a two-phase solid–fluid system under its interface and diffusivity changes due to a chemical reaction 121(1987)241

Mathematical modelling of industrial reactions using thermoanalytical methods 134(1988)441

Mathematical models of the kinetics of dynamic thermogravimetry 145(1989)165

Mathematical theory

Some problems concerning the mathematical theory of non-isothermal kinetics. II. Primary isothermal differential kinetic equations (PIDKEs) 118(1987)65

Transient technique for determining simultaneously the thermal parameters as a function of temperature. A mathematical treatment 120(1987)19

Some problems concerning the mathematical theory of non-isothermal kinetics. III. The classical non-isothermal change of some equations derived from the rate equation $d\alpha/dt = f(\alpha)k(T)h(\alpha, T)$ accepted as postulated primary isothermal differential kinetic equation 125(1988)261

Measuring conditions

The study of coal by thermal analysis. The effect of measuring conditions on thermal analysis results 148(1989)541

Meats

Calorimetric measurements on inhibitory effects of garlic on some meats 116(1987)363

Mechanical properties

The effect of temperature dependent factors upon the mechanical and surface properties of solids (1988 ICTA-DuPont Award Lecture) [abstract] 135(1988)2

The effect of temperature dependent factors upon the mechanical and surface properties of solids (1988 ICTA-DuPont Award Lecture) 148(1989) 63

Mechanism

Solid state kinetic parameters and mechanism for the deaquation–anation of hexacyanocobaltate(III) of aquopentaamminecobalt(III), rhodium(III) and iridium(III), calculated by isothermal DSC measurements 102(1986)137

A mechanistic investigation of the reaction between copper(II) malonate and copper(II) bromide 102(1986)323

Solid state mechanism of the thermal dehydration of $[Rh(NH_3)_5(H_2O)]X_3$ ($X = Cl^-, Br^-, I^-$) 103(1986)353

Mechanism of zinc sulphide oxidation 106(1986)9

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part II. Products and mechanism of the reaction 107 (1986)17

An approach with use of EGA to the mechanism of sulfur release during coal combustion 114 (1987)171

The determination of the most probable mechanism function and three kinetic parameters of exothermic decomposition reaction of energetic materials by a single non-isothermal DSC curve 123(1988)135

Chemistry and mechanism of thermal degradation reactions of zirconium(IV) alkyl xanthate complexes 127(1988)193

Kinetics and mechanism of the thermal cracking of *n*-heptane 127(1988)247

A reply concerning the Reich and Stivala computer algorithm to determine mechanism 131(1988)297

Thermal decomposition kinetics—Part XV. Kinetics and mechanism of thermal decomposition of tetrammine copper(II) sulphate monohydrate 144(1989)33

Kinetics and reaction mechanisms for formation and decomposition of $Ba_2YCu_3O_x$ 145(1989)149

Thermal decomposition kinetics. Part XVI. Kinetics and mechanism of thermal decomposition of diaquobis(ethylenediamine) copper(II) oxalate 150(1989)63

Mechanisms

Basic program to discriminate among mechanisms of heterogeneous solid–gas decomposition 149(1989)239

Mechanistic modeling

Mechanistic modeling of the pyrolysis of *n*-heptane 127(1988)259

Mechanochemical transformations

The effect of grinding on porosity and mechanochemical transformations in Al_2O_3 powders 148(1989)301

Mechanochemistry

Mechanochemistry of inorganic solids 110(1987) 303

Melamine

The thermal, spectral and magnetic studies of chloro and bromo compounds of cobalt(II), nickel(II) and copper(II) with melamine 115 (1987)21

Kinetics of the curing process of alkyd–melamine resin systems 149(1989)341

Melting

Melting behaviour of oriented isotactic polypropylene 117(1987)97

The melting behaviour of irradiated polymers 117(1987)365

Thermal analysis of polymer samples by a round robin method. I. Reproducibility of melting, crystallization and glass transition temperatures 136(1988)163

Interpretation of DSC curves of the indium melting process and determination of the thermal resistance R, thermal time constant RC_s and least separation temperature L 137(1988)307

Thermodynamic study of the phase transitions of the mesogens and the homologous trends of their melting entropies 139(1989)83

Melting point

Curie temperature standards for thermogravimetry: the effect of magnetic field strength and comparison with melting point standards using Ni and Pb 109(1986)193

Investigation of the thermal stability of nitroguanidine below its melting point 146 (1989)115

Phase changes in acetamide–salt systems: melting points and latent heat of fusion of pure acetamide and acetamide–ammonium chloride 146(1989) 353

Membranes

Investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A 119(1987)127

Mepirizol complexes

Thermal study of mepirizol complexes with Co(II), Ni(II), Cu(II) and Zn(II) 106(1986)155

2-Mercaptophenyl-4-benzamidothiosemicarbazide

Thermodynamic studies of some complexes of 2-mercaptophenyl-4-benzamidothiosemicarbazide 136(1988)315

2-Mercaptopyridine

Thermodynamic properties of the dissociation of 2-mercaptopyridine, 2-mercaptopyrimidine and 2-thiobarbituric acid 127(1988)81

2-Mercaptopyrimidine

Thermodynamic properties of the dissociation of 2-mercaptopyridine, 2-mercaptopyrimidine and 2-thiobarbituric acid 127(1988)81

Mercapto triazoles

Synthesis and physico-chemical studies on neodymium(III) and samarium(III) derivatives with mercapto triazoles 133(1988)359

Mercury

Thermochemical study of adducts of urea with zinc, cadmium and mercury: some correlations for urea derivatives 125(1988)295

Contribution to the study of the mercury–indium binary system as a function of pressure. Determination of the isobaric expansion coefficient of Hg + In alloys between 1 and 300 bar (in French) 126(1988)117

Mercury determination

A comparative study of a kinetic–thermometric method and the atomic absorption cold vapour technique for determination of mercury traces and ultratraces 128(1988)21

Mercury(I) complexes

Thermal studies on purine complexes. XI. Thermal behaviour of 2-thioxanthine, its chlorohydrate and some thioxanthine complexes of Ag(I), Cd(II), Hg(II) and Hg(I) 102(1986)149

Mercury(II) complexes

Thermal studies on purine complexes. XI. Thermal behaviour of 2-thioxanthine, its chlorohydrate and some thioxanthine complexes of Ag(I), Cd(II), Hg(II) and Hg(I) 102(1986)149

Thermal studies on organomercury(II) complexes of isoniazid 116(1987)357

Mercury(II) ethyl-α-katocyclopentylcarboxylates

Synthesis and characterization of two derivatives of ethyl-α-ketocyclopentylcarboxylate with mercury(II) 146(1989)279

Mercury iodide

The phase diagrams of mixtures of CuI with ZnI_2, CdI_2 and HgI_2 143(1989)115

Mesogens

Thermodynamic study of the phase transitions of the mesogens and the homologous trends of their melting entropies 139(1989)83

Mesomorphic changes

Thermotropic mesomorphic changes in racemic and meso lead(II) 9,10-dihydroxyoctadecanoates 122(1987)355

Metabolism

Direct and indirect calorimetry of the resting metabolism of Japanese quail (Coturnix coturnix japonica) 119(1987)157

A thermokinetic study of bacterial metabolism 142(1989)211

Metachromic dye

Calorimetric investigation of adsorption of an aqueous metachromic dye (crystal-violet) on montmorillonite 121(1987)373

Metakaolinites

Enthalpy of dissolution of different kaolinites and metakaolinites in hydrofluoric acid. Influence of crystallochemical characteristics (in French) 122(1987)79

Metal carboxylato complexes

Thermal decomposition reactions of metal carboxylato complexes in the solid state. I. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 109(1987)331

Metal complexes

Correlation of thermal stability with structures for some metal complexes 120(1987)107

Thermodynamic stabilities of metal complexes of the biologically active complexing agent, 2-acetylpyridine semicarbazone (2-APS) 126(1988)7

Metal hydrides

Kinetic studies by thermogravimetry: the role of heat transfer of sample mass and of sample holder design on metal hydride kinetic results 103(1987)51

Metal(II) complexes

Solid complexes from mandelohydroxamic acid and several divalent metallic cations: a thermal and spectroscopic study 127(1988)285

Metal ion complexes

Critical comparison of thermal properties of some divalent metal ion complexes with alanine, leucine and valine 113(1987)243

Stability and thermodynamics of binary complexes of divalent metal ions with *p*-nitrobenzaldehydesemicarbazone 116(1987)373

Structure, thermal behaviour and solid state kinetics, of bis-(5-sulphosalicylato)-diaquo metal chelates of bivalent metal ions 127(1988)37

The interaction of piroxicam with some metal ions in aqueous solution 143(1989)239

Metallic bars

Mathematical laws for the steady state and cooling in a metallic bar 143(1989)211

Metallic divalent cations

Thiophenehydroxamic acid (tha) and its solid complexes with several metallic divalent cations: a spectroscopic and thermal study 141(1989)253

Metallic glasses

Role of thermal annealing during processing of metallic glasses 110(1987)427

Metallochromic indicators

A thermometric titration study of the interaction of Co^{2+} with metallochromic indicators 122 (1987)163

Metallurgy

Application of thermal analysis to irreversible processes in the field of metallurgy 133(1988)311

Metal salicylates

Solid state decomposition studies on metal salicylates. Thermal decomposition of dysprosium salicylato complexes 116(1987)257

Solid state decomposition studies on metal salicylates. Thermal decomposition of the 5-substituted dysprosium and erbium salicylato complexes 117(1987)79

Metal sulphides

Molten potassium pyrosulfate: reactions of seven metal sulfides 140(1989)337

Metastability

Effect of water vapour on the thermal evolution of the metastable phases of zirconium dioxide 126(1988)33

Differential scanning calorimetry as a tool for evaluating preparation techniques, and detecting impurities, metastable states, etc. in silver mercury iodide (Ag_2HgI_4) 131(1988)191

The metastability of glucosyl ceramide in aqueous phase: effect of hydration and phosphatidylcholines of various chain length 148(1989)355

Metathesis catalysts

Rhenium oxide-containing metathesis catalysts: a study of temperature programmed reduction and thermal analysis 105(1986)135

Metavivianite

The thermochemistry of some iron phosphate minerals: vivianite, metavivianite, baraćite, ludlamite and vivianite/metavivianite admixtures 104(1986)1

Methacrylates

Effect of the side chain structure on the glass transition temperature. 2. Poly(*o*-alkylphenyl methacrylate)s 114(1987)319

Methacrylic derivates

Kinetics of methacrylic derivates bulk polymerization by DTA. Study of the influence of the monomer side group 124(1988)263

Methacrylic monomers

Optimization of the photocuring of a ternary mixture of methacrylic monomers using DSC 148(1989)387

Methanation

Temperature programmed desorption investigation of some nickel/alumina catalysts for carbon monoxide methanation 133(1988)137

Methanol

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. I. Description and discussion of experimental procedures 103(1986)275

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. II. Experimental results and their analytical presentation 103(1986)281

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. III. The influence of pressure on the excess enthalpy 103(1986)291

Liquid–liquid equilibria for the acetonitrile + methanol + saturated hydrocarbon and acetonitrile + 1-butanol + saturated hydrocarbon systems 114(1987)227

The thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics 114 (1987)245

Thermodynamic characterization of the water + methanol system, at 298.15K 142(1989)219

Enthalpies of solution of some nitrates in aqueous methanol solutions at 298.15 K 150(1989)121

Interactions in electrolyte solutions in glycerol–water and glycerol–methanol mixtures from the heat of solution enthalpy 150(1989)177

Methemoglobin

Thermophysical properties of protein crystals: thermal diffusivity measurements of methemoglobin single crystals using a dielectric heating technique 141(1989)235

Methods of measurement

Trends in the methods of measurement of thermophysical properties in the solid state 110 (1987)209

4-Methoxybenzaldehyde-4-phenyl-3-thiosemicarbazone

Thermal behaviour of transition metal complexes of 4-methoxybenzaldehyde-4-phenyl-3-thiosemicarbazone 115(1987)297

2-Methoxyethanol

Thermochemical properties of NaI solutions in water–2-methoxyethanol and water–2-ethoxyethanol mixtures. The temperature dependence of enthalpic pair interaction coefficients in water solution 122(1987)377

Methoxyethanol

Excess properties of mixtures of some n-alkoxyethanols with organic solvents. IV. H^E, V^E and C_p^E with 2-methoxyethanol at 298.15 K 137(1988)241—246

***N*-Methyl-1,2-ethanediamine complexes**

Thermal phase transition and decomposition of *N*-methyl-1,2-ethanediamine complexes of nickel(II) in the solid state 136(1988)191

***N*-Methyl-1,3-propanediamine complexes**

Thermally induced isomerization and decomposition of *N*-methyl-1,3-propanediamine complexes of nickel(II) in the solid state 124 (1988)297

3-Methyl-1-butene

A low-temperature DTA apparatus for temperatures down to 15 K and thermal anomalies in 3-methyl-1-butene and THF hydrate 121(1987)323

3-Methyl-5-hydroxy-1,4-naphthalenedione

Equilibrium analysis of La(III)– and Pr(III)–3-methyl-5-hydroxy-1,4-naphthalenedione systems 115(1987)385

2-Methyl-1-propanol

Thermodynamics of solutions of acetonitrile with 2-methyl-1-propanol 140(1989)109

Methyl acetate

Volumes of mixing and viscosities of methyl acetate + *n*-alkanes and *n*-butyl acetate + *n*-alkanes at 298.15 K: an interpretation in terms of the Van–Patterson, the absolute rate and free volume theories 129(1988)249

Excess thermodynamic properties of the *n*-pentane + methyl acetate system at 298.15 K 130(1988)249

***N*-Methylbenzenesulfonamide**

Thermodynamic properties of binary mixtures containing sulfur amide. Part 4. Excess molar volumes of *N*-methylbenzenesulfonamide + various solvents 132(1988)235

Methylcyclohexane

Isothermal vapour–liquid equilibria for binary mixtures of methylcyclohexane with alcohols 144(1989)95

Methyldiethanolamine

Enthalpies of absorption of carbon dioxide in aqueous methyldiethanolamine solutions 121 (1987)437

Methylene bromide

Topological studies of the molecular species that characterize lower alkanol + methylene bromide mixtures: molar excess volumes and molar excess enthalpies 106(1986)293

Methyl ethanoate

Liquid–liquid equilibria of (acetonitrile + methyl ethanoate + cyclohexane) and of (acetonitrile + cyclohexane + methyl ethanoate + benzene) 101 (1986)205

Methylhydrazine complexes

Thermal analysis of some methylhydrazine and methylhydrazinium complexes of copper(II), copper(I) and mixed valence species 130(1988)43

Methylhydrazinium complexes

Thermal analysis of some methylhydrazine and methylhydrazinium complexes of copper(II), copper(I) and mixed valence species 130(1988)43

Methyl imidazole

Study of some solvated copper(II) adipates. II. Complexes with imidazole and its methyl derivatives (in French) 125(1988)35

Methylisobutyl ketone

Excess molar volumes of trichloroethylene with cyclohexanone, methylisobutylketone, and 1,4-dioxane at 308.15 and 318.15 K 107(1986)383

Methylmaleanilic acid

Thermochemistry for the formation of methyl and chloro maleanilic acid complexes of bivalent transition metal ions 105(1986)231

Methyl methacrylate

Calorimetric study of the miscibility of poly(2,6-dimethyl-1,4-phenylene oxide) with styrene–methyl methacrylate copolymers 123 (1988)3

Polymerization of methyl methacrylate and ethyl methacrylate in different solvents studied by DSC 134(1988)217

Thermal characterization of methyl methacrylate–alkyl methacrylate copolymers 142(1989)189

Methyl methylthiomethyl sulfoxide

Thermodynamics of liquid mixtures containing methyl methylthiomethyl sulfoxide. V. Excess enthalpies of (deuterochloroform + methyl methylthiomethyl sulfoxide), (deuterochloroform + dimethyl sulfoxide) and (deuterochloroform + chloroform) at 298.15 K 123(1987)293

***N*-Methyl phenobarbiturates**

Cu(II) phenobarbiturates and *N*-methyl phenobarbiturates. Thermal decomposition processes 117(1987)135

N-Methylpyrrolidone

Thermodynamics of mixtures of *N*-methylpyrrolidone with hydrocarbons and their hydroxyl derivatives 108(1986)229

2-Methylquinoxaline

Thermal, structural and electrical studies of the chloro complexes of cobalt, nickel, copper and zinc with 2-methylquinoxaline 145(1989)291

Methyl silicone resin

Thermoanalytical investigations on curing and decomposition of methyl silicone resin 134 (1988)269

Micellar phases

Thermodynamics of transfer of some nitroalkanes from aqueous to dodecyltrimethylammonium bromide micellar phases 137(1988)151

Microbalance

A simple microbalance for investigating the reactions of solids with ammonia and freons at pressures up to 10 bars 103(1987)15

Microbalance application in the primary gravimetric hydrometer of the UK National Humidity Standard 103(1987)75

Experiments with a new symmetrical thermo microbalance to 1500°C 148(1989)507

Microcalorimeter

Design and testing of a microcalorimeter with semiconductor thermopiles as temperature sensor and study of the inclusion of Cu(II) with β-cyclodextrin 123(1988)85

Microcalorimetry

Application of microcalorimetry for analysing initial rates of enzymatic reactions 103(1986)297

Signal treatment in microcalorimetry: application to kinetics and thermodynamics (in French) 105 (1986)333

Recent progress in low temperature microcalorimetry 119(1987)35

Microcalorimetric studies in Mycotypha africana 119(1987)151

Microcalorimetric study of bacterial growth 123 (1988)33

True differential microcalorimetry study of the structure of bimetallic catalyst particles 133 (1988)149

Microcalorimetry: identification and automatic deconvolution with the aid of physical models (in French) 150(1989)11

Microdosimetry

The role of microdosimetry in heavy charged particle induced thermoluminescence dose response 135(1988)127

Microdynamics

Microdynamics of solid-state reactions 110 (1987)325

Microwaves

Use of low- and high-power microwave energy for thermal analysis 110(1987)289

On some thermodynamic and kinetic aspects of the dehydration of zeolite 13X in microwaves (in French) 115(1987)317

Microwave dielectric measurements during thermal analysis 125(1988)141

Microweight determination

New development in microweight determination by free magnetic suspension 103(1987)5

Mineral acids

A thermometric study on the oxidation of isopropyl alcohol in some mineral acids 109 (1986)367

Mineralogical analysis

The application of differential scanning calorimetry to mineralogical analysis 107(1986)51

Mineralogical changes

Mineralogical changes upon heating calcitic and dolomitic marl rocks 135(1988)243

Mineralogical studies

Calibration of differential scanning calorimetry units for mineralogical studies 104(1986)77

Mineralogy

Applications of thermal analysis to carbonate mineralogy 110(1987)501

Dehydration energy of halloysite by means of DSC methods with the relationships of its mineralogy and modes of occurence 135(1988)279

Mineral oils

Evaluation of 1-amino and 1-hydroxynaphthalenes as antioxidants for mineral oils by differential scanning calorimetery 108 (1986)91

Minerals

The thermochemistry of some iron phosphate minerals: vivianite, metavivianite, baraćite, ludlamite and vivianite/metavivianite admixtures 104(1986)1

Some applications of the decrepitation technique and thermosonimetry in research on minerals and building materials 110(1987)265

Thermal investigation of acid-activated clay minerals 119(1987)293

Differential scanning calorimetry of the dolomite–ankerite mineral series in flowing nitrogen 121(1987)39

Differential scanning calorimetry of the dolomite-ankerite mineral series in variable atmospheres 135(1988)225

X-ray studies on dehydration and rehydration of expansible clay minerals 135(1988)285

Thermal analysis of the adsorption of rhodamine 6G by smectite minerals 135(1988)299

The study of the influence of particle sizes on the thermal decomposition of minerals present in solid fuel 146(1989)63

Thermal analysis of minerals (Review) 148 (1989)421

Mineral wastes

Hydration versus strength in a portland cement developed from domestic mineral wastes — a comparative study 106(1986)93

Miscibility

Calorimetric study of the miscibility of poly(α-methyl styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 102(1986)281

Calorimetric study of the miscibility of poly(styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 105(1986)191

Calorimetric study of the miscibility of poly(2,6-dimethyl-1,4-phenylene oxide) with styrene–methyl methacrylate copolymers 123 (1988)3

Non-ideality near the monotectic composition of a miscibility-gap type system: succinonitrile–water 145(1989)301

Mishor rotem oil shale

Thermochemical reactions in subcritical and supercritical interaction between mishor rotem oil shale and toluene 105(1986)51

β-MITSC complexes

Determination of thermodynamic parameters and stability constants of the complexes of β-MITSC with transition metal ions 113(1987)7

Mixed-ligand complexes

Calorimetric determination of the heats of formation of competitive ternary mixed-ligand complex compounds. Copper(II)–*N*-acetylglycine–α-amino acid system 123(1988)201

Thermal stability of some novel mixed-ligand complexes of copper(II) 144(1989)369

Mixed metal hydroxides

Influence of temperature and humidity on ionic conduction of mixed metal hydroxides 133 (1988)87

Mixed oxides

Thermal effect on formation and conduction mechanism of $MnFe_2O_4$ 105(1986)1

On the thermal stability of some coordination compounds generating mixed oxides with perovskitic structure. III 111(1987)353

Studies on the reduction of iron/tungsten mixed oxides 112(1987)221

Reduction reactivity of $CuO–Cr_2O_3$ mixed oxides with hydrogen and the effect of gamma pre-irradiation 119(1987)261

Syntheses of mixed oxides of the system Te(VI)–Sb(V)–M(I) (M(I) = Ag, Tl, K, Rb, Cs) 124(1988)25

Thermal decomposition of $KClO_4$ catalyzed by MnO_2–CuO mixed oxides systems 126(1988)17

Mixed salt solutions

A composite description of mixed salt solutions 125(1988)347

A derivation of the cross-square rule in terms of a composite description of mixed salt solutions 125(1988)353

Mixed tripolyphosphates

Characterisation of the ammonium rare earth mixed tripolyphosphates $NH_4LnHP_3O_{10}$ (Ln = Nd, Ho, Er) (in French) 147(1989)241

Mixed tungstates

Thermal behaviour of mixed tungstates $ASc(WO_4)_2$ (A = Li, Na, K, Rb AND Cs) 144 (1989)151

Mixing

Unifac interaction parameters for excess enthalpies of mixing 111(1987)267

Volumes of mixing and viscosities of methyl acetate + *n*-alkanes and *n*-butyl acetate + *n*-alkanes at 298.15 K: an interpretation in terms of the Van–Patterson, the absolute rate and free volume theories 129(1988)249

Excess Gibbs energy of mixing and refractive index of binary solutions of acetonitrile and of dimethylsulfoxide with several aromatic hydrocarbons 138(1989)19

Enthalpies of mixing of the ternary system bismuth–antimony–tellurium at 981 K (in French) 149(1989)33

Modelling

Modelling of processes in calorimetry by taking into account heat transfer and reaction 121 (1987)381

Moisture

TG/MS interface: applications to the determination of moisture in polysaccharides and freeze-dried biological products 115(1987)289

Determination of moisture in food flours. A comparative thermogravimetric and NMR study, part 2 120(1987)81

Automated moisture evolution analysis (MEA) 134(1988)407

Thermogravimetric analysis of some spices and commercial food products. Comparison with other analytical methods for moisture content determination (Part 3) 143(1989)15

Molal compressibility

Apparent molal volume, apparent molal compressibility, verification of Jones–Dole equation and thermodynamic studies of aqueous urea and its derivatives at 25, 30, 35 and 40 °C 117(1987)245

Molal volume

Apparent molal volume, apparent molal compressibility, verification of Jones–Dole equation and thermodynamic studies of aqueous urea and its derivatives at 25, 30, 35 and 40 °C 117(1987)245

Molecular complexes

Contents of molecular complexes in gas phase at higher pressures: a case study of $(H_2O)_2$(g) 106 (1986)323

Molecular crystals

High-pressure differential scanning calorimetry (DSC) investigations at low temperatures: solid–solid and solid–liquid phase transformations of some molecular crystals up to 1750 bar 109(1986)111

Molecular interactions

Thermodynamic study of molecular interactions in ternary liquid systems 118(1987)277

Molecular mixtures

Enthalpic study of solutions and molecular mixtures: standardisation of instruments during microcalorimetric measurements (in French) 116(1987)21

Molecular orbitals

Spontaneous isothermal decomposition of the uranyl carbonate complex $(NH_4)_4[UO_2(CO_3)_3]$ at room temperature. Part III. Mechanism of the decomposition. Stability of the uranyl molecular orbitals 122(1987)277

Total resonant sextet benzenoid hydrocarbon isomers and their molecular orbital and thermodynamic characteristics 122(1987)313

Molecular weight

Glass-transition temperatures of PVME-PS blends. Influence of the molecular weight of PS 114(1987)165

Thermal analysis and molecular weight dependence on glass transition of poly-(ditrimethylene terephthalate) 134(1988)195

Correlation between polystyrene molecular weights and a characteristic temperature derived from the thermogravimetric weight loss curves 142(1989)83

Molybdate

Thermochemical investigation of solid state reactions in molybdate/tungstate system 133 (1988)191

Molybdenum

Differential thermal analysis investigation of the $Gd_2(MoO_4)_3$–$Bi_2(MoO_4)_3$ system (in French) 112(1987)245

Thermal degradation of transition metal carbonyl complexes. Part III. Thermogravimetric and differential scanning calorimetric studies of triphenylphosphine pentacarbonyls of chromium, molybdenum and tungsten 128(1988)175

Thermal stability of polymer-supported boronic acids functionalized with molybdenum derivatives 137(1988)71

Molybdenum compounds

The thermal decomposition of $K_6[Mo_2I_2O_{16}] \cdot 8H_2O$ 107(1986)393

Molybdenum(0) dinitrogen complexes

Thermal reactions of metal complexes under quasi-isothermal and quasi-isobaric conditions. 5. Thermal behaviour of molybdenum(0) dinitrogen complexes in the solid state 138 (1989)161

Molybdenum disulphide

Chemical reactions between molybdenum disulfide and sodium chloride in a stream of oxygen in the temperature range 470–900 K 124(1988)163

Molybdenum(IV) compounds

Thermal studies on molybdenum(IV) dialkyl dithiocarbamate adducts with pyridine 108 (1986)1

Molybdenum oxide

Studies on the $Fe_2V_4O_{13}$–MoO_3 system 127 (1988)363

Reactivity of MoO_3 towards $Cr_2 2V_4O_{13}$ 133 (1988)67

Molybdenum oxides

Effect of the different structural distortions of MoO_3 and the homologous $Mo_{18}O_{52}$ upon the thermodynamics of Li^+ insertion 121(1987)203

Molybdenum sulphide

Temperature-programmed reaction and desorption studies of unsupported MoS_2-based hydrotreating catalysts 133(1988)143

Molybdenum trioxide

A study of the reduction of molybdenum trioxide on a carbon support using thermogravimetry/ mass spectrometry 127(1988)1

Kinetics of solid state reaction between $CaCO_3$ and MoO_3 144(1989)363

The $CrVO_4$–MoO_3 system 150(1989)125

Molybdenum(VI)

Reactions of single Cr(III)–P(V)Mo(VI) and double Cr(VI)–P(V)Mo(VI) phase systems in molten KNO_3 132(1988)155

Thermometric study of the bromate–iodide reaction catalysed by Mo(VI) 142(1989)107

Molybdenum(V) thioglycolate 2-hydrate

Thermal decomposition of molybdenum(V) thioglycolate 2-hydrate 146(1989)95

12-Molybdophosphoric acid

Gas chromatographic studies of the thermal decomposition of 12-molybdophosphoric acid and its salts in the solid state 111(1987)325

Monazite

DTA study of the rhabdophane to monazite transformation in rare earth (La–Dy) phosphates 108(1986)65

Mono-2-alkoxyethyl itaconates

Non-classical free-radical polymerization. Part 2. The polymerization of mono-2-methoxyethyl and mono-2-ethoxyethyl itaconate 142(1989)317

Mono-2-phenoxyethyl itaconate

Non-classical free-radical polymerization. Part 1. The polymerization of mono-2-phenoxyethyl and mono-2-phenylethyl itaconates 132(1988)193

Mono-2-phenylethyl itaconate

Non-classical free-radical polymerization. Part 1. The polymerization of mono-2-phenoxyethyl and mono-2-phenylethyl itaconates 132(1988)193

Mono-butylurea

Sublimation enthalpy of mono-butylurea 112 (1987)387

Mono alkyl itaconates

Kinetics of mono alkyl itaconates bulk polymerization by DTA 124(1988)247

Monobromomalonic acid

Reaction kinetics at linearly increased temperature. V. DTA and UV study of the oxidation of malonic, tartronic, glyoxylic and monobromomalonic acids by ceric sulphate in dilute sulphuric acid 101(1986)245

Monochlorobenzoylhydrazones

Thermoanalytical studies on antimony(III) complexes with monochlorobenzoylhydrazones of 2-furaldehyde (FpClBHH), 2-pyrroaldehyde (PmClBHH) and 2-thiophenaldehyde (TpClBHH) as ligands 133(1988)329

Monohalogen benzoylhydrazine nickel(II) complexes

Spectral and thermal studies of monohalogen benzoylhydrazine Ni(II) complexes 142(1989)301

Monolayers

Ethylmorphine–lipid interaction study by calorimetry and monolayer techniques 130 (1988)221

Monophenylurea

Enthalpies of sublimation and fusion of monophenylurea and diphenyl-1,3 urea 122 (1987)189

Monotectic composition

Non-ideality near the monotectic composition of a miscibility-gap type system: succinonitrile–water 145(1989)301

Monovalent ions

Single ion free energies of some monovalent ions in mixed dimethylacetamide–water solutions using the asymmetric Ph_4AsBPh_4 assumption 147(1989)313

Montmorillonite

The study of some normal and abnormal montmorillonites by thermal analysis and infrared spectroscopy 117(1987)25

Calorimetric investigation of adsorption of an aqueous metachromic dye (crystal-violet) on montmorillonite 121(1987)373

Thermal analysis of AlOH polymer/montmorillonite/humic acid complexes 135(1988)307

Thermal analytic study of the adsorption of crystal violet by montmorillonite 148(1989)457

Mordenites

Desorption of presorbed ammonia, triethylamine and pyridine from the acid sites of mordenites via differential scanning calorimetry 132(1988) 257

Morpholine

Thermogravimetric and infrared studies of tetrameric zirconium(IV) compounds derived from oxozirconium(IV) chloride and imidazole, morpholine and their derivatives 109(1987)303

Morphology

Activated carbons from materials of varying morphological structure 129(1988)173

Mössbauer spectroscopy

Mössbauer study of the thermal decomposition of potassium tris(malonato)ferrate(III) trihydrate 101(1986)35

Thermal and Mössbauer studies of iron-containing hydrous silicates. VII. Glauconite 136(1988)247

Moulding sands

Application of DTA in the investigation of moulding sands 135(1988)341

Moving boat technique

The moving boat technique and practical studies on the decomposition of carbonates. Part 1. comparative assessment of the decomposition rates of limestone and dolomite samples 101 (1986)119

The moving boat technique and practical studies on the decomposition of carbonates. Part 2. Analysis and prediction of α–t plots generated under a nonlinear temperature programme 101 (1986)131

Mullite

Induced conversion of aluminium silicate fibers into mullite and cristobalite by elevated temperatures: a comparative study on two commercial products 120(1987)1

Multicell microcalorimeter

Construction of a multicell microcalorimeter 108(1986)79

Multiple bonding

The relative strengths of ionic, covalent and multiple-bonding in diatomic molecules 109 (1986)165

Mycotypha africana

Microcalorimetric studies in Mycotypha africana 119(1987)151

Myosin

The interaction of linoleic acid with myosin and its subfragments: a microcalorimetric study 130 (1988)165

The interaction of malonaldehyde with myosin and its subfragments: a microcalorimetric study 136(1988)287

N

***N*-dodecylbetaine**

Interfacial properties of zwitterionic surfactants: *N*-dodecylbetaine 122(1987)171

***N*-methylmethanesulphinamide**

Thermodynamic properties of binary mixtures containing sulfur amide. 1. Excess molar volumes of carbon tetrachloride + *N*,*N*-dimethylmethanesulfinamide and + *N*-methylmethanesulfinamide 104(1986)153

***N*,*N*-bis[2-(dimethylamino)ethyl]methylamine**

Thermal reaction of five-coordinated nickel(II) complexes containing *N*,*N*-bis[2-(dimethylamino)ethyl]methylamine in the solid state 105(1986)127

N,N-dimethylmethanesulphinamide

Thermodynamic properties of binary mixtures containing sulfur amide. 1. Excess molar volumes of carbon tetrachloride + *N,N*-dimethylmethanesulfinamide and + *N*-methylmethanesulfinamide 104(1986)153

Nagyagite

The thermal decomposition of nagyagite 128 (1988)311

Naphthalene

Thermodynamics of solution of naphthalene in various tetramethylurea–water mixtures 105 (1986)71

Evaluation of 1-amino and 1-hydroxynaphthalenes as antioxidants for mineral oils by differential scanning calorimetery 108 (1986)91

Precursor states for the graphitization of naphthalene, anthracene, phenanthrene and chrysene 108(1986)211

Naphthalenedionesemicarbazones

Complexing behaviour of 2-hydroxy-3-(-3-methyl-2-butenyl)-1,4-naphthalenedionesemicarbazone 104(1986)383

Naphthylacetic acid (NAA)

Equilibrium analysis of Nd(III)–NAA, Pr(III)–NAA and Ce(III)–NAA systems 144 (1989)173

Natrolite

The thermal behavior of K-exchanged forms of natrolite 109(1986)237

Neodymium

Synthesis and physico-chemical studies on neodymium(III) and samarium(III) derivatives with mercapto triazoles 133(1988)359

Iron–neodymium (Fe–Nd) phase diagram (in French) 147(1989)205

Neodymium complexes

Thermal decomposition of the complexes $[Co(NH_3)_6][Nd(SO_4)_3] \cdot nH_2O$ 102(1986)373

Neodymium compounds

Solution studies on tris(2-hydroxy-3-(3-methyl-2-butenyl)-1,4-naphthalenedione semicarbazonato) M^{3+} (M = praseodymium or neodymium) 116(1987)377

PH-metric studies on tris(*p*-chlorobenzaldehyde-thiosemicarbazonato)M(III) (M = Pr, Nd) 120 (1987)357

Kinetic and x-ray powder diffraction studies on hydrated tris(indole-3-acetato)M(III) (M = Ce, Pr, Nd) 126(1988)393

Neodymium(III) compounds

Equilibrium analysis of Nd(III)–NAA, Pr(III)–NAA and Ce(III)–NAA systems 144 (1989)173

Neodymium nitrate

The thermal decomposition of neodymium nitrate 104(1986)293

Neopentylglycol

Crystalline solid to plastic crystal transitions in pentaglycerine–neopentylglycol mixtures 118 (1987)287

Pentaglycerine-neopentylglycol mixtures: formation of a solid solution (in French) 136 (1988)55

Niccolite

Investigation of the oxidation of niccolite by thermal analysis 112(1987)197

Nickel

Thermal decomposition of 8-hydroxyquinoline complexes with aluminium, cobalt, manganese and nickel 114(1987)329

Kinetics of martensitic transformation in CuAlNi-43# alloy 123(1988)9

Calorimetric determination of the enthalpies of formation of liquid Ni–Ti alloys 131(1988)171

Temperature programmed desorption investigation of some nickel/alumina catalysts for carbon monoxide methanation 133(1988)137

Influence of heat treatment on the electrochemical behaviour of nickel 136(1988)19

A third law of thermodynamics analysis of the enthalpy change of the order–disorder transformation in Ni_3Fe 139(1989)149

CO adsorbed on Ni(001): effects of the interplay of "on-top" and "bridge" adsorption complexes on heat capacity 140(1989)237

Studies on thermal decomposition reactions of cobalt, nickel and zinc thiocyanatobismuthates (III) 148(1989)319

Nickel amino acid complexes

The behaviour of some cobalt, nickel and copper amino acid complexes at different temperatures 128(1988)75

Nickel carbonate

Influence of the self-generated and controlled atmosphere on the thermal decomposition of basic nickel carbonate, $NiCO_3 \cdot 2Ni(OH)_2 \cdot 4H_2O$ 104(1986)101

Effects of Li_2O doping on thermal solid–solid interaction between ferric oxide and nickel carbonate 132(1988)117

Nickel complexes

Enthalpies of formation of M(pentanedionato)$_2$ complexes (M = Ni and Pd) 102(1986)109

Thermal, structural and electrical studies of the chloro complexes of cobalt, nickel, copper and zinc with 2-methylquinoxaline 145(1989)291

Nickel compounds

The reactions of some compounds of iron, cobalt and nickel with the molten lithium carbonate–sodium carbonate–potassium carbonate eutectic 132(1988)45

Nickel dithiophosphinate

Thermogravimetric studies on the addition compounds of cobalt and nickel dithiophosphinates with picolines and acetylpyridines 128(1988)301

Nickel hydrazido-carbonate

Thermal properties of hydrazido-carbonates of cobalt and nickel in an inert atmosphere 144 (1989)257

Nickel hydroxide

Thermoanalytical investigation of the $Ni(OH)_2$–NaOH system 107(1986)27

The thermal stability of the β-$Ni(OH)_2$–β-NiOOH system 137(1988)247

Investigation of the effects of heat treatment on the β-$Ni(OH)_2$–β-NiOOH system using IR spectroscopy 142(1989)143

Thermal behavior of oxides and hydroxides of iron and nickel 145(1989)1

Some additional results concerning the thermal behaviour of the β-$Ni(OH)_2$/β-NiOOH system 149(1989)357

Nickel(II)

Solid-state reactions of talc toward Ni(II) at high temperatures 117(1987)17

Solid-state reactions in the system TALC–$CaCO_3$ doped with Ni(II) at high temperatures 127 (1988)171

Thermal, spectral, magnetic and electrical studies of cobalt(II) and nickel(II) with 3-(3-pyridyl)acrylic acid 137(1988)205

Nickel(II) acetoacetanilidehydrazone complexes

Thermodynamic and spectrophotometric studies of acetoacetanilidehydrazone complexes of Cu(II), Ni(II) and Co(II) metal ions 128(1988)81

Nickel(II) complexes

Study of the thermal decomposition of bromazepan-thiocyanate complexes of Fe(II), Co(II), Ni(II) and Cu(II) 101(1986)83

Thermal decomposition kinetics of salicylidene-aminofluorene complexes of cobalt(II) and nickel(II) 101(1986)145

Thermodynamics of the complexation of Fe(II), Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) with 6,7-dihydro-3(h)-methyl-5-methylthio-7-oxo-vic-triazolo(4,5-*d*)pyrimidine 102(1986)47

Dissociation of 5-nitroso-2,4,6-triamino-pyrimidine and stability of its complexes with Co(II), Ni(II) and Cu(II) 102(1986)163

Thermal study of cobalt(II), copper(II) and nickel(II) complexes of cimetidine 104(1986)31

Thermal reaction of five-coordinated nickel(II) complexes containing *N*,*N*-bis[2-(dimethylamino)ethyl]methylamine in the solid state 105(1986)127

Thermal study of mepirizol complexes with Co(II), Ni(II), Cu(II) and Zn(II) 106(1986)155

Study of the thermal decomposition of cinoxacin complexes with Co(II), Ni(II) and Cu(II) 106 (1986)333

Phase transition and decomposition of A_2MX_4 [A = $(C_2H_5)_4N$; M = Co(II), Ni(II) and Cu(II); X = Cl and Br] in the solid state 108(1986)97

The stability and thermodynamic functions of 4-amino-1,6-dihydro-1-methyl-2-methylthio-5-nitroso-6-oxo-pyrimidine complexes with Mn(II), Fe(II), Co(II), Ni(II) and Cu(II) 108(1986)181

Spectral, magnetic and thermal investigations on Cu(II), Ni(II) and Co(II) complexes with 3-(*p*-dimethyl amino-anilino)-methyl salicylic acid hydrazide 111(1987)385

Alizarine red S complexes of Mn(II), Co(II) and Ni(II) 113(1987)209

Thermochemical properties of the chelate complexes of some 3*d*-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione Part II. Complexes of nickel(II), copper(II) and zinc(II) 119(1987)311

Thermally induced isomerization and decomposition of *N*-methyl-1,3-propanediamine complexes of nickel(II) in the solid state 124 (1988)297

On the formation of mononuclear and binuclear complexes of pentadentate N_4O_2 Schiff base ligands with Co(II), Ni(II) and Cu(II) ions: TGA, spectral and conductance studies 126(1988)235

Chemistry of dithiocarbamate derivatives of amino acids. Part IV. Thermal behaviour of nickel(II) complexes 127(1988)101

Thermal and spectral studies of some mixed ligand complexes of Co(II), Ni(II) and Cu(II) involving aliphatic and heterocyclic β-diketone 129(1988)161

Thermochromism in Ni(II) complexes with Schiff base derivatives of 4-aminoantipyrine 131(1988)1

Thermal phase transition and decomposition of *N*-methyl-1,2-ethanediamine complexes of nickel(II) in the solid state 136(1988)191

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part II. 138(1989)285

Thermal decomposition kinetics of polymeric complexes of nickel(II), zinc(II) and cadmium(II) with *N*,*N*′-bis(dithiocarboxy)piperazine 140 (1989)325

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part III 142(1989)89

Spectral and thermal studies of monohalogen benzoylhydrazine Ni(II) complexes 142(1989)301

Nickel(II) compounds

Thermal studies on pyridine-2,3-dicarboxylic acid compounds of manganese(II), iron(II), cobalt(II) and nickel(II) 116(1987)275

Thermal studies on acetylenedicarboxylic acid compounds of iron(II), cobalt(II), nickel(II), copper(II) and zinc(II) 117(1987)51

Thermal and electrical studies on pyrazine-2,3-dicarboxylic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 124 (1988)345

Standard enthalpies of formation of bis(fluoro-substituted pentane-2,4-dionato) hydrates of Mn(II), Co(II) and Ni(II): the mean (M–O) bond dissociation enthalpies 139(1989)33

Thermal studies on maleic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 143(1989)283

Nickel(II) coordination compounds

Thermal stability and nonisothermal decomposition kinetic study of some coordination compounds of $Ni^{(II)}$ and $Co^{(II)}$ 149(1989)189

Nickel(II) crotonates

Thermal studies on fumaric acid and crotonic acid compounds of cobalt(II) and nickel(II) 141 (1989)227

Nickel(II) diphenylcarbazonate complexes

Thermal and spectroscopic characterization of Co(III) and Ni(II) diphenylcarbazonate complexes 132(1988)265

Nickel(II) fumarates

Thermal studies on fumaric acid and crotonic acid compounds of cobalt(II) and nickel(II) 141 (1989)227

Nickel(II) halo compounds

The thermal, spectral and magnetic studies of chloro and bromo compounds of cobalt(II), nickel(II) and copper(II) with melamine 115 (1987)21

Nickel(II) nitrate

Investigation of the phase diagram for the system $Ni(NO_3)_2$–H_2O and examination of the decomposition of $Ni(NO_3)_2 \cdot 6H_2O$ 121(1987) 137

Nickel(II) *p*-toluenesulphonate

Thermal decomposition of Co(II), Ni(II), Cu(II), Zn(II), Cd(II) and Pb(II) *p*-toluenesulphonates 146(1989)341

Nickel molybdate precursors

The role of ammonium ions in the activation of nickel molybdate; Precursors 133(1988)163

Nickel nitrates

Degradation studies on nickel nitrate hexahydrate. Part 3. Raman and infrared analysis 101(1986)291

Nickelocene

Vapour pressures and enthalpies of sublimation of ferrocene, cobaltocene and nickelocene 124 (1988)179

Nickel oxalate

Thermal study of $NiC_2O_4 \cdot 2H_2O$ obtained by a solid state reaction at room temperature and normal pressure 118(1987)123

Nickel oxalates

The thermal decomposition of nickel oxalates doped with traces of other metal ions 147(1989) 251

Nickel oxide

Thermal characterization of the near-surface of polycrystalline metal oxides, NiO, CuO and MgO, by emanation thermal analysis using ^{226}Ra as parent isotope 137(1988)293

Thermal behavior of oxides and hydroxides of iron and nickel 145(1989)1

Nickel phosphorus trichalcogenides

Magnetic phase transitions in iron and nickel phosphorus trichalcogenides 139(1989)197

Nickel phthalocyanine

Phase behaviour of cobalt, nickel and zinc phthalocyanines 109(1987)397

Nickel sulphate hexahydrate

Thermal dehydration of crystalline $NiSO_4 \cdot 6H_2O$ 144(1989)83

Nickel tetracarbonyl

Experimental determination of thermodynamic data for nickel tetracarbonyl (in French) 125 (1988)327

Nickel tungstate

Thermogravimetric studies of the hydrogen reduction of nickel tungstate 103(1987)175

Nicotinamide

Study of the khellin I–nicotinic acid and khellin I–nicotinamide binary systems (in French) 121 (1987)283

Nicotinic acid

Study of the khellin I–nicotinic acid and khellin I–nicotinamide binary systems (in French) 121 (1987)283

Nicotinium dichromate

Vibrational and thermal behaviour of nicotinium dichromate 131(1988)273

Niobium

Curie temperature standards for thermogravimetry: the effect of magnetic field strength and comparison with melting point standards using Ni and Pb 109(1986)193

Niobium complexes

Kinetics of solid state decomposition of $K_3[Nb(O_2)_2F_4]$: TG study 138(1989)199

Niobium oxide

Derivatographic investigations of the systems $BaO–GeO_2$ and $BaO–Nb_2O_5$ 115(1987)37

Nitramines

Thermal decomposition of energetic materials. 23. Thermochemical differentiation of cyclic and acyclic nitramines by their phase transitions 116 (1987)125

Nitrates

Thermal analysis of mixtures of nitrates and lignocellulosic materials 107(1986)131

Transition metal nitrate complexes of 1,4,5-triazanaphthalene 108(1986)325

Molten $LiNO_2–NaNO_2$, $LiNO_2–KNO_2$, $LiNO_2–CsNO_2$, and $NaNO_2–KNO_2$ eutectics: the reaction of $PdCl_2$, K_2PdCl_4, $K_2Pd(NO_2)_4$, $PtCl_2$, K_2PtCl_4, $K_2Pt(NO_2)_4$, $PtCl_4$, and K_2PtCl_6 111(1987)283

Enthalpies of solution of some nitrates in aqueous methanol solutions at 298.15 K 150(1989)121

Nitric acid

Apparent molar heat capacities and volumes of aqueous $HClO_4$, HNO_3, $(CH_3)_4NOH$ and K_2SO_4 at 298.15 K 126(1988)245

Nitrile rubbers

Thermoanalytical studies of rubber oxidation: characterization of nitrile rubbers 113(1987)387

Nitroalkanes

Thermodynamics of transfer of some nitroalkanes from aqueous to dodecyltrimethylammonium bromide micellar phases 137(1988)151

***p*-Nitrobenzaldehydesemicarbazone**

Stability and thermodynamics of binary complexes of divalent metal ions with *p*-nitrobenzaldehydesemicarbazone 116(1987)373

Nitrobenzene

Electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives 114 (1987)265

Nitrocelluloses

Thermal decomposition of nitrocelluloses derived from wood and cotton: a non-isothermal thermogravimetric analysis 104(1986)321

Nitrogen

Quasi-equilibrium nitrogen adsorption gravimetry: comparison with volumetry for the determination of surface areas and pore size distributions 103(1987)89

Adsorption of nitrogen and water vapour onto goethite surfaces 114(1987)139

Study of AUC thermal decomposition kinetics in nitrogen by a non-isothermal method 116(1987) 71

Investigation of basic zinc sulfate thermal decomposition under nitrogen and carbon monoxide atmosphere 137(1988)281

Nitrogen bases

Calorimetric study of the reaction of bis(*N*-benzoyl-*N'*,*N'*-diphenylthioureate) M(II) (M = Zn, Cd) with some nitrogen bases 107(1986)299

Nitrogen donor ligands

Thermal studies on copper(II) chelates of some O-/N-donor ligands 124(1988)371

Nitrogen monoxide

The use of DSC to study the selective catalytic reduction of NO with NH_3 133(1988)169

Nitro groups

Statistical study of the influence of the nitro groups on the ionization and solvation processes of disubstituted benzoic derivatives 125(1988)363

Nitroguanidine

Kinetic studies of the thermal decomposition of nitroguanidine using accelerating rate calorimetry 127(1988)89

Thermal decomposition of nitroguanidine 141 (1989)305

Investigation of the thermal stability of nitroguanidine below its melting point 146 (1989)115

Nitroso-2,4,6-triamino-pyrimidine

Dissociation of 5-nitroso-2,4,6-triamino-pyrimidine and stability of its complexes with Co(II), Ni(II) and Cu(II) 102(1986)163

Nitroso-2-naphthol-6-sulfonic acids

Thermal behavior and IR absorption spectra of the sodium salts of 1-nitroso-2-naphthol-6-sulfonic acid and 2-nitroso-1-naphthol-6-sulfonic acid 102(1986)239

Nitrosodicyanomethanide tetrapyridine

Thermoanalytical studies on some transition metal nitrosodicyanomethanide tetrapyridine complexes: $M[ONC(CN)_2]_2(Py)_4$ ($M = Fe^{2+}$, Ni^{2+}, Co^{2+}; $Py = C_5H_5N$) 150(1989)167

Nitroso naphthols

Potentiometric, spectrometric, thermogravimetric, conductimetric and magnetic studies of lanthanum complexes with some nitroso naphthols 143(1989)37

Nitryl perchlorate

Role of additives in the thermal decomposition of ammonium perchlorate and evidence supporting the identification of nitryl perchlorate as the essential reaction intermediate 132(1988) 205

NMR spectroscopy

The use of thermogravimetry and NMR spectroscopy in the attempted identification of the source of Babylonian building asphalt 115 (1987)181

Noble metal alloys

Vaporization study on fission-produced noble metal alloys by mass-spectrometric method 139 (1989)299

Nodular graphite

Some results of investigations into relationship between a few elements of nodular graphite cast iron and nodular graphite 103(1987)169

Nomenclature

Nomenclature in thermal analysis 104(1986)395

Non-aqueous media

A thermometric method for determination of thiols in non-aqueous media. Comparison with other methods 122(1987)305

Non-aqueous solvents

Thermodynamics of complex formation reactions in non-aqueous solvents. Part 2. Reaction of silver(I) with *N,N,N',N'*-tetramethylene diamine in acetone, methanol and ethanol 127(1988)399

Non-electrolytes

Order destruction and order creation in binary mixtures of non-electrolytes 120(1987)161

Non-ideality

Non-ideality near the monotectic composition of a miscibility-gap type system: succinonitrile–water 145(1989)301

Non-isothermal activation energy

The use of a method for evaluating the non-isothermal activation energy by modelling a non-isothermal change with kinetic parameters dependent on the degree of conversion 143 (1989)177

Non-isothermal data

Applicability of the master plots in kinetic analysis of non-isothermal data 147(1989)377

Non-isothermal kinetic analysis

Basic language programs for automatic processing non-isothermal kinetic data 111 (1987)359

Equations for the rapid evaluation of general temperature integrals in non-isothermal kinetic analysis 125(1988)111

Non-isothermal kinetics

The heating rate as a variable in non-isothermal kinetics. II. A method to evaluate the non-isothermal kinetic parameters using this principle and integration over low ranges of variables 107 (1986)353

Introduction and critique of non-isothermal kinetics 110(1987)141

Some problems concerning the mathematical theory of non-isothermal kinetics. I. Reactions described by rate equations of the form $d\alpha/dt = Ak(T)f(\alpha)$ 111(1987)335

Some problems concerning the mathematical theory of non-isothermal kinetics. II. Primary isothermal differential kinetic equations (PIDKEs) 118(1987)65

On the dependence of kinetic parameters and functions in non-isothermal kinetics 122(1987) 413

Some problems concerning the mathematical theory of non-isothermal kinetics. III. The classical non-isothermal change of some equations derived from the rate equation $d\alpha/dt = f(\alpha)k(T)h(\alpha, T)$ accepted as postulated primary isothermal differential kinetic equation 125(1988)261

Iterative integral method to evaluate the classical non-isothermal kinetic parameters from a single curve obtained at constant heating rate using integration over small intervals of variables and the least-squares method 141(1989)9

The heating rate as a variable in non-isothermal kinetics: III. Some theoretical aspects concerning this problem and the inverse problem of classical non-isothermal kinetics 147(1989)33

Non-isothermal reaction analysis

Non-isothermal reaction analysis and artificial intelligence—a promising combination for kinetic studies using thermoanalytical methods 121(1987)253

Non-isothermal sintering

Kinetics of sintering of irregular particles of glass. Part II. Non-isothermal sintering 140 (1989)225

Non-isothermal thermal analysis

The distinguishability of kinetic models using a single, non-isothermal thermal analysis experiment 136(1988)219

Non-isothermal thermoanalytical data

A computer program for kinetic analysis of non-isothermal thermoanalytical data 138(1989)337

Non-polar components

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions of acetic acid and non-polar components with association in both phases 132(1988)53

Non-polar solvents

Comment on "entropies of diphenylglyoxal solutions in non-polar solvents" 130(1988)367

Non-randomness

Local non-randomness and excess second-order thermodynamic quantities 149(1989)259

Non-stoichiometry

Evidence of the role of non-stoichiometry in Zn-Cr catalysts by thermal investigations 133 (1988)155

A study of the non-stoichiometry in U_3O_8 140 (1989)299

Nonisothermal kinetics

Comments on the note "on the correct rate expression in nonisothermal kinetics" by C. Popescu, M. Stan and E. Segal 143(1989)355

Nonlinear regression

Application of rigorous nonlinear regression to the decomposition kinetics of explosives 149 (1989)301

Nonlinear temperature programme

The moving boat technique and practical studies on the decomposition of carbonates. Part 2. Analysis and prediction of α–t plots generated under a nonlinear temperature programme 101 (1986)131

Nonyne

Use of the modified Wilson equation for description of vapor–liquid equilibrium in the system 1-nonyne–1-propanol 140(1989)49

Norbornane

Heats of combustion and formation of norbornane 121(1987)473

Nuclear plants

Thermoanalytical investigations on decontaminating agents for use in nuclear plants 108(1986)175

Nucleation

Nucleation and crystal growth in a $0.9Li_2O \cdot 0.1BaO \cdot 2SiO_2$ glass: a DTA study 120(1987)217

A new parameter to evaluate nucleation in glasses from DTA curves 128(1988)39

A new approach to kinetic study of nucleation and growth process by thermal analysis 135 (1988)85

Nucleation kinetic data from DTA curves 135 (1988)91

Nucleic acids

Energetics of left-handed helix formation of nucleic acids 119(1987)103

Numerical algorithms

A frequential analysis of the numerical algorithms used for inverse filtering in calorimetry 102 (1986)173

Numerical analysis

Acquisition and numerical analysis of thermoanalytical data by microcomputer, applied to an existing flow microcalorimeter 107(1986) 101

Numerical aspect

Thermal analysis from a numerical aspect 150 (1989)93

Numerical evaluation

High temperature, high pressure thermogravimetry of coal gasification apparatus, data acquisition and numerical evaluation 103 (1987)163

Numerical methods

Predictor–corrector numerical methods for kinetic analysis of TG data: methods applied to oil shale pyrolysis 113(1987)53

A numerical method to construct the sample base line in DSC curves 119(1987)233

Nylon 6

Thermal study of blended systems of nylon 6 and a liquid crystalline polyester 122(1987)181

Crystallization kinetics of dyed nylon 6 134 (1988)133

Nylon polyamide

On the thermal decomposition of the copolymer ABS and of nylon polyamide 149(1989)181

Nylon polymers

Emission thermophotometry. III. Some nylon polymers 101(1986)89

Emission thermophotometry. V. Premelting light emission of some nylon polymers 143(1989)181

O

Obtention

Obtention, thermal behaviour and structural study of the dioxynitrates of lead 105(1986)111

Octadecane

Mutual solubilities of components of binary blends of *n*-octadecane, di-*n*-octyl ether, and *N*,*N*-dioctylamine 107(1986)227

Octakis(di-*p*-methylphenyl sulphoxide) lanthanide(III) perchlorates

The thermal decomposition of octakis(di-*p*-methylphenyl sulphoxide) lanthanide(III) perchlorates. Formation of lanthanide oxysulphates 116(1987)45

Octan-1-ol

Vapour–liquid equilibrium and solid–solid equilibrium in the system formed by octan-1-ol and *n*-decane: measurement and calculation 150 (1989)101

Octane

Simultaneous correlation of vapor–liquid equilibrium and excess enthalpies for binary mixtures of *n*-hexane and *n*-octane with hexane isomers 106(1986)219

Vapour–liquid equilibrium and solid–liquid equilibrium in the system formed by 1-octanol and *n*-octane 128(1988)93

Octanol

Thermodynamic study of organic compounds in octan-1-ol. Enthalpy changes in the transfer or primary, secondary, and tertiary amines from gas and the dilute aqueous state 122(1987)1

Vapour–liquid equilibrium and solid–liquid equilibrium in the system formed by 1-octanol and *n*-octane 128(1988)93

Octylcyanobiphenyl

Calorimetric determination of enthalpy changes in octylcyanobiphenyl (8CB) liquid crystal transitions 119(1987)301

Oils

Analysis of wax/oil mixtures using DSC 105 (1986)9

Application of thermal methods for analysis of oils and oil products 134(1988)79

Oil shale

Investigation of diffusional phenomenon in the oil shale of Timahdit (Morocco). Role of sedimented plans 103(1987)147

Thermochemical reactions in subcritical and supercritical interaction between mishor rotem oil shale and toluene 105(1986)51

Comparative TGA and DSC studies of oil shales 134(1988)327

Oil shale pyrolysis – a new approach to the kinetic investigation of different kerogen type samples 134(1988)353

Oil shale pyrolysis

Predictor–corrector numerical methods for kinetic analysis of TG data: methods applied to oil shale pyrolysis 113(1987)53

Oligoethylenetetraphthalate

Kinetics of non-isothermal crystallization of oligoethylenetetraphthalate-oligooxyethylene block copolymers 134(1988)121

Oligooxyethylene

Kinetics of non-isothermal crystallization of oligoethylenetetraphthalate-oligooxyethylene block copolymers 134(1988)121

One-step processes

Peak heights and characteristic temperatures of differential thermoanalysis curves of one-step processes (in German) 112(1987)81

Onsager liquids

Comparisons of dielectric and thermodynamic ideality. I. Mixtures of Onsager liquids 113 (1987)369

Optical differential thermal analysis

Principles of the optical differential thermal analysis (ODTA) 134(1988)371

Applications of the optical differential thermal analysis 134(1988)377

Optimization

Use of thermal analysis in the optimization of polymeric diffusion barriers in controlled release delivery systems 134(1988)275

Optimum temperature programs

Optimum temperature programs to achieve thermogravimetry with equilibrium vapor pressure as a probe 132(1988)67

Order creation

Order destruction and order creation in binary mixtures of non-electrolytes 120(1987)161

Order destruction

Order destruction and order creation in binary mixtures of non-electrolytes 120(1987)161

Order–disorder transition

Study of an order–disorder transition by differential scanning calorimetry 125(1988)59

Organic amines

Infrared study of the thermal treatment of sepiolite and palygorskite saturated with organic amines 148(1989)445

Organic bases

Some features of the interaction of silica gel with organic bases 104(1986)111

Thermal and structural studies on the adducts of bis(β-diketonate) oxovanadium(IV) complexes with organic bases 140(1989)179

Organic chemistry

Application of thermal analysis to organic chemistry (Review) 148(1989)325

Organic chlorogallate systems

Differential scanning calorimetric study of low melting organic chlorogallate systems 126(1988) 255

Organic compounds

Thermodynamic study of organic compounds in octan-1-ol. Enthalpy changes in the transfer or primary, secondary, and tertiary amines from gas and the dilute aqueous state 122(1987)1

Organic crystalline complexes

Thermal investigation of organic crystalline complexes. I. Enthalpies and entropies of fusion 126(1988)61

Thermal investigation of organic crystalline complexes. II. Thermal behaviour of the complexes during heating 126(1988)67

Thermal investigation of organic crystalline complexes. III. Heat of formation of complexes 126(1988)75

Organic crystals

Thermal analysis by DSC on organic crystals 134(1988)107

Organic eutectics

Chemistry of organic eutectics and 1 : 1 addition compound: *p*-phenylenediamine–catechol system 138(1989)219

Organic ligands

Kinetic–thermometric study of hydrogen peroxide decomposition in basic media catalyzed by Mn(II). Influence of several organic ligands 125(1988)319

Organic materials

Problems in the DSC and DTA study of the burning properties of fuels and other organic materials 106(1986)191

A study of organic materials using thermal analysis 148(1989)49

Organic polymers

Thermally stimulated processes in organic polymers (Invited Lecture) 134(1988)15

Organic solvents

Solute–solvent interactions of some univalent–univalent salts with various organic solvents at 25 °C 120(1987)183

Study of the Ph_4SbBPh_4 assumption for single ion free energies in some organic solvents 140 (1989)7

Organic templates

Thermoanalytical studies of high silica ZSM-5 zeolites containing organic templates 102(1986)37

Organomercury

Thermal studies on organomercury(II) complexes of kojik acid and maltol 133(1988)371

Organomercury(II) complexes

Thermal studies on organomercury(II) complexes of isoniazid 116(1987)357

Organosilicon polymers

Development of ceramics from organosilicon polymers by heat treatment 144(1989)159

Oriental materials

The investigation of ancient oriental materials and artifacts by thermal analysis (1988 "Mettler" Plenary Lecture) 148(1989)95

Orientational order

Calorimetric studies on phase transitions arising from orientational order–disorder of the molecular axes of ferrocene and its derivatives 109(1986)29

Oscillating chemical reactions

Heat production in oscillating chemical reactions: three examples 112(1987)95

Oscillating ribbon

The longitudinally oscillating ribbon as a sensor for mass changes in controlled atmospheres 112 (1987)67

Osmium

Determination of submicrogram quantities of osmium based on its catalytic effect on the Ce(IV)–As(III) reaction 121(1986)367

Outgassing

Evaluation of outgassing processes of plastics and rubbers using on-line thermal desorption GC-FTIR-MS 134(1988)307

Oxalates

The thermal decomposition of oxalates. Part 21. The preparation and thermal decomposition of an oxymolybdenum(VI) oxalate 106(1986)125

The thermal decomposition of oxalates. Part 22. The preparation and thermal decomposition of some oxytungsten(VI) oxalates 111(1987)275

Molten potassium pyrosulfate: the reactions of seven metal oxalates 114(1987)281

Preparation of $BaPbO_3$ from coprecipitated barium–lead oxalate 115(1987)207

The thermal decomposition of oxalates. A review 117(1987)331

Preparation of V_2O_5 with an enhanced dispersity by thermal decomposition of oxalates and peroxides 137(1988)217

Oxidation

Oxidation of chromium carbide 103(1987)193

Mechanism of zinc sulphide oxidation 106(1986)9

Thermodynamics of the oxidation of elements by aluminium sulphate 106(1986)355

Thermal analysis and kinetics of oxidation of "TiS_2" and "Ti_2S_3" 109(1986)253

A thermometric study on the oxidation of isopropyl alcohol in some mineral acids 109 (1986)367

Investigation of the oxidation of niccolite by thermal analysis 112(1987)197

Oxidation of lipids studied by isothermal heat flux calorimetry 114(1987)159

Desulfurization of some Turkish lignites during oxidation by air 132(1988)289

Thermal analysis and kinetics of oxidation of Cr_3S_4 and Cr_2S_3 133(1988)215

In situ measurements of layer thickness during oxidation of titanium 133(1988)299

The oxidation of bis(*N*,*N*-diethyldithiocarbamato)tin(II) 133(1988)383

The effect of experimental variables on the multiple peaking phenomenon observed during the oxidation of pyrite 135(1988)267

Thermodynamic and related studies of the oxidation of *p*-aminobenzoic acid, sulphanilic acid and anthranilic acid by periodate 140(1989) 197

Thermogravimetric identification and analysis of reaction products during oxidation of solid or liquid sulfides 143(1989)221

The effect of experimental variables on the mechanism of the oxidation of pyrite. Part 1. Oxidation of particles less than 45 μm in size 145(1989)115

Oxidative degradation

The kinetics of the oxidative degradation of cellulose and cellulose doped with chlorides 121 (1987)273

Oxide glasses

Acid–base concept in oxide glasses 110(1987)443

Oxide powders

Thermal characterization and reactivity of metal oxide powders by emanation thermal analysis using Ra-226 parent isotope 110(1987)453

Oxides

Bond length–bond energy concept and its impact on the surface chemistry of oxides 110(1987)333

Report on the workshop: thermal characterization of non-stoichiometric oxides and similar compounds and their application in energy storage and conversion 110(1987)395

Progress in the thermal analysis of oxides and refractories 110(1987)449

Oxodipine

Thermal determination of solid dispersions of oxodipine 132(1988)181

Oxomolybdenum(VI) oxalato complex

Preparation of potassium trimolybdate by the thermal decomposition of a new oxomolybdenum(VI) oxalato complex 141(1989) 87

Oxo salt

Study of an ordered mixed oxo salt by thermal and vibrational analysis: $(NH_4)_2H_3AsO_4SO_4$ 132(1988)279

Oxozirconium(IV) chloride

Thermogravimetric and infrared studies of tetrameric zirconium(IV) compounds derived from oxozirconium(IV) chloride and imidazole, morpholine and their derivatives 109(1987)303

Oxyanion melts

The reactions of potassium tetrachromate in three oxyanion melts 106(1986)369

Oxygen

A thermodynamic study of the Cu–Cr–O system by the EMF method 103(1986)361

The energetics of phase transitions in the system $Na_{1+X}Zr_2Si_XP_{3-X}O_{12}$, $1.9 \leq X \leq 2.5$ 106 (1986)57

Interaction of coals with oxygen at temperatures up to 600 °C 113(1987)217

Determination of phase stability in the Sr–S–O system 113(1987)359

Thermal analysis of protein-carbohydrate mixtures in oxygen 114(1987)109

A thermoanalytical study of the solid state reactions in the Cr_2O_3–Na_2CO_3–O_2 system 120 (1987)9

Thermal analysis in the M-Ba-Cu-O systems (M = Y, La, Pr) in relation to high T_c superconductors 133(1988)17

Thermogravimetric study of the transition copper valency in the superconductive system Y–Ba–Cu–O 143(1989)123

Oxygen donor ligands

Thermal studies on copper(II) chelates of some O-/N-donor ligands 124(1988)371

Oxygen uptake

A thermogravimetric study of the uptake of oxygen by $YBa_2Cu_3O_x$ 136(1988)343

Oxymolybdenum(VI) oxalate

The thermal decomposition of oxalates. Part 21. The preparation and thermal decomposition of an oxymolybdenum(VI) oxalate 106(1986)125

Oxytungsten(VI) oxalates

The thermal decomposition of oxalates. Part 22. The preparation and thermal decomposition of some oxytungsten(VI) oxalates 111(1987)275

P

Paint films

Characterisation of aged paint films by differential scanning calorimetry 134(1988)85

Paint systems

Compositional analysis of waterborne paint systems by thermogravimetry 106(1986)79

Palladium

Amorphous $Zr_{0.7}Pd_{0.3}$ as a temperature reference near 2.5 K 103(1987)63

Probing the electronic interaction between metal and support on Pd/TiO_2 catalyst with adsorption of hydrogen 133(1988)175

The high temperature thermophysical properties of ruthenium and palladium 139(1989)99

Palladium chloride

The phase diagram $PdCl_2$–$CdCl_2$ 113(1987)49

***trans*-Palladium chloride di(ethyl telluride)**

Enthalpy of formation of *trans*-$PdCl_2(TeEt_2)_2$ 131(1988)103

Palladium complexes

Enthalpies of formation of M(pentanedionato)$_2$ complexes (M = Ni and Pd) 102(1986)109

Palladium(II)

Kinetic–thermometric determination of submicrogram quantities of Pd(II) 113(1987)73

Palladium(II) complexes

Thermal analysis of heterocyclic thione donor complexes. Part VI. Palladium(II) and platinum(II) complexes of thiazole-thiones 140 (1989)343

Palladium(II) coordination compounds

Structural and thermal studies on mixed ligand co-ordination compounds of Pd(II), Rh(III) and Pt(II) with 3-(dimethyl-aminomethyl)indole and salicylaldoxime 140(1989)265

Palladium(II) thiazole-thiolate complexes

Thermal analysis of heterocyclic thione donor complexes. Part VII. Palladium(II) and platinum(II) complexes of thiazole-thiolates 146 (1989)241

Palygorskite

Thermal analysis study of the adsorption of D_2O by sepiolite and palygorskite 135(1988)291

Infrared study of the thermal treatment of sepiolite and palygorskite saturated with organic amines 148(1989)445

Paper

Thermal analysis in the cellulose, paper and textile industry 110(1987)471

Paraffins

Determination of equations representing the thermodynamic magnitude of the vaporisation of true paraffins for any temperature. Application to the calculation of the activity coefficient (in French) 104(1986)121

Paramolybdates

Preparation, characterization and thermal studies of the paramolybdates of some cobaltammine complexes 143(1989)59

Partial Gibbs energies

Partial Gibbs energies from Redlich–Kister polynomials 129(1988)71

Particle size

The effect of particle size on the determination of quartz by differential scanning calorimetry 120(1987)257

Paul Klee

"Kinetic variations". Attempt of a classification of the dynamic thermal analysis methods to describe the dynamics of solid state reactions based on thoughts of Paul Klee (in German) 112(1987)13

Peak height

Theoretical analysis of peak height in classical DTA, power-compensated DSC and heat-flux DSC 107(1986)277

Peak heights

Peak heights and characteristic temperatures of differential thermoanalysis curves of one-step processes (in German) 112(1987)81

Peaking

The effect of experimental variables on the multiple peaking phenomenon observed during the oxidation of pyrite 135(1988)267

PEEK

The thermal analysis of PEEK 119(1987)231

Peltier heat

Electrochemistry and calorimetry coupling. IV. Determination of electrochemical Peltier heat 126(1988)221

Penetrants

Transport of penetrants in the macromolecular structure of coals. VIII. Transport mechanism as a function of temperature 116(1987)153

Peng–Robinson equation of state

Modification of Peng–Robinson equation of state for saturated vapour–liquid equilibrium 105 (1986)383

Application of L–M modification of the Peng–Robinson equation of state for saturated binary liquid mixtures 106(1986)201

Penicillin

Pyrolysis and kinetics of non-isothermal decomposition of La(III)– and Th(IV)–phenoxymethyl penicillin complexes 115(1987)381

Pentafluorotellurates(IV)

Study of the thermal decomposition of the alkaline pentafluorotellurates(IV) $MTeF_5$ (M = Li, Na, Rb, Cs) (in French) 119(1987)243

Pentaglycerine

Crystalline solid to plastic crystal transitions in pentaglycerine–neopentylglycol mixtures 118 (1987)287

Pentaglycerine-neopentylglycol mixtures: formation of a solid solution (in French) 136 (1988)55

Pentane

Excess thermodynamic properties of the *n*-pentane + methyl acetate system at 298.15 K 130(1988)249

Pentanedionato complexes

Enthalpies of formation of M(pentanedionato)$_2$ complexes (M = Ni and Pd) 102(1986)109

Peptides

Aqueous solutions containing amino acids and peptides. Part 25. The enthalpy of interaction at 298.15 K of glycine with potassium halides 107 (1986)267

Peptide–lanthanide cation equilibria in aqueous solution. IV. Isomorphous substitution, conformations and thermodynamics of complex formation 130(1988)205

Perchloric acid

Apparent molar heat capacities and volumes of aqueous $HClO_4$, HNO_3, $(CH_3)_4NOH$ and K_2SO_4 at 298.15 K 126(1988)245

Perfluoro-2,7-dimethyloctane

Enthalpy of formation of perfluoro-2,7-dimethyloctane 139(1989)43

Periodate

Thermodynamic and related studies of the oxidation of *p*-aminobenzoic acid, sulphanilic acid and anthranilic acid by periodate 140(1989) 197

Periodic chemical reactions

Extended batch calorimetry on periodic chemical reactions 119(1987)175

Periodic heat signals

Deconvolution of periodic heat signals by fast Fourier transform 119(1987)189

Permanganate

Kinetic thermometric determination of Co(II) and Cu(II) based on their catalytic effect on permanganate decomposition in basic media 137(1988)263

Perovskite

On the thermal stability of some coordination compounds generating mixed oxides with perovskitic structure. III 111(1987)353

Thermoanalytical investigation of $(YBa_2)_2Cu_3O_{7-y}$ superconductor. II. Perovskite formation from coprecipitated oxalate 132 (1988)15

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. IV. Mechanism of perovskite formation from various starting materials 142 (1989)281

Perovskite oxide

XPS and TPD probe techniques for the study of $LaNiO_3$ perovskite oxide 147(1989)361

Peroxides

Experimental data on the thermal kinetics of organic peroxides 101(1986)45

Preparation of V_2O_5 with an enhanced dispersity by thermal decomposition of oxalates and peroxides 137(1988)217

Perrhenate

Thermodynamic investigation of the system perrhenate–tetrazolium salt–water–chloroform 107(1986)123

Pesticides

Kinetic study of the thermal decomposition of pesticides 126(1988)319

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of H^+, Na^+ and Ca^{2+} complexes with 2,4-dichlorophenoxyacetate in aqueous solution at different temperatures and ionic strengths 128(1988)261

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of copper(II) complexes of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 149(1989)199

Petroleum

Determination of cloud point for petroleum middle distillates by differential scanning calorimetry 114(1987)125

Petroleum products

Bromine number determination of petroleum distillates by thermometric titration. comparison with other methods 104(1986)247

Kinetic–thermometric method for the determination of Fe(III) in petroleum products 127(1988)73

Petroleum sulphonate

Thermal and colloidal stability behaviour of overbased petroleum sulphonate additives 132 (1988)253

Phase behaviour

Phase behaviour of copper and zinc phthalocyanines 104(1986)377

Phase behaviour of cobalt, nickel and zinc phthalocyanines 109(1987)397

Investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A 119(1987)127

Polyesters: phase behavior in binary blends: amorphous, crystalline, liquid crystals, and on transreaction (Plenary Lecture) 134(1988)251

Polyesters: phase behavior in binary blends: amorphous, crystalline, liquid crystals, and on transreaction (Plenary Lecture) [abstract] 135 (1988)7

Phase change

Thermoanalytical investigation of the $(YBa_2)_2Cu_6O_y$ superconductor. I. Reactions forming the superconductor and its phase changes 124(1988)147

Phase changes on heating ammonium magnesium phosphate hydrates 129(1988)197

TC and DSC investigation of $CaCl_2 \cdot 6H_2O$, a phase change material for energy storage 148 (1989)281

Phase diagrams

The binary system (Li, Na)Br: measurement of the excess enthalpy of solid mixtures; measurement and analysis of the solid–liquid phase diagram 105(1986)117

Phase diagram of the ternary system Ge–Sb–Te. II. The subternary Ge–GeTe–Sb_2Te_3–Sb 107 (1986)239

Thermodynamics and phase diagrams 110(1987) 217

The phase diagram AgI-SnI_2 112(1987)47

The phase diagram $PdCl_2$–$CdCl_2$ 113(1987)49

Phase diagram studies of chloride system – common and not-so-common methods 114 (1987)67

Investigation of the phase diagram for the system $Ni(NO_3)_2$–H_2O and examination of the decomposition of $Ni(NO_3)_2 \cdot 6H_2O$ 121(1987) 137

Phase diagram of the pseudobinary $BaCuO_2$–$YBa_2Cu_3O_{6.5}$–$YCuO_{2.5}$ system 136 (1988)263

Solid–liquid phase diagram of the binary system pyridine + sulfolane 139(1989)1

The phase diagram AgI–PbI_2 141(1989)293

The phase diagrams of mixtures of CuI with ZnI_2, CdI_2 and HgI_2 143(1989)115

The phase diagram AgI–ZnI_2 145(1989)93

The system *p*-dibromobenzene + *p*-chloroiodobenzene + *p*-bromoiodobenzene–a methodological study on thermal analysis and thermodynamic phase-diagram analysis 146 (1989)297

Iron–neodymium (Fe–Nd) phase diagram (in French) 147(1989)205

Binary and ternary compounds, phase diagrams and contaminations in the $YO_{1.5}$-BaO-CuO system auxiliary to superconducting ceramics (Review) 148(1989)235

Phase equilibria

Thermodynamics of alcohol solutions: phase equilibria of binary and ternary mixtures containing two alcohols 102(1986)185

Thermodynamics of alcohol solutions. Phase equilibria and excess molar enthalpies of mixtures containing two alcohols 107(1986)199

Phase equilibria in the system $Fe_2(MoO_4)_3$–V_2O_5 117(1987)9

$V_9Mo_6O_{40}$ and phase equilibria in the system $V_9Mo_6O_{40}$–Fe_2O_3 118(1987)1

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. I. Li_2CO_3–$BaCO_3$ 124(1988)65

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. II. Na_2CO_3–$BaCO_3$ 124(1988)79

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. III. K_2CO_3–$BaCO_3$ 124(1988)89

Phase relation

Thermoanalytical investigation of the phase relation in $BaBiO_{3-x}$ 115(1987)199

Phase relation and dehydration behavior of barium nitrite hydrates 127(1988)201

Phase stability

Determination of phase stability in the Sr–S–O system 113(1987)359

Phase studies

Phase studies in the systems Ag_2Te-Ga_2Te_3, ZnSe-In_2Se_3, and ZnS-Ga_2S_3 112(1987)89

Phase investigations of the system Na_3AlF_6 - NaCl 133(1988)283

Phase transformation

High-pressure differential scanning calorimetry (DSC) investigations at low temperatures: solid–solid and solid–liquid phase transformations of some molecular crystals up to 1750 bar 109(1986)111

Exoelectron emission accompanying the phase transformations in some silver salts 130(1988)329

Kinetics of phase transformations in amorphous materials by DSC. Part I 131(1988)211

Kinetics of phase transformations in amorphous materials by DSC. Part II 131(1988)225

Phase transition

Preliminary experiments on phase transition of adsorbed gases on porous glass 103(1987)123

Solid state thermal phase transition of cadmium(II) diamine complexes 105(1986)35

The effect of intra and inter potential for isotropic to nematic phase transition: a pressure–volume–temperature measurement study 105(1986)251

The energetics of phase transitions in the system $Na_{1+X}Zr_2Si_XP_{3-X}O_{12}$, $1.9 \leq X \leq 2.5$ 106 (1986)57

Phase transition and decomposition of A_2MX_4 [A = $(C_2H_5)_4N$; M = Co(II), Ni(II) and Cu(II); X = Cl and Br] in the solid state 108(1986)97

Calorimetric studies on phase transitions arising from orientational order–disorder of the molecular axes of ferrocene and its derivatives 109(1986)29

Phase transition in hydrazinium hydrogen oxalate. A calorimetric study of the short hydrogen bond system 109(1986)63

Phase transition phenomena induced by the successive appearances of new types of aggregation states of water molecules in the "L-dipalmitoylphosphatidylcholine–water" system 109(1986)81

On the phase transitions of cycloalkanes 112 (1987)57

Phase transitions of cyanomercurates 112(1987) 71

The enantiotropic phase transition of antimony(III) oxide 114(1987)61

Reaction of strontium sulfate with anatase and rutile below and above the phase transition temperature of strontium sulfate 119(1987)347

Thermodynamic properties and phase transitions of dodecylammonium tetrachloromanganate(II) and tetrachlorozincate(II) from 280 to 500 K 123(1988)15

Thermally-induced phase transition of zinc(II) diamine complexes in the solid state 127(1988)329

The thermal phase transition of anhydrous potassium oxalate 131(1988)291

Study on the phase transition in potassium hydrogen sulphate crystals 132(1988)1

Thermal phase transition and decomposition of *N*-methyl-1,2-ethanediamine complexes of nickel(II) in the solid state 136(1988)191

Thermodynamic study of the phase transitions of the mesogens and the homologous trends of their melting entropies 139(1989)83

The authentication of phase transitions 139 (1989)93

DSC thermophysics on some medium chain thallium(I) *n*-alkanoates: phase transitions, thermal functions and heat capacity 139(1989)139

Heat capacity studies of phase transitions in langbeinites. I. $K_2Mn_2(SO_4)_3$ 139(1989)157

Magnetic phase transitions in iron and nickel phosphorus trichalcogenides 139(1989)197

Solid–solid phase transitions in phenalkylammonium salts 139(1989)205

Thermal stability and phase transition studies of diammonium zinc and cadmium halides 144 (1989)183

Solid state ^{13}C NMR and phase transitions in hydroxyadamantanes 146(1989)361

A DSC study of low temperature phase transitions in KH_2PO_4 and $NH_4H_2PO_4$ 148 (1989)289

Phase transitions of cholesteryl cinnamates 148 (1989)335

Phase transitions in tribochemically activated natural phosphates 148(1989)479

Order–disorder phase transitions in β-$MnSO_3 \cdot 3H_2O$–type hydrates: isotopic effects—vibrational, X-ray, thermoanalytical and permittivity measurements 150(1989)141

Phenalkylammonium salts

Solid–solid phase transitions in phenalkylammonium salts 139(1989)205

Phenanthrene

Precursor states for the graphitization of naphthalene, anthracene, phenanthrene and chrysene 108(1986)211

1,10-Phenanthroline

Studies on the dissociation constants of 1,10-phenanthroline in ethanediol + water mixtures at 25 °C 142(1989)1

Solvent effects on the dissociation of 2,2′-bipyridine and 1,10-phenanthroline in aqueous binary mixtures of 2-methoxyethanol and 1,2-dimethoxyethane 147(1989)41

Phenanthroline

Studies on the solubility and the stability constants of ferrous-tris-bipyridine and phenanthroline complexes and the determination of free energy of transfer of ferrous ion from water to 2-propanol–water mixtures 104(1986) 267

Phenanthroline *N,N′*-dioxide

Infrared and thermal investigations of 1,10-phenanthroline *N,N′*-dioxide chelates of zinc(II) and cadmium(II) 101(1986)389

Phenetsal

Thermodynamics of group IIA metal ions complexes of phenetsal 129(1988)345

Phenobarbitone

Thermal study of ternary complexes of Cu(II), cimetidine and phenobarbitone 102(1986)257

Phenol

Two-stage kinetic model for the non-isothermal decomposition of phenol adsorbed on activated carbon 104(1986)61

Structure identification of substituted phenol redox products by: thermogravimetric and differential thermal analysis 113(1987)117

Comparative study of the redox reactions between iodine and phenol derivatives, through correlation between thermal analysis and thermodynamic calculations from kinetic data 128(1988)105

Phenol determination by thermometric titrimetry 148(1989)341

Phenol derivatives

The kinetics and thermochemistry of the redox reaction between iodine and phenol derivatives. I. With *ortho*-bromophenol 101(1986)325

Phenols

The sequential bromination of phenols 146 (1989)371

Effect of hydrogen bonding on the thermal behaviour of substituted phenols 149(1989)381

Phenoselenobromides

Enthalpies of formation of PhSeBr and $PhSeBr_3$ 131(1988)91

2-Phenyl-4-quinolinecarboxylic acid

Thermal, spectral and magnetic studies of some first row transition metal complexes of 2-phenyl-4-quinolinecarboxylic acid 144(1989)187

Phenylacetylene

Thermal analysis, conductivity and electrochemical applications of phenylacetylene and benzylpropargylamine polymers. Part 3 146 (1989)161

Phenylalanine derivatives

Calorimetric study of the first and second proton dissociation processes of fluoro and hydroxyl derivatives of phenylalanine 142(1989)203

Phenylazobarbituric acid

Temperature and substituent effects on the dissociation constants of some 5-(*p*-substituted phenylazo) barbituric acid compounds 136 (1988)1

Phenylchloroformate

Solvolysis rates and activation parameters of phenylchloroformate in water–tetrahydrofuran and water–dioxane mixed solvents 141(1989)1

Phenylenediamine

Chemistry of organic eutectics and 1 : 1 addition compound: *p*-phenylenediamine–catechol system 138(1989)219

***N*-Phenylphthalamic acids**

Thermoanalytical investigations on heterocyclic organic compounds. Part V: Thermal decomposition of some substituted *N*-phenylphthalamic acids 138(1989)13

Phosgene

Chlorination reactions of gibbsite and its thermal decomposition products with phosgene 115 (1987)269

Phosphate minerals

The thermal analysis of some phosphate minerals: strengite, lipscombite and goyazite 135(1988)259

Phosphates

Accurate thermogravimetric studies of hydrated condensated phosphates imply controlled water vapour pressures 103(1987)151

Thermodynamic study of the solid–liquid equilibria in the MPO_3–LaP_3O_9 systems (M = Li, Na, K, Rb, Cs, Ag, Tl) 116(1987)85

Phase transitions in tribochemically activated natural phosphates 148(1989)479

Phosphatidylcholine

The metastability of glucosyl ceramide in aqueous phase: effect of hydration and phosphatidylcholines of various chain length 148(1989)355

Interaction of buprenorphine with phosphatidylcholine 150(1989)1

Phosphatidylserine

Microcalorimetric studies of Ca^{2+} binding to triphosphoinositide and phosphatidylserine 123 (1988)247

Phosphides

Chemistry and structural chemistry of phosphides and polyphosphides. 45. The thermal decomposition and thermodynamic properties of the alkali metal phosphides LiP_{15}(s), NaP_{15}(s), KP_{15}(s), RbP_{15}(s) and CsP_{15}(s) 117(1987)261

Phosphogypsum

High-temperature synthesis of calcium sulphoaluminate from phosphogypsum 113 (1987)269

Role of phosphogypsum in the hydration of calcium sulphoaluminate 116(1987)145

The influence of gudron additive on the structure of the solid phase from the thermal decomposition of phosphogypsum 133(1988)233

Phospholipids

DSC-studies of phospholipids containing iso-branched and ω-cyclohexane fatty acids 119 (1987)53

Phosphorus

Thermal behaviour of some phosphorus/chromium polyoxoanions 103 (1986)267

The energetics of phase transitions in the system $Na_{1+X}Zr_2Si_XP_{3-X}O_{12}$, $1.9 \leq X \leq 2.5$ 106 (1986)57

Thermodynamic stability of orthorhombic black phosphorus 129(1988)57

Study of the surface acidity before and after heat or steam treatment for P or Mg modified ZSM-5 zeolites 135(1988)385

Phosphorus oxychloride

Physicochemical characterization of asbestos and attapulgite mineral fibers before and after treatment with phosphorus oxychloride 108 (1986)279

Phosphorus(V)

Reactions of single Cr(III)–P(V)Mo(VI) and double Cr(VI)–P(V)Mo(VI) phase systems in molten KNO_3 132(1988)155

Photoacoustic effect

Thermal diffusivity measurements for thin films by the photoacoustic effect 120(1987)191

Photobacterium phosphoreum

Flow-microcalorimetric investigations on the relationship between that production and light emission of photobacterium phosphoreum 119 (1987)121

Photoluminescence

FTIR and high-resolution photoluminescence studies of the thermal decomposition of crystalline europium hydroxide 118(1987)25

Phthalanilic acid

Thermodynamics for the formation of complexes of lanthanide(III) ions with phthalanilic acids 143(1989)247

Physicochemical properties

Physicochemical properties of concentrated solutions of some alkali metal halides in aqueous thiourea solutions 136(1988)119

Picolines

Thermogravimetric studies on the addition compounds of cobalt and nickel dithiophosphinates with picolines and acetylpyridines 128(1988)301

Picrolonic acid

Thermal analysis of some complexes of divalent metal ions with picrolonic acid 144(1989)293

Pioneers

Pioneers of thermal analysis in Czechoslovakia 110(1987)553

Pipe

Thermoanalytical study of an aged XLPE-pipe 114(1987)115

Piperidinium hexathiocyanatochromate(III)

Thermal studies on piperidinium hexathiocyanatochromate(III) 145(1989)265

Piperonaldehyde thiosemicarbazone complexes

Evaluation of kinetic parameters for the thermal decomposition of piperonaldehyde thiosemicarbazone complexes of cobalt(II) and zinc(II) halides 146(1989)149

Pirimicarb

Kinetic analysis of the thermal decomposition of the pirimicarb–Cu-montmorillonite complex 141(1989)317

Piroxicam

The interaction of piroxicam with some metal ions in aqueous solution 143(1989)239

Pitzer equations

Mixed interaction terms in the use of Pitzer equations: application to the heat capacities of the reciprocal system $Na^+/K^+/Cl^-/SO_4^{2-}/H_2O$ at high temperatures 145(1989)61

Plant auxins

Affinity of plant auxins IAA, IBA, IPA and NAA to metals 115(1987)375

Plants

Determination of water in plant samples: a comparative thermogravimetric and nmr study on different species of seeds 105(1986)179

Plasticizers

Thermal analysis of ethyl cellulose: influence of atmosphere and addition of diethyl phthalate as plasticizer 145(1989)173

Plastics

Evaluation of outgassing processes of plastics and rubbers using on-line thermal desorption GC-FTIR-MS 134(1988)307

A round-robin test of the softening temperature of plastics by thermomechanical analysis 147 (1989)387

Platinum(II) complexes

Thermal analysis of heterocyclic thione donor complexes. Part VI. Palladium(II) and platinum(II) complexes of thiazole-thiones 140 (1989)343

Platinum(II) coordination compounds

Structural and thermal studies on mixed ligand co-ordination compounds of Pd(II), Rh(III) and Pt(II) with 3-(dimethyl-aminomethyl)indole and salicylaldoxime 140(1989)265

Platinum(II) iodide

Spectroscopic and thermal studies on platinum(II) iodide complexes with primary amines 115(1987)229

Platinum(II) thiazole-thiolate complexes

Thermal analysis of heterocyclic thione donor complexes. Part VII. Palladium(II) and platinum(II) complexes of thiazole-thiolates 146 (1989)241

Pleurotus ostreatus

Thermogravimetric analysis of flax shives degraded by *Pleurotus ostreatus* and *Ceraceomyces sublaevis* 138(1989)347

Plutonium oxide

On the chemistry of the reactions between liquid sodium and urania–plutonia fuel for fast breeder nuclear reactors 129(1988)143

Polar fluids

Correlation of second virial coefficient for polar fluids 145(1989)257

Polarizing microscopy

Polarizing microscopy for examining mechanisms of the decomposition of single crystal materials 133(1988)227

Poly(2,6-dimethyl-1,4-phenylene oxide)

Calorimetric study of the miscibility of poly(2,6-dimethyl-1,4-phenylene oxide) with styrene–methyl methacrylate copolymers 123 (1988)3

Poly-4-vinylpyridine

Enthalpy of maleic anhydride polymerization in the presence of poly-4-vinylpyridine 147(1989) 347

Poly(α-methylstyrene)

Evaluation of the interaction parameter for poly(styrene)-poly(α-methylstyrene) mixtures from heat of solution measurements 137(1988)123

Poly(α-methylstyrene-co-acrylonitrile)

Calorimetric study of the miscibility of poly(α-methyl styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 102(1986)281

Poly-*N*-vinylcarbazoles

Thermal studies of some substituted poly-*N*-vinylcarbazoles 143(1989)51

Polyacrylamide

Determination of ammonia, amides, and the degree of hydrolysis of partially hydrolyzed polyacrylamide by thermometric titration and direct injection enthalpimetry 111(1987)57

Investigation of the thermal decomposition kinetics of polyacrylamide using a dynamic TG technique 111(1987)121

Poly(acrylamide-co-acrylic acid)

Thermal degradation characteristics of poly(acrylamide-co-acrylic acid) and poly(acrylamide-co-sodium acrylate) copolymers 121(1987)295

Poly(acrylamide-co-sodium acrylate)

Thermal degradation characteristics of poly(acrylamide-co-acrylic acid) and poly(acrylamide-co-sodium acrylate) copolymers 121(1987)295

Polyamic acid esters

Polyamic acid esters characterized by thermogravimetric analysis 134(1988)145

Polyarene-phosphorochloridates

Synthesis, characterization and thermal behaviour of some polyarene-phosphorochloridates 108(1986)105

Polyaromatic hydrocarbons

Vapour pressure of polyaromatic hydrocarbons in the range 10^{-3}–10 Torr (in French) 146 (1989)53

Polyazines

On the thermal stability of some new polyazines and polyazomethines (II) 134(1988)177

Polyazomethines

On the thermal stability of some new polyazines and polyazomethines (II) 134(1988)177

Poly(butylene terephthalate)

Compatibility of blends of poly(butylene terephthalate) and liquid crystal polymers: A DSC study 137(1988)105

Polycarbonate

Thermal analysis of VAMAS polycarbonate–polyethylene blends 139(1989)313

Studies of the thermal and crystallization behaviour of polyphenylene sulphide/polycarbonate blends 144(1989)165

Polycarbonates

Thermogravimetric analysis of polycarbonates with aromatic side groups 144(1989)283

Polycondensation

The determination of catalytic activity of various metallic compounds in the polycondensation of bis(hydroxyethyl)terephthalate using DSC and TG techniques 106(1986)105

Polycrystals

Further investigations on the spectroscopic and thermophysical properties of vanadium bronze polycrystals 121(1987)215

Polycyclic aromatic hydrocarbons

On calculation of thermodynamic properties of polycyclic aromatic hydrocarbons 102(1986)59

Poly(dialkylphenyl methacrylates)

Thermogravimetric analysis of poly(dialkylphenyl methacrylates) 143(1989)75

Poly(dihexyl itaconate)

A kinetic study of the thermal degradation of poly(dihexyl itaconate) 134(1988)127

Poly(ditrimethylene terephthalate)

Thermal analysis and molecular weight dependence on glass transition of poly-(ditrimethylene terephthalate) 134(1988)195

Polyelectrolytes

Thermodynamics of the protonation of some polyelectrolytes 142(1989)165

Polyene

Determination of residual unsaturation in polyene preparations by direct injection enthalpimetry 117(1987)37

Polyepoxide

Studies of interfacial properties in polyepoxide/carbon or glass fiber composites by means of microgravimetric techniques 103(1987) 97

Polyester resin

Dynamic, isothermal and residual heats of curing of an unsaturated polyester resin 126(1988)339

Calorimetric analysis of the curing behavior of an unsaturated polyester resin using different catalytic systems 134(1988)261

Polyesters

A kinetic study of the thermal degradation of polyester/cotton blends by thermogravimetry 102(1986)335

Pyrolysis mass spectrometry of hexolic based polyesters 105(1986)19

Thermal study of blended systems of nylon 6 and a liquid crystalline polyester 122(1987)181

Polyesters: phase behavior in binary blends: amorphous, crystalline, liquid crystals, and on transreaction (Plenary Lecture) 134(1988)251

Polyesters: phase behavior in binary blends: amorphous, crystalline, liquid crystals, and on transreaction (Plenary Lecture) [abstract] 135 (1988)7

Characterization of some thermotropic polyesters by differential scanning calorimetry 137(1988)129

Structural characterization and thermal degradation of hexolic-anhydride-based polyesters 140(1989)169

DSC studies of thermal events at the glass transition temperature region of partially oriented polyester fibers 148(1989)381

Prediction of the 'state of cure' of an unsaturated polyester by differential scanning calorimetry, and investigation of its variation with temperature and kinetic parameters 149(1989)93

Poly(ether-ether-ketone)

Isothermal crystallization behaviour of poly(ether-ether-ketone) (PEEK) and its carbon fiber composite 134(1988)223

Polyethers

Complex formation of cobalt(II) and copper(II) with macrocyclic polyethers in propylene carbonate 137(1988)331

Polyethylene

Thermoanalytical study of an aged XLPE-pipe 114(1987)115

Effect of operating parameters on time to decomposition of high density polyethylene and chlorinated polyethylenes 117(1987)157

Designed experiment for polyethylene crystallization by DSC 128(1988)215

Thermal characterisation of LDPE and LLDPE blends 131(1988)241

Ageing due to gamma radiation of three linear low-density polyethylenes. Solubility and calorimetric results 137(1988)137

Thermal analysis of VAMAS polycarbonate–polyethylene blends 139(1989)313

Poly(ethylene glycol) distearate

Effect of poly(ethylene glycol) 4000 and poly(ethylene glycol) 4000 distearate additives on the thermal decomposition of tapioca starch 146 (1989)201

Polyethylene glycols

Solubility studies of polyethylene glycols in ethanol and water 114(1987)97

Polyethyleneoxides

Study of thermal stabilities of polyethyleneoxides (molecular weight range, $M\bar{n} = 200–4000$) 132 (1988)245

Polyethylenes

A thermogravimetric study of the decomposition rate of chlorinated polyethylenes under ignition conditions 125(1988)247

Poly(ethylene terephthalate)

A comparative study of the crystallinity degree of PET by DTA, X-ray diffraction and iodine sorption techniques 101(1986)341

Thermogravimetric analysis of poly(ethylene terephthalate) treated with polymeric bromine compounds 113(1987)105

Poly(ethyl methacrylate)

Calorimetric study of the miscibility of poly(α-methyl styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 102(1986)281

Calorimetric study of the miscibility of poly(styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 105(1986)191

Polyhydroxy epoxy resins

Calorimetric investigation of curing of some new polyhydroxy epoxy resins 111(1987)115

Polymer composite

Measurement of the specific heat of a glass-filled polymer composite to high temperatures 131 (1988)7

Polymerization

Free-radical bulk polymerization kinetics of 1-vinyl-imidazole at total conversion by DTA 104 (1986)285

Epoxy polymers: Effect of the elastomer in the kinetics of polymerization 122(1987)29

Kinetics of mono alkyl itaconates bulk polymerization by DTA 124(1988)247

Kinetics of methacrylic derivates bulk polymerization by DTA. Study of the influence of the monomer side group 124(1988)263

Enthalpy of maleic anhydride polymerization in the presence of pyridine 132(1988)161

Non-classical free-radical polymerization. Part 1. The polymerization of mono-2-phenoxyethyl and mono-2-phenylethyl itaconates 132(1988)193

Polymerization of methyl methacrylate and ethyl methacrylate in different solvents studied by DSC 134(1988)217

Non-classical free-radical polymerization. Part 2. The polymerization of mono-2-methoxyethyl and mono-2-ethoxyethyl itaconate 142(1989)317

Enthalpy of free radical polymerization of maleic anhydride 147(1989)93

Enthalpy of maleic anhydride polymerization in the presence of poly-4-vinylpyridine 147(1989) 347

Polymer–polymer interaction

Thermal analysis as a method of investigation of polymer–polymer interaction 102(1986)223

Polymers

Estimation of calcium hydroxide in OPC, OPC/PFA and OPC/PFA/polymer modified systems 106(1986)115

Thermochemistry of polymers 110(1987)477

A simple model for predicting polymer ignition in a thermogravimetric analyzer 112(1987)161

Isothermal calorimetric measurement of polymer cure kinetics: the mangelsdorf method of analysis 112(1987)289

The melting behaviour of irradiated polymers 117(1987)365

A comparative study of the kinetic and thermodynamic approaches to the glass transition phenomenon in high polymers 118(1987)159

The computation of heat capacities of solid high polymers for vibrational spectra 119(1987)225

Epoxy polymers: Effect of the elastomer in the kinetics of polymerization 122(1987)29

Determination of bound water content in polymers by DTA, DSC and TG 123(1988)153

Heats of dilution of water-soluble polymer solutions 123(1988)271

Lifetime prediction for polymers from thermal analytical experiments - problems and how to deal with some of them 134(1988)115

Simultaneous differential scanning calorimetry and reflected light intensity measurements in polymer studies 134(1988)201

Thermal characterisation of bismaleimide-diamine adduct polymers 134(1988)231

Use of thermal analysis in the optimization of polymeric diffusion barriers in controlled release delivery systems 134(1988)275

Modification in thermal decomposition products of polymers by catalytic pyrolysis 134(1988)301

Thermal analysis of polymers (Royal Society of Chemistry Sponsored Lecture) [abstract] 135 (1988)10

Thermal stability of polymer-supported boronic acids functionalized with molybdenum derivatives 137(1988)71

Thermal and FT-IR analysis of polymer blends based on functionalized polyolefins 137(1988)95

Crystallization kinetics of binary polymer blends 137(1988)115

Thermal analysis of polymer samples by the round robin method. Part III. Heat capacity measurement by DSC 146(1989)311

Thermal analysis of polymeric materials. Papers presented at the 9th ICTA, Jerusalem (Review) 148(1989)365

The application of thermogravimetry for the study of polymer degradation 148(1989)375

Geopolymers and synthetic polymers: A comparative study of the isothermal pyrolysis kinetic behavior 148(1989)405

Polymer samples

Thermal analysis of polymer samples by a round robin method. I. Reproducibility of melting, crystallization and glass transition temperatures 136(1988)163

Thermal analysis of polymer samples by round robin method. Part II. Factors affecting heats of transition 138(1989)327

Poly(methacrylates)

Effect of the side chain structure on the glass transition temperature. Part 4. Molecular weight dependence of T_g in chalcogenides containing poly(methacrylates) 146(1989)137

Polymethoxymethylstyrene

Thermal degradation of the three isomers *ortho-*, *meta-* and *para*-polymethoxymethylstyrene (in French) 112(1987)325

Poly(methyl methacrylate)

Thermogravimetric study of the thermal stability of poly(methyl methacrylate) containing sterically hindered amine groups 101(1986)27

Calorimetric study of the miscibility of poly(α-methyl styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 102(1986)281

Calorimetric study of the miscibility of poly(styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 105(1986)191

Evolved gas analysis of poly(methyl methacrylate) 109(1986)285

Polymethylol epoxy resins

Thermosetting characteristics of some new polymethylol epoxy resins 109(1987)297

Polymorphic behaviour

Thermoanalytical study on the polymorphic behaviour of long-chain vinyl compounds 123 (1988)191

Polymorphic modifications

Application of thermodynamic relationships to the polymorphic modifications of a camphor derivative (in French) 107(1986)189

Polymorphic transformations

Application of thermal analysis (DSC) in the study of polymorphic transformations (1988 ICTA Young Scientist's Award Paper) 134 (1988)1

Polymorphic transitions

Polymorphic transitions in hydrogenated canola oil in presence of surfactants 134(1988)97

Polymorphism

A calorimetric contribution to the study of polymorphism in tetramethylammonium chloride 109(1986)1

Polymorphism of hydrated sorbitol 125(1988)125

On polymorphism of khelline 147(1989)217

Polyolefins

Thermal and FT-IR analysis of polymer blends based on functionalized polyolefins 137(1988)95

Polyols

Calorimetric studies on the interaction of sugars and polyols with the non-ionic surfactant Triton-X-100 in aqueous solutions 138(1989)359

Polyoxetanes

Glass transition temperatures of substituted polyoxetanes 134(1988)155

Polyoxoanions

Thermal behaviour of some phosphorus/chromium polyoxoanions 103 (1986)267

Poly(oxypropylene-ether) polyol

Thermal stability of poly(oxypropylene-ether) polyol 123(1988)221

Poly(*p*-phenylene sulphide)

Thermal properties of poly(*p*-phenylene sulphide) single crystals 146(1989)233

Physico-chemical characterization of poly(*p*-phenylene sulphide) single crystals 149(1989)101

Polyphenylacetylene

Effects of temperature and oxygen on the degradation of doped and undoped polyphenylacetylene 146(1989)251

Polyphenylene sulphide

Compositional analysis of polyphenylene sulfide containing PTFE and carbon fibers 142(1989)151

Studies of the thermal and crystallization behaviour of polyphenylene sulphide/polycarbonate blends 144(1989)165

Polyphenyls

Thermodynamic studies of *p*-polyphenyls: heat capacity of *p*,*p*′-biphenol 109(1986)45

Polyphosphides

Chemistry and structural chemistry of phosphides and polyphosphides. 45. The thermal decomposition and thermodynamic properties of the alkali metal phosphides LiP_{15}(s), NaP_{15}(s), KP_{15}(s), RbP_{15}(s) and CsP_{15}(s) 117(1987)261

Polypropylene

Melting behaviour of oriented isotactic polypropylene 117(1987)97

Thermal properties and crystallization kinetics of PP/$CaCO_3$ and PP/EPDM/$CaCO_3$ composites 134(1988)139

The use of TGA to study thermal ageing effects of oriented polypropylene 134(1988)255

Polyprotic acids

Cooperativity functions and site binding constants in polyprotic acids 140(1989)203

Polysaccharides

TG/MS interface: applications to the determination of moisture in polysaccharides and freeze-dried biological products 115(1987)289

DTG and DTA studies on fungical polysaccharides 134(1988)61

Polystyrene

Combustion experiments of polystyrene by use of a modified bayer–ici–shell apparatus 103 (1986)231

Investigations of the combustion products of flame-protected impact resistant polystyrene 112(1987)75

Computer-aided simultaneous TA-MS investigations of beat-resistant polystyrene 112 (1987)107

Glass-transition temperatures of PVME-PS blends. Influence of the molecular weight of PS 114(1987)165

Evaluation of the interaction parameter for poly(styrene)-poly(α-methylstyrene) mixtures from heat of solution measurements 137(1988)123

Correlation between polystyrene molecular weights and a characteristic temperature derived from the thermogravimetric weight loss curves 142(1989)83

Poly(styrene-co-acrylonitrile)

Calorimetric study of the miscibility of poly(styrene-co-acrylonitrile)/poly(methyl methacrylate)/poly(ethyl methacrylate) ternary blends 105(1986)191

Poly(styrene covinyl benzyl diethyl phosphonate)

Study of the thermal stability of poly(styrene covinyl benzyl diethyl phosphonate) (in French) 117(1987)177

Polytetrafluoroethylene

Compositional analysis of polyphenylene sulfide containing PTFE and carbon fibers 142(1989)151

Polythiocarbonates

Thermogravimetric analysis of polythiocarbonates: thermal decomposition temperatures and kinetic parameters 118(1987) 111

Effect of the side chain structure on the glass transition temperature. Part 3. Molecular weight dependence of T_g in some poly(thiocarbonates) 130(1988)289

Poly(thiocarbonates)s

Effect of the side chain structure on the glass transition temperatures of some poly(thiocarbonate)s 105(1986)149

Polyurethanes

Influence of the macrodiol chain length on the kinetics of linear non-segmented and segmented polyurethanes 142(1989)127

Polyvinylacetate

Enthalpies of solution of polyvinylalcohol in water and polyvinylacetate in dioxane 119(1987) 47

Polyvinylalcohol

Enthalpies of solution of polyvinylalcohol in water and polyvinylacetate in dioxane 119(1987) 47

Poly(vinyl alcohol) derivative

Thermal stability of invertase immobilized on superfine filaments of a poly(vinyl alcohol) derivative 123(1988)183

Polyvinylbenzyltriphenylphosphonium chloride

Kinetic study of the thermal decomposition; of polyvinylbenzyltriphenylphosphonium chloride (in French) 126(1988)213

Poly(vinyl butyral)

Application of evolved gas analysis to the study of poly(vinyl butyral) thermal stability 116 (1987)317

Polyvinylchloride

A comparison of various isothermal thermogravimetric methods applied to the degradation of PVC 106(1986)169

Poly(vinylmethyl ether)

Glass-transition temperatures of PVME-PS blends. Influence of the molecular weight of PS 114(1987)165

Pore size distribution

Quasi-equilibrium nitrogen adsorption gravimetry: comparison with volumetry for the determination of surface areas and pore size distributions 103(1987)89

Porosity

The effect of grinding on porosity and mechanochemical transformations in Al_2O_3 powders 148(1989)301

Porous materials

Preliminary experiments on phase transition of adsorbed gases on porous glass 103(1987)123

Diffusion and readsorption effects during TPD from porous materials 135(1988)147

The role of thermal analysis and calorimetry in the study of porous or divided materials (Review) 148(1989)183

Porphyric sands

Devitrification behaviour of a glass obtained from porphyric sands with addition of TiO_2 (4%) and MgO (8%) 150(1989)39

Porphyrin

Thermal and electrical studies on porphyrin compounds of cobalt(II), copper(II) and zinc(II) 143(1989)67

Portland cement

Hydration versus strength in a Portland cement developed from domestic mineral wastes — a comparative study 106(1986)93

Thermal monitoring of flash setting in portland cement clinkers 119(1987)235

Portland cement pastes

Estimation of the degree of hydration in modified ordinary portland cement pastes by differential scanning calorimetry 145(1989)203

Postmortem human brain

Characterization of proteinaceous material from postmortem human brain by differential scanning calorimetry 102(1986)15

Potassium

Ion association of Cl^- with Na^+, K^+, Mg^{2+} and Ca^{2+} in aqueous solution at $10 \leqslant T \leqslant 45\,^\circ C$ and $0 \leqslant I \leqslant 1$ mol l^{-1}. a literature data analysis 115 (1987)241

The thermal stability of $RBa_{2-x}K_xCu_3O_z$ (R = Y and Eu) 148(1989)275

Potassium aluminate

The standard formation data for $KAlO_2$ 124 (1988)241

Potassium bromate

Kinetic analysis of thermal decomposition reactions. I. Thermal decomposition of potassium bromate 111(1987)49

Potassium bromide

A galvanic bromine cell for measuring ΔG-values of solid-state reactions in the systems KBr/MBr_2 (M = Ca, Sr, Ba) 121(1987)343

Potassium carbonate

Thermal decomposition of cellulose and typha sap — evaluation of the catalytic activity of potassium carbonate 111(1987)27

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. III. K_2CO_3–$BaCO_3$ 124(1988)89

The reactions of some compounds of iron, cobalt and nickel with the molten lithium carbonate–sodium carbonate–potassium carbonate eutectic 132(1988)45

Potassium cerium ferrocyanide

Thermal analysis of some cyano compounds. Part II. Thermal behaviour of mixed $KLnFe(CN)_6 \cdot 4H_2O$ (Ln = La(III), Ce(III), Nd(III)) 128(1988)127

Potassium chlorate

Thermal decomposition of $KClO_4$ catalyzed by MnO_2–CuO mixed oxides systems 126(1988)17

Potassium chloride

A new evaluation of the relative apparent molar enthalpies of KCl in water at 298.15 K 117 (1987)105

Potassium cobalt(III) cyanide

Thermal decomposition of $K_3Co(CN)_5L$ in hydrogen atmosphere and the influence of reduced iron powder 130(1988)77

Potassium complexes

Kinetics of solid state decomposition of $K_3[Nb(O_2)_2F_4]$: TG study 138(1989)199

Potassium compounds

The thermal decomposition of $K_6[Mo_2I_2O_{16}] \cdot 8H_2O$ 107(1986)393

On the thermal decomposition of $K_3[HV_2O_2(O_2)_3F_4] \cdot 2H_2O(K_3[V_2O_2(O_2)_3F_3] \cdot 2H_2O \cdot HF)$ 111(1987)383

Kinetics of solid state decomposition of $K_2[V_2O_3(O_2)_2F_2]$: A TG study 118(1987)229

Kinetics of solid-state decomposition of $K_2[VO(O_2)_2F]$ by a TG study 125(1988)51

Potassium cyanoplatinite

Enthalpy of formation of solid $K_2Pt(CN)_4$ 131 (1988)99

Potassium dihalotetracyanoplatinates

Solid state kinetic parameters of the first decomposition of potassium dichlorotetracyanoplatinate(IV), dibromotetracyanoplatinate(IV) and diiodotetracyanoplatinate(IV) 104(1986)299

Potassium erbium phosphate

Study of the equilibrium diagram of the potassium metaphosphate-erbium phosphate system and the allotropic forms of the condensed phosphates $ker(po_3)_4$ (in French) 136(1988)139

Potassium fluoride

Hydration effects in reactions between aluminum and potassium fluorides 101(1986)169

The influence of potassium sulphate impurity on thermal reactions between aluminum and potassium fluorides 106(1986)163

Structural properties and chemical flux reactivities of aqueous suspensions of mixtures of potassium tetrafluoroborate and potassium fluoride 107(1986)321

Potassium fluoroaluminate

Dehydration kinetics of $K_2AlF_5 \cdot H_2O$ 149 (1989)53

Potassium halides

Aqueous solutions containing amino acids and peptides. Part 25. The enthalpy of interaction at 298.15 K of glycine with potassium halides 107 (1986)267

Potassium hexaiodotellurate(IV)

Standard enthalpies of formation of potassium rubidium and caesium hexaiodotellurate(IV) (in French) 138(1989)67

Potassium hydrogen sulphate

Study on the phase transition in potassium hydrogen sulphate crystals 132(1988)1

Potassium hydroxide

Investigation of latent heat-thermal energy storage materials. IV. Thermoanalytical evaluation of binary eutectic mixtures of NaOH with LiOH or KOH 121(1987)193

Potassium lanthanum ferrocyanide

Thermal analysis of some cyano compounds. Part II. Thermal behaviour of mixed $KLnFe(CN)_6 \cdot 4H_2O$ (Ln = La(III), Ce(III), Nd(III)) 128(1988)127

Potassium metaphosphate

Study of the equilibrium diagram of the potassium metaphosphate-erbium phosphate system and the allotropic forms of the condensed phosphates $ker(po_3)_4$ (in French) 136(1988)139

Potassium metasilicate

Thermodynamic properties of potassium metasilicate (K_2SiO_3) 122(1987)289

Potassium neodymium ferrocyanide

Thermal analysis of some cyano compounds. Part II. Thermal behaviour of mixed $KLnFe(CN)_6 \cdot 4H_2O$ (Ln = La(III), Ce(III), Nd(III)) 128(1988)127

Potassium niobium oxide

Kinetics of solid state decomposition of $K_3[Nb(O_2)_4]$ and $K_3[Ta(O_2)_4]$: a thermogravimetric study 136(1988)73

Potassium nitrate

Molten lithium nitrate–potassium nitrate eutectic: the reactions of some lead compounds 101(1986)19

Enthalpy of KNO_3 and $CaCl_2$ solution in water–hydrophilic urea derivatives mixtures 116 (1987)349

Reactions of single Cr(III)–P(V)Mo(VI) and double Cr(VI)–P(V)Mo(VI) phase systems in molten KNO_3 132(1988)155

Kinetic study of solid–solid reactions by DTA method ($BaCl_2$-KNO_3 system) 133(1988)209

Molten lithium nitrate–potassium nitrate eutectic: the reaction of tin(II) chloride 136 (1988)149

Molten lithium nitrate–potassium nitrate eutectic: the reaction of magnesium compounds 145(1989)227

Potassium nitrosodisulphonate

Potassium nitrosodisulphonate (fremy's salt) as a new redox thermometric titrant 118(1987)215

Potassium oxalate

The thermal phase transition of anhydrous potassium oxalate 131(1988)291

Potassium oxides

Thermal solid–solid interaction between potassium and manganese oxides 102(1986)21

Potassium phosphates

A DSC study of low temperature phase transitions in KH_2PO_4 and $NH_4H_2PO_4$ 148 (1989)289

Potassium picrate (KP)

Determination of the specific heat functions of PYX and KP by DSC 149(1989)123

Potassium pyrosulfate

Molten potassium pyrosulfate: the reactions of seven metal oxalates 114(1987)281

Molten potassium pyrosulfate: reactions of seven metal sulfides 140(1989)337

Potassium sulphate

Thermodynamic functions of gaseous lithium, sodium, potassium, rubidium and caesium sulfates 106(1986)51

The influence of potassium sulphate impurity on thermal reactions between aluminum and potassium fluorides 106(1986)163

Solid–liquid equilibria of the quaternary system $Na^+, K^+, Mg^{2+} \| SO_4^{2-} - H_2O$ a 25 °C (in French) 111(1987)295

Apparent molar heat capacities and volumes of aqueous $HClO_4$, HNO_3, $(CH_3)_4NOH$ and K_2SO_4 at 298.15 K 126(1988)245

Potassium tantalum oxide

Kinetics of solid state decomposition of $K_3[Nb(O_2)_4]$ and $K_3[Ta(O_2)_4]$: a thermogravimetric study 136(1988)73

Potassium tetrachromate

The reactions of potassium tetrachromate in three oxyanion melts 106(1986)369

Potassium tetrafluoroborate

Structural properties and chemical flux reactivities of aqueous suspensions of mixtures of potassium tetrafluoroborate and potassium fluoride 107(1986)321

Potassium tetraperoxochromate(V)

Thermolysis of potassium tetraperoxochromate(V) IV. Effect of additives on ordinary and self-propagating decomposition 102(1986)293

Potassium trimolybdate

Preparation of potassium trimolybdate by the thermal decomposition of a new oxomolybdenum(VI) oxalato complex 141(1989) 87

Potassium tris(malonato)ferrate(III) trihydrate

Mössbauer study of the thermal decomposition of potassium tris(malonato)ferrate(III) trihydrate 101(1986)35

Potassium uranate

Thermal decomposition of tetrakisoxalatouranates(IV) of mixed metals: characterisation of a new potassium uranate phase 111(1987)67

Potentiometry

Analytical properties of the amidoxime group. Potentiometric and thermometric behaviour of ethanediamidoxime 142(1989)135

Powdered solids

Thermal effects induced by imperfections in powdered solids 110(1987)319

Powellite

Formation of scheelite ($CaWO_4$) and powellite ($CaMO_4$) by displacement reactions 133(1988) 125

Power compensation

Theoretical analysis of peak height in classical DTA, power-compensated DSC and heat-flux DSC 107(1986)277

Pozzolanic reaction

DTA study of the influence of lime content of low-calcium fly ashes on the Pozzolanic reaction 145(1989)87

Praseodymium

Thermal analysis in the M-Ba-Cu-O systems (M = Y, La, Pr) in relation to high T_c superconductors 133(1988)17

Praseodymium complexes

Thermal decomposition of complexes $[Co(NH_3)_6](M^I)_3[Ln(SO_4)_3]_2 \cdot nH_2O$ (M^I = NH_4, Rb; Ln = La, Ce, Pr) 126(1988)289

Praseodymium compounds

Solution studies on tris(2-hydroxy-3-(3-methyl-2-butenyl)-1,4-naphthalenedione semicarbazonato) M^{3+} (M = praseodymium or neodymium) 116(1987)377

PH-metric studies on tris(*p*-chlorobenzaldehyde-thiosemicarbazonato)M(III) (M = Pr, Nd) 120 (1987)357

Kinetic and x-ray powder diffraction studies on hydrated tris(indole-3-acetato)M(III) (M = Ce, Pr, Nd) 126(1988)393

Praseodymium(III) compounds

Equilibrium analysis of Nd(III)–NAA, Pr(III)–NAA and Ce(III)–NAA systems 144 (1989)173

Praseodymium(III) nitrate

The thermal decomposition of lanthanum(III), praseodymium(III) and europium(III) nitrates 124(1988)277

Praseodymium(III) systems

Equilibrium analysis of La(III)– and Pr(III)–3-methyl-5-hydroxy-1,4-naphthalenedione systems 115(1987)385

Pre-exponential factor

Estimation of the pre-exponential factor in the isoconversional calculation of effective kinetic parameters 128(1988)297

Precipitation

Thermal behavior in air of iron oxyhydroxides obtained from the method of homogeneous precipitation. Part I. Goethite samples of varying crystallinity 124(1988)359

Thermal behaviour in air of iron oxyhydroxides obtained from the method of homogeneous precipitation. Part II. Akaganeite sample 129 (1988)325

Calorimetric investigations of calcium phosphate precipitation in relation to solution composition and temperature 131(1988)47

γ precipitates in β-Cu–Zn–Al: influence on martensitic transformations 145(1989)237

Thermal decomposition of precipitates from aqueous aluminium phosphate solution by reaction with alkali 148(1989)295

Precision

Differential scanning calorimetry leads to high precision for water in zeolites determined by thermogravimetry 126(1988)397

Precursors

Thermal decomposition of some double oxalates, precursors of the oxides Na_2MO_3; M = Sn, Ge, V and Ti (in French) 106(1986)1

Thermal analysis of silicalite-1 precursors 127 (1988)319

Tetraalkylammonium silicates gels as precursors to zeolites of different structures 135(1988)353

Precursor states

Precursor states for the graphitization of naphthalene, anthracene, phenanthrene and chrysene 108(1986)211

Prediction

Prediction of thermodynamic equilibrium properties from mutual solubility data 120 (1987)63

Correlation and prediction of vapour–liquid equilibria in ternary systems formed by hydrocarbons 142(1989)59

Premelting

Emission thermophotometry. V. Premelting light emission of some nylon polymers 143(1989)181

Prigogine–Flory–Patterson model

Molar excess volumes of binary mixtures of ethylbenzene with *n*-alkanes at 298.15 K; an interpretation in terms of the Prigogine–Flory–Patterson model 114(1987)337

Primary explosives

The relationship between ignition temperature and thermal stability for selected primary explosives 105(1986)287

Processing

Processing of thermoanalytical curves and exact use of thermal analysis 110(1987)81

Processing temperature

A thermogravimetric index for the prediction of the processing temperature of $REBa_2Cu_3O_{7-x}$ high T_c superconducting materials 133(1988)27

Promethium trifluoride

Vapor pressure of promethium trifluoride 140 (1989)287

Propane

Thermodynamics and distribution of equilibrium compositions in LPG–O_2 detonation behind an initial shock wave 126(1988)279

Propanoic acid

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions containing propanoic acid or butanoic acid with association in both phases 142(1989)351

Thermodynamics of associated solutions: vapour–liquid equilibrium for the acetic acid–propanoic acid and propanoic acid–water systems with association in both phases 143 (1989)253

2-Propanol

Liquid–liquid equilibria for the acetonitrile– 2-propanol–saturated hydrocarbon and acetonitrile–isobutanol–saturated hydrocarbon systems 127(1988)109

Propanol

Liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol–saturated hydrocarbon mixtures 119(1987)357

Studies on thermodynamic properties of binary systems containing alcohols. VII. Temperature dependence of excess enthalpies for *n*-propanol + benzene and *n*-butanol + benzene 123(1988) 285

Isobaric expansivities of the binary mixtures $C_3H_7(OH) + C_nH_{2n+2}$ ($n = 11, 12$) between 288.15 and 318.15 K 131(1988)57

Use of the modified Wilson equation for description of vapor–liquid equilibrium in the system 1-nonyne–1-propanol 140(1989)49

2-Propanone

Molar excess enthalpies, molar excess volumes and molar isentropic compressions of mixtures of 2-propanone with heptane, benzene and trichloromethane at 298.15 K 113(1987)141

Propellants

A thermoanalytical study of the decomposition of a double-base propellant 101(1986)373

Thermal decomposition studies of solid propellant binder HTPB 138(1989)189

***n*-Propyl chloroformate**

Standard enthalpies of formation of n-propyl chloroformate and benzyl chloroformate via solution calorimetry 116(1987)65

Propylene carbonate

Complex formation of cobalt(II) and copper(II) with macrocyclic polyethers in propylene carbonate 137(1988)331

Propylene glycol

Thermodynamic properties of single ions in propylene glycol and its aqueous mixtures 108 (1986)133

Protein

Thermal analysis of protein-carbohydrate mixtures in oxygen 114(1987)109

Proteinaceous material

Characterization of proteinaceous material from postmortem human brain by differential scanning calorimetry 102(1986)15

Protein crystals

Thermophysical properties of protein crystals: thermal diffusivity measurements of methemoglobin single crystals using a dielectric heating technique 141(1989)235

Protonation

Solvent effect on the protonation of some purines, pyrimidines and related compounds 127(1988) 125

A calorimetric study of the protonation process of some indole derivatives in acetonitrile. Correlations with electro-oxidation and ionization potentials 138(1989)27

Thermodynamics of the protonation of some polyelectrolytes 142(1989)165

The effect of background on the protonation of pyridine: a complex formation model 143(1989) 289

Proton delocalization

Kinetic aspects of the thermal treatment of acid crystallohydrate, $MgHPO_4 \cdot 3H_2O$. Part 1. Changes in the IR spectra and proton delocalization 116(1987)131

Proximate analysis

Calorific value of lignites from proximate analysis 107(1986)291

Pseudo-alkali halides

Relation between heats of formation of alkali and pseudo-alkali halides and electronegativities of halogen ions 108(1986)189

Psychotherapeutic substances

Thermoanalytical study of psychotherapeutic substances. VI. Butobarbital 147(1989)17

Publication

Report on the workshop: education, publication and standardization in thermal analysis 110 (1987)23

Pulse method

Measurement of the specific heat capacity of steels using the pulse method (in German) 119 (1987)203

Purine

Thermal studies on purine complexes. XII. Thermal behaviour of some metal complexes of hypoxanthine 103(1986)305

Purine complexes

Thermal studies on purine complexes. XI. Thermal behaviour of 2-thioxanthine, its chlorohydrate and some thioxanthine complexes of Ag(I), Cd(II), Hg(II) and Hg(I) 102(1986)149

Thermal studies on purine complexes. XIII. Bromo complexes of some alkylxanthine derivatives 115(1987)45

Thermal studies on purine complexes. Part XIV. Thermal behaviour of 8-ethyl-1-methylxanthine, 8-ethyl-1,3-dimethylxanthine and some of their metal complexes 130(1988)229

Thermal studies on purine complexes. XV. Thermal behaviour of some new complexes of 8-ethylxanthine and 8-ethyl-3-methylxanthine 140(1989)13

Thermal studies on purine complexes. XVI. Thermal behaviour of some metal complexes of 6-thioguanine 144(1989)347

Purines

Heats of solution of some pyrimidines, purines and related compounds in dimethylsulfoxide 126(1988)155

Solvent effect on the protonation of some purines, pyrimidines and related compounds 127(1988) 125

Purity

Calorimetric determination of purity by simulation of DSC curves 129(1988)309

Pyrazine-2,3-dicarboxylic acid compounds

Thermal and electrical studies on pyrazine-2,3-dicarboxylic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 124 (1988)345

Pyridine

Isothermal liquid–vapour equilibrium of the systems pyridine–*n*-hexane and pyridine–*n*-heptane (in French) 102(1986)271

Thermal studies on molybdenum(IV) dialkyl dithiocarbamate adducts with pyridine 108 (1986)1

Thermogravimetric analysis of cobalt(II) halide complexes with a series of substituted pyridine ligands 113(1987)161

Thermal decomposition of solid complexes of cadmium chloride with substituted pyridines 128(1988)225

Thermodynamics of complex formation reactions in non-aqueous solvents. Part I. Reactions of silver(I) with pyridine and related ligands in acetone 114(1987)295

Solid and solution complexes of copper(II) acetate with pyridine: stoichiometry, spectral and thermodynamic characteristics 117(1987)59

The enthalpies of solution of tetraphenylsilane in pyridine–other solvent mixtures 117(1987)237

Study of some solvated copper(II) adipates. I. Complexes with water, ammonia and pyridine (in French) 125(1988)23

Enthalpy of maleic anhydride polymerization in the presence of pyridine 132(1988)161

Desorption of presorbed ammonia, triethylamine and pyridine from the acid sites of mordenites via differential scanning calorimetry 132(1988) 257

Solid–liquid phase diagram of the binary system pyridine + sulfolane 139(1989)1

The effect of background on the protonation of pyridine: a complex formation model 143(1989) 289

Thermodynamics of complex formation reactions in non-aqueous solvents. part 3. the reaction of $VO(acac)_2$ with pyridine 145(1989)353

Solute–solvent interactions in electron donor–acceptor–solvent systems: pyridine or quinoline derivatives, with molecular iodine 146(1989)125

Pyridine-2,3-dicarboxylic acid compounds

Thermal studies on pyridine-2,3-dicarboxylic acid compounds of manganese(II), iron(II), cobalt(II) and nickel(II) 116(1987)275

Pyridinium pentafluorotellurate(V)

Calorimetric study of ammonium and pyridinium pentafluorotellurates(V) at low temperatures (in French) 120(1987)47

3-(3-Pyridyl)acrylic acid

Thermal, spectral, magnetic and electrical studies of cobalt(II) and nickel(II) with 3-(3-pyridyl)acrylic acid 137(1988)205

2-Pyrilideniminobenzohydroxamic acid

Solid complexes from 2-benzylideniminobenzohydroxamic, 2-pyrilideniminobenzohydroxamic and 2-salicylideniminobenzohydroxamic acids with Fe(III) and Cu(II) 143(1989)85

Pyrimidine complexes

The stability and thermodynamic functions of 4-amino-1,6-dihydro-1-methyl-2-methylthio-5-nitroso-6-oxo-pyrimidine complexes with Mn(II), Fe(II), Co(II), Ni(II) and Cu(II) 108(1986)181

Pyrimidine compounds

Study of the thermal stability of 6-substituted-1,3-dimethyl-2,4-dioxo-1,2,3,4-tetrahydropyrrolo-[2,3-*d*]-pyrimidines 105(1986)65

Pyrimidines

Heats of solution of some pyrimidines, purines and related compounds in dimethylsulfoxide 126(1988)155

Solvent effect on the protonation of some purines, pyrimidines and related compounds 127(1988) 125

Pyrite

The effect of experimental variables on the multiple peaking phenomenon observed during the oxidation of pyrite 135(1988)267

The effect of experimental variables on the mechanism of the oxidation of pyrite. Part 1. Oxidation of particles less than 45 μm in size 145(1989)115

Pyroaurite

Changes in textural properties derived from the thermal decomposition of synthetic pyroaurite 113(1987)79

Pyrochlores

Thermal behaviour of hydrated pyrochlores $K(NbW)O_6 \cdot H_2O$ and $K(TaW)O_6 \cdot H_2O$ 120 (1987)41

Pyrolysis

Modelling of variation in properties of silicone sheet during pyrolysis with heating–cooling cycles 101(1986)347

Pyrolysis mass spectrometry of hexolic based polyesters 105(1986)19

The Method of Flash Vacuum Pyrolysis, Preparative Applications and Analytical Studies 112(1987)31

Pyrolysis and kinetics of non-isothermal decomposition of La(III)– and Th(IV)–phenoxymethyl penicillin complexes 115(1987)381

Pyrolysis of sodium analogs of $(NH_4)_3VO_2F_4$ 125(1988)229

Mechanistic modeling of the pyrolysis of *n*-heptane 127(1988)259

Modification in thermal decomposition products of polymers by catalytic pyrolysis 134(1988)301

Low-pressure and high-pressure pyrolysis 134 (1988)321

Oil shale pyrolysis – a new approach to the kinetic investigation of different kerogen type samples 134(1988)353

Investigation of thermal decomposition of HMX and RDX by pyrolysis–gas chromatography 138 (1989)167

The thermogravimetry and pyrolysis of date stones 147(1989)283

Geopolymers and synthetic polymers: A comparative study of the isothermal pyrolysis kinetic behavior 148(1989)405

A kinetic study of holm oak wood pyrolysis from dynamic and isothermal TG experiments 149 (1989)225

Pyrophyllite

Thermal analysis of pyrophyllite transformations 138(1989)267

Pyrosulphate

Thermogravimetric investigation of reactions between vanadium(V) compounds and pyrosulphate in alkali metal sulphate melts 121 (1987)121

Pyrotechnics

Times-to-ignition of pyrotechnics 106(1986)253

Temperature dependence of the burning velocity of gasless pyrotechnics 120(1987)203

Thermal analysis of pyrotechnics 120(1987)325

A thermo-analytical study of the pyrotechnic reactions of black powder and its constituents 134(1988)413

Pyrroaldehyde

Thermoanalytical studies on antimony(III) complexes with monochlorobenzoylhydrazones of 2-furaldehyde (FpClBHH), 2-pyrroaldehyde (PmClBHH) and 2-thiophenaldehyde (TpClBHH) as ligands 133(1988)329

Q

Quail

Direct and indirect calorimetry of the resting metabolism of Japanese quail (*Coturnix coturnix japonica*) 119(1987)157

Quartz

The effect of particle size on the determination of quartz by differential scanning calorimetry 120(1987)257

Powdered quartz tested by single crucible thermal analysis (SCTA) 126(1988)365

Determination of quartz in ceramics by dilatometry 135(1988)335

Heat capacity of α quartz from 298.15 to 847.3 K, and of β quartz from 847.3 to 1000 K—transition behaviour and revaluation of the thermodynamic properties 139(1989)225

The high-low inversion of quartz 148(1989)467

Quasi-adiabatic calorimeter

Calculation computer program for a quasi-adiabatic calorimeter 124(1988)185

Quasichemical theory

Thermodynamics of ketones + ether mixtures using a generalized quasichemical theory in terms of group surface interactions 136(1988)33

Quenching

Relationships between the quenching conditions and the relaxation enthalpy of Fe–Si–B amorphous ribbons 121(1987)223

Quinoline

Solute–solvent interactions in electron donor–acceptor–solvent systems: pyridine or quinoline derivatives, with molecular iodine 146(1989)125

Quinoxaline

Thermal and electrical studies on quinoxaline compounds of some first row transition metal ions 122(1987)403

R

Racemates

Thermotropic mesomorphic changes in racemic and meso lead(II) 9,10-dihydroxyoctadecanoates 122(1987)355

Radiation

Effects of temperature and ionizing radiation on some physical properties of developed zirconia refractories 113(1987)185

Radiation disorder

Emanation thermal analysis used to study annealing of radiation disorder 110(1987)237

Radium-226

Thermal characterization of commercial alumina with different preparation histories by emanation thermal analysis using Ra-226 parent isotope 109(1986)227

Radon

Thermal characterization and reactivity of metal oxide powders by emanation thermal analysis using Ra-226 parent isotope 110(1987)453

Raman spectroscopy

Degradation studies on nickel nitrate hexahydrate. Part 3. Raman and infrared analysis 101(1986)291

Rapid redox initiation

A study of rapid redox initiation by reaction calorimetry 118(1987)97

Rare earth antimonides

On the thermochemistry of the rare earth antimonides. The Dy–Sb system 129(1988)99

Rare earth molybdates

Differential scanning calorimetric studies of ferroelectric rare-earth molybdates 145(1989)11

Rare earth phosphates

DTA study of the rhabdophane to monazite transformation in rare earth (La–Dy) phosphates 108(1986)65

Rare earths

Thermal analysis of hydrated rare-earth trifluoromethanesulfonate complexes with *trans*-1,4-dithiane-1,4-dioxide (TDTD) 107(1986)387

Thermal decomposition of rare earth trifluoromethanesulfonate complexes with dimethylformamide (DMF) 120(1987)351

Synthesis of the hydrates of chlorinated acetates of rare earths and their thermal behaviour 123 (1988)23

Determination of standard molar enthalpies of formation for rare earth isothiocyanate hydrates 123(1988)43

A thermogravimetric index for the prediction of the processing temperature of $REBa_2Cu_3O_{7-x}$ high T_c superconducting materials 133(1988)27

Synthesis of rare earth coordination compounds of salicylaldehyde-β-alanine Schiff base and their thermal behaviours 133(1988)377

Characterisation of the ammonium rare earth mixed tripolyphosphates $NH_4LnHP_3O_{10}$ (Ln = Nd, Ho, Er) (in French) 147(1989)241

Rate constants

Some comments on the use of avrami–erofeev expressions and solid state decomposition rate constants 104(1986)93

Rate equations

Some problems concerning the mathematical theory of non-isothermal kinetics. I. Reactions described by rate equations of the form $d\alpha/dt = Ak(T)f(\alpha)$ 111(1987)335

On the use of the degree of conversion in the rate equations. II 111(1987)349

Rate expression

Comments on the note "on the correct rate expression in nonisothermal kinetics" by C. Popescu, M. Stan and E. Segal 143(1989)355

Rate law

The rate law of Nth-order in thermal analysis 110(1987)135

Raw material

The effect of raw material type on the characteristics of Mg-Al double hydroxides synthesized by hydrothermal method 133(1988) 119

Reaction calorimetry

Reaction calorimetry for the development of chemical reactions 114(1987)83

Reaction kinetics

Reaction kinetics at linearly increased temperature. V. DTA and UV study of the oxidation of malonic, tartronic, glyoxylic and monobromomalonic acids by ceric sulphate in dilute sulphuric acid 101(1986)245

Methodology of studying reaction kinetics by thermal analysis 110(1987)87

Reaction kinetics in thermal analysis: a brief survey of fundamental research problems 110 (1987)95

Reaction mechanism

An analysis of the Reich and Stivala algorithm for determining the reaction mechanism from TG data 118(1987)261

Reaction rates

Application of microcalorimetry for analysing initial rates of enzymatic reactions 103(1986)297

Reactive materials

A technique to measure the specific heat of reactive materials by heat flow calorimetry 130 (1988)335

Reactive solid surfaces

Thermal decomposition and the creation of reactive solid surfaces. V. The genesis course of the WO_3 catalyst from its ammonium paratungstate precursor 129(1988)187

Thermal decomposition and creation of reactive solid surfaces. VI. Thermal genesis course of titania catalyst from a novel ammonium titanyl oxalate precursor 150(1989)153

Reactivity

Structure and reactivity of solids (Invited Lecture) 135(1988)59

Internal and external parameters determining properties and reactivity of solids 137(1988)11

Preparation and thermal reactivity of magnesium metavanadates 143(1989)325

Readsorption

Diffusion and readsorption effects during TPD from porous materials 135(1988)147

Reciprocal systems

Mixed interaction terms in the use of Pitzer equations: application to the heat capacities of the reciprocal system $Na^+/K^+/Cl^-/SO_4^{2-}/H_2O$ at high temperatures 145(1989)61

Redlich–Kister polynomials

Partial Gibbs energies from Redlich–Kister polynomials 129(1988)71

Redlich–Kwong equation

Application of modified Redlich–Kwong equation for unsaturated vapour and liquid states 116(1987)209

Redox products

Related thermal analyses and spectrophotometric studies on iodine redox products of aminophenols 111(1987)103

Structure identification of substituted phenol redox products by: thermogravimetric and differential thermal analysis 113(1987)117

Redox reaction

The kinetics and thermochemistry of the redox reaction between iodine and phenol derivatives. I. With *ortho*-bromophenol 101(1986)325

Reduced-time plot

Method of the selection of the $g(\alpha)$ function based on the reduced-time plot 122(1987)339

Reduction

A study of the reduction of molybdenum trioxide on a carbon support using thermogravimetry/mass spectrometry 127(1988)1

Thermal analysis studies on the initial stages of iron oxide reduction 101(1986)107

Thermogravimetric studies of the hydrogen reduction of nickel tungstate 103(1987)175

The hydrogen reduction of iron ore sinters 103 (1987)181

Rhenium oxide-containing metathesis catalysts: a study of temperature programmed reduction and thermal analysis 105(1986)135

On the role of the boudouard reaction in the isothermal reduction of iron ore by char and graphite 111(1987)89

Reduction of iron ore under rising temperature and fluctuating temperature conditions 111 (1987)143

Studies on the reduction of iron/tungsten mixed oxides 112(1987)221

The effect of gangue components on the reduction of manganosite by graphite: an isothermal kinetic study 112(1987)365

Effect of carbon and silica on the reduction of calcium sulfate 114(1987)389

Reduction reactivity of $CuO-Cr_2O_3$ mixed oxides with hydrogen and the effect of gamma pre-irradiation 119(1987)261

The effect of admixtures on the reduction of cassiterite by graphite 124(1988)109

Kinetic model for the carbothermic reduction of manganese dioxide 125(1988)99

The effect of catalysts during the carbothermic reduction of manganese dioxide 125(1988)107

The effect of additives on the reduction of chromite by graphite: an isothermal kinetic study 127(1988)25

The use of DSC to study the selective catalytic reduction of NO with NH_3 133(1988)169

Reduction of $Ba_2YCu_3O_7$ and $Y_2Cu_2O_5$ BY H_2 137(1988)373

Kinetics of $SrSO_4$ reduction with CO 138(1989)55

The reduction of manganese nodules by hydrogen 144(1989)313

Reference materials

Biological standard reference materials for the calibration of differential scanning calorimeters: di-alkylphosphatidylcholine in water suspensions 107(1986)37

Studies on ICTA reference materials using simultaneous TG-DTA 114(1987)53

Reforming catalysts

Evaluation of thermal stability of some reforming catalysts 127(1988)217

Refractive index

Excess Gibbs energy of mixing and refractive index of binary solutions of acetonitrile and of dimethylsulfoxide with several aromatic hydrocarbons 138(1989)19

Refractories

Progress in the thermal analysis of oxides and refractories 110(1987)449

Application of high-temperature thermal methods to the investigation of refractory and related materials 110(1987)459

Refractory adsorbents

Thermochemistry of alkali interactions with refractory adsorbents 131(1988)141

Regeneration

Kinetics of the thermal regeneration of spent activated carbon in a fluidized bed 136(1988)179

Rehydration

Systematic exploration of the rehydration kinetics of a reversible salt. II. Test of the generalization of the kinetic laws (in French) 108(1986)289

Systematic investigation of the rehydration kinetics of a reversible salt. III. Role of the initial mass of the sample (in French) 126(1988) 265

X-ray studies on dehydration and rehydration of expansible clay minerals 135(1988)285

Reich and Stivala algorithm

An analysis of the Reich and Stivala algorithm for determining the reaction mechanism from TG data 118(1987)261

Reich and Stivala computer algorithm

On the experimental evaluation of a Reich and Stivala computer algorithm by House et al. 130 (1988)381

A reply concerning the Reich and Stivala computer algorithm to determine mechanism 131(1988)297

Relaxation

Relationships between the quenching conditions and the relaxation enthalpy of Fe–Si–B amorphous ribbons 121(1987)223

Reliability

Problems of the reliability of kinetic data evaluated by thermal analysis, e.v. boldyreva 110(1987)101

Report on the workshop: current problems of kinetic data reliability evaluated by thermal analysis 110(1987)101

How (un)reliable are kinetic data of reversible solid-state decomposition processes? 110(1987) 145

Renewable resources

Application of differential scanning calorimetry (DSC) to characterization of components in renewable resources 119(1987)169

Representation of relationships

On the representation of relationships obtained by thermal characterization techniques 124 (1988)1

Reservoir rocks

Thermogravimetric determination of the fluid constituents in reservoir rocks 106(1986)373

Resins

Studies on the thermal decomposition of thermosetting aniline–formaldehyde resins 119 (1987)321

Thermochemical study of ion-exchange processes. V. Sorption of copper ions in complex-forming resins 139(1989)327

Resistance

Interpretation of DSC curves of the indium melting process and determination of the thermal resistance R, thermal time constant RC_s and least separation temperature L 137(1988)307

Resolution

Interpretation of TG curves with help of high resolution mass spectrometry 114(1987)29

Retinoids

Thermotropic behaviour of dipalmitoylphosphatidylcholine lipsomes containing retinoids 122(1987)117

Reversible salt

Systematic exploration of the rehydration kinetics of a reversible salt. II. Test of the generalization of the kinetic laws (in French) 108(1986)289

Systematic investigation of the rehydration kinetics of a reversible salt. III. Role of the initial mass of the sample (in French) 126(1988) 265

Rhabdophane

DTA study of the rhabdophane to monazite transformation in rare earth (La–Dy) phosphates 108(1986)65

Rhenium(II) coordination compounds

Structural and thermal studies on mixed ligand co-ordination compounds of Pd(II), Rh(III) and Pt(II) with 3-(dimethyl-aminomethyl)indole and salicylaldoxime 140(1989)265

Rhenium oxide

Rhenium oxide-containing metathesis catalysts: a study of temperature programmed reduction and thermal analysis 105(1986)135

Rhodamine 6G

Thermal analysis of the adsorption of rhodamine 6G by smectite minerals 135(1988)299

Rhodium complexes

Solid state mechanism of the thermal dehydration of $[Rh(NH_3)_5(H_2O)]X_3$ ($X = Cl^-, Br^-, I^-$) 103(1986)353

Rhodium(II) complexes

Solid state kinetic parameters and mechanism for the deaquation–anation of hexacyanocobaltate(III) of aquopentaamminecobalt(III), rhodium(III) and iridium(III), calculated by isothermal DSC measurements 102(1986)137

Rhodium(III) complexes

Effect of substituents on the stability of rhodium(III) complexes. I. Methyl and sulphur substituted uracils 108(1986)73

Ribonuclease A

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of ribonuclease A in solution 128(1988)267

Rice straw

Studies on thermal decomposition of rice straw 120(1987)241

Rising temperature experiments

The application of kinetic parameters to the investigation of thermal stability determined from rising temperature experiments 113(1987)287

Correlation between isothermal and rising temperature experiments. Thermal decomposition of diammonium hydrophosphate 113(1987)305

Round-robin test

A round-robin test of the softening temperature of plastics by thermomechanical analysis 147 (1989)387

Round robin method

Thermal analysis of polymer samples by the round robin method. Part III. Heat capacity measurement by DSC 146(1989)311

Rubber

Effect of sample size and heating rate on cure reaction of rubber in DSC 108(1986)345

Effect of the enthalpy, sample size and heating rate on the cure reaction of rubber in DSC 112(1987)313

Comparative study of a reaction of low enthalpy (rubber cure) by DC and DSC 116(1987)111

Thermoanalytical studies of rubber oxidation: stabilization of natural rubber by two hexadentate macrocyclic ligands 126(1988)149

Rubber oxidation

Thermoanalytical studies of rubber oxidation: characterization of nitrile rubbers 113(1987)387

Thermoanalytical studies of rubber oxidation: stabilization of natural rubber by two hexadentate macrocyclic ligands 126(1988)149

Rubbers

Evaluation of outgassing processes of plastics and rubbers using on-line thermal desorption GC-FTIR-MS 134(1988)307

Rubidium chloride

Thermoanalytical investigations on the decomposition of double salts. Part II. The decomposition of double salts $MeCl \cdot MgCl_2 \cdot 6H_2O$ (Me = NH_4, Rb, Cs) 121(1987)151

Rubidium complexes

Thermal decomposition of complexes $[Co(NH_3)_6](M^I)_3[Ln(SO_4)_3]_2 \cdot nH_2O$ (M^I = NH_4, Rb; Ln = La, Ce, Pr) 126(1988)289

Rubidium hexaiodotellurate(IV)

Standard enthalpies of formation of potassium rubidium and caesium hexaiodotellurate(IV) (in French) 138(1989)67

Rubidium oxalate monohydrate

Thermal analyses of rubidium and cesium oxalate monohydrates 127(1988)159

Rubidium sulphate

Thermodynamic functions of gaseous lithium, sodium, potassium, rubidium and caesium sulfates 106(1986)51

Ruthenium

Simple kinetic–thermometric determination of submicrogram quantities of ruthenium based on its catalytic effect on the Ce(IV)–As(III) reaction 127(1988)209

The high temperature thermophysical properties of ruthenium and palladium 139(1989)99

Ruthenium catalysts

Characterization of supported ruthenium catalysts by thermal analysis 123(1988)121

Ruthenium oxide

The enthalpy of formation of RuO_2 129(1988)63

Rutile

Reaction of strontium sulfate with anatase and rutile below and above the phase transition temperature of strontium sulfate 119(1987)347

S

Saccharification

Differential scanning calorimetry in the saccharification of cellulose 123(1988)255

Salicylaldehyde-β-alanine

Synthesis of rare earth coordination compounds of salicylaldehyde-β-alanine Schiff base and their thermal behaviours 133(1988)377

Salicylaldoxime

Structural and thermal studies on mixed ligand co-ordination compounds of Pd(II), Rh(III) and Pt(II) with 3-(dimethyl-aminomethyl)indole and salicylaldoxime 140(1989)265

Salicylates

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some transition metal salicylato complexes 114 (1987)145

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some 5-substituted metal salicylato complexes 115(1987)255

Solid state decomposition studies on metal salicylates. Thermal decomposition of some lanthanide salicylato complexes 119(1987)285

Salicylideneaminofluorene

Thermal decomposition kinetics of salicylideneaminofluorene complexes of cobalt(II) and nickel(II) 101(1986)145

2-Salicylideniminobenzohydroxamic acid

Solid complexes from 2-benzylideniminobenzohydroxamic, 2-pyrilideniminobenzohydroxamic and 2-salicylideniminobenzohydroxamic acids with Fe(III) and Cu(II) 143(1989)85

Saline solutions

On the study by DSC of the unexpected ice melting at 0 °C of emulsified aqueous saline solutions 122(1987)123

Salt solutions

A composite description of mixed salt solutions 125(1988)347

A derivation of the cross-square rule in terms of a composite description of mixed salt solutions 125(1988)353

Samarium

Synthesis and physico-chemical studies on neodymium(III) and samarium(III) derivatives with mercapto triazoles 133(1988)359

Samarium(III) ions

Determination of stability constants and thermodynamic functions of L-lysine monohydrochloride with Sm(III), Bi(III) and Gd(III) metal ions 147(1989)401

Samarium nitrates

Thermal behaviour of samarium nitrate and oxide 111(1987)391

Samarium oxides

Thermal behaviour of samarium nitrate and oxide 111(1987)391

Samarium phosphate monohydrate

Thermal behavior of samarium phosphate monohydrate in the solid state 130(1988)155

Sample holder

Kinetic studies by thermogravimetry: the role of heat transfer of sample mass and of sample holder design on metal hydride kinetic results 103(1987)51

Sample size

Effect of heating rate and sample size on heat transfer through the sample in DSC 103(1986)341

Effect of the enthalpy, sample size and heating rate on the cure reaction of rubber in DSC 112(1987)313

Effect of sample size and heating rate on the DSC process for reactions of high enthalpy 126 (1988)81

Sample size: heating rate

Effect of sample size and heating rate on cure reaction of rubber in DSC 108(1986)345

Sampling device

A solid sampling device for use in batch solution calorimetry 124(1988)99

Sand

Determination of the state of cure of epoxy resin used in composite with sand 102(1986)93

Application of DTA in the investigation of moulding sands 135(1988)341

Saran degradation

Determination of the principal defect site responsible for Saran degradation using thermogravimetric analysis 134(1988)207

Saturated hydrocarbon

Liquid–liquid equilibria for the acetonitrile– 2-propanol–saturated hydrocarbon and acetonitrile–isobutanol–saturated hydrocarbon systems 127(1988)109

Saturated hydrocarbons

Liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol–saturated hydrocarbon mixtures 119(1987)357

Saturated vapours

Correlation of the thermal conductivity of saturated vapours 141(1989)113

Scale values

On the sensitivity of scale values in the arrhenius equation 124(1988)235

Scandium

Thermal behaviour of mixed tungstates $ASc(WO_4)_2$ (A = Li, Na, K, Rb AND Cs) 144 (1989)151

Scandium sulfite

Studies on lanthanoid sulfites. Part VI. Thermogravimetric study of scandium sulfite pentahydrate 114(1987)153

Scanning microcalorimeters

Three generations of scanning microcalorimeters for liquids 139(1989)257

Scanning mode

Modelling in calorimetry working under isothermal conditions or in scanning mode 114 (1987)15

Scheelite

Formation of scheelite ($CaWO_4$) and powellite ($CaMO_4$) by displacement reactions 133(1988) 125

Schiff base ligands

Thermal decomposition behaviour of thorium(IV) complexes with furfurylidene arylamine Schiff base ligands 125(1988)17

On the formation of mononuclear and binuclear complexes of pentadentate N_4O_2 Schiff base ligands with Co(II), Ni(II) and Cu(II) ions: TGA, spectral and conductance studies 126(1988)235

Schiff bases

The electrical properties of some 2-aminopyrimidine and 2-aminopyrazine Schiff bases 114(1987)257

Electrical properties of charge transfer complexes of 2-aminopyrimidine and 2-aminopyrazine Schiff bases with nitrobenzene derivatives 114 (1987)265

Spectral and thermogravimetric studies on thorium(IV) complexes with bidentate heterocyclic Schiff bases 130(1988)319

Thermochromism in Ni(II) complexes with Schiff base derivatives of 4-aminoantipyrine 131(1988)1

Synthesis of rare earth coordination compounds of salicylaldehyde-β-alanine Schiff base and their thermal behaviours 133(1988)377

Thermochromism and thermal decomposition of V(III) and VO(IV) COMPLEXES WITH Schiff base derivatives 137(1988)189

Preparation of novel non-symmetrical Schiff bases using solid state reactions 141(1989)19

Thermal synthesis of novel 'half unit' Schiff bases 141(1989)245

Schottky type defects

May Schottky type defects in metals be studied by analysing their specific heat data? 135(1988) 179

Screening

Safety screening of chemicals 134(1988)451

Second virial coefficient

Correlation of second virial coefficient for polar fluids 145(1989)257

Seeds

Determination of water in plant samples: a comparative thermogravimetric and nmr study on different species of seeds 105(1986)179

Selenites

Thermal and thermodynamic properties of the selenites of the elements from group IV in the periodic table 146(1989)15

Selenium

Physical properties and structural studies of $Se_{100-x}Sb_x$ 116(1987)35

New contribution in the study of the Bi_2Te_3-Bi_2Se_3 system 122(1987)135

Crystallization kinetics of some Ge-Sb-Se glasses 133(1988)293

Study of the thermodynamic properties of liquid selenium-tellurium alloys. Part I. Determination of thermodynamic properties by EMF cell method (in French) 136(1988)87

Study of the thermodynamic properties of liquid selenium-tellurium alloys. Part II. Determination of thermodynamic properties by calorimetry and study of the structural properties of liquid selenium-tellurium alloys (in French) 136(1988) 103

Crystallization kinetics of amorphous $Ge_{20}Se_5Te_{75}$ 140(1989)155

Kinetic study of isothermal and continuous heating crystallization in $Se_{100-x}Bi_x$ ($x \leqslant 8$) glasses 144(1989)123

Semiconductors

Possibilities of emanation thermal analysis for the characterization of semiconducting glasses 110(1987)437

Design and testing of a microcalorimeter with semiconductor thermopiles as temperature sensor and study of the inclusion of Cu(II) with β-cyclodextrin 123(1988)85

Sensitivity

On the sensitivity of scale values in the arrhenius equation 124(1988)235

Sensor

The longitudinally oscillating ribbon as a sensor for mass changes in controlled atmospheres 112 (1987)67

Separation

Interpretation of DSC curves of the indium melting process and determination of the thermal resistance R, thermal time constant RC_s and least separation temperature L 137(1988)307

Sepiolite

Thermal analysis study of the adsorption of D_2O by sepiolite and palygorskite 135(1988)291

Infrared study of the thermal treatment of sepiolite and palygorskite saturated with organic amines 148(1989)445

Service performance

Thermogravimetric assessment of service performance of DS-11 lube oils 101(1986)9

Shampoos

Thermal decomposition of shampoos 113(1987) 199

Shape factors

Use of the "shape factors" as an empirical method to determine the actual characteristic temperatures of binary phase diagrams by differential scanning calorimetry 128(1988)45

Shape index

Analysis of the shape index of DTG or DTA curves under a hyperbolic or logarithmic schedule 103(1986)317

Shape memory alloys

Thermal analysis and DSC: the hysteresis cycle in shape memory alloys 145(1989)101

Sheet materials

A method for the determination of thermal conductivity of sheet materials by differential scanning calorimetry (DSC) 126(1988)93

Shock wave

Thermodynamics and distribution of equilibrium compositions in LPG–O_2 detonation behind an initial shock wave 126(1988)279

Shrinkage

Thermal shrinkage stress relaxation in PET high speed spun yarns 134(1988)283

Side chain structure

Effect of the side chain structure on the glass transition temperature. Part 3. Molecular weight dependence of T_g in some poly(thiocarbonates) 130(1988)289

Effect of the side chain structure on the glass transition temperature. Part 4. Molecular weight dependence of T_g in chalcogenides containing poly(methacrylates) 146(1989)137

Siderite

Thermal decomposition kinetics of siderite 102 (1986)101

Influence of grinding on both the stability and thermal decomposition mechanism of siderite 135(1988)219

Signal processing

Signal processing in time-varying calorimeters for the study of continuous liquid mixtures 107 (1986)149

Signal treatment

Signal treatment in microcalorimetry: application to kinetics and thermodynamics (in French) 105 (1986)333

Silica gel

Some features of the interaction of silica gel with organic bases 104(1986)111

Silicalite 1

The effect of grinding on the thermal behaviour of tetrapropylammonium occluded in silicalite 1 135(1988)403

Silicalite-1 precursors

Thermal analysis of silicalite-1 precursors 127 (1988)319

Silicates

Thermal and Mössbauer studies of iron-containing hydrous silicates. VII. Glauconite 136(1988)247

Silicious mordenites

Differential molar heats of adsorption of ammonia on silicious mordenites at high temperature 143(1989)299

Silicon

The energetics of phase transitions in the system $Na_{1+X}Zr_2Si_XP_{3-X}O_{12}$, $1.9 \leq X \leq 2.5$ 106 (1986)57

Simultaneous thermoanalytical examinations of Si–$X_2S_2O_8$ (X = Na, K) binary systems 108 (1986)157

Thermal decomposition of silicon derivatives of cinchocaine 116(1987)79

Relationships between the quenching conditions and the relaxation enthalpy of Fe–Si–B amorphous ribbons 121(1987)223

Thermodynamic evalution of the Ag–Si system 130(1988)33

Structural relaxation and crystallization of $Fe_{78}B_{13}Si_9$ amorphous ribbons studied by dilatometry and differential scanning calorimetry 130(1988)177

A thermodynamic evaluation of the Au–Ge and Au–Si systems 141(1989)217

Structural, thermal and electrical studies of complexes of silicon with some first row transition elements 146(1989)317

Silicon carbide

Heat capacity of $2Al_4C_3 \cdot SiC$ from 447 to 1447 K and enthalpy of peritectic decomposition of Al_4C_3, $2Al_4C_3 \cdot SiC$, and $Al_4C_3 \cdot SiC$ 115(1987) 11

Silicon dioxide

Studies of the silicon dioxide-dolomite system by thermal analysis 148(1989)473

Silicone sheet

Modelling of variation in properties of silicone sheet during pyrolysis with heating–cooling cycles 101(1986)347

Silicon oxide

Effect of carbon and silica on the reduction of calcium sulfate 114(1987)389

Nucleation and crystal growth in a $0.9Li_2O \cdot 0.1BaO \cdot 2SiO_2$ glass: a DTA study 120(1987)217

DSC study of chemically modified porous silica powders 134(1988)457

Silicon tetrachloride

TG study on the reaction of γ-alumina with $SiCl_4$ 107(1986)175

Silver

Phase studies in the systems Ag_2Te-Ga_2Te_3, ZnSe-In_2Se_3, and ZnS-Ga_2S_3 112(1987)89

Standard potentials of silver–silver bromide electrode in water–dimethylformamide mixtures at different temperatures and the related thermodynamic quantities 112(1987)341

Standard thermodynamics of transfer. IV. The silver and silver salt electrodes in acetic acid + water mixtures at 25 °C 115(1987)111

Standard thermodynamics of transfer V. The silver and silver salt electrodes in *t*-butyl alcohol–water mixtures at various temperatures 119(1987)337

Standard thermodynamics of transfer. III. Silver and silver salt electrodes in water + mono- and + dihydric alcohol mixtures 121(1987)353

Critical assessment of thermodynamic data for the Ag–Ge system 130(1988)25

Thermodynamic evalution of the Ag–Si system 130(1988)33

The ternary system silver–antimony–tellurium. Study of the subternary Sb_2Te_3–Ag_2Te–Te 131 (1988)37

A thermodynamic evaluation of the Ag–Sn system 136(1988)45

Thermodynamics of silver–silver ion electrode in acetonitrile–water mixtures 144(1989)267

Silver bromide

Standard potentials of silver–silver bromide electrode in water–dimethylformamide mixtures at different temperatures and the related thermodynamic quantities 112(1987)341

Theoretical contribution of solvation of AgBr in some organic solvents at 25 °C 128(1988)99

Silver carbonate

Thermal decomposition of silver carbonate 1. Differential thermal gas analysis 138(1989)257

Thermal decomposition of silver carbonate. Part II. Cyclic differential thermal analysis 143(1989) 319

Thermal decomposition of silver carbonate. Part III. High temperature X-ray diffraction analysis 146(1989)177

Silver(I)

Thermodynamics of complex formation reactions in non-aqueous solvents. Part I. Reactions of silver(I) with pyridine and related ligands in acetone 114(1987)295

Thermodynamics of complex formation reactions in non-aqueous solvents. Part 2. Reaction of silver(I) with *N,N,N′,N′*-tetramethylene diamine in acetone, methanol and ethanol 127(1988)399

Silver(I) complexes

Thermal studies on purine complexes. XI. Thermal behaviour of 2-thioxanthine, its chlorohydrate and some thioxanthine complexes of Ag(I), Cd(II), Hg(II) and Hg(I) 102(1986)149

Influence of different donor atoms on the formation of 1 : 1- and 2 : 1-complexes of 12-crown-4 and 18-crown-6 ethers with Ag^+, Tl^{2+}, Ba^{2+} and Pb^{2+} 107(1986)219

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Silver iodide

The phase diagram AgI-SnI_2 112(1987)47

The phase diagram AgI–PbI_2 141(1989)293

The phase diagram AgI–ZnI_2 145(1989)93

Silver mercury iodide

Differential scanning calorimetry as a tool for evaluating preparation techniques, and detecting impurities, metastable states, etc. in silver mercury iodide (Ag_2HgI_4) 131(1988)191

Silver salts

Exoelectron emission accompanying the phase transformations in some silver salts 130(1988)329

Silver squarate

A thermoanalytical study of the thermal decomposition of silver squarate 127(1988)139

Simulation

Calorimetric determination of purity by simulation of DSC curves 129(1988)309

Simultaneous DSC-TG

Simultaneous DSC-TG up to 1700 K 112(1987) 131

Simultaneous TG-DSC

Introduction to a new simultaneous TG-DSC 111 103(1987)21

Simultaneous TG-DTA

Studies on ICTA reference materials using simultaneous TG-DTA 114(1987)53

Simultaneous TG-DTA-mass spectrometry

A new integrated system for simultaneous TG-DTA-mass spectrometry 114(1987)47

Simultaneous TG-DTG-EGA

Simultaneous TG-DTG-EGA analysis for studies of kerogen 148(1989)533

Simultaneous TG–DSC

Simultaneous TG–DSC: a new technique for thermal analysis 121(1987)307

Simultaneous TG/DTG/DTA/EGA

Simultaneous TG, DTG, DTA and EGA thermoanalysis of hydrazinium sulfate 125 (1988)237

Single crucible thermal analysis

Powdered quartz tested by single crucible thermal analysis (SCTA) 126(1988)365

Single crystal materials

Polarizing microscopy for examining mechanisms of the decomposition of single crystal materials 133(1988)227

Single crystals

Further investigations on the thermoelectrical and photochemical properties of 2,5-distyrylpyrazine (DSP) and azodiisobutyronitrile (AIBN) single crystals 101(1986)1

Physico-chemical characterization of poly(*p*-phenylene sulphide) single crystals 149(1989)101

Single ions

Thermodynamic properties of single ions in propylene glycol and its aqueous mixtures 108 (1986)133

The thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics 114 (1987)245

Study of the Ph_4SbBPh_4 assumption for single ion free energies in some organic solvents 140 (1989)7

Single ion free energies of some monovalent ions in mixed dimethylacetamide–water solutions using the asymmetric Ph_4AsBPh_4 assumption 147(1989)313

Singularity

Application of integral equations with superstrong singularity to steady state heat conduction 135(1988)133

Sintering

High temperature dilatometer study of special ceramics and their sintering kinetics 106(1986)71

Further investigations on some electrochemical and thermal properties of stabilized and sintered zirconia refractories 113(1987)193

Kinetics of sintering of irregular particles of glass. Part I. Isothermal sintering 140(1989)219

Kinetics of sintering of irregular particles of glass. Part II. Non-isothermal sintering 140 (1989)225

Site binding constants

Cooperativity functions and site binding constants in polyprotic acids 140(1989)203

Smectite minerals

Thermal analysis of the adsorption of rhodamine 6G by smectite minerals 135(1988)299

Smectites

Dehydration kinetics of some smectites: a thermogravimetric study 111(1987)9

Dehydroxylation kinetics of some pure smectites 112(1987)265

Sodium

The energetics of phase transitions in the system $Na_{1+X}Zr_2Si_XP_{3-X}O_{12}$, $1.9 \leq X \leq 2.5$ 106 (1986)57

Ion association of Cl^- with Na^+, K^+, Mg^{2+} and Ca^{2+} in aqueous solution at $10 \leqslant T \leqslant 45$ °C and $0 \leqslant I \leqslant 1$ mol l^{-1}. a literature data analysis 115 (1987)241

Thermal stability of $CuO-Al_2O_3$ system doped with sodium 118(1987)57

On the chemistry of the reactions between liquid sodium and urania–plutonia fuel for fast breeder nuclear reactors 129(1988)143

Phase investigations of the system Na_3AlF_6 - NaCl 133(1988)283

Characterisation of some new chromates $M_2Fe_3(OH)_5(CrO_4)_3 \cdot 3H_2O$ (M = Li, Na) 137 (1988)197

Studies on thermal decomposition of caesium–sodium chlorothiocyanatobismuthates(III) 137(1988)337

Sodium benzoate

Thermochemical investigation of β-cyclodextrin complexes with benzoic acid and sodium benzoate 116(1987)249

Sodium bromate

Evaluation of kinetic parameters for the thermal decomposition of γ-irradiated sodium bromate by dynamic thermogravimetry 141(1989)61

Sodium bromide

The binary system (Li, Na)Br: measurement of the excess enthalpy of solid mixtures; measurement and analysis of the solid–liquid phase diagram 105(1986)117

Sodium carbonate

A thermoanalytical study of the solid state reactions in the $Cr_2O_3-Na_2CO_3-O_2$ system 120 (1987)9

Differential thermal analysis of phase equilibria in mixtures of anhydrous carbonates. II. $Na_2CO_3-BaCO_3$ 124(1988)79

The reactions of some compounds of iron, cobalt and nickel with the molten lithium carbonate–sodium carbonate–potassium carbonate eutectic 132(1988)45

Sodium chloride

The effect of sodium chloride on the surface area of calcined limestone. Part 1 106(1986)35

Diffusional study of the effect of sodium chloride on limestone sulfation in fluidized-bed combustion. Part 2 106(1986)43

Chemical reactions between molybdenum disulfide and sodium chloride in a stream of oxygen in the temperature range 470–900 K 124(1988)163

Phase investigations of the system Na_3AlF_6 - NaCl 133(1988)283

Sodium complexes

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of H^+, Na^+ and Ca^{2+} complexes with 2,4-dichlorophenoxyacetate in aqueous solution at different temperatures and ionic strengths 128(1988)261

Sodium cyclotriphosphate

Thermochemistry of sodium triphosphate and sodium cyclotriphosphate transformations 142 (1989)265

Sodium ferrites

Solid–solid interaction between ferric oxide and sodium nitrate and thermal stability of the sodium ferrites produced 131(1988)115

Sodium hydroxide

Thermoanalytical investigation of the $Ni(OH)_2$–NaOH system 107(1986)27

Investigation of latent heat-thermal energy storage materials. IV. Thermoanalytical evaluation of binary eutectic mixtures of NaOH with LiOH or KOH 121(1987)193

Investigation of latent heat thermal energy storage materials V. Thermoanalytical evaluation of binary eutectic mixtures and compounds of NaOH with $NaNO_3$ or $NaNO_2$ 123(1988)233

Sodium iodide

Dissolution enthalpy of NaI in mixtures of ethylene glycol + aliphatic alcohols at 313.15 K 115(1987)119

Thermochemical properties of NaI solutions in water–2-methoxyethanol and water–2-ethoxyethanol mixtures. The temperature dependence of enthalpic pair interaction coefficients in water solution 122(1987)377

Enthalpies of solution of NaI and CsI in *N*,*N*-dimethylacetamide–water mixtures at 298.15 K 141(1989)131

Interactions in aqueous solutions of urea derivatives and NaI at 298.15 K 145(1989)357

Sodium metaphosphate

Calorimetric study of vitreous and crystalline sodium metaphosphate $NaPO_3$ 102(1986)249

Sodium nitrate

Investigation of latent heat thermal energy storage materials V. Thermoanalytical evaluation of binary eutectic mixtures and compounds of NaOH with $NaNO_3$ or $NaNO_2$ 123(1988)233

Solid–solid interaction between ferric oxide and sodium nitrate and thermal stability of the sodium ferrites produced 131(1988)115

Sodium nitrite

Molten $LiNO_2$–$NaNO_2$, $LiNO_2$–KNO_2, $LiNO_2$–$CsNO_2$, and $NaNO_2$–KNO_2 eutectics: the reaction of $PdCl_2$, K_2PdCl_4, $K_2Pd(NO_2)_4$, $PtCl_2$, K_2PtCl_4, $K_2Pt(NO_2)_4$, $PtCl_4$, and K_2PtCl_6 111(1987)283

Investigation of latent heat thermal energy storage materials V. Thermoanalytical evaluation of binary eutectic mixtures and compounds of NaOH with $NaNO_3$ or $NaNO_2$ 123(1988)233

Sodium oxalate

Application of a new method to the kinetic study of the thermal decarbonylation of sodium oxalate 141(1989)261

Sodium oxide

Thermal solid–solid interaction between sodium and manganese oxides 101(1986)195

Mutual solid–solid interaction between CuO and sodium oxide-doped alumina 141(1989)195

Sodium oxomolybdenum(VI)-formato complex

Preparation of sodium tetramolybdate by the thermal decomposition of a new sodium oxomolybdenum(VI)-formato complex 146 (1989)101

Sodium salts

Solubility data of some sodium salts in 2-hydroxyacetamide 142(1989)13

Sodium sulphate

Thermodynamic functions of gaseous lithium, sodium, potassium, rubidium and caesium sulfates 106(1986)51

Solid–liquid equilibria of the quaternary system Na^+, K^+, Mg^{2+} $\|SO_4^{2-}$–H_2O a 25 °C (in French) 111(1987)295

Sodium tetramolybdate

Preparation of sodium tetramolybdate by the thermal decomposition of a new sodium oxomolybdenum(VI)-formato complex 146 (1989)101

Sodium triphosphate

Thermal transformations of triphosphates $Na(NH_4)_4P_3O_{10} \cdot 4H_2O$ and $(NH_4)_9H(P_3O_{10})_2 \cdot 2H_2O$ 126(1988)355

Thermochemistry of sodium triphosphate and sodium cyclotriphosphate transformations 142 (1989)265

Sodium triphosphate hexahydrate

Some features of thermal behavior of $Na_5P_3O_{10} \cdot 6H_2O$ 106(1986)141

Sodium vanadyl fluoride

Pyrolysis of sodium analogs of $(NH_4)_3VO_2F_4$ 125(1988)229

Softening

A round-robin test of the softening temperature of plastics by thermomechanical analysis 147 (1989)387

Softness

On enthalpies of hydration, ionization potentials, and the softness of ions 104(1986)389

Software

Software for a mass spectrometer–thermobalance system 102(1986)115

Software for a combined STA-QMS instrument 148(1989)493

Solar energy

Solar energy storage by natural zeolites. V. Optimization of the thermal activation process of chabazite tuff 135(1988)379

Solid–gas reactions

Solid–gas reactions - sulphation of limestone 135(1988)253

Solid-state chemistry

Nontraditional and traditional methods of thermal treatment and analysis in solid-state chemistry and physics (1988 Bodenheimer Award Lecture of the Israel Group for Thermal Analysis) 148(1989)79

Solid-state physics

Nontraditional and traditional methods of thermal treatment and analysis in solid-state chemistry and physics (1988 Bodenheimer Award Lecture of the Israel Group for Thermal Analysis) 148(1989)79

Solid-state reactions

Microdynamics of solid-state reactions 110 (1987)325

Solid-water interface

Contribution of microcalorimetry to the study of adsorption mechanisms of ionic and non-ionic molecules at the solid-water interface 122(1987) 197

Solid complexes

Solid and solution complexes of copper(II) acetate with pyridine: stoichiometry, spectral and thermodynamic characteristics 117(1987)59

Solid fuel

The study of the influence of particle sizes on the thermal decomposition of minerals present in solid fuel 146(1989)63

Solid–gas decomposition

Basic program to discriminate among mechanisms of heterogeneous solid–gas decomposition 149(1989)239

Solid–gas equilibria

Enthalpy–entropy interplay in gas–solid equilibria: conditions for heterogeneous entropy-controlled processes 120(1987)207

Solid–gas kinetics

A new model of gas–solid kinetics: the case of ammonium carbamate formation and decomposition 126(1988)129

Solid–liquid equilibria

Solid–liquid equilibria of the quaternary system Na^+, K^+, Mg^{2+} $\|SO_4^{2-}$–H_2O a 25 °C (in French) 111(1987)295

Thermodynamic study of the solid–liquid equilibria in the MPO_3–LaP_3O_9 systems (M = Li, Na, K, Rb, Cs, Ag, Tl) 116(1987)85

Vapour–liquid equilibrium and solid–liquid equilibrium in the system formed by 1-octanol and *n*-octane 128(1988)93

Solid propellant binder

Thermal decomposition studies of solid propellant binder HTPB 138(1989)189

Solids

Water–solid interactions in thermal analysis 110 (1987)513

Theory of emanation thermal analysis. V. Functional scales for evaluating the parameters of inert gas diffusion in solids 111(1987)215

A method for the kinetic analysis of nonisothermal decomposition reactions of solids 115(1987)175

The relations between the structure and thermal reactions of solids 133(1988)197

Structure and reactivity of solids (Invited Lecture) 135(1988)59

Internal and external parameters determining properties and reactivity of solids 137(1988)11

Thermal analysis of compounds adsorbed on low-surface-area solids. Part 1. Measurement and characterization by TGA 140(1989)245

Thermal analysis of compounds adsorbed on low-surface-area solids Part 2. Calorimetric investigations of fatty acids on calcite 140(1989) 253

The effect of temperature dependent factors upon the mechanical and surface properties of solids (1988 ICTA-DuPont Award Lecture) 148(1989) 63

Solid–solid equilibria

Vapour–liquid equilibrium and solid–solid equilibrium in the system formed by octan-1-ol and *n*-decane: measurement and calculation 150 (1989)101

Solid–solid interaction

Thermal solid–solid interaction between sodium and manganese oxides 101(1986)195

Thermal solid–solid interaction between potassium and manganese oxides 102(1986)21

Solid–solid interaction between ferric oxide and sodium nitrate and thermal stability of the sodium ferrites produced 131(1988)115

Effects of Li_2O doping on thermal solid–solid interaction between ferric oxide and nickel carbonate 132(1988)117

Mutual solid–solid interaction between CuO and sodium oxide-doped alumina 141(1989)195

Thermal solid–solid interaction between CuO and pure Al_2O_3 solids 141(1989)205

Solid–solid interactions

Solid–solid interactions between ferric oxide and lithium carbonate and the thermal stability of the lithium ferrites produced 118(1987)151

Solid–solid reactions

Kinetic models for solid–solid reactions 131 (1988)65

Kinetic study of solid–solid reactions by DTA method ($BaCl_2$-KNO_3 system) 133(1988)209

Solid solution

Determination of enthalpy of formation of a solid solution in the Ti–S system by combustion calorimetry 109(1986)181

Pentaglycerine-neopentylglycol mixtures: formation of a solid solution (in French) 136 (1988)55

Solid solutions

Investigation of the thermal stability of $CaCO_3$-$SrCO_3$ solid solutions 122(1987)23

Solid state

Thermoanalytical study of solid state Al_4C_3–$X_2S_2O_8$ and B_4C–$X_2S_2O_8$ (X = Na, K) binary systems 127(1988)181

Solid state kinetic parameters of the dehydration of $CoCl_2 \cdot 6H_2O$ by isothermal thermogravimetric measurements 102(1986)125

Solid state kinetic parameters and mechanism for the deaquation–anation of hexacyanocobaltate(III) of aquopentaamminecobalt(III), rhodium(III) and iridium(III), calculated by isothermal DSC measurements 102(1986)137

Solid state mechanism of the thermal dehydration of $[Rh(NH_3)_5(H_2O)]X_3$ ($X = Cl^-$, Br^-, I^-) 103(1986)353

Solid state kinetic parameters of the first decomposition of potassium dichlorotetracyanoplatinate(IV), dibromotetracyanoplatinate(IV) and diiodotetracyanoplatinate(IV) 104(1986)299

Solid state thermal phase transition of cadmium(II) diamine complexes 105(1986)35

Thermal reaction of five-coordinated nickel(II) complexes containing *N,N*-bis[2-(dimethylamino)ethyl]methylamine in the solid state 105(1986)127

Solid state preparative and descriptive thermoanalysis of SnO_2–$X_2S_2O_8$ and PbO_2–$X_2S_2O_8$ (X = Na, K) binary systems 107 (1986)305

Phase transition and decomposition of A_2MX_4 [A = $(C_2H_5)_4N$; M = Co(II), Ni(II) and Cu(II); X = Cl and Br] in the solid state 108(1986)97

Thermal reactions of lead(IV) chloride complexes in the solid state. Part VI. Thermal properties, thermochemistry and kinetics of the thermal decomposition of alkanaminium hexachloroplumbates 108(1986)239

Thermal decomposition reactions of metal carboxylato complexes in the solid state. I. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 109(1987)331

Trends in the methods of measurement of thermophysical properties in the solid state 110 (1987)209

Gas chromatographic studies of the thermal decomposition of 12-molybdophosphoric acid and its salts in the solid state 111(1987)325

"Kinetic variations". Attempt of a classification of the dynamic thermal analysis methods to describe the dynamics of solid state reactions based on thoughts of Paul Klee (in German) 112(1987)13

Thermal decomposition reactions of metal carboxylato complexes in the solid state. II. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 112(1987)275

The solid state chemistry of uranium. Part IV. The thermal decomposition and kinetics of tetrachlorobis(*N, N, N', N'*-tetramethylurea) uranium(IV) 114(1987)303

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some 5-substituted metal salicylato complexes 115(1987)255

Thermal decomposition reactions of metal carboxylato complexes in the solid state. III. Thermographic and differential thermal studies of metal oxalato, malonato and succinato complexes 116(1987)53

Solid-state reactions of talc toward Ni(II) at high temperatures 117(1987)17

Thermal study of $NiC_2O_4 \cdot 2H_2O$ obtained by a solid state reaction at room temperature and normal pressure 118(1987)123

A thermoanalytical study of the solid state reactions in the Cr_2O_3–Na_2CO_3–O_2 system 120 (1987)9

Studies in solid state reactions between basic copper carbonate with cinnamic, succinic and adipic acids 124(1988)197

Structure, thermal behaviour and solid state kinetics, of bis-(5-sulphosalicylato)-diaquo metal chelates of bivalent metal ions 127(1988)37

Thermally-induced phase transition of zinc(II) diamine complexes in the solid state 127(1988)329

Thermal behavior of samarium phosphate monohydrate in the solid state 130(1988)155

Thermochemical investigation of solid state reactions in molybdate/tungstate system 133 (1988)191

The kinetics of heterogeneous solid state decomposition reactions: a new way forward? (1988 Royal Society of Chemistry, Thermal Methods Group, Award Lecture) 135(1988)37

Kinetics of decomposition of the solid state: Is there really a dichotomy? (Invited Lecture) 135 (1988)71

Thermal reactions of metal complexes under quasi-isothermal and quasi-isobaric conditions. 5. Thermal behaviour of molybdenum(0) dinitrogen complexes in the solid state 138 (1989)161

Kinetics of solid state decomposition of $K_3[Nb(O_2)_2F_4]$: TG study 138(1989)199

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part III 142(1989)89

Stoichiometry and stability of some solid state charge transfer complexes formed in imidazole–hydrocarbon systems 142(1989)371

Kinetics of solid state reaction between $CaCO_3$ and MoO_3 144(1989)363

Solid state reaction

Studies on solid state redox reaction of iron(III) oxalate by gas chromatography 126(1988)51

Formation of new copper antimony oxides by solid state reaction between $CuSb_2O_6$ and CuO under atmospheric and high pressure 133(1988)73

Preparation of novel non-symmetrical Schiff bases using solid state reactions 141(1989)19

Solubility

Studies on the solubility and the stability constants of ferrous-tris-bipyridine and phenanthroline complexes and the determination of free energy of transfer of ferrous ion from water to 2-propanol–water mixtures 104(1986) 267

Mutual solubilities of components of binary blends of *n*-octadecane, di-*n*-octyl ether, and *N*,*N*-dioctylamine 107(1986)227

Solubility studies of polyethylene glycols in ethanol and water 114(1987)97

Prediction of thermodynamic equilibrium properties from mutual solubility data 120 (1987)63

Ageing due to gamma radiation of three linear low-density polyethylenes. Solubility and calorimetric results 137(1988)137

Structure–activity relationships for solubility and wettability of a number of substituted barbituric acids 138(1989)319

Solubility data of some sodium salts in 2-hydroxyacetamide 142(1989)13

Solubility and excess volumes of the mixture Di-*n*-octyl ether + benzene 143(1989)171

Solute-solute-solvent interactions

Solute-solute-solvent interactions in dilute ternary aqueous solutions of urea and α,ω-aliphatic diols. Excess enthalpies and Gibbs energies 137(1988)165

Solute–solvent interactions

Solute–solvent interactions of some univalent–univalent salts with various organic solvents at 25 °C 120(1987)183

Solute–solvent interactions in electron donor–acceptor–solvent systems: pyridine or quinoline derivatives, with molecular iodine 146(1989)125

Solution

Enthalpy of solution of some electrolytes in water–acetamide mixtures at 313.15 K 105 (1986)41

Thermodynamics of solution of naphthalene in various tetramethylurea–water mixtures 105 (1986)71

Enthalpies of solution of carbon dioxide in aqueous diglycolamine solutions 106(1986)241

A microcalorimetric method for the measurement of enthalpies of solution of gases in liquids 115 (1987)67

Standard enthalpies of formation of n-propyl chloroformate and benzyl chloroformate via solution calorimetry 116(1987)65

The enthalpy of solution of ^{243}Am metal and the standard enthalpy of formation of $Am^{3+}(aq)$ 116(1987)235

Heats of solution of cyclohexanol in benzene solutions of tri-n-octylammonium bromide and derived thermodynamic functions of transfer from benzene 116(1987)241

Solution thermodynamics for *o*-alkoxyphenols in water and in water–alcohol systems 116(1987)329

Solution studies on tris(2-hydroxy-3-(3-methyl-2-butenyl)-1,4-naphthalenedione semicarbazonato) M^{3+} (M = praseodymium or neodymium) 116(1987)377

The enthalpies of solution of tetraphenylsilane in pyridine–other solvent mixtures 117(1987)237

Enthalpies of solution of polyvinylalcohol in water and polyvinylacetate in dioxane 119(1987) 47

Heats of solution of some pyrimidines, purines and related compounds in dimethylsulfoxide 126(1988)155

Evaluation of heat exchange calorimetry of the batch type by estimating known heats of solution 126(1988)165

Properties of domains in heterogeneous systems from thermodynamic functions of solution 135 (1988)155

Evaluation of the interaction parameter for poly(styrene)-poly(α-methylstyrene) mixtures from heat of solution measurements 137(1988)123

Enthalpies of solution of NaI and CsI in *N,N*-dimethylacetamide–water mixtures at 298.15 K 141(1989)131

Enthalpies of solution of some nitrates in aqueous methanol solutions at 298.15 K 150(1989)121

Solution complexes

Solid and solution complexes of copper(II) acetate with pyridine: stoichiometry, spectral and thermodynamic characteristics 117(1987)59

Solution equilibria

Continuous gradient method in flow microcalorimetry. Part II: Application to solution equilibria 122(1987)153

Solutions

Enthalpic study of solutions and molecular mixtures: standardisation of instruments during microcalorimetric measurements (in French) 116(1987)21

Solvation

Thermodynamics of electron transfer processes in liquid and gas phases. 1. Correlations of electrooxidation and ionization potentials with substituent constants for some indole and indolizine derivatives: quantitative solvation free energies 108(1986)163

Statistical study of the influence of the nitro groups on the ionization and solvation processes of disubstituted benzoic derivatives 125(1988)363

Determination of the free energy of solvation of ferrous ion in water and free energies of transfer of ferrous ion from water to ethanol–water mixtures 127(1988)119

Statistical study of the dissociation and solvation processes for dichloro-substituted benzoic acids: additive and steric effects 127(1988)295

Theoretical contribution of solvation of AgBr in some organic solvents at 25 °C 128(1988)99

Ionic solvation in water + CO-solvent mixtures. Part 17. The "neutral" component of free energies of transfer of single ions from water into water + ethanol mixtures 132(1988)141

Enthalpies of solvation of alkali and halide ions in water–acetamide mixtures in the range 298.15–348.15 K 137(1988)233

Calorimetric study of the solvation of some ions in acetonitrile–dimethylsulfoxide mixtures 145 (1989)219

Solvent effect

Solvent effect on the protonation of some purines, pyrimidines and related compounds 127(1988) 125

Solvent systems

Thermodynamics of individual ions in various solvent systems from electromotive force measurements 140(1989)305

Solvolysis

Solvolysis rates and activation parameters of phenylchloroformate in water–tetrahydrofuran and water–dioxane mixed solvents 141(1989)1

Sorbent materials

TG study of sorbent materials for desulfurization of combustion gases at high temperature 114 (1987)103

Sorbents

Thermogravimetric study of promoted hydrated lime sorbents for flue gas clean up 127(1988)57

Kinetic investigation of sorbents for desulfurization of combustion gases measured with a tubular reactor/TG combination 135 (1988)139

Comparing regenerative SO_2 sorbents using TG: the SRO test 141(1989)51

Sorbitol

Polymorphism of hydrated sorbitol 125(1988)125

Sorption

Microgravimetric measurements of water vapour sorption on hydrated cement pastes 103(1987)137

Kinetic investigation of the sorption of water by lithium hydroxide 113(1987)87

A microcalorimetric study of NH_3-sorption onto differently modified and pretreated ZSM-5 surfaces 126(1988)325

Thermochemical study of ion-exchange processes. V. Sorption of copper ions in complex-forming resins 139(1989)327

Specific energy

Derivation of the specific energy of victorian brown coal from proximate and ultimate analyses 149(1989)269

Specific heat

A technique to measure the specific heat of reactive materials by heat flow calorimetry 130 (1988)335

Measurement of the specific heat of a glass-filled polymer composite to high temperatures 131 (1988)7

Measurement of specific heat anomaly and characterization of high T_c ceramic superconductors by AC calorimetry 133(1988)39

Specific heat analysis in 1,1,1-trichloroethane 134(1988)27

Dynamical analysis of the specific heat in *p*-dichlorobenzene 134(1988)35

May Schottky type defects in metals be studied by analysing their specific heat data? 135(1988) 179

Low temperature specific heat and electrical resistivity of $UCu_{4.5}Al_{7.5}$ 139(1989)219

A heat flux DSC for enthalpy and specific heat determinations to 1700 K 148(1989)499

Determination of the specific heat functions of PYX and KP by DSC 149(1989)123

Specific heat; *Thynnus thunnus*

Microcalorimetric measurement of the specific heat of *Thynnus thunnus* 137(1988)387

Spectrophotometry

Thermodynamics, formation constants, spectrophotometry and infrared spectroscopy of complexes between some divalent metal ions and 3-hydrazino-6-phenylpyridazine and related ligands 119(1987)249

Spices

Thermogravimetric analysis of some spices and commercial food products. Comparison with other analytical methods for moisture content determination (Part 3) 143(1989)15

Sponge iron

On the determination of the ignition temperature of sponge iron 149(1989)27

Spreadsheets

Use of spreadsheets in thermal analysis. Part 2 138(1989)177

Use of spreadsheets in thermal analysis. Part 3. 143(1989)311

Stability

Thermogravimetric study of the thermal stability of poly(methyl methacrylate) containing sterically hindered amine groups 101(1986)27

Thermal stability of lithium aluminium hydroxy salts 102(1986)67

Study of the thermal stability of 6-substituted-1,3-dimethyl-2,4-dioxo-1,2,3,4-tetrahydropyrrolo-[2,3-*d*]-pyrimidines 105(1986)65

A thermometric study on the stability of di-butyl thiourea in acid solutions 105(1986)91

On the thermal stability of some 3,5-disubstituted 1,2,4-thiadiazols and 3,5-disubstituted-1,2,4-dithiazolin iodonium salts 105(1986)239

The relationship between ignition temperature and thermal stability for selected primary explosives 105(1986)287

Stoichiometry, thermodynamic functions and stability of some charge transfer complexes 105 (1986)303

Effect of substituents on the stability of rhodium(III) complexes. I. Methyl and sulphur substituted uracils 108(1986)73

The stability and thermodynamic functions of 4-amino-1,6-dihydro-1-methyl-2-methylthio-5-nitroso-6-oxo-pyrimidine complexes with Mn(II), Fe(II), Co(II), Ni(II) and Cu(II) 108(1986)181

Study of the thermal preparation and stability of tetrametaphosphates of bivalent metals 110 (1987)343

Evaluation of the thermal stability of cyclized polymers. I 113(1987)1

The application of kinetic parameters to the investigation of thermal stability determined from rising temperature experiments 113(1987)287

Structure–stability relationship of copper(II)–indol carboxylic acid derivative complexes from spectrophotometric, thermogravimetric and potentiometric studies 114(1987)359

Correlation of thermal stability with structures for some metal complexes 120(1987)107

Thermal stability of bromobenzylated poly(2,6-dimethyl-1,4-phenylene oxide) 120(1987)293

Investigation of the thermal stability of $CaCO_3$-$SrCO_3$ solid solutions 122(1987)23

DSC studies on the thermal stability of bis[4-(4′-ethynylphenoxy)phenyl] sulfone and bis[4-(4′-ethynylphenoxy)phenyl] ketone 123(1988)163

Thermal stability of invertase immobilized on superfine filaments of a poly(vinyl alcohol) derivative 123(1988)183

Thermal stability of poly(oxypropylene-ether) polyol 123(1988)221

Computational study of relative stabilities of $C_{60}(I_h)$ and $C_{70}(D_{5h})$ gas-phase clusters 125 (1988)155

Thermodynamic stabilities of metal complexes of the biologically active complexing agent, 2-acetylpyridine semicarbazone (2-APS) 126(1988)7

Evaluation of thermal stability of some reforming catalysts 127(1988)217

Thermodynamic stability of orthorhombic black phosphorus 129(1988)57

On the thermal stability of some macromolecular compounds 131(1988)279

The stability of $YBa_2Cu_3O_x$ in different atmospheres, by TGA 133(1988)33

On the thermal stability of some new polyazines and polyazomethines (II) 134(1988)177

Fluctuations, stability and fusion in biomembranes 135(1988)161

Influence of grinding on both the stability and thermal decomposition mechanism of siderite 135(1988)219

Chemical stability of $YBa_2Cu_3O_{7-x}$ to various atmospheres 136(1988)297

The thermal stability of the β-$Ni(OH)_2$–β-NiOOH system 137(1988)247

On relative stability reasoning for clusters of different dimensions: an illustration with the C_{60}–C_{70} system 140(1989)87

Thermal stability of some novel mixed-ligand complexes of copper(II) 144(1989)369

Investigation of the thermal stability of nitroguanidine below its melting point 146 (1989)115

The thermal stability of $RBa_{2-x}K_xCu_3O_z$ (R = Y and Eu) 148(1989)275

Stability constants

Stepwise stability constants of uranyl(II) and thorium(IV) complexes of L-lysine monohydrochloride 101(1986)381

Catalytic–thermometric determination of stability constants of complexes using the iodine–azide reaction 103(1986)325

Studies on the solubility and the stability constants of ferrous-tris-bipyridine and phenanthroline complexes and the determination of free energy of transfer of ferrous ion from water to 2-propanol–water mixtures 104(1986) 267

Thermodynamic stability constants of bivalent metal complexes of 2-hydroxy-3,4-dimethoxyacetophenone 107(1986)371

Determination of thermodynamic parameters and stability constants of the complexes of β-MITSC with transition metal ions 113(1987)7

Evaluation of thermodynamic parameters and stability constants for the formation of lanthanon(III) complexes with biologically active 2-(2′-lepidylazo)-*N*-methylisatin (LAMI) 113 (1987)15

Evaluation of thermodynamic parameters and stability constants of bivalent metal complexes of biologically active *o*-vanillinsemicarbazone 138(1989)21

Determination of thermodynamic parameters and stability constants of complexes of biologically active *o*-vanillinthiosemicarbazone with bivalent metal ions 146(1989)375

Determination of stability constants and thermodynamic functions of L-lysine monohydrochloride with Sm(III), Bi(III) and Gd(III) metal ions 147(1989)401

Stability constants, structure and thermogravimetric analysis of La(III) complexes with some arylhydrazones of benzoylacetone and dibenzoylmethane 149(1989)61

Thermodynamics, stability constants and spectrophotometric studies of complexes of trivalent lanthanides and some divalent metals with 3-[α-(*o*-hydroxyphenyl)ethylidenehydrazino]-6-phenylpyridazine ligand 149(1989)317

Stabilization

Optimization of stabilization process of NH_4-NaY by DTA-TGA and other characterization methods 135(1988)397

Stainless steel 304

Thermochemical studies on hot ash corrosion of stainless steel 304 and inhibition by magnesium sulphate 126(1988)43

Standard gases

Gravimetric calibration of standard gases 103 (1987)57

Standard inverse filtering

Application of harmonic analysis and standard inverse filtering to a DTA system 108(1986)337

Standardisation

Enthalpic study of solutions and molecular mixtures: standardisation of instruments during microcalorimetric measurements (in French) 116(1987)21

Standardization

Report on the workshop: education, publication and standardization in thermal analysis 110 (1987)23

Need for standardization of thermoanalytical kinetic communications: terminology suggestions, j. šesták 110(1987)101

Standard potentials

Standard absolute potentials of $M;M^+$ and $Ag,AgX;X^-$ electrodes in ethylene glycol + water solvents and related transfer free energies 106 (1986)309

Starch

Thermal characterization of starch-g-acrylonitrile copolymers 115(1987)189

State of cure

Prediction of the 'state of cure' of an unsaturated polyester by differential scanning calorimetry, and investigation of its variation with temperature and kinetic parameters 149(1989)93

Statistics

Remarks on computerized statistical analysis 110(1987)76

Statistical study of the influence of the hydroxyl groups in positions 3 and 4 on the ionization process of 3,4-dihydroxybenzoic acid 120(1987) 279

Statistical study of the influence of the nitro groups on the ionization and solvation processes of disubstituted benzoic derivatives 125(1988)363

Statistical study of the dissociation and solvation processes for dichloro-substituted benzoic acids: additive and steric effects 127(1988)295

Steady state

Mathematical laws for the steady state and cooling in a metallic bar 143(1989)211

Steady state heat conduction

Application of integral equations with superstrong singularity to steady state heat conduction 135(1988)133

Steam-reforming catalysts

Thermal analysis of spent steam-reforming catalysts 149(1989)147

Steel

Measurement of the specific heat capacity of steels using the pulse method (in German) 119 (1987)203

Steric effects

Thermodynamic analysis of the ionization of *ortho* and *para* toluic acids : influence of the medium on the hyperconjugative and steric effects 109(1986)353

Steroids

Thermoanalytical study of some steroids. V. Androstanolone (in French) 149(1989)1

Stoichiometry

Stoichiometry, thermodynamic functions and stability of some charge transfer complexes 105 (1986)303

Storage

TC and DSC investigation of $CaCl_2 \cdot 6H_2O$, a phase change material for energy storage 148 (1989)281

Storage materials

Investigation of latent heat-thermal energy storage materials. IV. Thermoanalytical evaluation of binary eutectic mixtures of NaOH with LiOH or KOH 121(1987)193

Investigation of latent heat thermal energy storage materials V. Thermoanalytical evaluation of binary eutectic mixtures and compounds of NaOH with $NaNO_3$ or $NaNO_2$ 123(1988)233

Straubel method

Influence of thermal noise on the accuracy of mass determination according to the Straubel method 103(1987)33

Strengite

The thermal analysis of some phosphate minerals: strengite, lipscombite and goyazite 135(1988)259

Strength

Hydration versus strength in a portland cement developed from domestic mineral wastes — a comparative study 106(1986)93

Stress

Thermal shrinkage stress relaxation in PET high speed spun yarns 134(1988)283

Thermoviscoelastic finite element stress analysis by using endochronic approach 135(1988)199

Strontium

Determination of phase stability in the Sr–S–O system 113(1987)359

Strontium bromide

A galvanic bromine cell for measuring ΔG-values of solid-state reactions in the systems KBr/MBr_2 (M = Ca, Sr, Ba) 121(1987)343

Strontium carbonate

Investigation of the thermal stability of $CaCO_3$-$SrCO_3$ solid solutions 122(1987)23

Strontium chloride

Thermal analysis of calcite equilibrated with aqueous solutions of magnesium, strontium, barium and zinc chlorides 135(1988)237

Strontium nitrate

Temperature dependence of IR analysis of $Sr(NO_3)_2$ 136(1988)7

Cryoscopy, viscosity, and electrical conductivity measurements of the strontium nitrate–acetamide molten system 143(1989)205

Strontium sulphate

Reaction of strontium sulfate with anatase and rutile below and above the phase transition temperature of strontium sulfate 119(1987)347

Kinetics of $SrSO_4$ reduction with CO 138(1989)55

Strontium zirconyl oxalate

A comparative study of the thermal decomposition kinetics of zirconyl oxalates of calcium and strontium 146(1989)225

Structural relaxation

Structural relaxation and crystallization of $Fe_{78}B_{13}Si_9$ amorphous ribbons studied by dilatometry and differential scanning calorimetry 130(1988)177

Structure

Obtention, thermal behaviour and structural study of the dioxynitrates of lead 105(1986)111

Effect of the side chain structure on the glass transition temperatures of some poly(thiocarbonate)s 105(1986)149

Structural properties and chemical flux reactivities of aqueous suspensions of mixtures of potassium tetrafluoroborate and potassium fluoride 107(1986)321

Some macrokinetic structural aspects of heterogeneous thermal dissociation reactions 110(1987)159

Significance of structural factors in the thermal dissociation of solids 110(1987)359

Changes in the internal structure of hydrogels 112(1987)111

Structure identification of substituted phenol redox products by: thermogravimetric and differential thermal analysis 113(1987)117

Structure and devitrification of $Li_2O \cdot P_2O_5$–B_2O_3 and $BaO \cdot P_2O_5$–B_2O_3 glasses 113 (1987)351

Thermal decomposition of energetic materials. 20. A comparison of the structural properties and thermal reactivity of an acyclic and cyclic tetramethylenetetranitramine pair 114(1987)209

Effect of the side chain structure on the glass transition temperature. 2. Poly(*o*-alkylphenyl methacrylate)s 114(1987)319

Structure–stability relationship of copper(II)–indol carboxylic acid derivative complexes from spectrophotometric, thermogravimetric and potentiometric studies 114(1987)359

Physical properties and structural studies of $Se_{100-x}Sb_x$ 116(1987)35

Transport of penetrants in the macromolecular structure of coals. VIII. Transport mechanism as a function of temperature 116(1987)153

Chemistry and structural chemistry of phosphides and polyphosphides. 45. The thermal decomposition and thermodynamic properties of the alkali metal phosphides LiP_{15}(s), NaP_{15}(s), KP_{15}(s), RbP_{15}(s) and CsP_{15}(s) 117(1987)261

Correlation of thermal stability with structures for some metal complexes 120(1987)107

Structure and function of the nuclei developed during dehydration of the alums $KAl(SO_4)_2 \cdot 12H_2O$ and $KCr(SO_4)_2 \cdot 12H_2O$ 121(1987)97

Effect of the different structural distortions of MoO_3 and the homologous $Mo_{18}O_{52}$ upon the thermodynamics of Li^+ insertion 121(1987)203

Thermal and structural aspects of tris(indole-3-butyrato)Ce(III) 125(1988)387

Calorimetric and structural investigation of monomeric and dimeric copper(II)-*N*-protected aminoacidates 130(1988)67

The structure and thermal reactions of natural iron-containing allophanes studied by 57-Fe mössbauer spectroscopy 130(1988)259

True differential microcalorimetry study of the structure of bimetallic catalyst particles 133 (1988)149

The relations between the structure and thermal reactions of solids 133(1988)197

The influence of gudron additive on the structure of the solid phase from the thermal decomposition of phosphogypsum 133(1988)233

On isomorphism of the structure of basic aluminium sulphates obtained by means of hydrolysis of aluminium sulphate at higher temperatures 133(1988)323

Synthesis and real structure of inorganic materials (Landseas Plenary Lecture) [abstract] 135(1988)3

Structure and reactivity of solids (Invited Lecture) 135(1988)59

Tetraalkylammonium silicates gels as precursors to zeolites of different structures 135(1988)353

Study of the thermodynamic properties of liquid selenium-tellurium alloys. Part II. Determination of thermodynamic properties by calorimetry and study of the structural properties of liquid selenium-tellurium alloys (in French) 136(1988) 103

Thermochemical and structural studies of complex actinide chlorides $Cs_2NaAnCl_6$ (An = U–Cf); ionization potentials and hydration enthalpies of An^{3+} ions 139(1989)49

Structural characterization and thermal degradation of hexolic-anhydride-based polyesters 140(1989)169

Thermal and structural studies on the adducts of bis(β-diketonate) oxovanadium(IV) complexes with organic bases 140(1989)179

Structural relaxation, glass transition and crystallization of Cu–Zr amorphous ribbons studied by dilatometry and differential scanning calorimetry 142(1989)29

Effects of sample weight, particle size, purge gas and crystalline structure on the observed kinetic parameters of calcium carbonate decomposition 143(1989)339

The use of thermal and spectrometric analyses for the structure investigation of arylhydrazone-acetoacetylaminopyridines and their copper chelates 146(1989)1

Structural, thermal and electrical studies of complexes of silicon with some first row transition elements 146(1989)317

Diagnostics of inorganic materials by diffusion structural analysis ("Israel Chemicals Ltd." Invited Lecture) 148(1989)117

Structural thermochemistry of solids (Review) 148(1989)149

Stability constants, structure and thermogravimetric analysis of La(III) complexes with some arylhydrazones of benzoylacetone and dibenzoylmethane 149(1989)61

Styrene

Calorimetric study of the miscibility of poly(2,6-dimethyl-1,4-phenylene oxide) with styrene–methyl methacrylate copolymers 123 (1988)3

Sublattice method

Calculation of the Gibbs free energy of formation of titanium carbide TiC_Y using the sublattice method. Application to the determination of chemical vapour deposition diagrams (in French) 147(1989)1

Sublimation

Thermolabile hydrocarbons. XXIX. Combustion and sublimation enthalpies of tri-*tert*-butylmethane (in German) 107(1986)331

DSC determination of the sublimation enthalpy of tris(2,4-pentanedionato)cobalt(III) and bis(2,4-pentanedionato)nickel(II) and -copper(II) 109(1986)383

DSC determination of the sublimation enthalpy of bis(2,4-pentanedionato)oxovanadium(IV) and tetrakis(2,4-pentanedionato)zirconium(IV) 109 (1986)391

Sublimation enthalpy of mono-butylurea 112 (1987)387

Some reflections on the calorimetric measurement of the enthalpy of sublimation or vaporisation (in French) 115(1987)153

Vapour pressure and sublimation enthalpy of GeI_4 119(1987)373

Enthalpies of sublimation and fusion of monophenylurea and diphenyl-1,3 urea 122 (1987)189

Vapour pressures and enthalpies of sublimation of ferrocene, cobaltocene and nickelocene 124 (1988)179

A new method for the measurement of enthalpies of sublimation using differential scanning calorimetry 124(1988)229

Substituent effects

Temperature and substituent effects on the dissociation constants of some 5-(*p*-substituted phenylazo) barbituric acid compounds 136 (1988)1

Temperature and substituent effects on the ionization of some disubstituted arylazo barbituric and thiobarbituric acid compounds 140(1989)365

Substituted phenols

Effect of hydrogen bonding on the thermal behaviour of substituted phenols 149(1989)381

Substitution

Substitution effects on the T_c of $RBa_2Cu_3O_2$ (R = Y and Eu) 133(1988)55

Succinic acid

Studies in solid state reactions between basic copper carbonate with cinnamic, succinic and adipic acids 124(1988)197

Succinonitrile

Non-ideality near the monotectic composition of a miscibility-gap type system: succinonitrile–water 145(1989)301

Sugar cane bagasse

Thermal degradation of sugar cane bagasse 125 (1988)89

Sugars

Spectroscopic and thermal characterization of some 5-acetyl-4-β-D-glycopyranosylaminopyrimidine derivatives and their acetylated sugar homologues 105(1986)161

DTG and DTA studies on typical sugars 134 (1988)55

DTG and DTA studies on sugar derivatives 134 (1988)67

Calorimetric studies on the interaction of sugars and polyols with the non-ionic surfactant Triton-X-100 in aqueous solutions 138(1989)359

The influence of sugars on the properties of freeze-dried lysozyme and haemoglobin 144 (1989)195

Sulfolane

Solid–liquid phase diagram of the binary system pyridine + sulfolane 139(1989)1

Sulfur amide

Thermodynamic properties of binary mixtures containing sulfur amide. Part 4. Excess molar volumes of *N*-methylbenzenesulfonamide + various solvents 132(1988)235

Sulphanilic acid

Thermodynamic and related studies of the oxidation of *p*-aminobenzoic acid, sulphanilic acid and anthranilic acid by periodate 140(1989) 197

Sulphation

Solid-gas reactions - sulphation of limestone 135 (1988)253

Sulphide

Enthalpimetric determination of sulphide and thiosulphate by the catalysis of the iodine–azide reaction 112(1987)171

Thermogravimetric identification and analysis of reaction products during oxidation of solid or liquid sulfides 143(1989)221

Sulphites

Studies on alkaline earth metal sulfites. X(1) - Thermal dehydration of calcium sulfite hemihydrate: Dependence of the products on dehydration conditions 133(1988)251

Sulphonamide derivative complexes

Thermal studies on sulphonamide derivative complexes. Part 1. Thermal behaviour of acetazolamide–copper complexes 147(1989)321

Sulphur

Determination of enthalpy of formation of a solid solution in the Ti–S system by combustion calorimetry 109(1986)181

Thermodynamic study of the liquid Fe–S system by use of a drop calorimeter 109(1986)275

Thermoelectrical conductivity of $Ge_{20}Bi_{15}S_{65}$ as a complementary method to differential thermal analysis 110(1987)281

Determination of phase stability in the Sr–S–O system 113(1987)359

An approach with use of EGA to the mechanism of sulfur release during coal combustion 114 (1987)171

Utilization of differential scanning calorimetry technique for determination of high sulfur content 134(1988)435

Sulphur amide

Thermodynamic properties of binary mixtures containing sulfur amide. 1. Excess molar volumes of carbon tetrachloride + *N*,*N*-dimethylmethanesulfinamide and + *N*-methylmethanesulfinamide 104(1986)153

Thermodynamic properties of binary mixtures containing sulfur amide. 3. Excess molar volumes of benzyl alcohol + *N*,*N*-dimethylmethanesulfinamide, + *N*,*N*-dimethyl-benzenesulfinamide and + dimethyl sulfoxide 109(1987)377

Sulphur dioxide

Comparing regenerative SO_2 sorbents using TG: the SRO test 141(1989)51

Superconductors

Susceptibility of superconducting vanadium measured following the Faraday method 103 (1987)83

Thermoanalytical investigation of the $(YBa_2)_2Cu_6O_y$ superconductor. I. Reactions forming the superconductor and its phase changes 124(1988)147

High temperature DTA of ceramic superconductor $YBa_2Cu_3O_{7-\gamma}$ 127(1988)395

Thermoanalytical investigation of $(YBa_2)_2Cu_3O_{7-y}$ superconductor. II. Perovskite formation from coprecipitated oxalate 132 (1988)15

Thermodynamic studies of the high temperature superconductor $Ba_2TmCu_3O_7$ 139(1989)169

Application of thermal analysis to kinetic study of superconducting oxide formation (Invited Lecture) 133(1988)11

Thermal analysis in the M-Ba-Cu-O systems (M = Y, La, Pr) in relation to high T_c superconductors 133(1988)17

A thermogravimetric index for the prediction of the processing temperature of $REBa_2Cu_3O_{7-x}$ high T_c superconducting materials 133(1988)27

Measurement of specific heat anomaly and characterization of high T_c ceramic superconductors by AC calorimetry 133(1988)39

Thermal analysis in the field of high temperature superconductors 133(1988)43

Comparative study on the heat capacity of $ABa_2Cu_3O_{7-x}$ high T_c superconducting compounds (A = Y, Eu, Ho) 133(1988)49

Synthesis and thermal properties of superconducting mixed copper oxides (Plenary Lecture) [abstract] 135(1988)5

Heat capacity measurements of the high T_c superconductor $YBa_2Cu_3O_{7-x}$ 137(1988)65

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. III. Preparation from mixed 2-ethylhexanoates of yttrium, barium and copper 140(1989)41

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. IV. Mechanism of perovskite formation from various starting materials 142 (1989)281

Thermogravimetric study of the transition copper valency in the superconductive system Y–Ba–Cu–O 143(1989)123

Chemical and physical properties of superconductivity materials characterized by thermal analysis 148(1989)53

Synthesis of oxide superconductors (Review) 148(1989)219

Interactions of high-temperature superconductors with the atmosphere (Review) 148(1989)229

Binary and ternary compounds, phase diagrams and contaminations in the $YO_{1.5}$-BaO-CuO system auxiliary to superconducting ceramics (Review) 148(1989)235

Thermal study of superconducting $Ba_2Cu_3RO_{7-x}$ (R = Y, Eu, Gd, Ho) 148(1989) 269

Supercooling

Supercooling phenomena in electrolytic mixtures of 2-ketobutyramide 118(1987)223

Surface area

Quasi-equilibrium nitrogen adsorption gravimetry: comparison with volumetry for the determination of surface areas and pore size distributions 103(1987)89

The effect of sodium chloride on the surface area of calcined limestone. Part 1 106(1986)35

Correlation between surface area and emanation power of solids 110(1987)241

Weighing in free suspension and its application in thermogravimetry and in the determination of surface areas and the density of porous solids 134(1988)395

Thermal analysis of compounds adsorbed on low-surface-area solids. Part 1. Measurement and characterization by TGA 140(1989)245

Thermal analysis of compounds adsorbed on low-surface-area solids Part 2. Calorimetric investigations of fatty acids on calcite 140(1989) 253

Surface chemistry

Bond length–bond energy concept and its impact on the surface chemistry of oxides 110(1987)333

Adsorption calorimetry in surface chemistry (Invited Lecture) 135(1988)19

Surface heterogeneity

Mathematical analysis of the effects of surface heterogeneity in chemisorption: a new/old model 148(1989)173

Surface hydroxyls

The effect of the surface hydroxyls on the chlorination kinetics of alumina 149(1989)205

Surface properties

The effect of temperature dependent factors upon the mechanical and surface properties of solids (1988 ICTA-DuPont Award Lecture) [abstract] 135(1988)2

The effect of temperature dependent factors upon the mechanical and surface properties of solids (1988 ICTA-DuPont Award Lecture) 148(1989) 63

Surface reaction

TG and DSC studies of the surface reaction of γ-Al_2O_3 with Cl_2 107(1986)171

Surfaces

Thermal analysis of catalyst surfaces 142(1989) 329

Quasi-equilibrium adsorption microcalorimetry (of Kr, Ar and N_2) to characterize real microcrystalline surfaces: Application to ZnO 148(1989)191

Surface science

Calorimetry and thermal analysis in surface science and catalysis 148(1989)37

Surface tension

Dynamic surface tension measurements on surface active materials 103(1987)107

Surface tensions of some molten divalent metal carboxylates 115(1987)351

Surfactants

Dynamic surface tension measurements on surface active materials 103(1987)107

A calorimetric study of three long-chain ionic surfactants 109(1986)155

Interfacial properties of zwitterionic surfactants: *N*-dodecylbetaine 122(1987)171

Thermal and spectral characterisation of compounds of the uranyl ion with surfactants 131(1988)79

Polymorphic transitions in hydrogenated canola oil in presence of surfactants 134(1988)97

Studies on Krafft point solubility in surfactant solutions 137(1988)143

Calorimetric studies on the interaction of sugars and polyols with the non-ionic surfactant Triton-X-100 in aqueous solutions 138(1989)359

Susceptibility

Susceptibility of superconducting vanadium measured following the Faraday method 103 (1987)83

Suspended target

Effects of effusing molecules on a suspended target 131(1988)257

Suspension

Weighing in free suspension and its application in thermogravimetry and in the determination of surface areas and the density of porous solids 134(1988)395

Possibility of feldspar formation in bentonite suspensions during storage, drying and/or heating 135(1988)319

Symmetry departure

Symmetry departure: disorder and glass transition 109(1986)91

Synthesis

High temperature synthesis and characteristics of Al-substituted iron alkoxide 107(1986)75

Synthesis, characterization and thermal behaviour of some polyarene-phosphorochloridates 108(1986)105

Synthesis and characterization of $(N_2H_5)_2SiF_6$ and thermal analysis of $(N_2H_5)_2SiF_6$ and $N_2H_6SiF_6$ 108(1986)149

Synthesis of the hydrates of chlorinated acetates of rare earths and their thermal behaviour 123 (1988)23

T

Talc

Solid-state reactions of talc toward Ni(II) at high temperatures 117(1987)17

Solid-state reactions in the system TALC–$CaCO_3$ doped with Ni(II) at high temperatures 127 (1988)171

Tantalum deuteride

The heat capacity of the metal hydride $TaD_{0.5}$ between 10 and 550 K 139(1989)181

Tapioca

Effect of poly(ethylene glycol) 4000 and poly(ethylene glycol) 4000 distearate additives on the thermal decomposition of tapioca starch 146 (1989)201

Tartronic acid

Reaction kinetics at linearly increased temperature. V. DTA and UV study of the oxidation of malonic, tartronic, glyoxylic and monobromomalonic acids by ceric sulphate in dilute sulphuric acid 101(1986)245

Techniques

Outline of some new calorimetric techniques and instrumentation 110(1987)165

Tellurium

Phase diagram of the ternary system Ge–Sb–Te. II. The subternary Ge–GeTe–Sb_2Te_3–Sb 107 (1986)239

Phase studies in the systems Ag_2Te-Ga_2Te_3, ZnSe-In_2Se_3, and ZnS-Ga_2S_3 112(1987)89

New contribution in the study of the Bi_2Te_3-Bi_2Se_3 system 122(1987)135

The ternary system silver–antimony–tellurium. Study of the subternary Sb_2Te_3–Ag_2Te–Te 131 (1988)37

Glass formation and crystallization in the $GeSe_2$-GeTe-Sb_2Te_1 system 133(1988)287

Study of the thermodynamic properties of liquid selenium-tellurium alloys. Part I. Determination of thermodynamic properties by EMF cell method (in French) 136(1988)87

Study of the thermodynamic properties of liquid selenium-tellurium alloys. Part II. Determination of thermodynamic properties by calorimetry and study of the structural properties of liquid selenium-tellurium alloys (in French) 136(1988) 103

Crystallization kinetics of amorphous $Ge_{20}Se_5Te_{75}$ 140(1989)155

Enthalpies of mixing of the ternary system bismuth–antimony–tellurium at 981 K (in French) 149(1989)33

Tellurium(VI)

Syntheses of mixed oxides of the system Te(VI)–Sb(V)–M(I) (M(I) = Ag, Tl, K, Rb, Cs) 124(1988)25

Temperature extrema

A rigorous rule for temperature extrema of isomer enthalpy and entropy terms: consistency test of data 142(1989)343

Temperature gradients

Temperature gradients in horizontal tube furnaces 105(1986)215

Temperature integral

On the temperature integral in non-isothermal kinetics with linear heating rate. Part II 107 (1986)365

The temperature integral 121(1987)487

Temperature morphology

Progress in modeling heat capacity versus temperature morphology 109(1986)11

Temperature reference

Amorphous $Zr_{0.7}Pd_{0.3}$ as a temperature reference near 2.5 K 103(1987)63

Temperature response

Comparison of temperature response within and between power compensated and differential temperature DSC instruments 134(1988)401

Temperature–time–transformation

Epoxy polymers: temperature–time–transformation diagram by means of DSC investigations 120(1987)315

Terbium

Studies on double selenates. VI. Thermal decomposition of gadolinium, terbium, dysprosium and alkali metal double selenates 136(1988)319

Terminology

Need for standardization of thermoanalytical kinetic communications: terminology suggestions 110(1987)101

Ternary heat effects

Ternary heat effects in ternary mixtures 105 (1986)219

Ternary liquid systems

Thermodynamic study of molecular interactions in ternary liquid systems 118(1987)277

Ternary mixtures

Ternary heat effects in ternary mixtures 105 (1986)219

Ternary non-electrolyte solutions

Thermodynamic properties of ternary non-electrolyte solutions: prediction of excess volumes from measured binary data 149(1989)363

Tetraalkylammonium silicates

Tetraalkylammonium silicates gels as precursors to zeolites of different structures 135(1988)353

Tetraalkylammonium tetrafluoroborates

On the thermal behaviour of some tetraalkylammonium tetrafluoroborates 122 (1987)87

Tetrachloroethane

Excess enthalpy and excess volume of cyclohexanone + tetrachloroethene 139(1989)11

Tetracyano complexes

Kinetics of thermal decomposition of the tetracyano complexes of some transition metals containing the $[R_3S]^+$ cation 128(1988)1

Tetracyanonickelates

Tetracyanonickelates containing ethylenediamine ligands isolated at different pH values and their thermal stabilities 146(1989)287

Tetradecahydroacridine

Hydroacridines. XII. Thermochemical characterization of 4aα,8aβ,9aβ,10aα- and 4aα,8aβ,9aα,10aα-tetradecahydroacridine 126 (1988)13

Tetradecylammonium hydrochloride

Investigations of water film properties on barite surface containing preadsorbed tetradecylammonium hydrochloride (TDACl) 122(1987)363

Tetraethoxysilane

Ultrasonic speeds and thermodynamic properties for tetramethylsilane, tetraethylsilane and tetraethoxysilane under high pressures 142 (1989)291

Tetraethylammonium fluorooxo-vanadates(IV)

Thermal decomposition of tetraethylammonium fluorooxo-vanadates(IV) 133(1988)247

Tetraethylsilane

Ultrasonic speeds and thermodynamic properties for tetramethylsilane, tetraethylsilane and tetraethoxysilane under high pressures 142 (1989)291

Tetrahydrofuran

Enthalpy of transfer of ions from water to water–tetrahydrofuran mixtures 115(1987)129

Tetrahydrofuran hydrate

A low-temperature DTA apparatus for temperatures down to 15 K and thermal anomalies in 3-methyl-1-butene and THF hydrate 121(1987)323

Tetrakis(2,4-pentanedionato)zirconium(IV)

DSC determination of the sublimation enthalpy of bis(2,4-pentanedionato)oxovanadium(IV) and tetrakis(2,4-pentanedionato)zirconium(IV) 109 (1986)391

Tetrakisoxalatouranates(IV)

Thermal decomposition of tetrakisoxalatouranates(IV) of mixed metals: characterisation of a new potassium uranate phase 111(1987)67

***trans*-Tetrakis(pyrazole)bisaquamanganese(II) bispyrazolebisnitrate**

Magnetic, spectral, thermal and structural properties of *trans*-tetrakis(pyrazole)bischloromanganese(II), *trans*-hexakis(pyrazole)manganese(II) bisperchlorate and *trans*-tetrakis(pyrazole)bisaquamanganese(II) bispyrazolebisnitrate 126(1988)187

***trans*-Tetrakis(pyrazole)bischloromanganese(II)**

Magnetic, spectral, thermal and structural properties of *trans*-tetrakis(pyrazole)bischloromanganese(II), *trans*-hexakis(pyrazole)manganese(II) bisperchlorate and *trans*-tetrakis(pyrazole)bisaquamanganese(II) bispyrazolebisnitrate 126(1988)187

Tetrametaphosphates

Study of the thermal preparation and stability of tetrametaphosphates of bivalent metals 110 (1987)343

Tetramethylammonium chloride

A calorimetric contribution to the study of polymorphism in tetramethylammonium chloride 109(1986)1

Tetramethylammonium di-μ-fluorobis[aquadifluoro-oxovanadate(IV)]

Thermal decomposition of tetramethylammonium di-μ-fluorobis[aquadifluoro-oxovanadate(IV)] 115 (1987)249

Tetramethylammonium hydroxide

Apparent molar heat capacities and volumes of aqueous $HClO_4$, HNO_3, $(CH_3)_4NOH$ and K_2SO_4 at 298.15 K 126(1988)245

***N,N,N′,N′*-Tetramethylene diamine**

Thermodynamics of complex formation reactions in non-aqueous solvents. Part 2. Reaction of silver(I) with *N,N,N′,N′*-tetramethylene diamine in acetone, methanol and ethanol 127(1988)399

Tetramethylenetetranitramine

Thermal decomposition of energetic materials. 20. A comparison of the structural properties and thermal reactivity of an acyclic and cyclic tetramethylenetetranitramine pair 114(1987)209

2,2,6,6-Tetramethylheptane-3,5-dione

Thermochemical properties of the chelate complexes of some 3*d*-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione Part II. Complexes of nickel(II), copper(II) and zinc(II) 119(1987)311

Tetramethylsilane

Ultrasonic speeds and thermodynamic properties for tetramethylsilane, tetraethylsilane and tetraethoxysilane under high pressures 142 (1989)291

Tetrammine copper(II) sulphate monohydrate

Thermal decomposition kinetics—Part XV. Kinetics and mechanism of thermal decomposition of tetrammine copper(II) sulphate monohydrate 144(1989)33

Tetraperoxo species

Solid state decomposition study on tetraperoxo species of transition metals. Part II. Kinetics of isothermal decomposition of $K_4[Ti(O_2)_4] \cdot 2H_2O$ 117(1987)73

Tetraphenylarsonium-tetraphenylborate assumption

Transfer free energies of ions from water to *n*,*n*-dimethylformamide and its aqueous mixtures, based on Ph_4AsBPh_4 and Ph_4SbBPh_4 assumptions 142(1989)19

Tetraphenylsilane

The enthalpies of solution of tetraphenylsilane in pyridine–other solvent mixtures 117(1987)237

Tetraphenylstibonium-tetraphenylborate assumption

Study of the Ph_4SbBPh_4 assumption for single ion free energies in some organic solvents 140 (1989)7

Transfer free energies of ions from water to *n*,*n*-dimethylformamide and its aqueous mixtures, based on Ph_4AsBPh_4 and Ph_4SbBPh_4 assumptions 142(1989)19

Single ion free energies of some monovalent ions in mixed dimethylacetamide–water solutions using the asymmetric Ph_4AsBPh_4 assumption 147(1989)313

Tetrapropylammonium

The effect of grinding on the thermal behaviour of tetrapropylammonium occluded in silicalite 1 135(1988)403

Standard enthalpy of formation of zeolite samples of the MFI type. Stabilisation of this structure by tetra-, tri- and dipropylammonium cations (in French) 146(1989)21

Tetrazole

Thermal decomposition of tetrazole. Part I. Programmed heating 145(1989)195

Tetrazolium salt

Thermodynamic investigation of the system perrhenate–tetrazolium salt–water–chloroform 107(1986)123

Tetryl

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part I. Derivation of the activation energy for decomposition 107(1986)1

Kinetic studies of the thermal decomposition of tetryl using accelerating rate calorimetry. Part II. Products and mechanism of the reaction 107 (1986)17

Textiles

Thermal analysis in the cellulose, paper and textile industry 110(1987)471

Textural properties

Changes in textural properties derived from the thermal decomposition of synthetic pyroaurite 113(1987)79

Thallium(II) complexes

Influence of different donor atoms on the formation of 1 : 1- and 2 : 1-complexes of 12-crown-4 and 18-crown-6 ethers with Ag^+, Tl^{2+}, Ba^{2+} and Pb^{2+} 107(1986)219

Thallium(III) malate trihydrate

Thermal decomposition of the malato-aquo complex of thallium(III): the mechanism of thermal dehydration of thallium(III) malate trihydrate 128(1988)55

Thallium(III) malato-aquo complex

Thermal decomposition of the malato-aquo complex of thallium(III): the mechanism of thermal dehydration of thallium(III) malate trihydrate 128(1988)55

Thallium(I) *n*-alkanoates

DSC thermophysics on some medium chain thallium(I) *n*-alkanoates: phase transitions, thermal functions and heat capacity 139(1989)139

Thallium nitrite

Thermodynamic properties of alkali and thallium nitrites: the ionic plastically crystalline state 132 (1988)133

Thallium thioarsenate

Mass spectra of vapors over Tl_3AsS_4 111(1987) 127

Thermal analysis

Thermal analysis as a method of investigation of polymer–polymer interaction 102(1986)223

Some reflections on thermal analysis 110(1987)1

On the less-common thermal analysis techniques 110(1987)61

Processing of thermoanalytical curves and exact use of thermal analysis 110(1987)81

Low-temperature calorimetry: a particular branch of thermal analysis 110(1987)183

Report on the workshop: potential of non-traditional thermal anlysis methods 110(1987) 221

Thermal analysis in inorganic chemistry: progress report 110(1987)383

Applications of new methods and instrumentation in thermal analysis 114(1987)1

A low-temperature DTA apparatus for temperatures down to 15 K and thermal anomalies in 3-methyl-1-butene and THF hydrate 121(1987)323

On the thermal behaviour of some tetraalkylammonium tetrafluoroborates 122 (1987)87

Application of thermal analysis to kinetic study of superconducting oxide formation (Invited Lecture) 133(1988)11

The future of thermal analysis (Congress Closing Lecture) 135(1988)11

Interplay of calorimetry and thermal analysis (Invited Lecture) 135(1988)31

Use of a BBC microcomputer for the collection and processing of thermal analysis data 136 (1988)307

Use of spreadsheets in thermal analysis. Part 2 138(1989)177

Use of spreadsheets in thermal analysis. Part 3. 143(1989)311

A study of organic materials using thermal analysis 148(1989)49

Thermal analysis from a numerical aspect 150 (1989)93

Thermal characterization techniques

On the representation of relationships obtained by thermal characterization techniques 124 (1988)1

Thermal conductivity

Determination of kinetics and thermal conductivity of hydrates simultaneously by using thermogravimetry and transient hot strip method 105(1986)369

The measurement of thermal conductivity by differential scanning calorimetry 115(1987)345

Thermal energy storage

Calorimetric study of some carboxylic acids Lewis-bases complexes in view of thermal energy storage 130(1988)149

Thermal mechanical analyzers

Calibration and accuracy of thermal mechanical analyzers 149(1989)215

Thermal noise

Influence of thermal noise on the accuracy of mass determination according to the Straubel method 103(1987)33

Thermal oscillations

Detection of adsorbed or condensed water films with the aid of thermal oscillations 119(1987)37

Thermal parameters

Transient technique for determining simultaneously the thermal parameters as a function of temperature. A mathematical treatment 120(1987)19

Thermal power measurements

Thermal power measurements in a differential-heat-conduction-scanning calorimeter at low temperature-scanning rates 121(1987)333

Thermal runaway reactions

Thermal runaway reactions in a low thermal inertia apparatus 104(1986)13

Thermistors

An isothermal labyrinth flow calorimeter with thermistors 115(1987)31

Thermoanalytical curves

The effect of heat transport within the sample on the shape of thermoanalytical curves 105(1986) 313

Thermoanalytical techniques

Method to reduce experimentation during crystallization studies done by thermoanalytical techniques 126(1988)25

Thermobalance

Software for a mass spectrometer–thermobalance system 102(1986)115

Thermochromism

Thermochromism in Ni(II) complexes with Schiff base derivatives of 4-aminoantipyrine 131(1988)1

Thermochromism and thermal decomposition of V(III) and VO(IV) complexes with Schiff base derivatives 137(1988)189

Thermochromism of the cobalt(II)–isoniazid complex in the solid state 147(1989)65

Thermodynamic functions

Stoichiometry, thermodynamic functions and stability of some charge transfer complexes 105 (1986)303

Thermodynamic functions of gaseous lithium, sodium, potassium, rubidium and caesium sulfates 106(1986)51

Thermodynamic functions of alkaline earth monouranates from calorimetric measurements 131(1988)183

Properties of domains in heterogeneous systems from thermodynamic functions of solution 135 (1988)155

DSC thermophysics on some medium chain thallium(I) *n*-alkanoates: phase transitions, thermal functions and heat capacity 139(1989)139

New estimates for the thermodynamic functions of molecular boric acid 141(1989)125

Determination of stability constants and thermodynamic functions of L-lysine monohydrochloride with Sm(III), Bi(III) and Gd(III) metal ions 147(1989)401

Thermodynamic ideality

Comparisons of dielectric and thermodynamic ideality. I. Mixtures of Onsager liquids 113 (1987)369

Comparisons of dielectric and thermodynamic ideality. II. Mixtures of associated liquids 116 (1987)183

Thermodynamic parameters

Determination of thermodynamic parameters and stability constants of the complexes of β-MITSC with transition metal ions 113(1987)7

Evaluation of thermodynamic parameters and stability constants for the formation of lanthanon(III) complexes with biologically active 2-(2′-lepidylazo)-*N*-methylisatin (LAMI) 113 (1987)15

Thermodynamic parameters of ionization of 5-(2-substituted phenylazo) barbituric acids 122 (1987)209

Evaluation of thermodynamic parameters and stability constants of bivalent metal complexes of biologically active *o*-vanillinsemicarbazone 138(1989)21

Thermodynamic parameters for the formation of calcium α-alaninate complexes in aqueous solution 140(1989)59

Investigations of the complexation equilibria and thermodynamic parameters of biologically active *o*-vanillinsemicarbazone with lanthanon(III) ions 140(1989)271

Automatic batch calorimetry: application to the determination of the thermodynamic parameters of Co(II)-5′ adenosine monophosphate complex formation 141(1989)141

Determination of thermodynamic parameters and stability constants of complexes of biologically active *o*-vanillinthiosemicarbazone with bivalent metal ions 146(1989)375

Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of copper(II) complexes of phenoxyacetate, 2-phenoxypropionate and 2-phenoxybutyrate in aqueous solution at different temperatures and ionic strengths 149(1989)199

Thermodynamic properties

Thermodynamic properties of calcium zirconate ($CaZrO_3$) 106(1986)183

High-pressure, high-temperature thermodynamic properties of a coal-derived liquid 115(1987)83

Thermodynamic properties of ionic and non-ionic solutions of amphiphiles. Direct measurement of the relative apparent molar enthalpies and the relative partial molar enthalpies (in French) 116 (1987)1

Excess thermodynamic properties for mixtures of water and *N*,*N*-dimethylformamide at 303.15 K 117(1987)379

Thermodynamics, formation constants, spectrophotometry and infrared spectroscopy of complexes between some divalent metal ions and 3-hydrazino-6-phenylpyridazine and related ligands 119(1987)249

Thermodynamic properties of compounds of alkaline earth elements with other fission products 120(1987)29

Thermodynamic properties of binary mixtures containing cyclic ethers 122(1987)9

Thermodynamic properties of potassium metasilicate (K_2SiO_3) 122(1987)289

The thermodynamic properties of β-UO_3 and γ-UO_3 124(1988)285

Correlation of thermodynamic properties of fluids by means of equations of state 137(1988)21

Ultrasonic speeds and thermodynamic properties for tetramethylsilane, tetraethylsilane and tetraethoxysilane under high pressures 142 (1989)291

Thermodynamic properties of positional isomers of disubstituted benzenes in the condensed phase (in French) 147(1989)261

Thermodynamic quantities

Solvent effects on single electrode potential and related thermodynamic quantities 103(1986)371

Direct determination of standard enthalpies and Gibbs energies of formation and absolute entropies of hydrated calcium sulphoaluminates and carboaluminates 132(1988)285

Local non-randomness and excess second-order thermodynamic quantities 149(1989)259

Thermogravimetric analyser

A new technique for analysis of evolved gases from a thermogravimetric analyser 101(1986)231

Thermogravimetric curves

Computer-determined kinetic parameters from TG curves. Part XVIII 111(1987)379

Thermogravimetric equipment

Temperature calibration of thermogravimetric equipment 113(1987)205

Thermogravimetry curves

Computer-determined kinetic parameters from TG curves. Part XXI 124(1988)139

Thermokinetics

Thermokinetics by heat-conduction calorimetry 110(1987)171

Dimensionless parameter method in thermokinetics 123(1988)213

The influence of the dynamic parameters of the calorimetric system on the accuracy of the determination of the thermokinetics 149(1989) 373

Thermoluminescence

Kinetic analysis of monochromatic TL curves 135(1988)103

Glow curve kinetics of self-made $CaSO_4$: Dy + PTFE thermoluminescent dosimeters 135(1988) 121

The role of microdosimetry in heavy charged particle induced thermoluminescence dose response 135(1988)127

A new model of TL in carbonates 135(1988)213

Thermolysis

Prediction of hydrocarbon thermolysis by thermodynamic analysis 148(1989)347

Thermomagnetometry

Thermomagnetometry 110(1987)269

The use of thermomagnetometry to follow reactions of thin films 121(1987)231

Thermometric method

A thermometric method for determination of thiols in non-aqueous media. Comparison with other methods 122(1987)305

Thermometric titration

Bromine number determination of petroleum distillates by thermometric titration. comparison with other methods 104(1986)247

Determination of ammonia, amides, and the degree of hydrolysis of partially hydrolyzed polyacrylamide by thermometric titration and direct injection enthalpimetry 111(1987)57

Determination of dithiocarbazates, stoichiometric composition and heat of formation of its methalic complexes by thermometric titration 113(1987)257

A thermometric titration study of the interaction of Co^{2+} with metallochromic indicators 122 (1987)163

VALTER, a computing program for automatic thermometric titrations 128(1988)9

Surface basicity modification of γ-alumina: study by thermometric titration 138(1989)303

Thermometric titrimetry

Phenol determination by thermometric titrimetry 148(1989)341

Thermometry

Early thermometry and differential thermometry (Lumitron-ICTA Honorary Membership Lecture) [abstract] 135(1988)1

Kinetic thermometric determination of Co(II) and Cu(II) based on their catalytic effect on permanganate decomposition in basic media 137(1988)263

Thermometric study of the bromate–iodide reaction catalysed by Mo(VI) 142(1989)107

Analytical properties of the amidoxime group. Potentiometric and thermometric behaviour of ethanediamidoxime 142(1989)135

Thermometric study of ethanediamidoxime complexes with metallic ions 143(1989)187

Early thermometry and differential thermometry ("Lumitron" - ICTA Honoray Membership Lecture) 148(1989)57

Thermophotometry

The emission thermophotometry (ETP) of some amino acids 114(1987)381

Thermophysical properties

The high temperature thermophysical properties of ruthenium and palladium 139(1989)99

Thermophysical properties of protein crystals: thermal diffusivity measurements of methemoglobin single crystals using a dielectric heating technique 141(1989)235

Thermophysical properties of the urea–formaldehyde system measured under near-industrial-process conditions 146(1989)271

Thermopiles

Design and testing of a microcalorimeter with semiconductor thermopiles as temperature sensor and study of the inclusion of Cu(II) with β-cyclodextrin 123(1988)85

Thermoplastic polymers

Thermal analysis of thermoplastic polymers 134 (1988)161

Thermosetting

Thermosetting characteristics of some new polymethylol epoxy resins 109(1987)297

Studies on the thermal decomposition of thermosetting aniline–formaldehyde resins 119 (1987)321

Thermosonimetry

Thermosonimetry 110(1987)253

Some applications of the decrepitation technique and thermosonimetry in research on minerals and building materials 110(1987)265

Thermotropic behaviour

Thermotropic behaviour of dipalmitoylphosphatidylcholine lipsomes containing retinoids 122(1987)117

Thermotropic polyesters

Characterization of some thermotropic polyesters by differential scanning calorimetry 137(1988)129

1,3,4-Thiadiazoles

Thermal stability of some 1,3,4-thiadiazoles with possible antimicrobial activity 140(1989)1

Thiadiazols

On the thermal stability of some 3,5-disubstituted 1,2,4-thiadiazols and 3,5-disubstituted-1,2,4-dithiazolin iodonium salts 105(1986)239

Thianthrene

Thermodynamic study of the thianthrene molecule (in French) 138(1989)241

Thiazole-thiones

Thermal analysis of heterocyclic thione donor complexes. Part VI. Palladium(II) and platinum(II) complexes of thiazole-thiones 140 (1989)343

Thin films

Thermal diffusivity measurements for thin films by the photoacoustic effect 120(1987)191

The use of thermomagnetometry to follow reactions of thin films 121(1987)231

Thioamides

Thermal stability and non-isothermal kinetic study of two coordination compounds of cobalt(II) with ligands derived from thioamides and ethylendiamine 149(1989)251

2-Thiobarbituric acid

Thermodynamic properties of the dissociation of 2-mercaptopyridine, 2-mercaptopyrimidine and 2-thiobarbituric acid 127(1988)81

Thiobarbituric acid compounds

Temperature and substituent effects on the ionization of some disubstituted arylazo barbituric and thiobarbituric acid compounds 140(1989)365

Thiocarbonyl donors

Spectroscopic and thermal studies on dirhodium tetra-acetate adducts with thiocarbonyl donors 132(1988)217

Thiocyanate

Study of the thermal decomposition of bromazepan-thiocyanate complexes of Fe(II), Co(II), Ni(II) and Cu(II) 101(1986)83

Thiocyanatobismuthates

Studies on thermal decomposition reactions of cobalt, nickel and zinc thiocyanatobismuthates (III) 148(1989)319

6-Thioguanine

Thermal studies on purine complexes. XVI. Thermal behaviour of some metal complexes of 6-thioguanine 144(1989)347

Thioisoorotic acid

Thermal, spectral and biological studies on metal complexes of isoorotic and 2-thioisoorotic acids 133(1988)341

Thiols

A thermometric method for determination of thiols in non-aqueous media. Comparison with other methods 122(1987)305

Thione donor complexes

Thermal analysis of heterocyclic thione donor complexes. Part VII. Palladium(II) and platinum(II) complexes of thiazole-thiolates 146 (1989)241

Thiophenaldehyde

Thermoanalytical studies on antimony(III) complexes with monochlorobenzoylhydrazones of 2-furaldehyde (FpClBHH), 2-pyrroaldehyde (PmClBHH) and 2-thiophenaldehyde (TpClBHH) as ligands 133(1988)329

Thiophenehydroxamic acid

Thiophenehydroxamic acid (THA) and its solid complexes with several metallic divalent cations: a spectroscopic and thermal study 141(1989)253

Thiosemicarbazone compounds

DTG and kinetics of non-isothermal decomposition of tris(*p*-nitrobenzaldehydethiosemicarbazonato) M(III) (M = Fe, Al, Cr) 104(1986)387

Thiosulphate

Enthalpimetric determination of sulphide and thiosulphate by the catalysis of the iodine–azide reaction 112(1987)171

Thiourea

The preparation of bismuth(III) sulfide from ammonium thiocyanate and thiourea 126(1988) 199

Physicochemical properties of concentrated solutions of some alkali metal halides in aqueous thiourea solutions 136(1988)119

Thioxanthine

Thermal studies on purine complexes. XI. Thermal behaviour of 2-thioxanthine, its chlorohydrate and some thioxanthine complexes of Ag(I), Cd(II), Hg(II) and Hg(I) 102(1986)149

Thomson heat

Direct measurement of the Thomson heat by differential scanning calorimetry (DSC) 124 (1988)329

Thorium

Thorium as a carbon oxidation catalyst 108 (1986)389

Thorium(IV) complexes

Stepwise stability constants of uranyl(II) and thorium(IV) complexes of L-lysine monohydrochloride 101(1986)381

Pyrolysis and kinetics of non-isothermal decomposition of La(III)– and Th(IV)–phenoxymethyl penicillin complexes 115(1987)381

Thorium(IV) complexes of some dicarboxylic acids in aqueous solution: a potentiometric and calorimetric study 124(1988)311

Thermal decomposition behaviour of thorium(IV) complexes with furfurylidene arylamine Schiff base ligands 125(1988)17

Spectral and thermogravimetric studies on thorium(IV) complexes with bidentate heterocyclic Schiff bases 130(1988)319

Thulium

Studies on double selenates. VII. Thermal decomposition of holmium, erbium, thulium and alkali metal double selenates 136(1988)327

Tian–Calvet microcalorimeter

Construction and testing of a gas–solid reaction calorimetry system using a Tian–Calvet microcalorimeter 132(1988)75

Time-varying calorimeters

Signal processing in time-varying calorimeters for the study of continuous liquid mixtures 107 (1986)149

A model-based study of deconvolution in time-varying or injection calorimeters 126(1988)171

Time constant

Interpretation of DSC curves of the indium melting process and determination of the thermal resistance R, thermal time constant RC_s and least separation temperature L 137(1988)307

Time lag

Method for correcting the time lag of a conduction calorimeter and its application 123 (1988)177

Time / temperature resolution

High temperature X-ray diffraction techniques for enhancing time/temperature resolution 130 (1988)309

Tin

Thermodynamics of the liquid aluminum–gallium–tin system 122(1987)395

A thermodynamic evaluation of the Au–Sn system 130(1988)1

Investigation of the binary Pb-Sn system by DTA 133(1988)319

A thermodynamic evaluation of the Ag–Sn system 136(1988)45

Tin(II) chloride

Molten lithium nitrate–potassium nitrate eutectic: the reaction of tin(II) chloride 136 (1988)149

Tin iodide

The phase diagram AgI-SnI_2 112(1987)47

Tin(IV) complexes

Thermal studies on tin(IV) complexes of *N*-alkylcyclohexyl dithiocarbamates 106(1986)233

Tin oxide

Solid state preparative and descriptive thermoanalysis of SnO_2–$X_2S_2O_8$ and PbO_2–$X_2S_2O_8$ (X = Na, K) binary systems 107 (1986)305

Titania catalyst

Thermal decomposition and creation of reactive solid surfaces. VI. Thermal genesis course of titania catalyst from a novel ammonium titanyl oxalate precursor 150(1989)153

Titanium

Determination of enthalpy of formation of a solid solution in the Ti–S system by combustion calorimetry 109(1986)181

Calorimetric determination of the enthalpies of formation of liquid Ni–Ti alloys 131(1988)171

In situ measurements of layer thickness during oxidation of titanium 133(1988)299

Characterization of the hydrogenated species in $Li_2Ti_4O_9.nH_2O$ by isothermal weight-change determination 137(1988)59

Titanium carbide

Thermodynamic and experimental study of the stoichiometry of titanium carbide deposited by the reaction between a graphite substrate and a gaseous mixture of titanium tetrachloride and hydrogen (in French) 138(1989)81

Calculation of the Gibbs free energy of formation of titanium carbide TiC_y using the sublattice method. Application to the determination of chemical vapour deposition diagrams (in French) 147(1989)1

Titanium dioxide

Kinetic analysis of thermal decomposition reactions. Part IV: kinetics of formation of barium titanate in crystalline mixtures of barium carbonate and titanium dioxide 145(1989)271

Devitrification behaviour of a glass obtained from porphyric sands with addition of TiO_2 (4%) and MgO (8%) 150(1989)39

Titanium oxide

Probing the electronic interaction between metal and support on Pd/TiO_2 catalyst with adsorption of hydrogen 133(1988)175

Titanium phosphate

Thermodynamic treatment of H^+/K^+ ion-exchange on γ-titanium phosphate 101(1986)101

Titanium sulphides

Thermal analysis and kinetics of oxidation of "TiS_2" and "Ti_2S_3" 109(1986)253

Titanium tetrachloride

Thermodynamic and experimental study of the stoichiometry of titanium carbide deposited by the reaction between a graphite substrate and a gaseous mixture of titanium tetrachloride and hydrogen (in French) 138(1989)81

Titration

Microcalorimetric titration of β-cyclodextrine with adamantane-1-carboxylate 109(1986)139

Toluene

Thermochemical reactions in subcritical and supercritical interaction between Mishor Rotem oil shale and toluene 105(1986)51

Toluic acid

Thermodynamic analysis of the ionization of *ortho* and *para* toluic acids : influence of the medium on the hyperconjugative and steric effects 109(1986)353

Toothpastes

Thermal decomposition of toothpastes and toothpowders 108(1986)57

Toothpowders

Thermal decomposition of toothpastes and toothpowders 108(1986)57

Topological studies

Topological studies of the molecular species that characterize lower alkanol + methylene bromide mixtures: molar excess volumes and molar excess enthalpies 106(1986)293

Transfer

Standard thermodynamics of transfer. IV. The silver and silver salt electrodes in acetic acid + water mixtures at 25 °C 115(1987)111

Standard thermodynamics of transfer V. The silver and silver salt electrodes in *t*-butyl alcohol–water mixtures at various temperatures 119(1987)337

Standard enthalpies of transfer of alkali-metal and halide ions from water to water–urea mixtures 120(1987)97

Absolute electrode potentials in dioxane–water solvent mixtures and transfer free energies of individual ions 120(1987)261

Standard thermodynamics of transfer. III. Silver and silver salt electrodes in water + mono- and + dihydric alcohol mixtures 121(1987)353

Thermodynamic study of organic compounds in octan-1-ol. Enthalpy changes in the transfer or primary, secondary, and tertiary amines from gas and the dilute aqueous state 122(1987)1

Determination of the free energy of solvation of ferrous ion in water and free energies of transfer of ferrous ion from water to ethanol–water mixtures 127(1988)119

Ionic solvation in water + co-solvent mixtures. Part 16. Free energies of transfer of large single ions with the "neutral" component removed from water into water + ethanol mixtures 130(1988) 127

Ionic solvation in water + CO-solvent mixtures. Part 17. The "neutral" component of free energies of transfer of single ions from water into water + ethanol mixtures 132(1988)141

Thermodynamic functions of the transfer of aminobenzoic acids from water to water–acetone mixtures at 25 °C 136(1988)23

Thermodynamics of transfer of some nitroalkanes from aqueous to dodecyltrimethylammonium bromide micellar phases 137(1988)151

Transfer free energies of ions from water to *n*,*n*-dimethylformamide and its aqueous mixtures, based on Ph_4AsBPh_4 and Ph_4SbBPh_4 assumptions 142(1989)19

Heats of transfer of cobalt(II) perchlorate from pure to mixed solvents 143(1989)161

Thermodynamics of proton transfer processes for some α-amino-acids with different side-chain groups 144(1989)75

Transfer free energy

Standard absolute potentials of $M;M^+$ and $Ag,AgX;X^-$ electrodes in ethylene glycol + water solvents and related transfer free energies 106 (1986)309

Transformation

Influence of additives and water vapour on the transformation of transition aluminas into alpha alumina 122(1987)71

Thermal transformations of triphosphates $Na(NH_4)_4P_3O_{10} \cdot 4H_2O$ and $(NH_4)_9H(P_3O_{10})_2 \cdot 2H_2O$ 126(1988)355

Interpretation of the dependence of the effective values of kinetic parameters on the degree of transformation 128(1988)69

Physical transformations in differential scanning calorimetry 132(1988)89

Thermal transformation of yttrium hydroxides to yttrium oxides 133(1988)79

Alkaline X and Y zeolites as catalysts for ring transformation: a TPD study 135(1988)371

Thermal analysis of pyrophyllite transformations 138(1989)267

Kinetics of the isothermal transformation of β-PbO_2 into α-PbO_2 138(1989)277

A third law of thermodynamics analysis of the enthalpy change of the order–disorder transformation in Ni_3Fe 139(1989)149

Thermochemistry of sodium triphosphate and sodium cyclotriphosphate transformations 142 (1989)265

Controlled transformation rate thermal analysis: the hidden face of thermal analysis 144(1989)209

Transient hot strip method

Determination of kinetics and thermal conductivity of hydrates simultaneously by using thermogravimetry and transient hot strip method 105(1986)369

Transition

Base line drawing for the determination of the enthalpy of transition in classical DTA, power-compensated DSC and heat-flux DSC 104(1986) 275

Enthalpies of fusion and solid-to-solid transition, entropies of fusion for urea and twelve alkylureas 122(1987)143

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of ribonuclease A in solution 128(1988)267

Lysophosphatidylcholine-water system: calorimetric study of the lamellar-micellar transition before and after gamma-radiation 137 (1988)79

Calorimetric heat of transition assignments by microcomputer-based differential thermal analysis. Part I. The α–δ (monoclinic to cubic) transition of bismuth(III) oxide 137(1988)353

Calorimetric heat of transition assignments by microcomputer-based differential thermal analysis. Part II. The γ–β (orthorhombic to hexagonal) transition of barium carbonate 137 (1988)365

Thermal analysis of polymer samples by round robin method. Part II. Factors affecting heats of transition 138(1989)327

Heat capacity of α quartz from 298.15 to 847.3 K, and of β quartz from 847.3 to 1000 K—transition behaviour and revaluation of the thermodynamic properties 139(1989)225

Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of lysozyme in solution 147(1989)71

Transition metals

Thermodynamic and physicochemical studies of some transition metal ions with violuric acid and some of its homologs 101(1986)359

Transition metal nitrate complexes of 1,4,5-triazanaphthalene 108(1986)325

Preparation of transition metal complexes of strongly basic ligands by thermal decomposition 112(1987)63

Determination of thermodynamic parameters and stability constants of the complexes of β-MITSC with transition metal ions 113(1987)7

Solid state decomposition studies on metal salicylates. Kinetics of isothermal dehydration of some transition metal salicylato complexes 114 (1987)145

Solid-state decomposition studies on fluoroperoxo species of transition metals. Part XIII. Kinetics of isothermal decomposition of $K_2[V_2O_3(O_2)_2F_2]$ and $K_3[Ta(O_2)_2F_4]$ 114 (1987)347

Thermal behaviour of transition metal complexes of 4-methoxybenzaldehyde-4-phenyl-3-thiosemicarbazone 115(1987)297

Solid state decomposition study on tetraperoxo species of transition metals. Part II. Kinetics of isothermal decomposition of $K_4[Ti(O_2)_4] \cdot 2H_2O$ 117(1987)73

Thermal studies on itaconic acid compounds of some transition metal ions 122(1987)295

Thermal and electrical studies on quinoxaline compounds of some first row transition metal ions 122(1987)403

Potentiometric, IR and thermal conductimetric studies on chelates of chromotropic acid with some transition metals 125(1988)163

Kinetics of thermal decomposition of the tetracyano complexes of some transition metals containing the $[R_3S]^+$ cation 128(1988)1

Thermal degradation of transition metal carbonyl complexes. Part III. Thermogravimetric and differential scanning calorimetric studies of triphenylphosphine pentacarbonyls of chromium, molybdenum and tungsten 128(1988)175

Thermal, spectral and magnetic studies of some first row transition metal complexes of 1,4-bis(4-aminocyclohexyl) butadiyne 131(1988)29

Thermochemical study of some transition metal complexes of isonicotinic hydrazide derivatives 144(1989)53

Thermal, spectral and magnetic studies of some first row transition metal complexes of 2-phenyl-4-quinolinecarboxylic acid 144(1989)187

Thermal degradation of transition metal carbonyl complexes. Part IV: Thermogravimetric studies of various stoichiometric mixtures of trimethylamine *N*-oxide dihydrate and hexacarbonyl molybdenum 145(1989)179

Thermal degradation of cellulose, cellulose thiophosphate and its complexes with transition-metal cations 145(1989)331

Structural, thermal and electrical studies of complexes of silicon with some first row transition elements 146(1989)317

The thermal, spectral and magnetic studies of malonic acid compounds of some transition metal ions 147(1989)353

Thermoanalytical studies on some transition metal nitrosodicyanomethanide tetrapyridine complexes: $M[ONC(CN)_2]_2(Py)_4$ ($M = Fe^{2+}$, Ni^{2+}, Co^{2+}; $Py = C_5H_5N$) 150(1989)167

Transport

Note on the distortion of TA curves by transport phenomena 110(1987)78

Transport of penetrants in the macromolecular structure of coals. VIII. Transport mechanism as a function of temperature 116(1987)153

Trends

Trends in thermal analysis instrumentation 110 (1987)51

Tri-n-octylammonium bromide

Heats of solution of cyclohexanol in benzene solutions of tri-n-octylammonium bromide and derived thermodynamic functions of transfer from benzene 116(1987)241

Triazanaphthalenes

Transition metal nitrate complexes of 1,4,5-triazanaphthalene 108(1986)325

Tributyl phosphate

Excess molar volumes of tributyl phosphate(TBP) + *n*-alkanol, *n*-alkanol + *n*-alkane measured with a modified continuous-dilution dilatometer 123(1988)169

Excess volumes of trimethylphosphite and tributylphosphate with branched and linear alkanes 124(1988)129

β-Tricalcium di(orthophosphate)

Formation of β-tricalcium di(orthophosphate) from mixtures of hydroxyapatite and calcium hydrogen orthophosphate 113(1987)133

Tricalcium phosphate

Contribution to the study of the $Ca_3(PO_4)_2$–CaO–$CaSO_4$ system (in French) 120(1987)143

***ortho*-Trichloro-stannylbenzylideneamine compounds**

Synthesis, infrared spectra and thermal analysis of some new substituted *ortho*-trichloro-stannylbenzylideneamine compounds 131(1988) 265

Trichloroacrylyl chloride

Thermal studies of uranium(V) chloride–trichloroacrylyl chloride and uranium(VI) chloride–hexachloropropene 115 (1987)63

Trichlorobenzene

Excess molar volumes and heat capacities of (1,2,4-trichlorobenzene + an *n*-alkane) and (1-chloronaphthalene + an *n*-alkane) 105(1986)101

Trichloroethane

Specific heat analysis in 1,1,1-trichloroethane 134(1988)27

Trichloroethylene

Excess molar volumes of trichloroethylene with cyclohexanone, methylisobutylketone, and 1,4-dioxane at 308.15 and 318.15 K 107(1986)383

Trichloromethane

Molar excess enthalpies, molar excess volumes and molar isentropic compressions of mixtures of 2-propanone with heptane, benzene and trichloromethane at 298.15 K 113(1987)141

Triether

Excess enthalpies of ketone–triether mixtures. Measurement and application of the DISQUAC group contribution method 141(1989)269

Triethylamine

Desorption of presorbed ammonia, triethylamine and pyridine from the acid sites of mordenites via differential scanning calorimetry 132(1988) 257

Trifluoroacetates

Thermal decomposition of trifluoroacetates 106 (1986)377

Trifluoromethanesulfonate

Thermal analysis of hydrated rare-earth trifluoromethanesulfonate complexes with *trans*-1,4-dithiane-1,4-dioxide (TDTD) 107(1986)387

Thermogravimetric investigation of 4-picoline-*N*-oxide (4-picNO) lanthanoid trifluoromethanesulfonate complexes 115(1987) 389

Thermal decomposition of rare earth trifluoromethanesulfonate complexes with dimethylformamide (DMF) 120(1987)351

Triglycidyl-*p*-aminophenol

Kinetics of thermal degradation of cured epoxy resins based on triglycidyl-*p*-aminophenol 128 (1988)149

Trimethyl-N-oxidephenolates

Calorimetric study of hydrogen-bond formation in acetonitrile for some hydrogen-bis-phenolates and hydrogen-trimethyl-N-oxidephenolates at 298.15 K 137(1988)87

Trimethylamine *N*-oxide dihydrate

Thermal degradation of transition metal carbonyl complexes. Part IV: Thermogravimetric studies of various stoichiometric mixtures of trimethylamine *N*-oxide dihydrate and hexacarbonyl molybdenum 145(1989)179

Trimethylphosphite

Excess volumes of trimethylphosphite and tributylphosphate with branched and linear alkanes 124(1988)129

Trinitrobenzene

Electrical properties of charge transfer complexes of diaminonaphthalene donors with dinitro- and trinitrobenzene acceptors 140(1989)277

Trioctyl methyl ammonium salts

The influence of trioctyl methyl ammonium salts on the decomposition of initiators studied by DSC 134(1988)237

Trion

A sensitive kinetic–thermometric method for Co(II) determination based on the tiron–hydrogen peroxide reaction 117(1987)89

Triphenylarsine oxide

Enthalpy of combustion of triphenylarsine oxide 131(1988)107

Triphenylphosphine pentacarbonyls

Thermal degradation of transition metal carbonyl complexes. Part III. Thermogravimetric and differential scanning calorimetric studies of triphenylphosphine pentacarbonyls of chromium, molybdenum and tungsten 128(1988)175

Triphenyltin chloride benzil semicarbazone complex

Thermal studies of the triphenyltin chloride benzil semicarbazone complex 149(1989)173

Triphosphoinositide

Microcalorimetric studies of Ca^{2+} binding to triphosphoinositide and phosphatidylserine 123 (1988)247

Tripropylammonium

Standard enthalpy of formation of zeolite samples of the MFI type. Stabilisation of this structure by tetra-, tri- and dipropylammonium cations (in French) 146(1989)21

Tris(2,2′-dipyridyl)ruthenium(II) halogenocadmates

Preparation and thermal decomposition of halogenometalates. Part I. Tris(2,2′-dipyridyl)ruthenium(II) halogenocadmates 127 (1988)347

Tris(2,4-pentanedionato)cobalt(III)

DSC determination of the sublimation enthalpy of tris(2,4-pentanedionato)cobalt(III) and bis(2,4-pentanedionato)nickel(II) and -copper(II) 109(1986)383

Standard enthalpy of formation of tris(2,4-pentanedionato)cobalt(III): the mean (Co–O) bond-dissociation enthalpy 129(1988)229

Tris(2-hydroxy-3-(3-methyl-2-butenyl)-1,4-naphthalenedione semicarbazonato) M^{3+}

Solution studies on tris(2-hydroxy-3-(3-methyl-2-butenyl)-1,4-naphthalenedione semicarbazonato) M^{3+} (M = praseodymium or neodymium) 116(1987)377

Tris(2-hydroxy-1,4-naphthoquinonato)europian(III)

Thermal studies on tris(2-hydroxy-1,4-naphthoquinonato) Eu(III), Gd(III) and Tb(III) 132(1988)275

Tris(2-hydroxy-1,4-naphthoquinonato)gadolinium(III)

Thermal studies on tris(2-hydroxy-1,4-naphthoquinonato) Eu(III), Gd(III) and Tb(III) 132(1988)275

Tris(2-hydroxy-1,4-naphthoquinonato) terbium(III)

Thermal studies on tris(2-hydroxy-1,4-naphthoquinonato) Eu(III), Gd(III) and Tb(III) 132(1988)275

Tris(ethylenediamine)cadmium(II) chloride

Some observations on the decomposition of tris (ethylenediamine)cadmium(II) chloride 117 (1987)375

Tris(ethylenediamine)chromium(III) phosphate

Catalyzed deamination of tris(ethylenediamine)chromium(III) phosphate 117(1987)371

Tris(ethylenediamine)nickel(II) chloride

Deamination of tris(ethylenediamine)nickel(II) chloride and tris(ethylenediamine)platinum(IV) chloride 118(1987)191

Tris(ethylenediamine)platinum(IV) chloride

Deamination of tris(ethylenediamine)nickel(II) chloride and tris(ethylenediamine)platinum(IV) chloride 118(1987)191

Tris(indole-3-acetato)M(III) (M = Ce, Pr, Nd)

Kinetic and x-ray powder diffraction studies on hydrated tris(indole-3-acetato)M(III) (M = Ce, Pr, Nd) 126(1988)393

Tris(indole-3-butyrato)cerium(III)

Thermal and structural aspects of tris(indole-3-butyrato)Ce(III) 125(1988)387

Tris(indole-3-butyrato)holmium(III)

Kinetic parameters of the decomposition of hydrated tris(indole-3-butyrato)Ho(III) 138 (1989)173

Tris(mandelato)–thallium(III) complex

Novel thermal decarboxylation of tris(mandelato)–thallium(III) complex 116 (1987)171

Trisnadimide

The thermal behaviour of blends of trisnadimide with bismaleimide resins 144(1989)339

Tris(*p*-chlorobenzaldehydethiosemicarbazonato)M(III) (M = Pr, Nd)

PH-metric studies on tris(*p*-chlorobenzaldehydethiosemicarbazonato)M(III) (M = Pr, Nd) 120 (1987)357

[Tris(tetraammine-bis-μ-hydroxocobalt(III))cobalt(III)]hydroxy nitrate

The thermal light emission of [tris(tetraammine-bis-μ-hydroxocobalt(III))cobalt(III)]$(NO_3)_5(OH) \cdot 4H_2O$ 150(1989)193

Triton-X-100

Calorimetric studies on the interaction of sugars and polyols with the non-ionic surfactant Triton-X-100 in aqueous solutions 138(1989)359

Triuranium octoxide

A study of the non-stoichiometry in U_3O_8 140 (1989)299

Trivalent metal ions

Thermodynamic studies of the complexation reaction involving trivalent metal ions and benzil-4-methyl-2-quinolylhydrazone (BMQH) 144(1989)13

Tube furnaces

Temperature gradients in horizontal tube furnaces 105(1986)215

Tuffs

Solar energy storage by natural zeolites. V. Optimization of the thermal activation process of chabazite tuff 135(1988)379

Tungstate

Thermochemical investigation of solid state reactions in molybdate/tungstate system 133 (1988)191

Tungsten

Studies on the reduction of iron/tungsten mixed oxides 112(1987)221

Tungsten complexes

Thermal degradation of transition metal carbonyl complexes. Part III. Thermogravimetric and differential scanning calorimetric studies of triphenylphosphine pentacarbonyls of chromium, molybdenum and tungsten 128(1988)175

Tungsten trioxide

Thermal decomposition and the creation of reactive solid surfaces. V. The genesis course of the WO_3 catalyst from its ammonium paratungstate precursor 129(1988)187

Turkish lignites

Desulfurization of some Turkish lignites during carbonization by ammonia 126(1988)299

Desulfurization of some Turkish lignites during oxidation by air 132(1988)289

Two-dimensional complexes

γ-irradiation effects on the electrical conductivity of some two-dimensional complexes: $RMnCl_4$, $RCoCl_4$ and $RMn_{0.5}Co_{0.5}Cl_4$ (R = $H_3N-(CH_2)_8-NH_3$) 146(1989)87

Type system

Non-ideality near the monotectic composition of a miscibility-gap type system: succinonitrile–water 145(1989)301

Typha sap

Thermal decomposition of cellulose and typha sap — evaluation of the catalytic activity of potassium carbonate 111(1987)27

Tyrosine

Thermodynamics of the second proton dissociation processes of nine α-amino-acids and the third ionization processes of glutamic acid, aspartic acid and tyrosine 141(1989)297

U

Ultrasonic speeds

Ultrasonic speeds and thermodynamic properties for tetramethylsilane, tetraethylsilane and tetraethoxysilane under high pressures 142 (1989)291

Ultrasonic velocity

Ultrasonic velocity and viscosity of binary liquid mixtures 115(1987)335

Comment on "ultrasonic velocity and viscosity of binary liquid mixtures" 149(1989)393

Unifac interaction parameters

Unifac interaction parameters for excess enthalpies of mixing 111(1987)267

UNIQUAC

The simultaneous correlation of excess gibbs energies of binary systems at different temperatures by means of the UNIQUAC equation 117(1987)271

Correlation of the spectroscopic and thermodynamic properties of solutions of ethanol with non-associating components by means of the UNIQUAC associated-solution model 118 (1987)237

Correlation of ternary liquid–liquid equilibrium data and prediction of quaternary liquid–liquid equilibrium data by means of the UNIQUAC model 140(1989)121

Univalent–univalent salts

Solute–solvent interactions of some univalent–univalent salts with various organic solvents at 25 °C 120(1987)183

Unsaturated liquid states

Application of the modified van der Waals equation for unsaturated vapour and liquid states 112(1987)215

Unsaturated polyester

Prediction of the 'state of cure' of an unsaturated polyester by differential scanning calorimetry, and investigation of its variation with temperature and kinetic parameters 149(1989)93

Unsaturated vapour states

Application of the modified van der Waals equation for unsaturated vapour and liquid states 112(1987)215

Unsaturation

Determination of residual unsaturation in polyene preparations by direct injection enthalpimetry 117(1987)37

Uracils

Effect of substituents on the stability of rhodium(III) complexes. I. Methyl and sulphur substituted uracils 108(1986)73

Uranium

The solid state chemistry of uranium. Part IV. The thermal decomposition and kinetics of tetrachlorobis(*N, N, N*^{1}, *N*^{1}-tetramethylurea) uranium(IV) 114(1987)303

Low temperature specific heat and electrical resistivity of $UCu_{4.5}Al_{7.5}$ 139(1989)219

Uranium arsenates

Chemical stability of arsenates of uranium with a valency lower than six, with emphasis on uranium(V) arsenic oxide $UAsO_5$ 118(1987)107

Uranium dicarbide

A thermoanalytical study of the ignition behaviour of uranium dicarbide 144(1989)357

Uranium oxide

On the chemistry of the reactions between liquid sodium and urania–plutonia fuel for fast breeder nuclear reactors 129(1988)143

Heat capacity and enthalpy of UO_2 and gadolinia-doped UO_2 139(1989)107

Uranium trioxide

The thermodynamic properties of β-UO_3 and γ-UO_3 124(1988)285

Uranium(V) arsenic oxide

Chemical stability of arsenates of uranium with a valency lower than six, with emphasis on uranium(V) arsenic oxide $UAsO_5$ 118(1987)107

Uranium(V) chloride

Thermal studies of uranium(V) chloride–trichloroacrylyl chloride and uranium(VI) chloride–hexachloropropene 115 (1987)63

Uranium(VI) chloride

Thermal studies of uranium(V) chloride–trichloroacrylyl chloride and uranium(VI) chloride–hexachloropropene 115 (1987)63

Uranium(VI) complexes

Thermal behaviour of uranium(VI) and cerium(IV) complexes of 1-(2′-hydroxybenzyl)-2-(2′-hydroxyphenyl)-benzimidazole 111(1987)369

Thermal behaviour of uranium(VI) complexes. Uranyl acetate dihydrate–*N,N*′-dimethylthiourea system: synthesis and decomposition 136(1988)153

Uranyl acetate dihydrate

Thermal behaviour of uranium(VI) complexes. Uranyl acetate dihydrate–*N,N*′-dimethylthiourea system: synthesis and decomposition 136(1988)153

Uranyl arsenates

Thermochemical properties of uranyl arsenates. II. Derivations of standard entropies 126(1988) 385

Uranyl carbonate

Spontaneous isothermal decomposition of the uranyl carbonate complex $(NH_4)_4[UO_2(CO_3)_3]$ at room temperature. Part I. Chemical analysis 122(1987)245

Spontaneous isothermal decomposition of the uranyl carbonate complex $(NH_4)_4[UO_2(CO_3)_3]$ at room temperature. Part II. Infrared spectroscopy and X-ray analysis 122(1987)261

Spontaneous isothermal decomposition of the uranyl carbonate complex $(NH_4)_4[UO_2(CO_3)_3]$ at room temperature. Part III. Mechanism of the decomposition. Stability of the uranyl molecular orbitals 122(1987)277

Uranyl fluoride

Activation energy studies on complexes of uranyl fluoride with amidic ligands 128(1988)237

Uranyl(II) complexes

Stepwise stability constants of uranyl(II) and thorium(IV) complexes of L-lysine monohydrochloride 101(1986)381

Uranyl ion

Thermal and spectral characterisation of compounds of the uranyl ion with surfactants 131(1988)79

Uranyl phosphates

The thermochemistry of uranyl phosphates 126 (1988)375

Uranyl/uranium arsenates

Comparison of the thermochemistry of uranyl/uranium phosphates and arsenates 124 (1988)339

Uranyl/uranium phosphates

Comparison of the thermochemistry of uranyl/uranium phosphates and arsenates 124 (1988)339

Urea

Enthalpimetric flow analysis of urea using immobilized urease 111(1987)1

Enthalpy of fusion of urea and of some eutectic mixtures of urea base (in French) 111(1987)37

Enthalpy of KNO_3 and $CaCl_2$ solution in water–hydrophilic urea derivatives mixtures 116 (1987)349

Apparent molal volume, apparent molal compressibility, verification of Jones–Dole equation and thermodynamic studies of aqueous urea and its derivatives at 25, 30, 35 and 40 °C 117(1987)245

Enthalpies of fusion and solid-to-solid transition, entropies of fusion for urea and twelve alkylureas 122(1987)143

Enthalpies of sublimation and fusion of monophenylurea and diphenyl-1,3 urea 122 (1987)189

Thermochemical study of adducts of urea with zinc, cadmium and mercury: some correlations for urea derivatives 125(1988)295

Heat capacity of urea and some eutectic mixtures of urea base between 30 and 140 °C (in French) 127(1988)223

A study of reaction between RDX and urea by a single non-isothermal DSC curve 134(1988)429

Solute-solute-solvent interactions in dilute ternary aqueous solutions of urea and α,ω-aliphatic diols. Excess enthalpies and Gibbs energies 137(1988)165

Thermophysical properties of the urea–formaldehyde system measured under near-industrial-process conditions 146(1989)271

Urea derivatives

Interactions in aqueous solutions of urea derivatives and NaI at 298.15 K 145(1989)357

Urease

Enthalpimetric flow analysis of urea using immobilized urease 111(1987)1

Urease activity

Determination of the urease activity and the relative inhibition in the presence of some metal ions: A microcalorimetric study 122(1987)95

Uridine

Kinetic study on the thermal decomposition of cytidine and uridine 115(1987)281

V

Vacuum adiabatic calorimetry

Heat capacity measurements under continuous heating and cooling using vacuum adiabatic calorimetry 139(1989)245

Vacuum microbalances

Vacuum microbalance studies on the combustion of Saraji coal 103(1987)157

δ-Valerolactam lanthanoid trifluoromethanesulphonate complexes

Thermogravimetric study of δ-valerolactam lanthanoid trifluoromethanesulphonate complexes 143(1989)351

Valine

Critical comparison of thermal properties of some divalent metal ion complexes with alanine, leucine and valine 113(1987)243

VALTER

VALTER, a computing program for automatic thermometric titrations 128(1988)9

VALTER-II: a program for automatic solution calorimetry including heat-leak corrections 143 (1989)193

Vanadium

Susceptibility of superconducting vanadium measured following the Faraday method 103 (1987)83

Reactivity of MoO_3 towards $Cr_2 2V_4O_{13}$ 133 (1988)67

Thermochromism and thermal decomposition of V(III) and VO(IV) complexes with Schiff base derivatives 137(1988)189

Vanadium bronze polycrystals

Further investigations on the spectroscopic and thermophysical properties of vanadium bronze polycrystals 121(1987)215

Vanadium complexes

The thermal decomposition of $VO[(DMSO)_3SO_4]$ 138(1989)367

Vanadium compounds

Kinetics of solid state decomposition of $K_2[V_2O_3(O_2)_2F_2]$: A TG study 118(1987)229

Vanadium molybdenum oxide

$V_9Mo_6O_{40}$ and phase equilibria in the system $V_9Mo_6O_{40}$–Fe_2O_3 118(1987)1

Vanadium oxide

DSC–GC studies on the oxidation of CO over vanadia catalysts 107(1986)181

Phase equilibria in the system $Fe_2(MoO_4)_3$–V_2O_5 117(1987)9

The thermodynamics of the solid oxides of vanadium 129(1988)49

Preparation of V_2O_5 with an enhanced dispersity by thermal decomposition of oxalates and peroxides 137(1988)217

Vanadium(V) compounds

Thermogravimetric investigation of reactions between vanadium(V) compounds and pyrosulphate in alkali metal sulphate melts 121 (1987)121

Vanadyl acetylacetonate

Thermodynamics of complex formation reactions in non-aqueous solvents. Part 3. The reaction of $VO(acac)_2$ with pyridine 145(1989)353

Vanadyl(IV) hexacyanoferrate(II)

The thermal decomposition of vanadyl(IV) hexacyanoferrate(II), $(VO)_2[Fe(CN)_6] \cdot 10H_2O$ 111(1987)375

Van der Waals complexes

Measuring energy–entropy competition and compensation in chemical reactions: a theoretical study of the role of entropy in the formation of van der Waals complexes 118(1987)79

Van der Waals equation

Application of the modified Van Der Waals equation for unsaturated vapour and liquid states 112(1987)215

***o*-Vanillinsemicarbazone**

Evaluation of thermodynamic parameters and stability constants of bivalent metal complexes of biologically active *o*-vanillinsemicarbazone 138(1989)21

Investigations of the complexation equilibria and thermodynamic parameters of biologically active *o*-vanillinsemicarbazone with lanthanon(III) ions 140(1989)271

***o*-Vanillinthiosemicarbazone**

Determination of thermodynamic parameters and stability constants of complexes of biologically active *o*-vanillinthiosemicarbazone with bivalent metal ions 146(1989)375

Vaporisation

Determination of equations representing the thermodynamic magnitude of the vaporisation of true paraffins for any temperature. Application to the calculation of the activity coefficient (in French) 104(1986)121

Thermodynamics and vaporization chemistry in the PbS–Ga_2S_3 system 107(1986)83

Some reflections on the calorimetric measurement of the enthalpy of sublimation or vaporisation (in French) 115(1987)153

Vaporization enthalpy of cadmium selenide and telluride obtained by vapour pressure measurements 129(1988)341

Vaporization studies of mixed lanthanide trifluorides 130(1988)55

Vaporization study on fission-produced noble metal alloys by mass-spectrometric method 139 (1989)299

A Knudsen cell–mass spectrometer study of the vaporization of cesium telluride and cesium tellurite 144(1989)21

Vapour–liquid coexistence curves

Some interesting properties of vapor–liquid or liquid–liquid coexistence curves for ionic and non-ionic fluids 139(1989)25

Vapour–liquid equilibria

Isothermal liquid–vapour equilibrium of the systems pyridine–*n*-hexane and pyridine–*n*-heptane (in French) 102(1986)271

Modification of Peng–Robinson equation of state for saturated vapour–liquid equilibrium 105 (1986)383

Simultaneous correlation of vapor–liquid equilibrium and excess enthalpies for binary mixtures of *n*-hexane and *n*-octane with hexane isomers 106(1986)219

Saturated vapour–liquid equilibria calculation with modified Martin equation of state 111 (1987)311

Isothermal vapor–liquid equilibria for binary and ternary mixtures formed by 1-butanol, acetonitrile and benzene 112(1987)187

Prediction of vapor–liquid equilibrium from ternary liquid–liquid equilibrium data by means of local composition equations 115(1987)359

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, isobutanol and benzene 126(1988)107

Vapour–liquid equilibrium and solid–liquid equilibrium in the system formed by 1-octanol and *n*-octane 128(1988)93

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions of acetic acid and non-polar components with association in both phases 132(1988)53

Thermodynamics of associated solutions. Vapour–liquid equilibrium for the systems acetic acid–water and acetic acid–2-butanone with association in both phases 138(1989)207

Use of the modified Wilson equation for description of vapor–liquid equilibrium in the system 1-nonyne–1-propanol 140(1989)49

Isothermal vapour–liquid equilibria for binary and ternary mixtures formed by acetonitrile, 2-butanol and benzene 140(1989)355

Correlation and prediction of vapour–liquid equilibria in ternary systems formed by hydrocarbons 142(1989)59

Thermodynamics of associated solutions. Vapour–liquid equilibrium for solutions containing propanoic acid or butanoic acid with association in both phases 142(1989)351

Thermodynamics of associated solutions: vapour–liquid equilibrium for the acetic acid–propanoic acid and propanoic acid–water systems with association in both phases 143 (1989)253

Isothermal vapour–liquid equilibria for binary mixtures of methylcyclohexane with alcohols 144(1989)95

Vapour–liquid equilibrium and solid–solid equilibrium in the system formed by octan-1-ol and *n*-decane: measurement and calculation 150 (1989)101

Measurements of VLE, h^E and v^E for binary mixtures of n-alkanes with n-alkylbenzenes 180 (1986)9

Vapour pressure

The vapour pressure of di-caesium telluride (Cs_2Te) 102(1986)387

Measurement of the vapour pressure of the hydrocarbons C_{10} to C_{18} *n*-alkanes and *n*-alkylbenzenes in the range 3–1000 Pascal (in French) 105(1986)79

Thermodynamic properties of CsI. II. Vapour pressures and thermochemical properties of CsI(g) and Cs_2I_2(g) 108(1986)45

Vapour pressure and thermodynamic properties of hexamethyldisilane at 305–387 K 109(1986)55

Prediction of vapor pressures, boiling points and enthalpies of fusion for twenty-nine halogenated dibenzo-*p*-dioxins 112(1987)117

Vapour pressure, heat of evaporation and thermal conductivity determination by means of the C 80 calorimeter 114(1987)91

Vapour pressure and sublimation enthalpy of GeI_4 119(1987)373

Vapour pressures and enthalpies of sublimation of ferrocene, cobaltocene and nickelocene 124 (1988)179

Vaporization enthalpy of cadmium selenide and telluride obtained by vapour pressure measurements 129(1988)341

Optimum temperature programs to achieve thermogravimetry with equilibrium vapor pressure as a probe 132(1988)67

The vapour pressure over Al_2Se_3 136(1988)313

Vapour pressure and thermodynamics of PbS(s) 137(1988)269

Vapor pressure of promethium trifluoride 140 (1989)287

Vapour pressure of polyaromatic hydrocarbons in the range 10^{-3}–10 Torr (in French) 146 (1989)53

Accurate thermogravimetric studies of hydrated condensated phosphates imply controlled water vapour pressures 103(1987)151

Vapour state

Application of modified redlich–kwong equation for unsaturated vapour and liquid states 116 (1987)209

Use of modified Martin equation for unsaturated vapour and liquid states 118(1987)17

Verification

Principle and experimental verification of compensation calorimetry 123(1988)93

Vessels

New experimental vessels for the C 80 calorimeter 119(1987)223

Vibrational analysis

Study of an ordered mixed oxo salt by thermal and vibrational analysis: $(NH_4)_2H_3AsO_4SO_4$ 132(1988)279

Vibrational spectra

The computation of heat capacities of solid high polymers for vibrational spectra 119(1987)225

Victorian brown coal

Derivation of the specific energy of victorian brown coal from proximate and ultimate analyses 149(1989)269

Vinyl compounds

Thermoanalytical study on the polymorphic behaviour of long-chain vinyl compounds 123 (1988)191

Vinylimidazole

Free-radical bulk polymerization kinetics of 1-vinyl-imidazole at total conversion by DTA 104 (1986)285

Violuric acid

Thermodynamic and physicochemical studies of some transition metal ions with violuric acid and some of its homologs 101(1986)359

Viscoelastometer

Research on the FFT method applied to a dynamic viscoelastometer 123(1988)51

Viscosity

Ultrasonic velocity and viscosity of binary liquid mixtures 115(1987)335

Viscosity and densities of binary mixtures of acetonitrile with substituted anilines. Part 4 117 (1987)115

Binary liquid mixtures of acetonitrile with methyl, ethyl, n-propyl and n-butyl benzoates. Variation of viscosities with temperature and composition 117(1987)219

Volumes of mixing and viscosities of methyl acetate + *n*-alkanes and *n*-butyl acetate + *n*-alkanes at 298.15 K: an interpretation in terms of the Van–Patterson, the absolute rate and free volume theories 129(1988)249

Cryoscopy, viscosity, and electrical conductivity measurements of the strontium nitrate–acetamide molten system 143(1989)205

Viscosities and densities of binary liquid mixtures of 2-butoxyethanol with aniline and *N*-alkylaniline 149(1989)275

Comment on "ultrasonic velocity and viscosity of binary liquid mixtures" 149(1989)393

Vivianite

The thermochemistry of some iron phosphate minerals: vivianite, metavivianite, baraćite, ludlamite and vivianite/metavivianite admixtures 104(1986)1

W

Waste materials

An equilibrium analysis of combustion of industrial waste materials 134(1988)347

Water

Physico-chemical properties of water adsorbed in zeolites 13X and 4A. Heat capacities of the adsorbed water, the zeolite–water system and anhydrous zeolite (in French) 101(1986)217

Equipment for studying hot corrosion processes in dynamic gas mixtures containing water vapour 103(1987)27

Microgravimetric measurements of water vapour sorption on hydrated cement pastes 103(1987)137

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. I. Description and discussion of experimental procedures 103(1986)275

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. II. Experimental results and their analytical presentation 103(1986)281

Excess enthalpy in the methanol–water system at 278.15, 298.15 and 323.15 K under pressures of 0.1, 20 and 39 MPa. III. The influence of pressure on the excess enthalpy 103(1986)291

Thermodynamics of individual ions in ethylene glycol–water solvents 103(1986)387

Determination of water in plant samples: a comparative thermogravimetric and NMR study on different species of seeds 105(1986)179

Thermal analysis of the $3CaO \cdot Al_2O_3$–$CaSO_4 \cdot 2H_2O$–$CaCO_3$–H_2O system 106(1986)273

Standard absolute potentials of $M;M^+$ and $Ag,AgX;X^-$ electrodes in ethylene glycol + water solvents and related transfer free energies 106 (1986)309

Thermodynamic investigation of the system perrhenate–tetrazolium salt–water–chloroform 107(1986)123

Absolute electrode potentials in dimethyl sulphoxide–water mixtures and transfer free energies of individual ions 108(1986)115

Excess isobaric heat capacities for water + alkanol mixtures at 298.15 K 109(1986)145

Water–solid interactions in thermal analysis 110 (1987)513

Enthalpies of transfer of alkali metal halides from water to water–acetamide mixtures 111 (1987)175

Enthalpies of transfer of alkali metal halides from water to water–acetamide mixtures 111 (1987)175

Solid–liquid equilibria of the quaternary system $Na^+, K^+, Mg^{2+} \| SO_4^{2-} - H_2O$ a 25 °C (in French) 111(1987)295

Standard potentials of silver–silver bromide electrode in water–dimethylformamide mixtures at different temperatures and the related thermodynamic quantities 112(1987)341

Kinetic investigation of the sorption of water by lithium hydroxide 113(1987)87

Solubility studies of polyethylene glycols in ethanol and water 114(1987)97

Adsorption of nitrogen and water vapour onto goethite surfaces 114(1987)139

The thermodynamics of ionization of α-alanine in methanol + water mixtures and the determination of single ion thermodynamics 114 (1987)245

A cluster model of the gas-phase water 114 (1987)273

Thermodynamics of dissociation of dicarboxylic acids in water + dioxane mixtures 115(1987)97

Standard thermodynamics of transfer. IV. The silver and silver salt electrodes in acetic acid + water mixtures at 25 °C 115(1987)111

Enthalpy of transfer of ions from water to water–tetrahydrofuran mixtures 115(1987)129

Enthalpy of KNO_3 and $CaCl_2$ solution in water–hydrophilic urea derivatives mixtures 116 (1987)349

Excess thermodynamic properties for mixtures of water and *N*,*N*-dimethylformamide at 303.15 K 117(1987)379

Detection of adsorbed or condensed water films with the aid of thermal oscillations 119(1987)37

A water calorimetric determination of absorbed dose to water 119(1987)81

A measurement of the heat defect of water caused by high energy electrons 119(1987)95

Absolute electrode potentials in dioxane–water solvent mixtures and transfer free energies of individual ions 120(1987)261

Determination and analysis of the excess molar volumes of some amide–water systems 120 (1987)299

Standard thermodynamics of transfer. III. Silver and silver salt electrodes in water + mono- and + dihydric alcohol mixtures 121(1987)353

Investigations of water film properties on barite surface containing preadsorbed tetradecylammonium hydrochloride (TDACl) 122(1987)363

Thermochemical properties of NaI solutions in water–2-methoxyethanol and water–2-ethoxyethanol mixtures. The temperature dependence of enthalpic pair interaction coefficients in water solution 122(1987)377

Thermodynamics for the ionization of benzoic acid in ethanol + water mixtures at 298.1 K 124 (1988)43

Study of some solvated copper(II) adipates. I. Complexes with water, ammonia and pyridine (in French) 125(1988)23

Determination of the free energy of solvation of ferrous ion in water and free energies of transfer of ferrous ion from water to ethanol–water mixtures 127(1988)119

Comparative DSC and TG studies of the desorption of water from cationic-exchange resins 127(1988)309

Ionic solvation in water + co-solvent mixtures. Part 16. Free energies of transfer of large single ions with the "neutral" component removed from water into water + ethanol mixtures 130(1988) 127

Excess molar volumes and enthalpies of the 2-butoxyethanol + water system at 25 °C 131 (1988)153

Ionic solvation in water + CO-solvent mixtures. Part 17. The "neutral" component of free energies of transfer of single ions from water into water + ethanol mixtures 132(1988)141

Thermodynamic functions of the transfer of aminobenzoic acids from water to water–acetone mixtures at 25 °C 136(1988)23

Excess molar isobaric heat capacities and excess molar enthalpies for water–dimethylsulfoxide mixtures at 25 °C 136(1988)209

Lysophosphatidylcholine-water system: calorimetric study of the lamellar-micellar transition before and after gamma-radiation 137 (1988)79

Enthalpies of solvation of alkali and halide ions in water–acetamide mixtures in the range 298.15–348.15 K 137(1988)233

Thermodynamics of associated solutions. Vapour–liquid equilibrium for the systems acetic acid–water and acetic acid–2-butanone with association in both phases 138(1989)207

Studies on the dissociation constants of 1,10-phenanthroline in ethanediol + water mixtures at 25 °C 142(1989)1

Thermodynamic characterization of the water + methanol system, at 298.15K 142(1989)219

Thermodynamics of associated solutions: vapour–liquid equilibrium for the acetic acid–propanoic acid and propanoic acid–water systems with association in both phases 143 (1989)253

Thermodynamics of silver–silver ion electrode in acetonitrile–water mixtures 144(1989)267

Non-ideality near the monotectic composition of a miscibility-gap type system: succinonitrile–water 145(1989)301

Interactions in electrolyte solutions in glycerol–water and glycerol–methanol mixtures from the heat of solution enthalpy 150(1989)177

Water content

The influence of water content on the adsorption of lubricating oil base stocks onto ferric oxide, studied by flow-microcalorimetry 101(1986)155

Determination of bound water content in polymers by DTA, DSC and TG 123(1988)153

Water–oligomer populations

Temperature enhancement of water–oligomer populations in saturated aqueous vapour 116 (1987)161

Waterproof products

Thermoanalytical study on some film-forming quick-drying and waterproof products 134 (1988)243

Water sorption

Variability in water sorption and in thermogravimetry of bentonite 114(1987)179

Water treatment

The use of thermal analysis in water treatment related problems 134(1988)445

Water vapour

Influence of additives and water vapour on the transformation of transition aluminas into alpha alumina 122(1987)71

Effect of water vapour on the thermal evolution of the metastable phases of zirconium dioxide 126(1988)33

Wax

Analysis of wax/oil mixtures using DSC 105 (1986)9

Weighing

Disturbances in weighing. Part II 103(1987)39

The influence of convection on weighing 103 (1987)45

Weight-change determination

Characterization of the hydrogenated species in $Li_2Ti_4O_9.nH_2O$ by isothermal weight-change determination 137(1988)59

Wettability

Structure–activity relationships for solubility and wettability of a number of substituted barbituric acids 138(1989)319

Wilson equation

Use of the modified Wilson equation for description of vapor–liquid equilibrium in the system 1-nonyne–1-propanol 140(1989)49

Wood

Thermal decomposition of nitrocelluloses derived from wood and cotton: a non-isothermal thermogravimetric analysis 104(1986)321

Differential scanning calorimetry as a complementary tool in wood biodegradation studies 119(1987)143

A kinetic study of holm oak wood pyrolysis from dynamic and isothermal TG experiments 149 (1989)225

Thermogravimetric analysis of fresh and archeological waterlogged woods 117(1987)297

X

X-ray diffraction

A comparative study of the crystallinity degree of PET by DTA, X-ray diffraction and iodine sorption techniques 101(1986)341

X-ray diffraction techniques

High temperature X-ray diffraction techniques for enhancing time/temperature resolution 130 (1988)309

Xanthosine

Thermal behaviour of metal-xanthosine complexes 133(1988)335

Xylan

Kinetics of weight loss by thermal decomposition of xylan and lignin. Influence of experimental conditions 143(1989)137

Y

Yarns

Thermal shrinkage stress relaxation in PET high speed spun yarns 134(1988)283

Ytterbium

Studies on double selenates. VIII. Thermal decomposition of ytterbium, lutetium, yttrium and alkali metal double selenates 136(1988)335

Yttrium

On phases and characterisation of quenched $YBa_2Cu_3O_x$ 132(1988)35

Thermal analysis in the M-Ba-Cu-O systems (M = Y, La, Pr) in relation to high T_c superconductors 133(1988)17

Use of emanation thermal analysis in characterization of $YBa_2Cu_3O_x$ 133(1988)23

The stability of $YBa_2Cu_3O_x$ in different atmospheres, by TGA 133(1988)33

Comparative study on the heat capacity of $ABa_2Cu_3O_{7-x}$ high T_c superconducting compounds (A = Y, Eu, Ho) 133(1988)49

Substitution effects on the T_c of $RBa_2Cu_3O_2$ (R = Y and Eu) 133(1988)55

Phase diagram of the pseudobinary $BaCuO_2$–$YBa_2Cu_3O_{6.5}$–$YCuO_{2.5}$ system 136 (1988)263

Studies on double selenates. VIII. Thermal decomposition of ytterbium, lutetium, yttrium and alkali metal double selenates 136(1988)335

Heat capacity measurements of the high T_c superconductor $YBa_2Cu_3O_{7-x}$ 137(1988)65

Reduction of $Ba_2YCu_3O_7$ and $Y_2Cu_2O_5$ BY H_2 137(1988)373

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. IV. Mechanism of perovskite formation from various starting materials 142 (1989)281

Thermogravimetric study of the transition copper valency in the superconductive system Y–Ba–Cu–O 143(1989)123

Binary and ternary compounds, phase diagrams and contaminations in the $YO_{1.5}$-BaO-CuO system auxiliary to superconducting ceramics (Review) 148(1989)235

Thermal study of superconducting $Ba_2Cu_3RO_{7-x}$ (R = Y, Eu, Gd, Ho) 148(1989) 269

The thermal stability of $RBa_{2-x}K_xCu_3O_z$ (R = Y and Eu) 148(1989)275

Yttrium 2-ethylhexanoate

Thermoanalytical investigation of $YBa_2Cu_3O_{7-y}$ superconductor. III. Preparation from mixed 2-ethylhexanoates of yttrium, barium and copper 140(1989)41

Yttrium barium copper oxide

A thermogravimetric study of the uptake of oxygen by $YBa_2Cu_3O_x$ 136(1988)343

Yttrium barium copper oxides

Chemical stability of $YBa_2Cu_3O_{7-x}$ to various atmospheres 136(1988)297

Yttrium carbonates

Thermal decomposition of the hydrated basic carbonates of lanthanides and yttrium 137 (1988)319

Yttrium hydroxides

Thermal transformation of yttrium hydroxides to yttrium oxides 133(1988)79

Yttrium oxides

Thermal transformation of yttrium hydroxides to yttrium oxides 133(1988)79

Z

Zeolite-Y

Detection of unidentifiable changes in zeolite-Y via treatment with NH_4NO_3 using differential scanning calorimetry (DSC) 146(1989)263

Zeolites

Physico-chemical properties of water adsorbed in zeolites 13X and 4A. Heat capacities of the adsorbed water, the zeolite–water system and anhydrous zeolite (in French) 101(1986)217

Thermoanalytical studies of high silica ZSM-5 zeolites containing organic templates 102(1986)37

Kinetic analysis of NH_3 temperature programmed desorption (TPD) on a HZSM-5 zeolite 106(1986)133

Thermoanalytical investigation of zeolites and related compounds 110(1987)337

Thermal analysis of zeolites 110(1987)521

Effects of γ-irradiation on thermal and textural properties of Na–Y zeolites 111(1987)249

Acidity of dealuminated Y-type zeolites determined by adsorption microcalorimetry 115 (1987)91

Calorimetric investigation of the effect of dealumination on the acidity of zeolites 122 (1987)63

Characterization of acidity types and strength on H–NaY zeolites by TA 123(1988)113

A microcalorimetric study of NH_3-sorption onto differently modified and pretreated ZSM-5 surfaces 126(1988)325

Differential scanning calorimetry leads to high precision for water in zeolites determined by thermogravimetry 126(1988)397

Mass spectral studies on the thermal desorption of aliphatic amines from the surface of Y-type zeolites 128(1988)115

A study of heat-treated ammonium-ion-exchanged zeolites by differential scanning calorimetry 129(1988)301

Standardization of TMA (dilatometry) for application of the study of synthetic zeolites 132(1988)127

Tetraalkylammonium silicates gels as precursors to zeolites of different structures 135(1988)353

Influence of diffusional barriers on the thermal analysis of the zeolite TON 135(1988)359

Alkaline X and Y zeolites as catalysts for ring transformation: a TPD study 135(1988)371

Solar energy storage by natural zeolites. V. Optimization of the thermal activation process of chabazite tuff 135(1988)379

Study of the surface acidity before and after heat or steam treatment for P or Mg modified ZSM-5 zeolites 135(1988)385

Study of the decoking kinetics of deactivated zeolite catalysts for ethylation of benzene by TA 135(1988)391

Optimization of stabilization process of NH_4-NaY by DTA-TGA and other characterization methods 135(1988)397

Acid-base properties of zeolites by acetic acid temperature programmed desorption 137(1988)51

Standard enthalpy of formation of zeolite samples of the MFI type. Stabilisation of this structure by tetra-, tri- and dipropylammonium cations (in French) 146(1989)21

Zeolite 13X

On some thermodynamic and kinetic aspects of the dehydration of zeolite 13X in microwaves (in French) 115(1987)317

Zinc

The energetics of phase transitions in the system $Na_{1+X}Zr_2Si_XP_{3-X}O_{12}$, $1.9 \leq X \leq 2.5$ 106 (1986)57

Phase studies in the systems Ag_2Te-Ga_2Te_3, ZnSe-In_2Se_3, and ZnS-Ga_2S_3 112(1987)89

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Optical microscopy and simultaneous thermosonimetry of a microplate 113(1987)171

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reversibility versus irreversibility via acoustic emission 116(1987)195

Thermochemical study of adducts of urea with zinc, cadmium and mercury: some correlations for urea derivatives 125(1988)295

A thermodynamic evaluation of the iron–zinc system 129(1988)77

Vapour composition and activities in Mg–Zn liquid alloy at 923 K 130(1988)193

Evidence of the role of non-stoichiometry in Zn-Cr catalysts by thermal investigations 133 (1988)155

Calorimetric studies of liquid Li–Zn alloys 142 (1989)117

γ precipitates in β-Cu–Zn–Al: influence on martensitic transformations 145(1989)237

Studies on thermal decomposition reactions of cobalt, nickel and zinc thiocyanatobismuthates (III) 148(1989)319

Zinc acetate

Thermoanalysis of zinc acetate-active carbon catalysts 148(1989)395

Zinc alloys

Systematic study of the martensitic transformation in a Cu–Zn–Al alloy. Reproducibility of the thermal energy results and cycling effects 106(1986)209

Zinc carbonate

Thermal decomposition of basic carbonates of copper, zinc and cobalt under high pressures 106(1986)263

Thermoanalytical study of the system Pb^{2+}–Zn^{2+} coprecipitated as binary carbonates 137(1988)177

Zinc chloride

Thermal analysis of calcite equilibrated with aqueous solutions of magnesium, strontium, barium and zinc chlorides 135(1988)237

Zinc chloride diammoniate

Thermodynamics of the dissociation of $ZnCl_2(NH_3)_2$ by modified entrainment 138 (1989)371

Zinc citrate

Thermoanalytical studies of zinc citrate, bismuth citrate and calcium citrate 117(1987)201

Zinc complexes

Complexes of group IIB metals with dithiooxamides. I. Thermal properties of $Zn(CH_3NHCSCSNHCH_3)X_2$ (X = Cl, Br, I) complexes 124(1988)17

Thermal, structural and electrical studies of the chloro complexes of cobalt, nickel, copper and zinc with 2-methylquinoxaline 145(1989)291

Zinc di *n*-alkyl dithio phosphates

The heats of adsorption of zinc di *n*-alkyl dithio phosphates onto pure iron, cast iron and ferric oxide surfaces 130(1988)141

Zinc(II) bis(oxalato)zincate(II) tetrahydrate

Thermal decomposition kinetics of zinc(II) bis (oxalato)zincate(II) tetrahydrate 140(1989)145

Zinc(II) chelates

Infrared and thermal investigations of 1,10-phenanthroline *N,N'*-dioxide chelates of zinc(II) and cadmium(II) 101(1986)389

Infrared and thermal studies of 1,10-phenanthroline-mono-***n***-oxide chelates of zinc(II) and cadmium(II) 105(1986)377

Zinc(II) complexes

Thermodynamics of the complexation of Fe(II), Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) with 6,7-dihydro-3(h)-methyl-5-methylthio-7-oxo-vic-triazolo(4,5-*d*)pyrimidine 102(1986)47

Thermal study of mepirizol complexes with Co(II), Ni(II), Cu(II) and Zn(II) 106(1986)155

Thermochemical properties of the chelate complexes of some 3*d*-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione Part II. Complexes of nickel(II), copper(II) and zinc(II) 119(1987)311

Thermal studies on complexes of zinc(II) and cadmium(II) with 5,6-benzoquinoline-*N*-oxide 132(1988)297

Thermometric study of metal–nitrogenated-ligand complexes. I. Ethylenediamine complexes with Ag(I), Cu(II), Zn(II), Ni(II), Mn(II), Cd(II) and Co(II) 138(1989)1

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part II. 138(1989)285

Thermal decomposition kinetics of polymeric complexes of nickel(II), zinc(II) and cadmium(II) with *N,N'*-bis(dithiocarboxy)piperazine 140 (1989)325

Thermal investigation and stereochemical studies of some cyclic diamine complexes of nickel(II), zinc(II) and cadmium(II) in the solid state. Part III 142(1989)89

Zinc(II) compounds

Thermal studies on acetylenedicarboxylic acid compounds of iron(II), cobalt(II), nickel(II), copper(II) and zinc(II) 117(1987)51

Thermal and electrical studies on pyrazine-2,3-dicarboxylic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 124 (1988)345

Thermal studies on maleic acid compounds of manganese(II), cobalt(II), nickel(II), copper(II) and zinc(II) 143(1989)283

Zinc(II) diamine complexes

Thermally-induced phase transition of zinc(II) diamine complexes in the solid state 127(1988)329

Zinc(II) halide complexes

Evaluation of kinetic parameters for the thermal decomposition of piperonaldehyde thiosemicarbazone complexes of cobalt(II) and zinc(II) halides 146(1989)149

Zinc(II) methanesulphonates

Thermal decomposition of Co(II), Cu(II) and Zn(II) methanesulfonates 124(1988)9

Zinc(II) *p*-toluenesulphonate

Thermal decomposition of Co(II), Ni(II), Cu(II), Zn(II), Cd(II) and Pb(II) *p*-toluenesulphonates 146(1989)341

Zinc(II) porphyrin compounds

Thermal and electrical studies on porphyrin compounds of cobalt(II), copper(II) and zinc(II) 143(1989)67

Zinc iodide

The phase diagrams of mixtures of CuI with ZnI_2, CdI_2 and HgI_2 143(1989)115

The phase diagram $AgI-ZnI_2$ 145(1989)93

Zinc–iron ferrites

Electrical conduction in γ-irradiated and unirradiated zinc–iron ferrites 125(1988)379

Zinc oxide

Quasi-equilibrium adsorption microcalorimetry (of Kr, Ar and N_2) to characterize real microcrystalline surfaces: Application to ZnO 148(1989)191

Application of thermal analysis for the investigation of reaction of ammonium nitrate melt with solid zinc oxide 148(1989)311

Zinc phthalocyanine

Phase behaviour of copper and zinc phthalocyanines 104(1986)377

Phase behaviour of cobalt, nickel and zinc phthalocyanines 109(1987)397

Zinc sulphate

Investigation of basic zinc sulfate thermal decomposition under nitrogen and carbon monoxide atmosphere 137(1988)281

Zinc sulphide

Mechanism of zinc sulphide oxidation 106(1986)9

Zircon

Use of emanation thermal analysis, DTA and TG/DTG for zirconia reactivity testing during zircon preparation 143(1989)101

Zirconia reactivity

Use of emanation thermal analysis, DTA and TG/DTG for zirconia reactivity testing during zircon preparation 143(1989)101

Zirconia refractories

Effects of temperature and ionizing radiation on some physical properties of developed zirconia refractories 113(1987)185

Further investigations on some electrochemical and thermal properties of stabilized and sintered zirconia refractories 113(1987)193

Zirconium

Amorphous $Zr_{0.7}Pd_{0.3}$ as a temperature reference near 2.5 K 103(1987)63

Studies of the crystallization processes of amorphous Zr-Co based alloys by DSC 114 (1987)35

The influence of zirconium on decomposition in high strength aluminium alloys 119(1987)211

Structural relaxation, glass transition and crystallization of Cu–Zr amorphous ribbons studied by dilatometry and differential scanning calorimetry 142(1989)29

Zirconium dioxide

Effect of water vapour on the thermal evolution of the metastable phases of zirconium dioxide 126(1988)33

Zirconium fluoride

Non-isothermal crystallization in $ZrF_4-BaF_2-GdF_3-AlF_3$ fluoride glasses 123 (1988)263

Enthalpies of formation of ZrF_4–MF (M = Li, Na, K, Rb) liquid mixtures (in French) 149 (1989)15

Zirconium(IV) alkyl xanthate complexes

Chemistry and mechanism of thermal degradation reactions of zirconium(IV) alkyl xanthate complexes 127(1988)193

Zirconium(IV) compounds

Thermogravimetric and infrared studies of tetrameric zirconium(IV) compounds derived from oxozirconium(IV) chloride and imidazole, morpholine and their derivatives 109(1987)303

Zirconium oxide

Performance of ZrO_2 electrolyte cells for coulometric titration at high voltage 129(1988)127

Thermally induced changes in the ceria zirconia system 133(1988)113

GENERAL INFORMATION

Submission of articles: Manuscripts should be submitted to Prof. W.W. Wendlandt, Department of Chemistry, University of Houston, Cullen Boulevard, Houston, Texas 77204-5641, U.S.A. A notice to authors may be obtained through the Editor-in-chief or the publisher.
Submission of an article is understood to imply that the article is original and unpublished and is not being considered for publication elsewhere.
Upon acceptance of an article by the journal, the author(s) will be asked to transfer the copyright of the article to the publisher. The transfer will ensure the widest possible dissemination of information.

Languages: Papers in English, French or German will be accepted, but English is preferred. When normal-length papers are written in French or German, an English abstract should be added. A Résumé or Zusammenfassung, in the same language as the paper itself, should also be added.

Reprints: A total of 50 reprints of each paper will be provided free of charge to the author. Additional copies can be ordered at prices shown on the reprint order form which will accompany the proofs.

Customers in the U.S.A. and Canada who wish to obtain information on this and other Elsevier journals, can contact Elsevier Science Publishing Co., Inc., Attn: Journal Information Center, 655 Avenue of the Americas, New York, NY 10010, U.S.A. Tel.: (212) 633-3750. Telefax: (212) 633-3990. Telex: 420-643 AEP UI.

Subscriptions should be sent to:
